Papers by Issue

- Effects of Nonlinear Distortion on CDMA Communication Systems (1996 Vol. II [MWSYM])
- Session WE3E -- Power Dividers and Couplers
- Uniplanar MIC Power Dividers Using Coupled CPW and Asymmetrical CPS
- A New 3-Way Power Divider with Various Output Power Ratios
- A 50:1 Bandwidth Cost-Effective Coupler with Sliced Coaxial Cable
- Using Miniaturized 90 Degree Hybrid Coupler Using High Dielectric Substrate for QPSK Modulator
- A 10-50 GHz Micromachined Directional Coupler
- A Stripline Re-Entrant Coupler Network for Cofired Multilayer Microwave Circuits
- Overlaid Parallel Coupled Inset Dielectric Guides for Broadband Applications to Directional Couplers
- Session WE3F -- Open Forum 1

IEEE © 2003

Papers by Issue

- A Super Low-Noise Ion-Implanted Planar GaAs MESFET MMIC Amplifier
- Noise Optimization of a GaAs HBT Direct-Coupled Low Noise Amplifier
- A Novel Sub-Harmonic Pumping Direct Conversion Receiver with High Instantaneous Dynamic Range
- New Topology of the GaAs Non-Linear Transmission Line (NLTL) Using Microstrip Line Technology
- A Low Third Order Intermodulation Amplifier with Harmonic Feedback Circuitry
- A Novel Series Diode Linearizer for Mobile Radio Power Amplifiers
- Adaptive Digital Predistorter for Power Amplifiers with Real Time Modeling of Memoryless Complex Gains
- Evaluation and Correction of Time Dependent Amplifier Non-Linearity
- High-Power, High-Efficiency Cell Design for 26 GHz HBT Power Amplifier

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Optimal Design of Low Crosstalk, Wideband, Bidirectional Distributed Amplifiers
- Linear RF Power Amplifier Design for CDMA Signals
- A Design Method for High Efficiency Class F HBT Amplifiers
- High Efficiency Harmonic Control Amplifier
- Conditionally Stable Amplifier Design Using Constant μ-Contours (1996 Vol. II [MWSYM])
- Analysis and Design of Broadband, High Efficiency Feedforward Amplifiers
- New Structure for DC-60 GHz Thermal Power Sensor
- A Compact MMIC-Compatible Microstrip to Waveguide Transition
- A Design Technique for Raising Upper Frequency Limit of Wide-Band 180°Hybrids
- Photonic Band Structures for a Class of 2D Periodic Dielectric Materials
- Investigations and Improvements in Microwave Opto-Electronic Variable Delay Lines

IEEE © 2003

Papers by Issue

- 1/4 W Optical Receiver and Clock Recovery Circuit for Gb/s Digital Fiberoptic Links
- Simulation of a Subcarrier Multiplexed Communications System: A Performance Enhancement Tool
- Ultra-Wide Bandwidth, Low Voltage, and Chirp-Free Optical Intensity Modulator: Design and Performance Analysis
- The Noise Performance of 20 GHz Optical Receivers Using a Distributed Amplifier and P-I-N Photodiode Combination with Matched and Unmatched Input Terminations
- Optical Polarization Effect in Discrete Time Fiber-Optic Structures for Microwave Signal Processing
- A New Type of Waveguide Structures with Photonic Band Structures
- Metal-Semiconductor-Metal Photodetectors on Intermediate Temperature MBE Grown GaAs for Lightwave/Millimeter-Wave Applications
- Coherent Power Combining of Millimeter Wave Resonant Tunneling Diodes in a Quasi-Optical Resonator

IEEE © 2003

Papers by Issue

- An Active Inverted Patch Antenna with Wideband Varactor-Tuned Capability
- Two-Dimensional Quasi-Optical Power Combining System Performance and Component Design
- Transmission Line Coupled Active Microstrip Antennas for Phased Arrays
- Noise Behavior of a 15-GHz-AlGaAs/GaAs-HEMT-Oscillator
- Design and Optimization of Millimeter-Wave IMPATT Oscillators
- Low-Frequency Noise Behavior of InP-Based HEMTs and its Connection with Phase Noise of Microwave Oscillators
- A Novel HBT Active Transformer Balanced Schottky Diode Mixer
- An E-Mode GaAs FET Operating as a Single Balanced Gate Mixer
- High Power 6-18 GHz H/V Switch Designed in Channelized Wafer Scale Fabrication Process

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Highly Integrated Single Package Monolithic VCO/Up-Converter for Digital Microwave Radio Systems
- A Ka-Band GaInP/GaAs HBT Double Balanced Upconvert Mixer Using Lumped Element Balun
- Even Harmonic Quadrature Modulator with Low Vector Modulation Error and Low Distortion for Microwave Digital Radio
- 48/24 GHz and 20/10 GHz Regenerative Frequency Dividers
- Control Properties of Nonlinear Acoustic Materials
- Analysis of a Magnetically-Shielded Cellular Phone Antenna Using Finite-Difference Time-Domain Method
- A Low-Cost Active Antenna for Personal Communications
- Narrowband Filter and Annular Slot Antenna for PCS Applications
- 20 GHz LTCC Phased Array Module
- T/R Module Architecture Tradeoffs for Phased Array Antennas

IEEE © 2003

Papers by Issue

- Intercept Points of Active Phased Array Antennas
- A Real Time 'Clean' Method for Small Linear Arrays
- A 60GHz Imaging Array Using CPW-Fed Twin-Slots on Multilayered Substrates
- Simulating "Large" Microwave Circuits with the Parallel Planar Generalized Yee Algorithm
- Analysis of Compensated Structures in Planar Transmission Lines Using the FDTD Method Incorporating Triangular Subcells
- Accuracy of TLM Solutions of Maxwell's Equations (1996 Vol. II [MWSYM])
- Application of the Eigenmode Transformation Technique for the Analysis of Planar Transmission Lines (1996 Vol. II [MWSYM])
- A General Functional Analysis to Dispersive Structures
- Improved Excitation of 3D SCN TLM Based on Voltage Sources

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- The Modeling of Coplanar Circuits in a Parallel Computing Environment
- Dispersion Analysis of TLM Node for Modeling General Anisotropic and Gyromagnetic Materials
- Synthesis of Absorbing Boundary Condition with Digital Filter Bank
- Diaz-Fitzgerald Time Domain (D-FTD) Technique Applied to Electromagnetic Problems
- Analysis Method for Transient Fields in Planar Structures by Marching-on-in-Time Integral Equation Technique
- A Full-Wave Analysis for Microwave, Planar, Distributed Discontinutites
- Parameterization of Arbitrary Geometrical Structures for Automated Electromagnetic Optimization
- A Hybrid 3D TLM-FDTD Model of Microwave Fields
- An Electromagnetic Technique for Packaging Problem Analysis

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A Linear Class AB Single-Ended to Differential Transconverter Suitable for RF Circuits
- Distributed Small Signal Model for Multi-Fingered GaAs PHEMT/MESFET Devices
- A SIMMWIC 76 GHz Front-End with High Polarization Purity
- A High Efficiency Complementary GaAs Power FET Technology for Single Supply Portable Applications
- Session WE4A -- Biological Effects and Medical Applications
- A New Gel Phantom Used for Three Dimensional Measurement of the Local SAR
- Complete Evaluation of Conformational MW Effects on ACH Channels with Parallel Computing
- Design and Modeling Using the FDTD Method of Planar Multi-Applicators for Microwave Hyperthermia
- Generation of a Highly Focused Electromagnetic Field in a Lossy Biological Medium by Controlling the Phase and Time Excitation of the Microwave Sources

IEEE © 2003

Papers by Issue

- Design and Modeling Using the FDTD Method of a New Generation of Applicators Realized from Coaxial Antennas for Microwave Hyperthermia
- Session WE4B -- Quasi-Optical Amplifiers and Systems
- A PHEMT Based Monolithic Plane Wave Amplifier for 42 GHz
- Quasi-Optical Traveling Wave Amplifiers
- A 10-Element Active Lens Amplifier on a Dielectric Slab
- Monolithic 40-GHz 670-mW HBT Grid Amplifier
- A 44-60 GHz Monolithic pHEMT Grid Amplifier
- A Quasi-Optical Receiver with Angle Diversity
- Millimeter-Wave Imaging Using Neural Networks for Object Recognition
- Session WE4C -- Micromachining for Microwave and Millimeter Wave Applications
- Characteristics of Micromachined Switches at Microwave Frequencies

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Novel Micromachined Approaches to MMICs Using Low-Parasitic, High-Performance Transmission Media and Environments
- Micromachined Cellular Filters
- Folded U-Shaped Microwire Technology for Ultra-Compact 3D MMICs
- MM-Wave Tapered Slot Antennas on Micromachined Photonic Bandgap Dielectrics
- Session WE4D -- Commercial and Space Microwave System Applications
- A 20 GHz MMIC Power Module for Transmit Phased Array Applications
- Low Cost Electronically Steered Antenna and Receiver System for Mobile Satellite Communications (1996 Vol. II [MWSYM])
- 60-GHz Transceiver for High-Speed Wireless LAN System
- Simple Techniques to Correct for VCO Nonlinearities in Short Range FMCW Radars

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Session WE4E -- Passive Component Technology
- Design of Quasi-Ideal Couplers Using Multilayer MMIC Technology
- Modeling of Generalized Double Ridge Waveguide T-Junctions
- Novel Micromachined LIGA Microstrip Transmission Lines and Filters
- Coplanar Stripline Components for High Frequency Applications
- A Novel Phase Shifter Using a GaAs MESFET in Passive Configuration
- A Phase Compensated, Motion Insensitive Coaxial Connector
- Focus Sessions, Panel and Rump Sessions, Workshops, µAPS Technical Program and MMWMC Symposium Schedule (1996 Vol. II [MWSYM])
- Special MTT-S Technical Sessions (1996 Vol. II [MWSYM])
- MTT-S Panel Sessions (1996 Vol. II [MWSYM])

IEEE © 2003

Papers by Issue

1996 Vol. III [MWSYM]

- Front Cover (1996 Vol. III [MWSYM])
- Copyright (1996 Vol. III [MWSYM])
- Table of Contents (1996 Vol. III [MWSYM])
- Technical Program Contents (1996 Vol. III [MWSYM])
- Technical Program Schedule (1996 Vol. III [MWSYM])
- Session TH1A -- Low Noise Devices and Circuits
- Highly Integrated Three-Dimensional MMIC Single-Chip Receiver and Transmitter (1996 Vol. III [MWSYM])
- A Miniaturized X-Band 4-Stage LNA Designed Using a Novel Layout Optimization Technique
- A Novel Monolithic Linearized HEMT LNA Using HBT Tuneable Active Feedback
- Noise Characteristics of GaAs HBT's
- L-Band Internally Matched Si-MMIC Low Noise Amplifier

IEEE © 2003

Papers by Issue

- Enhanced Design of a Floating Broad-Band Lossless Tunable HBT Monolithic Active Inductor
- MMIC Quasi-Circulator with Low Noise and Medium Power
- Session TH1B -- Quasi-Optical Modulators and Oscillators
- An Optically Controlled Modulator Using a Metal Strip Grating on a Silicon Plate for Millimeter and Submillimeter Wavelengths
- An M-PSK Modulator for Quasi-Optical Wireless Array Applications
- Quasi-Optical Phase Modulators
- Electromagnetic Modeling of Finite Grid Structures in Quasi-Optical Systems
- Method of Moments and Time Domain Analyses of Waveguide-Based Hybrid Multiple Device Oscillators
- Axially Symmetric Fabry-Perot Power Combiner with Active Devices Mounted on Both the Mirrors
- An Extended Resonance Spatial Power Combining Oscillator

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Session TH1C -- Mario A. Maury, Jr. Memorial Session
- Retrospective on the Career of Mario A. Maury, Jr.
- W-Band Noise Figure Measurement Designed for On-Wafer Characterisation
- Experimental Investigation of On-Wafer Noise Parameter Measurement Accuracy
- Vector Corrected On-Wafer Power Measurements of Frequency Converting Two-Ports
- Transmission Response Measurements of Frequency Translating Devices
- An Application of Membrane Probes for On-Wafer Testing of Unmatched High Power MMICs
- Session TH1D -- High Speed Lightwave Communication Systems
- Progress in Optical Communications for Commercial Terrestrial Telecommunication Networks
- Undersea Lightwave Transmission Technology and Techniques

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Session TH1E -- Linear Device Modeling
- Direct Parametric Extraction of 1/f Noise Source Magnitude and Physical Location from Baseband Spectra in HBTs
- Extraction of Low-Frequency Noise Model of Self-Aligned AlGaAs/GaAs Heterojunction Bipolar Transistor
- Bias-Dependent "Cold-(H)FET" Modeling
- Investigation and Modeling of Impact Ionization with Regard to the RF- and Noise Behaviour of HFET
- Millimeter-Wave HEMT Noise Models Verified Thru V-Band
- New Aspects Concerning the Bias and Temperature Dependence of Intrinsic Noise Generators in Extracted FET Models
- Session TH2A -- Progress in High Speed Digital Applications
- Digital Receiver Technology, Architecture, and Application
- ADCs for Digital Receivers: The Whole World Tunes In
- Three-Level 1 GS/s Digital Correlator for Wideband Polarimetric Radiometry

Papers by Issue

- Comparison of Direct and Downconverted Digitization in GPS Receiver Front End Designs
- Recent Progress in Wideband Monolithic Direct Digital Synthesizers
- Generation of High-Speed Pseudo-Random Sequences Using Multiplex-Techniques (1996 Vol. III [MWSYM])
- Session TH2B -- Nonlinear Modeling and Analysis
- Harmonic-Balance Simulation of Strongly Nonlinear Very Large-Size Microwave Circuits by Inexact Newton Methods
- Parametric Harmonic Balance
- Envelop Transient Analysis: A New Method for the Transient and Steady State Analysis of Microwave Communication Circuits and Systems
- Compressed Transient Analysis Speeds Up the Periodic Steady State Analysis of Nonlinear Microwave Circuits
- Low-Frequency Dispersion and its Influence on the Intermodulation Performance of AlGaAs/GaAs HBTs

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Intermodulation Analysis of FET Resistive Mixers Using Volterra Series
- Implicit Incorporation of Nonlinear Elements for Unconditionally Stable FDTD Analysis at Coarse Time-Steps
- Behavioral Modeling of Narrowband Microwave Power Amplifiers with Applications in Simulating Spectral Regrowth
- Session TH2C -- Scattering Parameter and Dielectric Measurements
- A Novel Calibration Verification Procedure for Millimeter-Wave Measurements
- The Implementation of Calibration on Coplanar Waveguide for On-Wafer Measurements at W-Band
- On-Wafer Measurement of Microstrip-Based MIMICs Without via Holes
- A Simplified Calibration Procedure for Cryogenic Microwave Measurements

