Welcome

WELCOME:

The Microwave Theory and Techniques Society of the IEEE continues the task of indexing the IEEE Transactions on Microwave Theory and Techniques, and all other major publications including the IEEE Microwave and Wireless Components Letters (formerly called IEEE Microwave and Guided Wave Letters), as well as the digests of the IEEE International Microwave Symposium (IMS) and the Radio Frequency Integrated Circuits (RFIC) conference. This Microwave Theory and Techniques CD-ROM index updates the existing CD-ROM index for quick retrieval of archived information.

The complete MTT Digital Archive CD-ROM set can be ordered via phone, fax, E-mail or mail order:

- Call IEEE at +1 800 701 4333 for US and Canada, or call +1 732 981 0060
- Fax +1 732 981 9667 or e-mail customer-service@ieee.org
- Mail your order to IEEE Customer Service Center, 445 Hoes Lane, Piscataway, NJ, 08854
- All payments must be in US dollars, drawn on US banks

The section “Getting Started” in this Index tells you how to optimize the Acrobat Reader preferences to improve the readability of the document.

All papers were electronic files or images scanned from hard copy and converted to Adobe Acrobat PDF file format for cross-platform access. The viewing quality

will vary with the size and quality of fonts used. Even though the viewing quality on your monitor may vary, all papers should print clearly. Remember that the quality of the some journal articles is not perfect, and that some photographs will not be as clear as Technicolor. Also, the optical character recognition is good but not perfect, so some spelling errors will occur. None the less, you can copy and paste the material for your own use and personal study.

The MTT CD-ROM index update was assembled from electronic files provided to us by Adam Philippidis at IEEE Headquarters.

If you find errors in the CD-ROM, e-mail a note to the current Editor of the Digital Archive project at Digital.Archive@mtt.org.

Many people have contributed the CD-ROM archival effort. The Digital Archive project was initiated by Charlie Jackson and Roger Pollard. During my tenure as Editor, Charlie Jackson, Manfred Schindler, Karl Varian have provided constant help and support. I would also like to acknowledge the hard work of the reviewers of the Index disk. I hope that I have implemented their ideas and corrections and it is my only responsibility if any errors are still left unidentified. Last but not least, I want to acknowledge the enthusiastic support by the team at InControl Productions, Inc. Special thanks go to Barbara DiEdwardo for her assistance in producing the new Index disc.

Thank you and enjoy!
Luciano Boglione,
Editor,

Recommendations

Be sure to read the following on how to achieve the best performance with this electronic guide.

RECOMMENDATIONS FOR OPTIMAL PERFORMANCE

In order to take full advantage of the performance capabilities of this collection, and because this archive spans multiple CD-ROMs, we recommend that you do the following.

1. To use all features provided for this archive you must have Acrobat Reader 5.0 plus Adobe's Search plug-in and the ICPI SmartLink™ plug-in for Adobe Acrobat Reader that enables links across CD-ROMs.
   If you have not installed these components from this CD-ROM, you should read the README.TXT file located on the root directory of this CD-ROM for instructions on how to install the plug-in. (The plug-in that enables links across CD-ROMs currently supports Windows 95, Windows 98, Windows NT, Windows 2000 and Windows XP. For other users, reference Section 3 in the README.TXT file on how to access article files.)

2. To make navigation and searching easier, we strongly recommend changing several default Acrobat Search Preferences. In the dialog box shown for Acrobat Preferences, (found on the menu

MTT®

Recommendations

bar under Edit > Preferences) select “Search” and make the following changes:

A. Under “Include in Query” check “Document Information” so that Title, Author, Keywords, and Subject fields are visible when specifying search criteria. **Note**: If for some reason this preference option is not present on your system, check to see that you have the Search plug-in installed. The Search icon will be present on the Acrobat Toolbar if the function is properly installed. Specifics of the Search function are described later in this section.

B. Under “Results” change “Show First” to 1000. (Type in “1000” in the field provided.) This allows the maximum number of hits to be displayed during a search.

C. Under “Display” change “Next Highlight” using the drop-down list to “No Highlighting”. This is necessary for all searches executed from the Master Index CD-ROM to operate properly.

3. In the “Preferences” window (found on the menu bar under Edit > Preferences) select “Options”. Under “Startup” uncheck “Certified Plug-ins Only” **Note: if this is checked the ICPI**

MTT

Contents

Recommendations

Smartlink™ plug-in will not be loaded when Adobe Reader is launched.

4. In the “Preferences” window (found on the menu bar under Edit > Preferences) select “Options”. Under “Miscellaneous” uncheck “Open Cross-Document Links in Same Window” option.

5. If you have the resources, placing the Master Index CD-ROM on a second CD-ROM drive, your local hard drive or on a network will increase the performance of cross-disc linking. If only one CD-ROM drive is available, you will need to eject the Master Index CD-ROM and insert the requested CD-ROM. When you return to the Master Index (generally by using the History button), you will be prompted to reinsert the Master Index CD-ROM. (See README.TXT for more information.)

6. Articles may have text outside normal print-area defaults. We recommend selecting “Shrink to Fit” in the print menu (File > Print) to capture the complete image for your printout. This setting will become your new default.

