Contents

Short Communications

The inhibition of *Saccharomyces cerevisiae* cells by acetic acid quantified by electrochemistry and fluorescence
J. Zhao, Z. Wang, M. Wang, Q. He and H. Zhang . . . 117

Evaluation of the physico-chemical properties of chitosan as a potential carrier for rifampicin, using voltammetric and spectrophotometric techniques
R.H.T. Santos, N.G. Santos, J.P.H. Alves, C.A.B. Garcia, L.C.P. Romão and M.L.P.M. Arguelho . . . 122

Research Articles

Importance of intermediary transitions and waveform in the enzyme–electric field interaction
E.F. Treo and C.J. Felice . . . 127

Direct electron-transfer of native hemoglobin in blood: Kinetics and catalysis
Y. Xu, C. Hu and S. Hu . . . 135

Gene delivery by electroporation after dielectrophoretic positioning of cells in a non-uniform electric field
L.A. MacQueen, M.D. Buschmann and M.R. Wertheimer . . . 141

The use of electrochemical impedance spectroscopy (EIS) in the evaluation of the electrochemical properties of a microbial fuel cell
A.K. Manohar, O. Bretschger, K.H. Nealson and F. Mansfeld . . . 149

Electrocatalysis of emodin at multi-wall nanotubes
Z.-H. Yin, Q. Xu, Y. Tu, Q.-J. Zou, J.-H. Yu and Y.-D. Zhao . . . 155

Nonlinear current response of micro electroporation and resealing dynamics for human cancer cells
H. He, D.C. Chang and Y.-K. Lee . . . 161

The electron transfer reactivity of kaempferol and its interaction with amino acid residues
G. Chen, X. Ma, F. Meng and G. Li . . . 169

Scanning electrochemical microscopy study of laccase within a sol–gel processed silicate film
W. Nogala, M. Burchardt, M. Opallo, J. Rogalski and G. Wittstock . . . 174

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. Please refer to the online version of the Guide for Authors at http://www.elsevier.com/locate/bioelechem