IEEE © 2003

Papers by Issue

- Measuring Complex Permittivity and Permeability Using Time Domain Network Analysis
- Development of a Coplanar Waveguide Membrane Probe for Non-Destructive Evaluation of Thin Film Structures
- New Density-Independent Moisture Measurement Methods Using Frequency-Swept Microwave Transmission
- Parametric Modelling of Complex Permittivity and Permeability
- Session TH2D -- Microwave Photonic Devices
- Millimeter Wave Generation by Off-Locking Optical Injection in a DFB Laser Diode
- Three-Dimensional Modelling of High-Power Laser Diodes Based on the Finite Integration Beam Propagation Method
- An AlGaAs/InGaAs Pseudomorphic HEMT Modulator Driver IC with Low Power Dissipation for 10 Gb/s Optical Transmission Systems
- A New Optoelectronic Technique for Microwave Passive Structures Tuning

IEEE © 2003

Papers by Issue

- Velocity Matching for Field-Induced Electrooptic Modulators
- The Optical Performance of Microwave Transistors
- A Balanced Distributed Preamplifier Using MMIC GaAs MESFET Technology
- Session TH2E -- CAD Techniques Using Field Theory
- CAD-Oriented Equivalent Circuit Models for Rigorous Full-Wave Analysis and Design of Waveguide Components and Circuits
- A Circular Cavity Structure for the Efficient CAD of Dual Mode Filters
- Order Recursive Method of Moments: A Powerful Computational Tool for Microwave CAD and Optimization
- A Fast and Rigorous CAD Procedure for Complex Shielded Planar Circuits
- Analysis of Planar Circuits with a Combined 3D FDTD-Time Domain Modal Expansion Method
- Multiple Region FDTD (MR/FDTD) and its Application to Microwave Analysis and Modeling

Papers by Issue

- Session TH3A -- Superconductor Microwave Technology
- Hybrid Semiconductive/High-Temperature Superconductive Tunable Preselector
- Design of High Power Superconductive Output Multiplexer
- An Ultra-High Quality Factor Microwave Sapphire Loaded Superconducting Cavity Transducer
- Quasi-Lumped Element Band-Pass Filters Using DC Isolated Shunt Inductors
- Analysis of HTS Filters Using Novel Nonlinear Phenomenological Two Fluid Model
- Session TH3B -- Sources
- Wideband MMIC Voltage Controlled Oscillator Using Active Impedance Load Matching
- 10 and 26 GHz Differential VCOs Using InP HBTs
- New High-Performance Voltage-Controlled LC-Oscillator
- Enhanced MESFET VCO Injection-Locking Bandwidth Using Low Frequency Feedback Techniques

IEEE © 2003

Papers by Issue

- Voltage Tuned Dielectric Resonance 20.5GHz Harmonic Oscillator with Novel Structure
- Session TH3C -- Mapping of Fields and Waves in Integrated Circuit Structures
- Voltage Amplitude and Voltage Phase Mapping Within Sub-µm Devices by High Frequency Scanning Force Microscopy
- Design and Characterization of Integrated Probes for Millimeter Wave Applications in Scanning Probe Microscopy
- In-Circuit Electro-Optic Field Mapping for Function Test and Characterization of MMICs
- A Simple Electric Near Field Probe for Microwave Circuit Diagnostics
- A Laser Probing System for Characterization of SAW Propagation on LiNbO/sub3/, LiTaO/sub3/, and Quartz
- Session TH3D -- Microwave Photonic Systems
- Limitations in Distance and Frequency Due to Chromatic Dispersion in Fibre-Optic Microwave and Millimeter-Wave Links

Papers by Issue

- Bias-Field / Frequency Design Charts for Composite Gyrotropic Resonators
- The Current Distribution of High-Tc Superconducting Microstrip Lines
- A Distributed Ferroelectric Superconducting Transmission-Line Phase Shifter
- Scattering Parameters of Semiconductor Microstrip Line Under Laser Spot Illumination
- A New Measurement Approach for Phase Noise at Close-In Offset Frequencies of Free-Running Oscillators (1996 Vol. III [MWSYM])
- On-Wafer Measurement at Millimeter Wave Frequencies
- Measurement of Complex Permittivity of Solids Up to 1000°C
- Multi-Tone Transistor Characterization for Intermodulation and Distortion Analysis
- Hilbert-Transform-Derived Relative Group Delay Measurement of Frequency Conversion Systems

IEEE © 2003

Papers by Issue

- The Evaluation of Electrooptic-Sampling Including Diffraction and Aperture Masking of a Tilted Astigmatic Gaussian Sampling Beam
- Near Electric Field Mapping Above X-Band MMICs Using Modulated Scattering
- Determining Timing for Isothermal Pulsed-Bias S-Parameter Measurements
- DC and RF Techniques for Computing Access Resistances in Microwave FET's
- Unique and Physically Meaningful Extraction of the Bias-Dependent Series Resistors of a 0.15 µm PHEMT Demands Extremely Broadband and Highly Accurate Measurements
- Accurate Modeling of Noise Fluctuations in mm-Wave Semiconductor Devices and Their Spatial and Frequency Dependence
- Temperature Noise Constants Extraction of mm-Wave FETs from Measured S- and Noise Parameters
- Characterization of RF-IC Packages by Multiport Excitation

IEEE © 2003

Papers by Issue

- Picosecond Dual-Source Interferometer Extending Fourier-Transform Spectrometer to Microwave Regime
- Black Box Modelling of Hard Nonlinear Behavior in the Frequency Domain
- Analysis of HEMT Harmonic Generation Using a Vector Nonlinear Measurement System
- Modeling of Low Frequency Noise Sources in HEMTs
- An Examination of Data Based Large Signal Models for Wireless Amplifiers
- Large-Signal Modeling of Self-Heating and RF-Breakdown Effects in Power HBTs
- Non-Linear System and Subsystem Modelling in the Time Domain
- A Large-Signal Physical HEMT Model
- A Realistic Large-Signal MESFET Model for SPICE (1996 Vol. III [MWSYM])
- Improving the CAD of SRD Frequency Multipliers

Papers by Issue

- Physical simulation of complete millimeter-wave amplifiers using full-wave FDTD technique
- Relationship between the compact complex and real variable 2-D FDTD methods in arbitrary anisotropic dielectric waveguides
- A hybrid full-wave analysis of via hole grounds using finite difference and finite element time domain methods
- Human organs dosimetry for transient electromagnetic fields
- Modeling of interaction of electromagnetic fields from a cellular telephone with hearing aids (1997 Vol. I [MWSYM])
- Theoretical analysis of voltage-gated membrane channels under GSM and DECT exposure
- Measurements of complex permittivity of biological and organic liquids up to 110 GHz
- Coupling parameters of a concentric multi-element waveguide array
- An attempt of high-speed imaging of the chirp radar-type microwave computed tomography

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Silicon RF-GCMOS IC technology for RF mixed-mode wireless applications (1997 Vol. I [MWSYM])
- Optimization of high Q CMOS-compatible microwave inductors using silicon CMOS technology (1997 Vol. I [MWSYM])
- Low-frequency noise characteristics of self-aligned AlGaAs/GaAs HBTs with a noise corner frequency below 3 kHz (1997 Vol. I [MWSYM])
- 28 V low thermal impedance HBT with 20 W CW output power (1997 Vol. I [MWSYM])
- High-reliability GaAs HBT monolithic microwave amplifier (1997 Vol. I [MWSYM])
- Systematic investigations on MESFETs and passive components transplanted by epitaxial lift off onto host materials with various resistivities (1997 Vol. I [MWSYM])
- Electromagnetic interfacing of semiconductor devices and circuits

IEEE © 2003

Papers by Issue

- Characterization and modelling of microwave and millimeter-wave large-signal device-circuit interaction based on electro-thermal physical models
- Full wave BIE analysis of travelling waves in unbiased/velocity saturated FET structures with linearly controlled current density
- Far field radiation in sub-picosecond systems
- Recent progress in SAW filters at GHz frequencies
- Design, fabrication, and application of GHz SAW devices
- Recent and future RF SAW technology for mobile communications
- High frequency SAW devices
- Thin film ZnO based bulk acoustic mode filters
- Novel 24 GHz FMCW front-end with 2.45 GHz SAW reference path for high-precision distance measurements
- Double vector-integral-equation method for microstrip-lines on photonic band-gap substrates

IEEE © 2003

Papers by Issue

- A finite element-generalized network analysis of finite thickness photonic crystals
- Accurate calculation of the modes of the circular multiridge waveguide
- A new modal approach for planar transmission line to waveguide three-port transition
- Scattering properties of asymmetric rectangular iris in a circular waveguide using edge-conditioned basis functions
- Generalized Y-matrix of arbitrary H-plane waveguide junctions by the BI-RME method
- Wireless distribution via fiber-optic technology
- Stable and high-power laser diode module for millimeter-wave generation
- Fibreoptic microwave generation for bidirectional broadband mobile communications
- Nd:LiNbO/sub 3/ microchip laser with 20 GHz subcarrier
- Experimental 20 Gbit/s modules for optical fiber links

IEEE © 2003

Papers by Issue

- Input impedance conditions for minimizing the noise figure of an analog optical link (1997 Vol. I [MWSYM])
- A 6 watt Ka-band MMIC power module using MMIC power amplifiers (1997 Vol. I [MWSYM])
- Compact integrated coplanar T/R-modules for automotive applications (1997 Vol. I [MWSYM])
- A V-band GaAs MMIC chip set on a highly reliable WSi/Au refractory gate process (1997 Vol. I [MWSYM])
- A D-LDD (double lightly-doped drain) structure H-MESFET for MMIC applications (1997 Vol. I [MWSYM])
- Low phase noise Ka-band VCOs using InGaP/GaAs HBTs and coplanar waveguide (1997 Vol. I [MWSYM])
- 1 Watt, 65% PAE K-band AlGaAs/GaAs heterojunction bipolar transistors using emitter air-bridge technology (1997 Vol. I [MWSYM])
- Air-gap transmission lines for OEICs and MMICs using glass substrates

IEEE © 2003

Papers by Issue

- W-band micromachined finite ground coplanar (FGC) line circuit elements
- Uniplanar hybrid couplers using asymmetrical coplanar strip lines
- Improved compaction of multilayer MMIC/MCM baluns using lumped element compensation
- A compact MMIC 90/spl deg/ coupler for ISM applications
- Arbitrary termination impedances, arbitrary power divisions and small-sized ring hybrids (1997 Vol. I [MWSYM])
- Line-to-ring coupling circuit model and its parametric effects for optimized design of microstrip ring circuits and antennas
- HTS diplexer and low noise amplifier rf module
- A novel split-resonator high power HTS planar filter
- Tunable superconducting resonators using ferrite substrates
- Novel phase noise reduction technique using HTSC-limiters
- A new high-temperature superconducting double-hybrid coupler with wide bandwidth

IEEE © 2003

Papers by Issue

- Special 3D-TLM corner nodes for singular field regions
- Electromagnetic analysis of planar circuitry and the dimensionality argument
- Modal boundary conditions for waveguides of arbitrary cross-section with SCN TLM
- The TLM-equivalent FD-TD analysis of antenna radiation problems with the PML absorbing conditions
- Applications of multiresolution based FDTD multigrid
- Space- and time-adaptive gridding using MRTD technique
- Efficient ARMA modeling of FDTD time sequences for microwave resonant structures
- A wideband, fiber-optic, true time-steered array receiver
- MMIC based SOM in optically fed phased array antennas for Ka-band communication satellites
- Electrical characterization and application of very high speed vertical cavity surface emitting lasers (VCSELs)
- Optoelectronic mixing in three-terminal InP/InGaAs heterojunction bipolar transistors

Papers by Issue

1997 Vol. II [MWSYM]

- Front Cover (1997 Vol. II [MWSYM])
- Copyright (1997 Vol. II [MWSYM])
- 1997 IEEE MTT-S International Microwave Symposium/Microwave Week, Volume II
- Table of Contents (1997 Vol. II [MWSYM])
- Technical Program Contents (1997 Vol. II [MWSYM])
- Analysis of electrothermal transients and digital signal processing in electrically and thermally nonlinear microwave circuits
- The effect of a variation in tone spacing on the intermodulation performance of Class A and Class AB HBT power amplifiers
- Comparison of hybrid pi and Tee HBT circuit topologies and their relationship to large signal modeling
- A non-quasi-static model of GaInP/AlGaAs HBT for power applications

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Modeling of nonlinear active and passive devices in three-dimensional TLM networks
- Scaleability of DC/AC non-linear dispersion models for microwave FETs
- A physical large signal Si MOSFET model for RF circuit design
- A wide band multiport planar power divider design by radially combining matched sectorial components
- Design and performance of GaAs MMIC CPW baluns using overlaid and spiral couplers
- An octave bandwidth monopulse processor
- A compact Ku-band power combining network using rectangular coaxial line technology
- Cavity-type directional couplers with simple structure
- Analysis and design of H-plane waveguide bends with compact size, wide-band and low return loss characteristics
- Thin-film microstrip lines for MM and sub-MM/wave on-chip interconnects

IEEE © 2003

Papers by Issue

- A low cost miniature MMIC W-band transceiver with planar antenna
- A miniature, MMIC one watt W-band solid-state transmitter
- A comparison of W-band MMIC mixers using InP HEMT technology
- A DC-60 GHz GaAs MMIC switch using novel distributed FET
- A single-bias diode-regulated 60 GHz monolithic LNA
- 60 GHz flip-chip assembled MIC design considering chip-substrate effect
- RF performance characteristics of InP millimeter-wave n/sup +/-n/sup -/-n/sup +/ Gunn devices
- Over-60-GHz operation of SCFL dynamic frequency divider using InP-based HEMTs
- A 40-Gbit/s optical repeater circuits using InAlAs/InGaAs HEMT digital IC chip set
- A 40 Gbit/s super-dynamic decision IC using 0.15-/spl mu/m GaAs MESFETs

Papers by Issue

- Sir J.C. Bose and radio science
- Integrated micro-machined antenna for 200 GHz operation
- Single- and dual-polarized slot-ring subharmonic receivers
- Miniature low power submillimeter-wave spectrometer for detection of water in the Solar System
- A high-efficiency millimeter-wave holographic power splitter/combiner
- Low cost T/R modules for planar arrays
- Unaccelerated reliability testing for T/R modules: need, methodology and supporting data
- Megalithic microwave signal processing for phased-array beam forming and steering
- Active antenna oscillator arrays in communication systems
- A polarization flexible phased array antenna for a mobile communication SDMA field trial
- Automatic beam steered active antenna receiver

IEEE © 2003

Papers by Issue

- Analysis of the propagation and leakage effects for various classes of traveling-wave sources in the presence of covering dielectric layers
- Discontinuity effects on high frequency transistors
- Characterization of power loss from discontinuities in guided structures
- Analysis of unbounded and bounded circuits and antennas considering finite extent and inhomogeneous dielectric
- Stability envelope-new tool for generalised stability analysis
- Knowledge based neural models for microwave design
- Recursive causal convolution [passive distributed circuits]
- Space mapping optimization of waveguide filters using finite element and mode-matching electromagnetic simulators
- A new design of microwave filters by using continuously varying transmission lines
- A procedure for the design of microwave filters based on a distributed parameter model