ORIENTATION

This electronic guide contains the Master Index for the IEEE Microwave Theory and Technologies Society's complete digital archive from 1953 through 2002. In addition to the Electronic Guide, this CD-ROM contains the full-text index to all articles in the archive's 24 CD-ROMs.

From the Master Index, you will be able to look up articles by Publication, Issue, Paper Title, Author and full-text search. Abstracts for each article are made available for you to browse. By clicking on the title of the abstract, you will be prompted to insert the CD-ROM with the actual article file.

When links to a file on another CD-ROM are encountered, a special plug-in searches all available devices (local and network) for a CD-ROM with the appropriate volume label (e.g. MTT007). If already available, the file is opened. If not, you will be prompted to insert the appropriate CD-ROM.

In many instances, we refer to the "menu bar" and "tool bar", shown here for reference.

USING BOOKMARKS

In addition to links, you can navigate through the Electronic Guide using Bookmarks. If they are not already visible, click the bookmark tab or press the “Show/Hide Navigation Pane” button on the tool bar. A panel opens on the left side of the screen displaying Bookmarks in a hierarchy. (The bookmark tab may have to be selected.)

Each Bookmark corresponds to a page in the Electronic Guide. Click on the text in a Bookmark to go to that page.

Entries with subordinate Bookmarks show a plus “+” sign. To view subordinate Bookmarks, click on the plus “+” sign. The bookmark will expand and the plus “+” sign will change to a minus “-” sign. Dragging the right margin of the bookmark panel resizes it.

SELECTING TEXT AND GRAPHICS

To select text or graphics, the appropriate select tool must be selected. The select tools share the same space on the tool bar.

To see more text selection tools you must click the arrow to the right of the Text Select Tool. A “flyout” menu will allow you to select the Column Select Tool.

See the Adobe Acrobat Reader 5.0 Guide (Help > Reader Help) for more information on these tools.

PERFORMING A “FIND”

Choosing Find (from the Toolbar or Tools > Find) opens a dialog box. Find scans linearly through the currently open Acrobat file from the cursor forward. If the Electronic Guide PDF is open, “Find” will scan the entire Electronic Guide for a match to your text. Type a text string in the field provided, check the appropriate options and press the “Find” button. Reader then highlights the first instance of the text string. To look at the next “hit”, click on the Find icon and select “Find Again” in the Acrobat Find window.

PERFORMING A “SEARCH”

Choosing the Search button or Search menu item (Tools > Search), or selecting the Query item, opens a dialog box from which you can access the more powerful full-text search engine (if you installed Acrobat Reader from this CD-ROM). Its dialog box is shown on the next page.

Typing a term in the text box at the top of the Search dialog box and pressing the “Search” button causes a full-text search of all words in the body of papers in the collection. Entering a term in one or more

of the fixed fields (Title, Author, Subject* or Keywords) will cause a search for hits in only those fields.

See the Search Online Guide (on Help menu) for more complete instructions on selecting appropriate options, constructing boolean queries, etc.

*Subjects were indexed for years beginning with 1997. The most accurate hits will be for Publications beginning then.

- Inside Cover (Oct. 2002 [MWCL])
- Information for Authors Submitting Manuscripts in Electronic Form (Oct. 2002 [MWCL])
- Information for Authors (Oct. 2002 [MWCL])
- Characterization of ultrafast devices using near-field optical heterodyning
- Novel flip-chip bonding technology for W-band interconnections using alternate lead-free solder bumps
- A compact-size microstrip spiral resonator and its application to microwave oscillator
- Analysis of high speed p-i-n photodiode S-parameters by a novel small-signal equivalent circuit model
- Analytical derivation of a two-section impedance transformer for a frequency and its first harmonic

IEEE © 2003

Papers by Issue

- Parallel coupled microstrip filters with suppression of harmonic response
- A novel dual-mode bandpass filter with wide stopband using the properties of microstrip open-loop resonator
- Gradient-based optimization of filters using FDTD software
- A new MRTD scheme based on Coifman scaling functions for the solution of scattering problems
- Reliable method for computing the phase shift of multiline LRL calibration technique
- Leaky-wave dispersion behavior on a grounded ferrite slab waveguide
- Effects of mechanical flaws in open-ended coaxial probes for dielectric spectroscopy
- Patent abstracts (Oct. 2002 [MWCL])

- Inside Cover (Nov. 2002 [MWCL])
- Information for Authors Submitting Manuscripts in Electronic Form (Nov. 2002 [MWCL])
- Information for Authors (Nov. 2002 [MWCL])
- Effects of output harmonic termination on PAE and output power of AlGaN/GaN HEMT power amplifier
- A SiGe MMIC variable gain cascode amplifier
- A phase noise reduction technique in microwave oscillator using high-Q active filter
- 40-GHz coplanar waveguide bandpass filters on silicon substrate
- Low-loss and compact V-band MEMS-based analog tunable bandpass filters
- New periodic-loaded electromagnetic bandgap coplanar waveguide with complete spurious passband suppression

IEEE © 2003

Papers by Issue

- Low-order models from FD-TD time samples
- Analysis and design of periodic structures for microstrip lines by using the coupled mode theory
- A nonlinear and dispersive APML ABC for the FD-TD methods
- Patent abstracts (Nov. 2002 [MWCL])