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Design of an electronically tunable microwave impedance transformer
- Monolithic silicon-glass double balanced mixers for wireless communications
- Fully monolithic integrated even harmonic quadrature ring mixer with an active matched 90 degree power divider for direct conversion receivers
- Push-pull frequency converter for mobile communication
- A 2 GHz subharmonic sampler for signal downconversion
- A low power GaAs front-end IC with current-reuse configuration using 0.15 /spl mu/m gate MODFETs
- A bi-directional quasi-optical lens amplifier (1997 Vol. II [MWSYM])
- A transmit-receive spatial amplifier array
- A terahertz grid frequency doubler (1997 Vol. II [MWSYM])
- Class F power amplifier integrated with circular sector microstrip antenna

IEEE © 2003

Papers by Issue

- TE surface wave power combining by a planar 10-element active lens amplifier
- Automatic frequency control techniques for microwave active filters
- Narrow X-band tunable MMIC filters employing active resonators as local feedback
- Low-noise active recursive MMIC filters
- Enhanced-Q microstrip bandpass filter with coupled negative resistors
- Microstrip slow-wave open-loop resonator filters
- Characteristics of /spl lambda//4 CPW resonators with tap-excitation and their application to bandpass filters
- DBIT-direct backside interconnect technology: a manufacturable, bond wire free interconnect technology for microwave and millimeter wave MMICs
- Analysis and design of a vertical CPW transition between microstrip planes

IEEE © 2003

Papers by Issue

- A flip chip bonding technology using gold pillars for millimeter-wave applications
- Characteristics of trenched coplanar waveguide for SiMMIC applications
- A novel waveguide-to-microstrip transition for low-cost millimeter-wave and MMIC applications
- A power amplifier module with harmonics suppression for digital mobile communication
- Improvements to the design of the 0-180/spl deg/ rat race coupler and its application to the design of balanced mixers with high LO to RF isolation
- A monolithic GaAs PIN switch network for a 77 GHz automotive collision warning radar (1997 Vol. II [MWSYM])
- Temperature analysis and on-chip compensation for an UHF VCO
- Multilayer passive components for uniplanar Si/SiGe MMICs (1997 Vol. II [MWSYM])

IEEE © 2003

Papers by Issue

- Analysis of ground bond wire arrays for RFICs (1997 Vol. II [MWSYM])
- Accurate passive component models in coplanar waveguide for 50 GHz MMICs
- Alignment tolerant stripline directional couplers
- Experimental study of wideband uniplanar phase inverters for MICs
- Theory on rotated excitation of a circular dual-mode resonator and filter
- Design methodology for multilayer coupled line filters
- A miniaturized monolithic dual band filter using ceramic lamination technique for dual mode portable telephones
- Bandpass and bandstop filters using dominant TM/sub 01/spl delta// mode dielectric rod resonators
- Modeling of conductor loaded resonators and filters in rectangular enclosures
- Tapped-line interdigital filter equivalent circuits

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- The design of band-pass filters made of both dielectric and coaxial resonators
- A monolithic active notch tunable filter based on the gyrator principle
- Comparative performance of three different CPW bandpass filters
- Input harmonics control using non-linear capacitor in GaAs FET power amplifier
- Design of SAW expander and compressor on LiTaO/sub 3/ for a TCDMA spread spectrum system
- Simulation of electromagnetic effects in SAW RF filters
- High frequency SAW filter on diamond
- A sophisticated design procedure for a triple mode SAW filter suppressing adjacent channel interferences in digital mobile telephones
- A balanced-type SAW filter for PCN and PCS systems
- 1/f noise modeling of InP HBT-based Schottky diodes for monolithic monolithic millimeter-wave mixers

IEEE © 2003

Papers by Issue

- A theoretical and experimental study on low-voltage bias voltage controlled oscillators
- Fundamental limitations on output power and conversion loss of an even harmonic mixer in an up-conversion operation
- On the performance of different HEMT cryogenic mixers
- A simplified method to predict the conversion loss of FET resistive mixers
- Transistor parameter extraction using DC, S-parameter and noise data simultaneously
- Improvements on a MOSFET model for non-linear RF simulations
- A distributed, measurement based, nonlinear model of FETs for high frequencies applications
- Novel method for determination of junction-FET access resistances
- Nonlinear modelling of SiGe HBTs up to 50 GHz
- A bias dependent HEMT noise model

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Design procedures for millimetre wave MMIC voltage controlled oscillators [using pHEMTs]
- A flip-chip high efficiency X-band HPA
- First demonstration of a 0.5 W, 2 to 8 GHz MMIC HBT distributed power amplifier based on a large signal design approach
- Robust cascode HBTs for efficient high power microwave applications
- Transfer characteristic of IM/sub 3/ relative phase for a GaAs FET amplifier (1997 Vol. II [MWSYM])
- Pulsed internal-node waveform study of flip-chip MMIC power amplifiers
- Measurement of dynamic load lines of power heterojunction bipolar transistor
- A theory of distributed amplifiers exploiting growing waves
- Low noise direct detector at submillimeter wavelength using SIS junction [Nb/AlO/sub x//Nb]

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A new hybrid technology for millimeter-wave integrated circuits
- Air bridge based planar hybrid technology for microwave and millimeterwave applications
- Low power, tunable active inductor and its applications to monolithic VCO and BPF
- A low loss, 5.5 GHz-20 GHz monolithic balun
- InP MMICs for V-band FMCW radar
- MMIC tunable bandpass filter using a ring resonator with loss compensation
- CMOS layout and bias optimization for RF IC design applications
- Power performance of thermally-shunted heterojunction bipolar transistors
- The development of planar Schottky diode waveguide mixers at submillimeter wavelengths
- A high power 270 GHz frequency tripler featuring a Schottky diode parallel pair

IEEE © 2003

Papers by Issue

- A mm-wave tapered slot antenna with improved radiation pattern
- Power generation of millimeter-wave SiC avalanche transit time oscillator at high temperature
- 30 GHz GaAs monolithic low noise amplifier-antennas
- A low cost W-band multi-beam Doppler radar for automotive applications
- A three-dimensional active antenna for a high-speed wireless communication application
- Optimization of RF (MMIC)/optical subcarrier multiplexed communications system
- Printed microwave couplers with thermal isolation
- Advantages of flip chip technology in millimeter-wave packaging
- Integral microwave circulators for multi-chip module (MCM) applications
- Microwave Si power transistor with monolithically fabricated impedance matching circuits

IEEE © 2003

Papers by Issue

- Surface mount microwave package characterization technique
- Miniature LTCC filters for digital receivers
- Characteristics of finite ground coplanar waveguide lumped elements
- A fast and rigorous synthesis procedure for (monolithic) millimeterwave integrated circuit layout
- Rigorous and efficient fabrication-oriented CAD and optimization of complex waveguide networks (1997 Vol. II [MWSYM])
- A unified approach for mixed EM and circuit simulation using model-reduction techniques
- Coupled localized and distributed elements analysis applying an electromagnetic software in the frequency domain
- New formulae for the initial design in the optimization of T-junction manifold multiplexers

IEEE © 2003

Papers by Issue

- From layout to schematic using pattern recognition in microwave computer aided design
- Wide-band SSB subharmonically pumped mixer MMIC (1997 Vol. II [MWSYM])
- A planar circuit design for high order sub-harmonic mixers
- Active, monolithically integrated coplanar V-band mixer
- High-performance W-band GaAs PIN diode single-pole triple-throw switch CPW MMIC
- Feedback optimization of grid oscillators
- A 43-GHz AlInAs/GaInAs/InP HEMT grid oscillator
- Phase noise in coupled oscillator arrays
- HBT active antenna as a self oscillating Doppler sensor
- The active phased array antennas coupled through slotlines
- Computer aided engineering environment for spatial power combining systems
- Conductor loaded resonator filters with wide spurious free stop band

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Elliptical cavity resonators for dual-mode narrowband filters
- Alternative designs for dual-mode filters
- Design and realization of a four pole elliptic microwave filter using low dielectric loaded cavities
- Generalized cross-coupled filters using evanescent mode coupling elements
- Improvement of spurious performance of combline filters
- Dual mode combined dielectric and conductor loaded cavity filters
- FEM analysis of nonreciprocity of a coplanar waveguide with a transversely magnetised ferrite layer
- Finite-Difference Time-Domain analysis of microwave ferrite devices
- Modeling a stripline ferrite phase shifter
- Microwave phase shift using ferrite-filled waveguide below cutoff (1997 Vol. II [MWSYM])
- C band ferrite microstrip limiter

IEEE © 2003

1997 Vol. III [MWSYM]

- Front Cover (1997 Vol. III [MWSYM])
- Copyright (1997 Vol. III [MWSYM])
- 1997 IEEE MTT-S International Microwave Symposium/Microwave Week, Volume III
- Table of Contents (1997 Vol. III [MWSYM])
- Technical Program Contents (1997 Vol. III [MWSYM])
- An ultra-wideband exciter for ground-penetration radar systems
- Broadband waveguide-based spatial combiners
- 60-GHz-band ultracompact transmitter for HDTV
- A 28GHz LMDS transceiver for subscriber applications (Paper Withdrawn)
- Channel loading effects on power limited wireless transmitters utilizing discrete multitone modulation
- A novel RF to baseband monolithic microwave receiver with on-chip tuning

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A high performance transceiver hybrid IC for PHS hand-set operating with single positive voltage supply
- Cesium beam frequency standards
- The waveguide below-cutoff attenuation standard (1997 Vol. III [MWSYM])
- A review of the six-port measurement technique
- A 94 GHz monolithic high output power amplifier
- 60 GHz high-efficiency HEMT MMIC chip set development for high-power solid state power amplifier
- A 6 watt Ka-band MMIC power module using MMIC power amplifiers (1997 Vol. III [MWSYM])
- High gain and high efficiency K-band power HEMT with WSi/Au T-shaped gate
- Novel InGaP/AlGaAs/InGaAs heterojunction FET for X-Ku band power applications
- Development of a compact, broadband FET linearizer for satellite use
- A microwave miniaturized linearizer using a parallel diode

IEEE © 2003

Papers by Issue

- High efficiency planar oscillator with RF power of 100 mW near 140 GHz
- A low-power X-band frequency synthesizer module
- A DC to X-band frequency doubler using GaAs HBT MMIC
- A 5 to 10 GHz low spurious triple tuned type PLL synthesizer driven by frequency converted DDS unit
- A very wide-tuning range 5-GHz-band Si bipolar VCO using three-dimensional MMIC technology
- W band monolithic multipliers
- Application of the TLM-method for the analysis of longitudinally periodic structures
- Modal block-LU-decomposition technique for the efficient CAD of ridged waveguide filters
- A new global time domain electromagnetic simulator of microwave circuits including lumped elements based on finite element method
- Variational analysis of arbitrarily oriented thick iris coupling a rectangular and an elliptical waveguide

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Field theory analysis of conically shaped coupling elements in dual mode filters and polarizers
- Radar requirements and architecture trades for automotive applications
- Millimeter wave radar sensor for automotive intelligent cruise control (ICC)
- Millimeter-wave dual mode radar for headway control in IVHS
- Active SIMMWIC-antenna for automotive applications
- A novel circularly polarized W-band direct detection receiver for six-port polarimetric radar systems
- A 155-GHz monolithic InP-based HEMT amplifier
- Full-waveguide band, 90 to 140 GHz, MMIC amplifier module
- Compact monolithic coplanar 94 GHz front ends
- Millimeter-wave waveguide-bandwidth cryogenically-coolable InP HEMT amplifiers

IEEE © 2003

Papers by Issue

- Efficient modeling of microscopic and macroscopic noise behavior of submicron-highly-doped semiconductor devices at millimeter-wave frequencies
- Design and characterization of FET based cold/hot noise sources
- SiGe bipolar junction transistors for microwave power applications
- High efficiency submicron gate LDMOS power FET for low voltage wireless communications
- High-efficiency, small-chip AlGaAs/GaAs power HBTs for low-voltage digital cellular phones
- A 1.9 GHz variable gain linear power amplifier MMIC for PHS using novel cascaded MESFETs
- An E-mode GaAs FET power amplifier MMIC for GSM phones
- A 2 W, 65% PAE single-supply enhancement-mode power PHEMT for 3 V PCS applications

IEEE © 2003

Papers by Issue

- High efficiency, low adjacent channel leakage 2-V operation GaAs power MESFET amplifier for 1.9-GHz digital cordless phone system
- Wavelength optimized electro-optic scanning of MMICs with Fabry-Perot enhancement
- MM-wave near-field scanning resistivity microscope
- An SOLR calibration for accurate measurement of orthogonal on-wafer DUTs
- Coplanar waveguide technique for measurement of dielectric constant or thickness of dielectric films
- Permittivity characterization from transmission-line measurement
- Complex permittivity measurements of extremely low loss dielectric materials using whispering gallery modes
- Precision free-space measurements of complex permittivity of polymers in the W-band
- Measurement of transmittance and scattering of radome membranes from 30 to 1000 GHz (1997 Vol. III [MWSYM])

IEEE © 2003

Papers by Issue

- Finite-difference vector potential time-domain approach to the analysis of planar structures
- Investigation of various H-shaped antennas with an ATLM field-solver
- Unified analysis of quasi-TEM and higher order modes in planar transmission lines
- Global edge-conditioned basis functions from local solutions of Maxwell's equations
- Circuit based model for coupling between MMICs in multi-chip assemblies
- Nonlinear PML for absorption of nonlinear electromagnetic waves
- Radio architecture of a wideband DS-CDMA testbed for future cellular systems
- Mobitex PC card wireless modem
- A low cost 16.2 GHz phase locked oscillator for wireless LAN

IEEE © 2003

Papers by Issue

- A true enhancement mode single supply power HFET for portable applications
- 3.4 V operation 1 W MMIC power amplifier with SrTiO/sub 3/ capacitors for digital cellular phones
- A S-band push-pull 60-watt GaAs MESFET for MMDS applications
- 60W L-band power AlGaAs/GaAs heterostructure FETs
- High efficiency S-band 30 W power GaAs FETs
- High efficiency 11 watt octave S/C-band PHEMT MMIC power amplifier
- A 15-watt dual band HBT MMIC power amplifier
- A 6-18 GHz broadband high power MMIC for EW applications
- Push-pull power amplifiers in the X band
- W-band measurements of 100 /spl mu/m height micro-machined air-filled rectangular waveguides
- Broadband noise parameter and S-parameter measurement technique

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Determination of wave noise sources using spectral parametric modeling (1997 Vol. III [MWSYM])
- High speed noise power ratio measurement techniques on rf power amplifiers
- A dynamic AM/AM and AM/PM measurement technique
- A broadband heterodyne measurement setup for active millimeter wave integrated antennas
- GaAs HBT profile optimization using the Taguchi method
- Bias and temperature dependent noise modeling of HBTs
- Transmission line model of the distributed heterojunction bipolar transistor
- Capacitance topology for high frequency modeling of bipolar transistors
- Electrothermal simulation of HBT by TLM method with quasi two dimensional model
- A physics-based electro-thermal model for microwave and millimetre wave HEMTs

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Magnetically tunable superconducting microstrip resonators using yttrium iron garnet single crystals
- Analytic design of high efficiency harmonic loading oscillator using harmonic two signal method
- Simplified nonquasi-static FET modelling approach experimentally validated up to 118.5 GHz
- A charge model of step recovery diode for CAD
- Iterative solution of linear systems in harmonic balance analysis
- Nonlinear dynamic modeling of micromachined microwave switches
- A pulsed-measurement based electrothermal model of HBT with thermal stability prediction capabilities
- Analysis and design of feedforward power amplifier
- Mode computation in long tapered multi-cell linear accelerator structures using the GSM method
- Hybrid FEM analysis of thick CPW discontinuities with nonrectangular cross section

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Practical metal loss implementation for a microstrip line structure using SIBC in FDTD simulation
- MICs in a multilayer dielectric media in a rectangular waveguide
- Second order nonuniform grid spacing in the FDTD technique
- FDTD method with a conformal polygonal mesh and perfectly matched layer absorbing boundary condition
- A S/V potential method for Maxwell's equations near corners using nodal elements
- New 3D low loss, wide band microwave interconnection
- Time-domain (transient) analysis of capacitive Jaumann absorbers
- Modal analysis of parallel and crossed rectangular waveguide broadwall couplers with apertures of arbitrary shape
- A generalized 3D subgrid technique for the finite-difference time domain method

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- An efficient inversion technique for banded linear systems
- General full-wave Green's functions in spectral domain for arbitrarily multilayered dielectric media
- Accurate CAD for dual mode filters in circular waveguide including tuning elements
- Input noise current spectral density estimation for a distributed based optical receiver
- Wide band CAD model for coplanar waveguide using FDTD technique
- Application of the harmonic-balance method to the stability analysis of oscillators
- Accurate and efficient CAD-oriented modeling of circular waveguide bends
- CAD and electrical performance of new compact power divider suitable for use in M(H)MICs
- Parasitic resistance extraction errors with implications for FET model accuracy around V/sub ds/=0

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- EM-ANN modelling and optimal chamfering of 90/spl deg/ CPW bends with air-bridges
- On the generalized scattering matrix of a lossless multiport
- Efficient numerical method for the design of microwave active circuits
- Analysis and design of microwave structures using broad frequency band and shape driven edge finite element models
- Synthesis of impedance matching circuits using arbitrary nonuniform transmission lines
- Characterization and minimization of mutual coupling between NLC-FED slot antennas
- A new broadband coplanar waveguide to slotline transition
- FDTD investigation of higher order mode leakage from three dimensional microstrip line structures
- Scattering parameters of interdigital microstrip gap under laser spot illumination

IEEE © 2003

Papers by Issue

- Measurements of unloaded Q-factor of transmission mode dielectric resonators
- Image observation of pico second electrical pulse by scanning force optoelectronic microscope
- Vizualisation of portable phone-user interactions via near field mapping on mannequins and volunteers
- Microscopic observation of the temperature coefficient distribution of dielectric material for microwave application using scanning photothermal dielectric microscope
- Novel methods of measuring impurity levels in liquid tanks
- Network-analyzer self-calibration with four or five standards for the 15-term error-model
- Comparison of air coplanar microprobes for on-wafer measurements at W-band
- A calibration procedure for W-band on-wafer testing
- A new field-probing technique for millimeter-wave components
- A membrane quadrant probe for R&D applications

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Known good die testing of wide S/C band power MMICs
- Microstrip ring resonator as a moisture sensor for wheat grains
- Measurement of temperature dependence of relative permittivity by the cavity perturbation method
- A novel time domain characterization technique of intermodulation in microwave transistors: application to the visualization of the distortion of high efficiency power amplifiers
- Improvement of digital mapping predistorters for linearising transmitters
- Sensitivity of distortion cancellation in feedforward amplifiers to loop imbalances
- FFT windows for intermodulation analysis of microwave circuits from transient simulation
- Phase compensation in an optically controlled microwave attenuator

IEEE © 2003

Papers by Issue

- Millimetre wave generation by filtering the FM-IM spectra of a directly modulated DFB laser
- 40 GHz-narrow band photoreceiver for clock recovery in 40 Gbit/s optical transmission systems
- 10 Gb/s clock extraction and data regeneration circuit implemented with phase-locked loop
- Synthesis of amplitude response of optical directional coupler modulators
- A new approach for optical millimeter wave generation utilizing locking techniques
- Dual mode patch superconductor cavity filters
- Large-signal design of MMMIC Ka-band power amplifiers based on physical models
- Modeling and characterization of interconnects and IC packages by FDTD 3D simulation
- Full-wave investigation on the curved bonding wire interconnection by using a suitable FDTD code

IEEE © 2003

Papers by Issue

- Measurements of field distributions and scattering parameters in multiconductor structures using an electric field probe
- An adaptive antenna integrated with automatic gain control for receiver front end
- Finite-difference time-domain analysis of a dual resonance and shielded cellular antenna
- Microstrip-fed cylindrical slot antennas for GPS avionics applications
- Performance of PCS handset antennas in mobile environments
- The implication of nonlinear effect on DS/CDMA with imperfect power control in optical transmission
- An accurate determination of the characteristic impedance matrix of coupled symmetrical lines on chips based on high frequency S-parameter measurements
- Embedded multiconductor transmission line characterization

IEEE © 2003

Papers by Issue

- Multigrid technique with local grid refinement for solving static field problems [RF circuits]
- A CAD algorithm for coupling between dielectric covered MMICs in multi-chip assemblies
- GaInP/GaAs HBT broadband monolithic transimpedance amplifiers and their high frequency small and large signal characteristics (1998 Vol. I [MWSYM])
- K/Ka-band low-noise embedded transmission line (ETL) MMIC amplifiers (1998 Vol. I [MWSYM])
- Integrated 1.55 /spl mu/m receivers using GaAs MMICs and thin film InP detectors (1998 Vol. I [MWSYM])
- A Ka-band 4-bit monolithic phase shifter using unresonated FET switches (1998 Vol. I [MWSYM])
- A wideband pHEMT downconverter MMIC for satellite communication systems (1998 Vol. I [MWSYM])
- Digital Video Broadcasting standards for satellite, terrestrial and cable television transmission

IEEE © 2003

Papers by Issue

- VSB transmission system: Broadcast and microwave applications
- Development of satellite and terrestrial digital broadcasting systems in Japan
- A 900 MHz ISM band transceiver RFIC chip set and RF module
- GaAs RFICs for CDMA/AMPS dual-band wireless transmitters (1998 Vol. I [MWSYM])
- A bipolar upconversion modulation loop transmitter for dual-band mobile communications (1998 Vol. I [MWSYM])
- IF-band MMICs for high-speed wireless signal processing (1998 Vol. I [MWSYM])
- A high dynamic range, digitally tuned, Q-enhanced LC bandpass filter for cellular/PCS receivers (1998 Vol. I [MWSYM])
- New coplanar-like transmission lines for application in monolithic integrated millimeter-wave and submillimeter-wave circuits

IEEE © 2003

Papers by Issue

- An hermetic coplanar waveguide-to-HDI microstrip microwave feedthrough
- W-Band finite ground coplanar waveguide (FGGPW) to microstrip line transition
- CPS structure potentialities for MMICs: a CPS/CPW transition and a bias network
- Micromachined thick-metal coplanar coupled-line filters and couplers
- Original techniques for designing wideband 3D integrated couplers
- Simplified design technique for high performance microstrip multi-section couplers
- MEMS designed for tunable capacitors
- Low loss air-gap spiral inductors for MMICs using glass microbump bonding technique
- A new analytical and scaleable noise model for HFET
- A bias and temperature dependent noise model of heterojunction bipolar transistors

Papers by Issue

- Technology independent degradation of minimum noise figure due to pad parasitics
- Robust, model-independent generation of intrinsic characteristics and multi-bias parameter extraction for MESFETs/HEMTs
- Comparison of quasi-2D and ensemble Monte Carlo simulations for deep submicron HEMTs
- Extrinsic elements extraction of DGMESFET
- A systematic scheme for power amplifier design using a multi-harmonic loadpull simulation technique
- A 2-V operation RF front-end GaAs MMIC for PHS hand-set (1998 Vol. I [MWSYM])
- A 1.9 GHz single-chip RF front-end GaAs MMIC with low-distortion cascode FET mixer for Personal Handy-phone System terminals (1998 Vol. I [MWSYM])
- A monolithic even harmonic quadrature mixer using a balance type 90 degree phase shifter for direct conversion receivers (1998 Vol. I [MWSYM])

IEEE © 2003

Papers by Issue

- An 18 GHz Si bipolar mold package prescaler (1998 Vol. I [MWSYM])
- A Q-factor enhancement technique for MMIC inductors (1998 Vol. I [MWSYM])
- Design and verification of a SAW based chirp spread spectrum system
- The implementation of RTU and RSU transceiver for WLL system
- Ultrafast analog-to-digital converter using resonant-tunneling ternary quantizers
- Intelligent RF power module using automatic bias control (ABC) system for PCS CDMA applications
- A 900 MHz HBT power amplifier MMICs with 55% efficiency, at 3.3 V operation
- A 44 GHz InP-based HBT double-balanced amplifier with novel current re-use biasing (1998 Vol. I [MWSYM])

IEEE © 2003

Papers by Issue

- A 60 GHz 256 QAM balanced vector modulator for short range LOS communication applications (1998 Vol. I [MWSYM])
- A single-chip 94-GHz frequency source using InP-based HEMT-HBT integration technology (1998 Vol. I [MWSYM])
- Fully integrated Q-band MMIC transmitter and receiver chips using resistive PHEMT mixers (1998 Vol. I [MWSYM])
- Low cost GaAs PHEMT MMICs for millimeter-wave sensor applications
- Generalized multilayer anisotropic dielectric resonators
- Attenuation and power-handling capabilities of generalized ridge waveguides
- Automated design of a novel dual mode coupler for compact dual polarization beam forming networks
- Coaxial-probe to parallel-plate dielectric waveguide transition: analysis and experiment
- A novel wideband TM01-to-TE11 mode converter
- Wideband crossed-guide waveguide directional couplers

IEEE © 2003

Papers by Issue

- A novel coplanar transmission line to rectangular waveguide transition
- Global modeling of microwave devices using wavelets
- Nonlinear transient simulation of embedded subnetworks characterized by S-parameters using complex frequency hopping
- Chaos detection in microwave circuits using harmonic balance commercial simulations
- A new approach for the extraction of SPICE compatible models from measured parameters of microwave circuits
- New extraction method for FET extrinsic capacitances using active bias conditions
- New versatile model: accurate prediction and synthesis ability for arbitrary geometry FET
- Small-signal distributed FET modeling through electromagnetic analysis of the extrinsic structure
- Reliable extraction of small-signal elements of a generalized distributed FET model

IEEE © 2003

Papers by Issue

- A 44 GHz low noise block downconvertor MMIC suitable for EHF satellite communication applications (1998 Vol. I [MWSYM])
- A highly integrated multi-functional chip set for low cost Ka-band transceiver (1998 Vol. I [MWSYM])
- V-band single chip, direct carrier BPSK modulation transmitter with integrated patch antenna (1998 Vol. I [MWSYM])
- A Ka-band monolithic single-chip transceiver using sub-harmonic mixer (1998 Vol. I [MWSYM])
- Millimeter-wave three-dimensional masterslice MMICs (1998 Vol. I [MWSYM])
- Low voltage electronics for portable wireless applications: an industrial perspective
- Nonlinear effects of power amplification on multicarrier spread spectrum systems
- Device and circuit approaches for improved linearity and efficiency in microwave transmitters

IEEE © 2003

Papers by Issue

- MEMS and Si-micromachined components for low-power, high-frequency communications systems
- X-band Si bipolar transistor single-chip transceiver using three-dimensional MMIC technology (1998 Vol. I [MWSYM])
- Direct conversion for FLEX paging receivers - a feasibility study (1998 Vol. I [MWSYM])
- A Si BJT RF dual band receiver IC for DAB (1998 Vol. I [MWSYM])
- A low voltage RF receiver for digital satellite radio (1998 Vol. I [MWSYM])
- A Si BJT IF downconverter/AGC IC for DAB (1998 Vol. I [MWSYM])
- RF micromachined varactors with wide tuning range (1998 Vol. I [MWSYM])
- High-Q tunable YBCO disk resonator filters for transmitter combiners in radio base stations
- 8-pole superconducting quasi-elliptic function filter for mobile communications application

IEEE © 2003

Papers by Issue

- Direct synthesis of tubular bandpass filters with frequency-dependent inductors
- A satellite repeater comprising superconducting filters
- Novel superconducting ring filter
- Index of Authors (1998 Vol. I [MWSYM])

Papers by Issue

1998 Vol. II [MWSYM]

- Front Cover (1998 Vol. II [MWSYM])
- Table of Contents (1998 Vol. II [MWSYM])
- Technical Program Schedule (1998 Vol. II [MWSYM])
- Novel millimeter wave active MMIC triplers
- An 80/160 GHz broadband, fixed-tuned, balanced frequency doubler
- Millimeter-wave GaAs monolithic multipliers
- Progress towards the realization of MMIC technology at submillimeter wavelengths: a frequency multiplier to 320 GHz
- An all solid-state 640 GHz subharmonic mixer
- A 640 GHz planar-diode fundamental mixer/receiver
- Westinghouse microwave systems and technology
- Early work on millimeter wave systems and phased array radars (in the Baltimore-Washington area)

IEEE © 2003

Papers by Issue

- Historical perspectives on commercial and non-military government space applications of microwave systems in the Baltimore/Washington area
- The origins of the proximity fuze
- A 1.9 GHz fully integrated PHS power amplifier with a novel automatic gate-bias control circuit [MESFET ICs]
- 63.2% high efficiency and high linearity two-stage InGaP/GaAs HBT power amplifier for personal digital cellular phone system
- 64% efficiency enhancement-mode power heterojunction FET for 3.5 V Li-ion battery operated personal digital cellular phones
- A high efficiency GaAs power amplifier module with a single voltage for digital cellular phone systems
- 3.5 V operation driver-amplifier MMIC utilizing SrTiO/sub 3/ capacitors for 1.95 GHz wide-band CDMA cellular phones
- Performance of RFMOS/sup TM/ for 1.9 GHz CDMA operation

IEEE © 2003

Papers by Issue

- High efficiency mode "E" amplifier powers high efficiency active transmitting patch antenna
- Stable and efficient ABCs for graded mesh FDTD simulations
- Adapted radiating boundaries (ARB) for efficient time domain simulation of electromagnetic interferences
- Unsplit-field formulations for generalised material independent PML absorbers
- An interface for the FDTD diakoptics
- A novel 2-D multi-mode parallel time domain diakoptics and its application in filter analysis and design
- Space adaptive analysis of evanescent waveguide filters
- Time-domain vector-potential analysis of complex RF multilayer structures via segmentation technique
- A robust ultra broadband wireless communication system using SAW chirped delay lines
- Performance degradation in GPS-receivers caused by group delay variations of SAW-filters

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Miniature SAW antenna duplexer module for 1.9 GHz PCN systems using SAW-resonator-coupled filters
- New applications of wirelessly interrogable passive SAW sensors (1998 Vol. II [MWSYM])
- A chirp spread spectrum DPSK modulator and demodulator for a time shift multiple access communication system by using SAW devices
- Novel nonlinear FMCW radar for precise distance and velocity measurements
- A W-band dielectric-lens-based integrated monopulse radar receiver (1998 Vol. II [MWSYM])
- Multi-beam automotive radar front end using non-contact cylindrical NRD switch
- A flip-chip MMIC design with CPW technology in the W-band
- 80 GHz distributed amplifiers with transferred-substrate heterojunction bipolar transistors

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Characteristics of a MM-wave tapered slot antenna with corrugated edges
- Optimization of MM-wave distribution networks using silicon-based CPW
- Is our engineering education system suitable to fulfill the needs of the wireless industry?
- East-West summer schools in microwave and optical engineering
- MMIC designers trained on real chips without expensive fabrication
- A virtual field-based laboratory for microwave education
- Microwave education after the unification of Germany-an example: Gerhard-Mercator-University Duisburg
- Educating tomorrow's RF/microwave engineer: a new undergraduate laboratory uniting circuit and system concepts
- A high power and high efficiency monolithic power amplifier for local multipoint distribution service

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Ka-band 2 watt power SSPA for LMDS application
- High-efficiency, packaged Ka-band MMIC operating at 24 volts
- A robust 3W high efficiency 8-14 GHz GaAs/AlGaAs heterojunction bipolar transistor power amplifier
- High-efficiency L-band Kahn-technique transmitter
- Microwave power amplifier efficiency improvement with a 10 MHz HBT DC-DC converter
- Analytical charge conservative large signal model for MODFETs validated up to MM-wave range
- Measurement based nonlinear electrothermal modeling of GaAs FET with dynamical trapping effects
- Modeling of current lag in GaAs IC's
- A physically-based transient SPICE model for GaAs MESFET's
- Characterization and modeling of thermal dynamic behavior of AlGaAs/GaAs HBTs
- Ferrite and wire baluns with under 1 dB loss to 2.5 GHz

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Insertion loss analysis of small isolator for portable phones
- Thermostable stripline lumped element circulator for UHF applications
- Finite-difference time-domain analysis of a stripline disc junction circulator
- FDTD analysis of microwave circulators involving saturated magnetized ferrites
- The new approach to designing W-band Y-junction circulator with small insertion loss
- Space-wave-type leaky mode carrying dominant-mode-like modal current distributions
- Unexpected contribution of nonphysical mode to the fields excited by a practical source in printed-circuit transmission lines
- Mode-coupling phenomena of the even modes on microstrip line
- Propagation and radiation characteristics of gyrotropic open structures in the presence of sources

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Leaky-wave characteristics of trapezoidally shaped NRD-guide suitable for design of millimeter-wave antenna
- Eliminating surface currents with metallodielectric photonic crystals
- Characteristics of broadband InP millimeter-wave amplifiers for radiometry
- Noise temperature estimates for a next generation very large microwave array [HEMT LNAs]
- A comparison of topologies for single-ended millimeter-wave monolithic amplifier design
- Low noise broadband MMIC amplifier concept
- A compact coplanar W-band variable gain amplifier MMIC with wide control range using dual-gate HEMTs
- 800 MHz-band low noise low distortion Si-MMIC front-end using BJT/MOSFET LNA and MOSFET mixer
- Microwave low-noise GaAs HBTs
- Three-dimensional MMIC architecture using low thermal impedance technology

IEEE © 2003

Papers by Issue

- L-band 100-watts push-pull GaAs power FET
- 120 Watt, 2 GHz, Si LDMOS RF power transistor for PCS base station applications
- High-efficiency L and S-band power amplifiers with high-breakdown GaAs-based pHEMTs
- Low distortion and high efficiency 17 W power GaAs FETs for satellite communication system applications
- An L band adaptive digital predistorter for power amplifiers using direct I-Q modem
- A novel envelope-termination load-pull method for ACPR optimization of RF/microwave power amplifiers
- Simulation of multi-tone IMD distortion and spectral regrowth using spectral balance
- A nonlinear ARMA model for simulating power amplifiers
- Residual second order intermodulation suppression in third order distortion generators
- Efficient simulation of NPR for the optimum design of satellite transponders SSPAs

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Validation of a new nonlinear HEMT model by intermodulation characterization
- Improved prediction of the intermodulation distortion characteristics of MESFETs and PHEMTs via a robust nonlinear device model
- A 9.2 GHz microwave applicator for the treatment of menorrhagia
- Study on diagnosis for tooth using millimeter-waves
- Microwave tomography. Experimental imaging on two and three dimensional systems
- Accuracy study of FDTD calculations of a dipole antenna irradiating a lossy sphere
- Cellular phones effects on otoacoustic emissions
- A new design procedure for single-layer and two-layer 3-line baluns
- Three-port 3-dB power divider terminated by arbitrary impedances
- Wideband, planar, log-periodic balun

IEEE © 2003

Papers by Issue

- Planar transmission line transformer using coupled microstrip lines
- High Q on-chip passive components for UTSi(R) CMOS technology
- Resonant coupling type microstrip line interconnect using a bonding ribbon and dielectric pad
- Design of planar, single-layer microwave baluns
- A new enhanced coupling structure of microstrip ring resonator with two coupled lines and a slit
- Simultaneous realization of millimeter wave uniplanar shunt stubs and dc block
- Accurate CAD of integrated band-pass and second harmonic band-reject microwave filters
- Modeling of couplings between double ridge waveguide and dielectric loaded resonator
- Synthesis of general topology multiple coupled resonator filters by optimization

IEEE © 2003

Papers by Issue

- High Q TE01 mode DR cavity filters for wireless base stations
- A miniaturized end-coupled bandpass filter using /spl lambda//4 hair-pin coplanar resonators
- FDTD calculation of coupling coefficient between two resonators [band-pass filters]
- Distributed coupling in a circular dielectric disk resonator and its application to a square dielectric disk resonator to fabricate a low-profile dual-mode BPF
- Nonlinear behavior of electromagnetic waves in the YIG film microstrip line
- Low TB radio SAW sensors incorporating chirped transducers and reflectors for wireless pressure sensing applications
- Understanding and modeling the non-monotonic attenuation behavior of PIN limiter diodes
- New compact double balanced monolithic down-converter application to a single chip MMIC receiver for satellite equipment

IEEE © 2003

Papers by Issue

- Unbalance effects of an antiparallel diode pair on the virtual local leakage in an even harmonic mixer
- A K band DRO in coplanar layout with dry and wet etched InP HEMTs
- The distributed oscillator at 4 GHz (1998 Vol. II [MWSYM])
- Broadband monolithic analog phase shifter and gain circuit for frequency tunable microwave active filters
- A stability-ensuring procedure for designing high conversion-gain frequency doublers
- Millimeter-wave monolithic balanced BPSK modulator using a miniaturised backward-wave coupler
- FDTD analysis of a quasi-planar MM-wave frequency doubler
- A modified matrix pencil moment method for multimode waveguide discontinuities analysis
- A simple method to correct the reflection error of absorbing boundary condition in the FDTD analysis of waveguides

IEEE © 2003

Papers by Issue

- Finite difference quasi-TEM mode analysis of coupled coplanar lines used in (M)MIC directional couplers
- Modification of the 3D-TLM scattering matrix to model nonlinear devices in graded and heterogeneous regions
- Simple equivalent circuit modeling of small apertures in transmission line matrix (TLM) method
- Comparison between FDTD graded grids
- The design of parallel coupled line filter with arbitrary image impedance
- Analysis of waveguide E-plane discontinuities and components based on planar-circuit approach
- Waveguide step discontinuities revisited by the generalized network formulation
- Fast and rigorous CAD of phase delay equalizers by mode matching techniques including losses
- Analysis of 3-D cylindrical structures using the finite difference time domain method

IEEE © 2003

Papers by Issue

- Arbitrarily oriented perfectly matched layer in the frequency domain
- Accurate broadband characterization of transmission lines
- A frequency/time domain characterization technique for frequency-translating devices
- Modeling of correlated noise in RF bipolar devices
- A new time-domain measurement technique for microwave devices
- High-resolution electro-optic mapping of near-field distributions in integrated microwave circuits
- A novel vector network analyzer (1998 Vol. II [MWSYM])
- Membrane probe technology for non-destructive thin-film material characterization
- In situ microwave characterization of insulator thin films for interconnects of advanced circuits
- Near-field scanning microwave microscopy: measuring local microwave properties and electric field distributions

IEEE © 2003

Papers by Issue

- Calibration of short range FMCW-radars with network analyzer calibration techniques
- Influence of some imperfect system performances on linearizers
- Self-tracking duplex communication link using integrated retrodirective antennas
- Low cost UTSi technology for RF wireless applications
- Ferroelectric films: nonlinear properties and applications in microwave devices
- A statistical relationship for power spectral regrowth in digital cellular radio
- A 94 GHz aperture-coupled micromachined microstrip antenna
- Novel active antenna amplifying arrays
- Low profile, 2D-scanning MMW antenna controlled by two currents
- A new optical-microwave double mixing method
- Self-bias control of electroabsorption waveguide modulator

IEEE © 2003

Papers by Issue

- A novel K-band tunable microstrip bandpass filter using a thin film HTS/ferroelectric/dielectric multilayer configuration
- A novel approach to modeling the nonlinear propagation characteristics of HTS planar transmission lines
- A two-mode dielectric rod resonator method for measuring surface impedance of high-T/sub c/ superconductors
- New classes of microstrip resonators for HTS microwave filters applications
- Tunable superconducting band-stop filters
- Design of cryogenic (4.2 K) X-band HEMT oscillator for Josephson voltage standard
- Micro-coplanar striplines-new transmission media for microwave applications
- Thin film tunnels versus air-bridges in coplanar waveguide discontinuities
- Power-combining grids for frequency tuning and beam control applications
- A low-cost active transceiving antenna

Click on title for a paper summary.

IEEE © 2003

Papers by Issue

- A new mixer for sensor applications
- A direction sensitive, integrated, low cost Doppler radar sensor for automotive applications
- Finite element method for rigorous design of microwave devices using photonic band gap structures
- Microwave properties of coplanar transmission lines and filters on diamond from 1-120 GHz
- Theoretical and experimental investigation of bias and temperature effects on high resistivity silicon substrates for RF applications
- Near and far field characterization of radiation from ultra-fast electronic systems
- Edge element modeling of 3D interconnection structures
- Millimeterwave characteristics of flip-chip interconnects for multi-chip modules
- Development of a package utilizing an electromagnetic coupling structure

IEEE © 2003

Papers by Issue

- Avoiding cross talk and feed back effects in packaging coplanar millimeter-wave circuits
- RF performance of a 77 GHz monolithic CPW amplifier with flip-chip interconnections
- The thermal benefits of diamond enhanced plastic packages for microwave applications
- Development of millimeter wave multi-layer organic based MCM technology
- Class E high-efficiency power amplifiers, from HF to microwave
- A low-cost class-E power amplifier with sine-wave drive
- Capabilities of low-cost high voltage RF power MOSFETs at HF and VHF
- A novel high frequency single-sideband transmitter using constant-envelope modulation
- Ultra linear/feedforward amplifier design
- Harmonic balance analysis for systems with circuit-field iterations

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Global time-domain full-wave analysis of microwave FET oscillators and self-oscillating mixers
- RF power detector using a silicon MOSFET
- An X-band 2 kW CW GaAs FET power amplifier for continuous wave illuminator application
- The design and analysis of multi-megawatt distributed single pole double throw (SPDT) microwave switches
- Use of a magnetron as a high-gain, phased-locked amplifier in an electronically-steerable phased array for wireless power transmission
- A novel oscillating rectenna for wireless microwave power transmission
- Index of Authors (1998 Vol. II [MWSYM])

Papers by Issue

1998 Vol. III [MWSYM]

- Front Cover (1998 Vol. III [MWSYM])
- Table of Contents (1998 Vol. III [MWSYM])
- Technical Program Schedule (1998 Vol. III [MWSYM])
- Frequency hopping evanescent mode filter
- Optimization of noise performance for various topologies of microwave active recursive filters
- A GaAs MMIC active filter with low noise and high gain
- Low loss micromachined filters for millimeter-wave telecommunication systems
- Micromachined filters on synthesized substrates
- A design of novel asymmetrically coupled CPW bandpass filter using TEM analysis
- A new miniature uniplanar lowpass filter using series resonators
- Miniature P-code GPS translator

IEEE © 2003

Papers by Issue

- A broadband linearizer for Ka-band satellite communication
- Procedure for measurements and statistical processing of upstream channel noise in HFC-networks
- Novel microwave vibration monitoring system for industrial power generating turbines
- Integrated 5.8 GHz phased array antenna, for electronic toll collection
- High spectral purity millimetre-wave modulated optical signal generation using fibre grating lasers
- Optically powered remote optical field sensor system using an electroabsorption-modulator
- Third-order intermodulation distortion in an optical downconverter
- Distributed velocity-matched 1.55 /spl mu/m InP travelling-wave photodetector for generation of high millimeterwave signal power
- High power, high frequency traveling wave heterojunction phototransistors with integrated polyimide waveguide

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Tapered slot antenna integrated with velocity-matched distributed photodetector
- InP-based Gilbert Cell phase detector for generation of stable dense wavelength division multiplexing channel offsets using an optical phase-locked loop
- A wavelet based time domain moment method for the analysis of three-dimensional electromagnetic fields
- Electromagnetic propagation into reinforced-concrete walls
- Design of photonic band-gap substrates for surface waves suppression
- Electromagnetic field coupling to multiconductor transmission lines in multi-layered media
- Efficient analysis of microstrip radiation by the TLM integral equation (TLMIE) method
- Fast subgrid FD-TD matrix pencil technique for the rigorous analysis of resonant 3D microwave structures

IEEE © 2003

Papers by Issue

- Efficient hybrid mode-matching/-finite-element (MM/FE) method for the design of waveguide components and slot radiators
- Design of embedded passive components in Low-Temperature Cofired Ceramic on Metal (LTCC-M) technology
- Design and performance of UHF band inductors, capacitors and resonators using LTCC technology for mobile communication systems
- 3D microwave modules for space applications
- An embedded transmission line micro-ball grid array X-band power amplifier
- Methodology for creating embedded transmission line 90/spl deg/ bend and shunt capacitor models
- NRD guide couplers combined with microwave integrated circuits in side-by-side alignment
- A new planar type dielectric resonator for microwave filtering

IEEE © 2003

Papers by Issue

- K-band planar type dielectric resonator filter with high-/spl epsiv/ ceramic substrate
- Dielectric combline resonators and filters (1998 Vol. III [MWSYM])
- High-temperature superconductor-shielded high power dielectric dual-mode filter for applications in satellite communications
- Novel helical resonator filter structures
- Synthesis of delay filters
- DC-to-mm-wave absolute potential measurements inside digital microwave ICs using a micromachined photoconductive sampling probe
- Mapping the thickness of conducting layers by a mm-wave near-field microscope
- Localized circuit probing with a combined Schottky diode/scanning force microscope
- Accurate extraction method for 1/f-noise parameters used in Gummel-Poon type bipolar junction transistor models

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- W band silicon dielectric resonator for semiconductor substrate characterization
- Measurement of the broadband microwave absorption and shielding characteristics of a conductive polymer
- Analytical expressions of transient thermal response of self-heating semiconductor devices
- New array capabilities by photonic beamforming
- Optically controlled serially fed phased array radar
- Beam-forming network characteristics of spatial optical signal processing array antenna for multibeam reception
- Ultimate beam capacity limit of fibre grating based true-time-delay beam-formers for phased arrays
- Optical beamforming network based on chirped fiber gratings continuously variable true-time-delay lines
- All-optically controlled beam-scanning array for antenna remoting applications
- Microwave phase conjugation using optically interconnected phased arrays

IEEE © 2003

Papers by Issue

- Formulation of a Haar-wavelet-based multi-resolution analysis similar to the 3-D FDTD method
- Nonlinear circuit characterization using a multiresolution time domain technique (MRTD)
- Time domain characterization of coupled electromagnetic/thermal phenomena for material processing
- A fully integrated multiconductor model for TLM (1998 Vol. III [MWSYM])
- A systematic approach to the problem of equivalent circuit model generation
- Analysis of MQW and anisotropic guided wave structures using a full-wave 2D TLM-based FD-TD method
- Partially prism-gridded FDTD analysis for layered structures of transversely curved boundary
- A modified feed-forward technique for mixer linearization
- A new FET frequency multiplier
- Distributed broadband frequency translator

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A compact subharmonically pumped MMIC self oscillating mixer for 77 GHz applications
- Low cost coplanar 77 GHz single-balanced mixer using ion-implanted GaAs Schottky diodes
- A millimeter-wave broadband monolithic even harmonic image rejection mixer
- Microwave regenerative dividers with low phase noise
- A Ka-band monolithic quasi-optic amplifier
- 20 watt spatial power combiner in waveguide
- A 10-GHz high-efficiency lens amplifier array
- A CPW fed microstrip patch quasi-optical amplifier array
- Analysis and measurement of hard horn feeds for the excitation of quasi-optical amplifiers
- An integrated electromagnetic and nonlinear circuit simulation environment for spatial power combining systems
- W-band on-wafer load-pull measurement system and its application to HEMT characterization

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Characterization of W-band MMIC power amplifier using on-wafer pulsed power test
- Accuracy of lumped-element calibrations for four-sampler vector network analyzers
- Complete 3-port measurement of microwave mixers using a non-linear vectorial network analyser
- Measuring transistor dynamic load lines and breakdown currents under large-signal high-frequency operating conditions
- A microwave multisine with known phase for the calibration of narrowbanded nonlinear vectorial network analyzer measurements
- A single six-port based automated network analyzer
- Broadband millimeter-wave fiber-radio network incorporating remote up/downconversion
- A wireless LAN at 60 GHz - novel system design and transmission experiments
- Intrinsic microwave phase noise of fiber-optic links

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Photonic remoting of the receiver of an ultra-high dynamic range radar
- New carrier generation approach for fiber-radio systems to overcome chromatic dispersion problems
- Compensation of fiber dispersion in an optical mm-wave system in the 60 GHz-band
- Propagation in a circular waveguide periodically loaded with dielectric disks
- High-Q rectangular cavities and waveguide filters using periodic metalo-dielectric slabs
- MOL-mode analysis with precise resolution by an enhanced and generalized line algorithm
- Analysis of MMIC junctions and multiports by the method of lines
- Mesh grading and cutoff frequencies in the frequency-domain TLM method
- A full-wave approach to the modeling of discontinuities of real conductors in planar lossy lines for MMIC applications

IEEE © 2003

Papers by Issue

- An impedance matrix transformation for planar circuit integral equation solvers
- A simplified MPIE analysis for planar circuits with N-fold rotational symmetry and lumped elements
- Micromechanical electrostatic K-band switches
- An MMIC active phase shifter using a variable resonant circuit
- Digital vector control chip set at Q band for communication phased array
- An analogue frequency-division approach for subharmonic generation in microwave VCOs
- Subharmonically injection locked 94 GHz MMIC HEMT oscillator using coplanar technology
- The dielectric resonator power combiner oscillator: a new design for micro- or millimeter-wave development
- A method for computing adjacent-channel spectral energy in cellular power amplifiers

IEEE © 2003

Papers by Issue

- MMIC-compatible terminal protection device
- Investigation and application to LNA of an InP-HEMT operated at ultra low DC power levels
- Intrinsic limitations of GaAs device cooling for microwave low noise applications
- MOTT SiGe SIMMWICs
- Low-frequency noise in GaAs and InP Schottky diodes
- Flip-chip mounted silicon-based Impatt diodes for automotive applications
- An advanced hybrid assembly technique for 40 Gbit/s-modules including surface and feed-through capacitors
- Wideband transmit modules designed for production
- A low noise NMOSFET with overlaid metal gate
- Characterization of GaInP avalanche transit time device in millimeter-wave frequencies
- A fully automated high-accuracy RF/IF test system for millimeter- and submillimeter-wave mixers

IEEE © 2003

Papers by Issue

- 120 and 60 GHz monolithic InP-based HEMT diode sub-harmonic mixer
- A low-noise 2.5 THz heterodyne receiver with tunable reflector antenna for atmospheric OH-spectroscopy
- Implementing PML boundary conditions in TLM
- Efficient phenomenologically-based 1-D evaluation of the impedance matrix in a MPIE analysis of planar microstrip circuits
- 3D subgrid technique for the finite difference method in the frequency domain
- Modal analysis of the slotted-circular coaxial cavities used in space-harmonic millimeter wave magnetrons
- Efficient integral equation formulations for admittance or impedance representation of planar waveguide junctions
- Efficient admittance matrix representation of a cubic junction of rectangular waveguides
- A general-purpose circuit model of interdigital capacitor for accurate design of low-loss microstrip circuit

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A trust region aggressive space mapping algorithm for EM optimization (1998 Vol. III [MWSYM])
- A robust and efficient method for the frequency domain analysis of non-uniform, lossy multi-line transmission structures
- A hierarchical neural network approach to the development of library of neural models for microwave design
- Automated design of microwave devices using full EM optimization method
- Efficient CAD of discontinuities between elliptical and circular waveguides
- Microwave module design applying a global electromagnetic analysis
- A partitioning approach to large scale electromagnetic problems applied to an array of microstrip coupled slot antennas
- A new approach to the optimization of passive microwave structures on the basis of a FDTD-method

IEEE © 2003

Papers by Issue

- The mutual coupling effects in large microstrip leaky-mode array
- Dispersion characteristics of leaky waves on lossless and lossy slotlines
- Fast and efficient mode-matching analysis of ridged circular waveguide polarizers
- A novel high-Q image guide resonator using band-gap structures
- Surface-wave elimination in integrated circuit structures with artificial periodic materials
- Development of the "laminated waveguide"
- Phase noise effect on frequency measurement error of IFM receivers
- Development of vertical interconnect surface mount packages
- RF and mechanical characterization of flip-chip interconnects in CPW circuits with underfill (1998 Vol. III [MWSYM])

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Design and implementation of a microwave packaging materials database
- Characterization of plated via hole fences for isolation between stripline circuits in LTCC packages
- Ultra low-cost membrane technology for millimeterwave applications
- A fast frequency switching synthesizer with an integration circuit
- InP heterojunction bipolar transistor decision circuits
- A wide-band low-distortion ferrimagnetic attenuator
- CMOS RF circuits for integrated wireless systems
- Modeling of spiral inductors on lossy substrates for RFIC applications (1998 Vol. III [MWSYM])
- Sub-micron silicon RFIC technologies: "an overview"
- Extraction of parasitic parameters of dummy devices on different silicon substrates (1998 Vol. III [MWSYM])
- Parasitic-aware design and optimization of CMOS RF integrated circuits (1998 Vol. III [MWSYM])

IEEE © 2003

Papers by Issue

- A two-dimensional Newton iterative scheme for high contrast full-scale microwave tomography
- Calibration of a lens-focused reflectometer by means of a mixed time/frequency domain method
- Phase-locking of grid oscillators
- Spatial power combining of Gunn diodes using an overmoded waveguide resonator at millimeter wavelengths
- Grid oscillators with photonic-crystal reflectors
- Surface-wave coupling of active antennas for homodyne sensor systems (1998 Vol. III [MWSYM])
- Broadband power amplifier integrated with slot antenna and novel harmonic tuning structure
- Cavity induced polarisation switching in a slot-loop active antenna
- Submillimeter-wave sideband generation using a planar diode array
- A planar active lens oscillator on a dielectric slab
- 50-GHz interconnect design in standard silicon technology

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Accurate characteristic impedance measurement on silicon
- A test board for multiport immittance measurement and characterization of RF-IC packages
- Analysis of microvia interconnects
- Multi-wire microstrip interconnections: a systematic analysis for the extraction of an equivalent circuit
- Applications of microwave radar to improving aviation safety and efficiency
- Index of Authors (1998 Vol. III [MWSYM])

IEEE © 2003

Papers by Issue

1999 Vol. I [MWSYM]

- Front Cover (1999 Vol. I [MWSYM])
- Table of Contents (1999 Vol. I [MWSYM])
- Technical Program Schedule (1999 Vol. I [MWSYM])
- 47 GHz SiGe-MMIC oscillator
- A 50 GHz SiGe HBT push-push oscillator
- V-band planar Gunn oscillators and VCOs on AlN substrates using flip-chip bonding technology
- A monolithic W-band HEMT VCO with feedback topology
- A line-unified-FET combiner/divider with built-in 3D amplifiers (LUFET-amp) and its application to a very small injection-locked oscillator
- Analysis of N-furcation in elliptical waveguides via the generalized network formulation
- Novel analytic gradient evaluation techniques for optimization of microwave structures

IEEE © 2003

Papers by Issue

- CAD-oriented equivalent circuit modeling of on-chip interconnects for RF integrated circuits in CMOS technology
- Unified CAD-oriented circuit model of finite-ground coplanar waveguide gap structure for uniplanar M(H)MICs
- Modeling and analysis of multilevel spiral inductors for RFICs
- Exact noise parameters of lossy transmission lines
- Spurious effects due to the excitation of leaky modes and the continuous spectrum from a practical source on stripline
- Significant contribution of improper-real solution to the fields excited by a practical source in printed-circuit transmission lines
- Wave effects in Si-micromachined multilayer guiding structures operating at W-band
- Guidance characteristics of two-dimensionally periodic impedance surface
- Leaky properties of microstrip above a perforated ground plane

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Leakage suppression in stripline circuits using a 2-D photonic bandgap lattice
- A 2.4 GHz CMOS LC VCO using micromachined variable capacitors for frequency tuning
- Nonlinear modeling of a SiGe HBT with applications to ultra low phase noise dielectric resonator oscillators
- Low supply voltage high efficiency MMIC oscillator at C-band
- An extremely low noise, phase lockable, sapphire loaded cavity based microwave oscillator
- Thermally stabilized flip-chip mounted monolithic oscillators using CPW technology
- W-band InP wideband MMIC LNA with 30 K noise temperature
- Low noise metamorphic HEMT devices and amplifiers on GaAs substrates
- Physics-based FET noise model applicable to millimeter-wave frequencies

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A general parameter extraction method for transistor noise models with correlation
- Design of ultra low noise mixer using an analytical formulae of the noise figure
- 12% efficiency and 9.5 dBm output power from InP-based heterostructure barrier varactor triplers at 250 GHz
- Demonstration of a 630-GHz photomixer used as a local oscillator
- A compact V-band 3DMMIC single-chip down-converter using photosensitive BCB dielectric film
- A planar varactor array multiplier chain to 300 GHz
- A dielectric resonator balanced second harmonic quasi-optical self oscillating mixer for 60 GHz applications
- Robust training of microwave neural models
- Neuromodeling of microwave circuits exploiting space mapping technology
- A global modeling approach using artificial neural network

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- An accurate distributed small signal FET model for millimeter-wave applications
- Accurate analysis of millimeter-wave MMIC power amplifier using distributed FET model
- A field theoretic approach to the analysis of practical coupled dielectric resonators
- High resolution resonator method for accurate measurement of inhomogeneous dielectric constants
- A leaky-mode S-parameter extraction technique for efficient design of the microstrip line leaky-wave antenna
- An unconventional circuit model for an efficient description of impedance and radiation features in printed-circuit leaky-wave structures
- A new asymmetrically grooved NRD guide leaky-wave antenna for millimeter-wave application
- Differential precoder IC modules for over-20-Gbit/s optical duobinary transmission systems

IEEE © 2003

Papers by Issue

- Novel frequency division technique for very low power GaAs monolithic microwave prescalers
- A 10-bit, 500 MS/s analog-to-digital converter
- A novel clock recovery circuit for fully monolithic integration
- Analysis of interconnections with BCB for high-speed digital applications
- Multi-chip transmitter/receiver module using high dielectric substrates for 5.8 GHz ITS applications
- Antenna switch duplexer for dualband phone (GSM/DCS) using LTCC multilayer technology
- Optimization and miniaturization of a filter/antenna multi-function module using a composite ceramic-foam substrate
- High performance L-band ball grid array power and receive amplifier module set for satellite phone handsets
- 12 GHz coplanar quasi-monolithic oscillator
- K-band receiver front-end IC integrating micromachined filter and flip-chip assembled active devices
- A 36 W, V-band, solid state source

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- W-band InGaP/GaAs HBT MMIC frequency sources
- Monolithic millimeter-wave balanced bi-phase amplitude modulator in GaAs/InGaP HBT technology
- 94 and 150 GHz coplanar waveguide MMIC amplifiers realized using InP technology
- A cryogenic focal plane array for 85-115 GHz using MMIC preamplifiers
- CAD and optimization of compact ortho-mode transducers
- An aggressive approach to parameter extraction
- A hybrid aggressive space mapping algorithm for EM optimization
- Input variable space reduction using dimensional analysis for artificial neural network modeling [of MMICs]
- Combining neural networks and iir filters for circuit microwave design and optimization in the time domain (1999 Vol. I [MWSYM])
- Millimeter-wave FMCW/monopulse radar front-end for automotive applications

IEEE © 2003

Papers by Issue

- Application of a 25 GHz FMCW radar for industrial control and process level measurement
- Advanced millimeterwave speed sensing system based on low-cost active integrated antennas
- Novel 77 GHz flip-chip sensor modules for automotive radar applications
- System aspects for future automotive radar
- Optimization of distributed MEMS phase shifters
- Coplanar 4-bit HEMT phase shifters for 94 GHz phased array radar systems
- A 12/24 GHz frequency doubler MMIC using resistive series feedback circuit
- A decade bandwidth resistive FET singly balanced MIC mixer
- A Ku-band 6-bit digital attenuator with integrated serial to parallel converter
- Ultra-compact 1 W GaAs SPDT switch IC
- Progress in high power SiC microwave MESFETs

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A compact, high efficiency, 120 Watts GaAs power amplifier module for the 3rd generation cellular base stations
- Designing high-power limiter circuits with GaAs PIN diodes
- A comparison of high power solid state GaAs FETs versus microwave power modules from a user's perspective: the Cooperative Engagement Capability program
- Increasing TWTA multi-carrier saturated power with limiters and linearizers
- Design of an electronically-steerable phased array for wireless power transmission using a magnetron directional amplifier
- The generation of 400 MW RF pulses at X-band using resonant delay lines
- Class-F amplifier loading networks: a unified design approach
- An ultra-broadband power amplifier using dynamically-controlled linearisation

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- 500 W, class E 27.12 MHz amplifier using a single plastic MOSFET
- Frequency limitation of a high-efficiency class E tuned RF power amplifier due to a shunt capacitance
- An LDMOS VHF class E power amplifier using a high Q novel variable inductor
- Fast simulation of large-scale planar circuits using an object-oriented sparse solver
- Passive closed-form transmission-model for general purpose circuit simulators
- A stable and efficient admittance method for the analysis of complex waveguide circuits
- Coupling algorithm for MMICs in multi-chip assemblies with baffles
- Circuit simulators as a tool for field simulations
- Future radiometer systems for Earth remote sensing
- MMIC based MMW radiometers for remote sensing
- WindSat-satellite-based polarimetric microwave radiometer

IEEE © 2003

Papers by Issue

1999 Vol. II [MWSYM]

- Front Cover (1999 Vol. II [MWSYM])
- Table of Contents (1999 Vol. II [MWSYM])
- Technical Program Schedule (1999 Vol. II [MWSYM])
- Temperature dependent MOSFET RF large signal model incorporating self heating effects
- A new dynamic electro-thermal nonlinear model for silicon RF LDMOS FETs
- Noise characterization of MOSFETs for RF oscillator design
- Non-quasi-static large signal transient model for heterojunction bipolar transistors
- Compensation of self-heating effect in DC and pulse characteristics of HBTs
- An accurate physics-based large-signal model for high power SiGe BJTs
- Three-dimensional, W-band circuits using Si micromachining

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- 3D multilayer monolithic microwave (M/sup 3/) passive transmitter module
- AlN HTCC super miniaturized millimeterwave transceiver MCMs, the novel structure for the high reliability, the high performance and the mass productivity
- A ceramic planar 77 GHz antenna array
- Hybrid integrated fibre-amplifier-antenna module for radio applications at 60 GHz
- MEMS millimeterwave components
- Ka-band low loss and high power handling GaAs PIN diode MMIC phase shifter for reflected-type phased array systems
- A Ka-band fully integrated transceiver multi-chip-module based on aluminum nitride multi-layer LCC package with the waveguide interface
- Miniature 60 GHz transmitter/receiver modules on AlN multi-layer high temperature co-fired ceramic
- 119 GHz MMIC radiometer for the (IMAS) integrated multispectral atmospheric sounder

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Silicon UTSi/sup (R)/ CMOS RFIC for CDMA wireless communications systems
- A novel high-Q inductor based on Si 3D MMIC technology and its application (1999 Vol. II [MWSYM])
- 1.9 GHz/5.8 GHz-band on-chip matching Si-MMIC low noise amplifiers fabricated on high resistive Si substrate (1999 Vol. II [MWSYM])
- An S-band low-noise amplifier with self-adjusting bias for improved power consumption and dynamic range in a mobile environment (1999 Vol. II [MWSYM])
- A 5.2 GHz variable gain LNA MMIC for adaptive antenna combining (1999 Vol. II [MWSYM])
- Communication networks for the new millennium
- A large-signal model of self-aligned gate GaAs FETs for high-efficiency power amplifier design
- Large signal IMD sweet spots in microwave power amplifiers
- Generalized Kushner analysis of RF power amplifiers
- An empirical-table based FET model

IEEE © 2003

Papers by Issue

- Nonlinear FET model for intermodulation distortion analysis of resistive mixers
- Large-signal characteristics of AlGaN/GaN power MODFETs
- A 60-watt X-band spatially combined solid-state amplifier
- A rectangular tem waveguide with photonic crystal walls for excitation of quasi-optical amplifiers
- A three-dimensional quasi-optical source
- A 4 watt Ka-band quasi-optical amplifier
- A balanced diode grid mixer
- A full-wave system simulation of a folded-slot spatial power combining amplifier array
- Modelling of quasi-optical arrays
- 2-V 0.8-/spl mu/M CMOS monolithic RF filter for GSM receivers
- Thick metal CMOS technology on high resistivity substrate for monolithic 980 MHz and 1.9 GHz CMOS LNAs

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- High frequency performance of a fully depleted 0.25-/spl mu/m SOI CMOS technology
- Via hole technology for microstrip transmission lines and passive elements on high resistivity silicon
- Long-term stability of passive millimeterwave circuits on high-resistivity silicon substrates
- Thermoacoustic computed tomography of the breast at 434 MHz
- Study on the mass averaging of SAR distributions
- Evaluation of the power absorbed in subjects exposed to EM fields in partially closed environments by using a combined analytical-FDTD method
- New generation of endocavitary applicators for microwave thermotherapy in urology
- New thermometer for RF and microwave thermal therapy using MMIC in Si BJT VCO type
- The market for photonics in the 21/sup st/ century

IEEE © 2003

Papers by Issue

- Photonic technologies and subsystems for terabit communications
- Device development for terabit systems
- Mixed material integration for power amplifier MMICs
- A wideband CPW-to-microstrip transition for millimeter-wave packaging
- An equivalent circuit for the double bonding wire interconnection
- Optimization of flip-chip interconnects for millimeter-wave frequencies
- Novel three-dimensional vertical interconnect technology for microwave and RF applications
- Planar digital-beamforming antenna for satellite navigation
- W-band CTS planar array
- A retrodirective array using balanced quasi-optical FET mixers with conversion gain
- A high efficiency slot antenna push-pull power amplifier

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A 10 GHz high-efficiency active antenna
- A perpendicularly-fed patch array for quasi-optical power combining
- A slotted waveguide quasi-optical power amplifier
- Low cost MMIC DBS chip sets for phased array applications
- High-performance AlGaAs/InGaAs/GaAs PHEMTs for K and Ka-band applications
- Optimal design and experimental characterization of high-gain GaInP/GaAs HBT distributed amplifiers
- W-band amplifier fabricated by optical stepper lithography
- Fully coupled electro-thermal simulation of MMICs and MMIC arrays based on a physical model
- Computational electromagnetic exploration of B-spline shaped microwave impedance matching circuits using evolutionary algorithms and information theory
- Analysis of microwave and micromachined filters by the method of lines with nonequidistant discretization

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Designing high-performance finline tapers with vector-based optimization
- Design of end-coupled band-pass filters in multilayer microstrip configurations
- Modeling of microwave circuits exploiting space derivative mapping
- Time domain modeling of PIN control and limiter diodes
- K-band hair-pin resonator oscillators
- 24-27 GHz dielectrically stabilized oscillators with excellent phase noise properties utilizing InP/InGaAs HBTs
- Improving balanced frequency doublers through a design approach insensitive to residual asymmetries
- Room temperature thin film Ba/sub x/Sr/sub 1-x/TiO/sub 3/ Ku-band coupled microstrip phase shifters: effects of film thickness, doping, annealing and substrate choice
- Influence of 2 GHz harmonic load-pull on HBT and MESFET output power and efficiency

IEEE © 2003

Papers by Issue

- Large-signal model of triple-gate MESFET/PHEMT for switch applications
- Measurement based modeling of amplifiers in deep saturation
- Easy and accurate empirical transistor model parameter estimation from vectorial large-signal measurements
- Validation of power amplifier nonlinear block models
- Multi-tone intermodulation distortion performance of 3rd order microwave circuits
- Harmonic balance analysis of two bifurcation routes to chaos [frequency doubler]
- Modulation-oriented harmonic balance based on Krylov-subspace methods
- A high efficiency and low distortion GaAs power MMIC design in the wide load impedance range by extended use of load-pull method
- Adaptive preconditioners for the simulation of extremely nonlinear circuits using harmonic balance

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A Volterra mapping-based S-parameter behavioral model for nonlinear RF and microwave circuits and systems
- Full-wave design and optimization of MM-wave diode-based circuits in finline technique
- Transient analysis of a spatial power combining amplifier
- An asymmetric GaAs MMIC dual-gate mixer with improved intermodulation characteristics
- Comparative study of hot-electron reliability of PHEMT vs. MESFET for high efficiency power amplifiers
- Resistive FET mixer conversion loss and IMD optimization by selective drain bias
- High efficiency power amplifier with novel PBG ground plane for harmonic tuning
- Drive modulation in Kahn-technique transmitters
- Current dumping: a novel linearisation technique for RF power transistors
- Cascode-delay-matched distributed amplifiers for efficient broadband microwave power amplification

IEEE © 2003

Papers by Issue

- Design and validation of the load networks for broadband class E amplifiers using nonlinear device models
- Planar C-band DC-DC converter
- BiCMOS MOSFET high frequency features for radiofrequency (RF) applications. Hot carrier effects on dynamic and noise parameters, impact on RF design features
- A monolithic LSB rejection up converter for PCS
- GaAs MESFET dual-gate mixer with active filter design for Ku-band applications (1999 Vol. II [MWSYM])
- A 3 V GaAs MESFET monolithic transmitter with cross-coupled common-source, common-gate pair linear mixer for cellular hand-held phones (1999 Vol. II [MWSYM])
- Author Index (1999 Vol. II [MWSYM])

IEEE © 2003

Papers by Issue

1999 Vol. III [MWSYM]

- Front Cover (1999 Vol. III [MWSYM])
- Table of Contents (1999 Vol. III [MWSYM])
- Technical Program Schedule (1999 Vol. III [MWSYM])
- Lateral microwave transformers and inductors implemented in a Si/SiGe HBT process
- Loss considerations for lumped inductors in silicon MMICs
- Broadband design consideration of uniplanar double-Y baluns for hybrid and monolithic integrated circuits
- Hybrid FGCPW/CPS scheme in the building block design of low-cost uniplanar and multilayer circuit and antenna
- Leakage suppression in coplanar waveguide circuits by patterned backside metallization
- Photonic signal processing for microwave applications
- Simultaneous electro-optical upconversion, remote oscillator generation and air transmission of multiple optical WDM channels for a 60 GHz high capacity indoor system

IEEE © 2003

Papers by Issue

- A four channel angle of arrival detector using optical downconversion
- Time-domain optical sampling of nonlinear microwave amplifiers
- Analytical design of contiguous multiplexers
- Cascaded triplet filter design using cascade synthesis approach
- General coupled resonator filters design based on canonical asymmetric building blocks
- Resonant aperture filters in rectangular waveguide
- Microwave breakdown in air-filled resonators
- A novel uniplanar compact PBG structure for filter and mixer applications
- Terahertz electronics for chemical and biological warfare agent detection
- GaAs devices and circuits for terahertz applications
- Potential and capabilities of two-terminal devices as millimeter- and submillimeter-wave fundamental sources

IEEE © 2003

Papers by Issue

- Terahertz applications of plasma wave electronics
- THz imaging via electro-optic effect
- Fully monolithic 4 watt high efficiency Ka-band power amplifier
- A high power broadband monolithic power amplifier for Ka-band ground terminals
- 35% PAE 6 W Ku-band power amplifier module
- A compact 6 to 18 GHz power amplifier module with 10 W output power
- A 68% P.A.E. power pHEMT for K-band satellite communication system
- A compact network for eliminating parametric oscillations in high power MMIC amplifiers
- A push-pull power MMIC operating at K/Ka-band frequencies
- Effect of out-of-band terminations on intermodulation distortion in common-emitter circuits

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- The method of envelope currents for rapid simulation of weakly nonlinear communications circuits
- Spectral regrowth in microwave amplifiers using transformation of signal statistics
- Nonlinear design of microwave oscillators based on electromagnetic analysis
- A unified approach for the linear and nonlinear stability analysis of microwave circuits using commercially available tools
- Broadband linearization of a Mach-Zehnder electro-optic modulator
- Laminated photonic band structures with high conductivity and high transparency
- The effects of photocurrent on microwave properties of electroabsorption modulators
- Microwave modeling and characterization of thick coplanar waveguides on oxide-coated lithium niobate substrates for electro-optical applications

IEEE © 2003

Papers by Issue

- Four-branch optical frequency shifter using coupled inverted slot lines at 60 GHz
- Millimeter-wave sub-carrier optical modulation, photodetection and integration with antenna for optic fiber link system
- Dual-mode filters with conductor loaded dielectric resonators
- Thin film layered electrode for 2 GHz band cellular base station
- Filters using a new type of resonator: the partially-metallized dielectric slug
- Helical ceramic resonator structures
- An elliptical cavity for triple-mode filters
- Temperature compensation of combline resonators and filters
- Digital and analog satellite/millimeter-wave transmission link
- Design and development of the frequency generation system for the ACeS spacecraft

IEEE © 2003

Papers by Issue

- A 2 watt Ku-band linear (multi-carrier) transmit module for VSAT applications
- A high-performance miniaturized 6/4-GHz satellite receiver using MMIC technology
- Impact of vegetation on the performance of 28 GHz LMDS transmission
- Future technologies for commercial and defense telecommunication electronics
- Microwave MEMS technology for next-generation wireless communications
- Applications of Si/SiGe technology for high-speed communications systems
- GaN electronic devices for future systems
- A 150 W E-mode GaAs power FET with 35% PAE for W-CDMA base station
- Wide-band CDMA highly-efficient heterojunction FET over wide range output power with DC-DC converter

IEEE © 2003

Papers by Issue

- A buried p-gate heterojunction field effect transistor for a power amplifier of digital wireless communication systems
- 0.2 cc HBT power amplifier module with 40% power-added efficiency for 1.95 GHz wide-band CDMA cellular phones
- A novel design concept for a super compact power amplifier module (SCPAM) using a multilayer substrate
- Range demonstration of an ultrawideband, fiber-optic, array transmitter with dynamic null steering
- Coherent photonic integrated beamformer for phased-array antennas
- Effects of optical modulation on continuously variable millimeter-wave delay lines based on optical fiber gratings
- Four channel MMIC-based transmitter module for RF/optical subcarrier multiplexed communications
- A design of the novel coupled line low-pass filter with attenuation poles
- Computer aided design of reentrant coaxial filters including coaxial excitation

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Band-pass filters with self-filtering resonators: a solution to control spurious resonances
- A /spl lambda//2 CPW resonator BPF with multiple attenuation poles and its miniaturization
- Balanced-input-output configuration of laminated planar filter suitable for next-generation super-compact portable telephones
- Low temperature cofired ceramic (LTCC) ridge waveguide bandpass filters
- Design and measurement of ferrite coupled line circulators
- Low cost ferrite toroid phase shifter for broadband applications
- Temperature stabilization of a lumped element circulator without an apparent compensating element
- Lumped element circulator (LEC) with variable couplings
- The millimeter wave magneto-optics: new method for characterization of ferrites in the millimeter wave range
- Frequency and phase selective magnetostatic wave switch

IEEE © 2003

Papers by Issue

- Commercial communications satellites: history and highlights
- Microwaves at Gilfillan division, ITT industries: past, present, and future
- Greater than 70% PAE enhancement-mode GaAs HJFET power amplifier MMIC with extremely low leakage current
- High breakdown voltage InAlGaAs/In/sub 0.32/Ga/sub 0.68/As metamorphic HEMT for microwave and MM-wave power applications
- Small- and large-signal operation of X-band CE and CB SiGe/Si power HBT's
- High efficiency 0.4 /spl mu/m gate LDMOS power FET for low voltage wireless communications
- Full-duplex broadband fiber-wireless system incorporating baseband data transmission and a novel dispersion tolerant modulation scheme
- Demonstration of dispersion-tolerant 34 Mbit/s data transmission in electro-optically upconverted 28 GHz LMDS fiber-optic link

IEEE © 2003

Papers by Issue

- Multi-channel upstream data transmission in a millimeter-wave fiber-radio system
- Novel fiber fed WDM links for millimeter-wave wireless access systems
- Third-order intermodulation distortion in an optical multichannel mm-wave system in the 60 GHz-band
- Analysis and optimization of noise and gain performances for various topologies of microwave ring resonator planar active filters
- Low noise and frequency tunable microwave active recursive filters using power summation principles
- A high-performance integrated K-band diplexer (1999 Vol. III [MWSYM])
- Millimeter-wave micromachined tunable filters
- Back-to-back microstrip open-loop resonator filters with aperture couplings
- Antennas on high-impedance ground planes

IEEE © 2003

Papers by Issue

- Effective dielectric constant of the embedded transmission line (ETL)-a multilayer stripline-like structure
- New boundary and edge conditions for real planar circuits
- FDTD-analysis of 3D-optical and optoelectronic waveguide-based devices
- Spurious leaky mode solutions and experimental verification of the second leaky wave
- Accurate full wave analysis of open hemispherical resonators loaded with dielectric layers
- Generalized Y-matrix of arbitrary 3D waveguide junctions by the BI-RME method
- Mode-matching analysis of general waveguide multiport junctions
- Locally conformed subgrid FD-FD technique for the analysis of 3D waveguide structures with curved metallic objects
- Simulation of large electromagnetic MMICs using time-domain impedance concept

IEEE © 2003

Papers by Issue

- Parallel higher-order-compact time-domain solutions to Maxwell's equations
- Far field computation for the FDTD method in curvilinear coordinates
- Successful applications of PML-ABC to the symplectic FDTD scheme with 4th-order accuracy in time and space
- TLM analysis of microstrip patch antenna on ferrite substrate
- An algorithm for realizing Yee's FDTD-method in the wavelet domain
- Mixed circuit/electromagnetic analysis of radiation from high-speed interconnects
- Exact, conformal-mapping models for the high-frequency losses of coplanar waveguides with thick electrodes of rectangular or trapezoidal cross section
- Analysis of stripline right-angle bend with slant-wise corner cut based on eigenmode expansion method and Foster-type equivalent network

IEEE © 2003

Papers by Issue

- A broad-band differential phase shifter of novel design
- Finite element realization of ultra-high quality factor frequency-temperature compensated sapphire-rutile whispering gallery mode resonators
- Broadband flat coupling two-branch and multibranch directional couplers
- Radiation leakage from an under metallized silicon cavity
- A new class of miniature radiationless CPW shunt stubs printed on the center conductor
- Comparison of the stored energy distributions in a QC-type and a TC-type prototype with the same power transfer function
- The improvement of miniaturized multilayer ceramic band-pass filter
- Millimeter wave H-plane diplexers
- Tuning band pass filters in the time domain
- Dielectric waveguide filter with low profile and low insertion loss

- Technical Program Schedule (1999 Vol. IV [MWSYM])
- An integrated FBAR filter and PHEMT switched-amp for wireless applications
- A 3.2-V operation single-chip AlGaAs/GaAs HBT MMIC power amplifier for GSM900/1800 dual-band applications
- 0.1 CC 60% efficiency power amplifier multi-chip modules for personal digital cellular phones
- Single chip 1.9 GHz transceiver frontend MMIC including RX/TX local oscillators and 300 mW power amplifier
- C-band direct conversion receiver front-end using a resistive FET mixer
- Tapped dispersive SAW delay line yields powerful signal processing capability in communication systems

IEEE © 2003

Papers by Issue

- High efficiency and broadband excitation of leaky mode in microstrip structures
- A resonant flip-chip design with controllable transition band
- Novel lumped-element coplanar waveguide-to-slotline transitions
- A broadband microstrip-to-waveguide transition using quasi-Yagi antenna
- Full band waveguide-to-microstrip probe transitions
- Design and performance of a SAW ladder-type filter at 3.15 GHz using SAW mass production technology
- RF-circuit configurations and new SAW duplexers for single- and dual-band cellular radios
- Laser interferometric analysis of a ISM band SAW duplexer
- Impedance loaded SAW-sensors offer a wide range of measurement opportunities
- Multiresolution time domain (MRTD) schemes with space-time Haar wavelets

IEEE © 2003

Papers by Issue

- MRTD applied to complex geometry air-dielectric interfaces in 3D microwave structures
- Field singularity correction in 2-D time domain Haar wavelet modeling of waveguide components
- Multiresolution model of electromagnetic wave propagation in dispersive materials
- Applications of Haar wavelet based MRTD scheme in the characterization of 3D microwave circuits
- Global finite element time domain analysis of active non-linear microwave circuits
- A 77 GHz FM/CW radar frontend with a low-profile, low-loss printed antenna
- Full MMIC millimeter-wave front end for a 76.5 GHz adaptive cruise control car radar
- Phase-comparison monopulse radar with switched transmit beams for automotive application
- Imaging RFID system at 24 GHz for object localization
- A wideband millimeter-wave front-end for automotive radar

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Design and modeling of RF MEMS tunable capacitors using electro-thermal actuators
- 30 GHz tuned MEMS switches
- MEMS reconfigurable Vee antenna
- Design and realization of high Q millimeter-wave structures through micromachining techniques
- High-performance three-dimensional on-chip inductors fabricated by novel micromachining technology for RF MMIC
- High-impedance electromagnetic ground planes
- Planar periodic structures for microwave and millimeter wave circuit applications
- Fundamental artificial periodic substrate effects on printed circuit antennas
- Laminated photonic band structures with high conductivity and high transparency
- High temperature superconductive Butler matrix beam former for satellite applications

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Efficient computer design of compact planar band-pass filters using electrically short multiple coupled lines
- HTS microstrip filters with multiple symmetric and asymmetric prescribed transmission zeros
- Design and construction of high performance HTS pseudo-elliptic band-stop filters
- Cross-coupled HTS microstrip open-loop resonator filter on LAO substrate
- Novel approach for narrowband superconducting filters
- Time domain modelling of E.M. coupling between microwave circuit structures
- FDTD accuracy improvement by incorporation of 3D edge singularities
- Full-wave analysis of X-band MMIC pre-matched power cell
- Reduced FDTD formulation (R-FDTD) for the analysis of 30 GHz dielectric resonator coupled to a microstrip line
- Numerical parasitic reactances at the interface between FDTD mesh and lumped elements

IEEE © 2003

Papers by Issue

- A conducting sheet model for efficient wide band FDTD analysis of planar waveguides and circuits
- An active tagging system using circular polarization modulation
- A microwave position sensor with sub-millimeter accuracy
- A microwave system for moisture monitoring in wet powders for industrial applications
- Modular design of SAR electronics
- Near-field synthetic aperture interferometric microwave radiometry for remote sensing of mines
- A retrospective on the 1999 Microwave Pioneer Award
- Novel high-Q bondwire inductors for RF and microwave monolithic integrated circuits
- A study on substrate effects of silicon-based RF passive components
- One-dimensional photonic bandgap resonators and varactor tuned resonators
- Active probes for 2-port network analysis within 70-230 GHz

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Determining two-port S-parameters from a one-port measurement using a novel impedance-state test chip
- On-wafer calibration using space-conservative (SOLT) standards
- A new structure for a six-port reflectometer using a silicon MOSFET for power measurement
- A new dynamic load-line measurement method with EOS and load-pull system for power FET design
- A controllable phase coherent modulated RF signal for use with microwave network analyzer measurements
- Validation of a microwave multitone signal with known phase
- Large-domain MOM solution of complex electromagnetic problems
- The frequency-domain TLM method with absorbing boundary conditions
- Fast hybrid integral equation-neural network method for the modeling of multiconductor transmission lines

IEEE © 2003

Papers by Issue

- Full-wave analysis of radiation from a microstrip amplifier
- Electrodynamic coplanar/slotline structure analysis with 3-D components based on a surface/volume integral equation approach
- Modeling of the millimeter-wave behavior of MEMS capacitive switches
- GSM/moment-method CAD of waffle-iron-filters with round teeth
- Edge-conditioned vector basis functions for the analysis and optimization of rectangular waveguide dual-mode filters
- Generalized admittance matrix of arbitrary E-plane waveguide junctions by the BI-RME method
- An efficient finite-element method for the analysis of photonic band-gap materials
- Efficient MOM-based generalized scattering matrix method for the integrated circuit and multilayered structures in waveguide

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A multi-resolution MoM analysis of multiport structures using matched terminations
- Commercial communications satellites: history and highlights
- Broadband coplanar couplers in multilayer thin film MCM-D technology
- Compact multi-level folded coupled line RF couplers
- A design of the novel varactor tuned directional coupler
- Full-wave optimum design of millimeter-wave rectangular waveguide narrow-wall branch couplers
- Low-loss, planar monolithic baluns for K/Ka-band applications
- A parallel connected Marchand balun using spiral shaped equal length coupled lines
- On-wafer load pull characterization of W-band InP HEMT unit cells for CPW MMIC medium power amplifiers

IEEE © 2003

Papers by Issue

- CAD oriented design methods of frequency multipliers. Application to a millimeterwave MMIC PHEMT tripler and a microwave HBT doubler
- Wideband propagation measurements and Doppler analysis for the 60 GHz indoor channel
- A new open-resonator technique at 60 GHz for permittivity and loss-tangent measurement of low-loss materials
- Microwave characterization of integrated and multilayered directional couplers for wireless communication applications
- Automated phase noise measurement of Ku-band MMIC VCO on-wafer
- An efficient SOM for front-end UHF electronics
- True RMS power detection with high dynamic range
- Theoretical analysis of wurtzite and zincblende phase GaN avalanche transit time device in millimeter-wave frequencies
- A 90 GHz-band monoblock type waveguide orthomode transducer
- Nonradiative dielectric waveguide using cordierite ceramics

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- NbN hot electron bolometric mixers-a new technology for low noise THz receivers
- A novel method of pulse power amplification using a CW injection locked oscillator pair
- A compact high performance W-band FMCW radar front-end based on MMIC technology
- Light dependence of silicon FGCPW transmission lines
- Characteristics of optically controlled oscillator using InP HEMT with novel structure
- Very low phase noise optical links: experiments and theory
- Reconstructing permittivity profiles using an improved renormalization technique
- Two dimensional dielectric profile reconstruction based on spectral domain moment method and nonlinear optimization
- Quasi-optical discrete beam steering grids
- Two Ka-band quasi-optical amplifier arrays
- A 65 GHz holographic power combiner

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Novel adaptive linearization for digitally modulated multi-carrier power amplifier using pre-distorter cum cross-correlator (PDCC)
- WCDMA power amplifier requirements and efficiency optimization criteria
- A new SAW based OFDM receiver concept
- FN-modulation loop architecture for fully integrated 1 Mb/s GFSK transmitter
- A wireless data collection system for monitoring and control of city lifelines
- Evanescent microwave probes using coplanar waveguide and stripline for super-resolution imaging of materials
- Microstrip resonator technique for non-destructive moisture/permittivity measurement
- 10 and 2.45 GHz short baseline interferometers for positioning systems
- A monostatic radio-acoustic sounding system

IEEE © 2003

Papers by Issue

- Multi-port scattering matrix measurement using a reduced-port network analyzer
- Comparison of methods for adapter characterization
- Millimeter wave measurements of temperature dependence of complex permittivity of dielectric plates by a cavity resonance method
- GaAs FET characterization in a quasi-monolithic Si environment
- A design of the ceramic multilayer chip balun
- Passive integration on Si for RF circuits in wireless applications
- Material parameter characterization of multilayer LTCC and implementation of high Q resonators
- Proposed design solutions for low-cost flip-chip membrane devices for millimeterwave applications
- Ni-Au surface finish effects on RF performance
- A Ku-band 6-bit digital attenuator with integrated serial to parallel converter

IEEE © 2003

Papers by Issue

2000 Vol. I [MWSYM]

- Front Cover (2000 Vol. I [MWSYM])
- Table of Contents (2000 Vol. I [MWSYM])
- Technical Program Schedule (2000 Vol. I [MWSYM])
- HBT low-noise performance in a 0.18 /spl mu/m SiGe BiCMOS technology (2000 Vol. I [MWSYM])
- Design of GaAs MMIC transistors for the low-power low noise applications (2000 Vol. I [MWSYM])
- High gain-density K-band p-HEMT LNA MMIC for LMDS and satellite communication (2000 Vol. I [MWSYM])
- High performance 60-GHz coplanar MMIC LNA using InP heterojunction FETs with AlAs-InAs superlattice layer
- Design and performance of wideband, low-noise, millimeter-wave amplifiers for Microwave Anisotropy Probe radiometers (2000 Vol. I [MWSYM])
- Design and characterization of MMIC active cold loads (2000 Vol. I [MWSYM])

IEEE © 2003

Papers by Issue

- Low phase noise 58 GHz SiGe HBT push-push oscillator with simultaneous 29 GHz output
- A 94 GHz HEMT-oscillator using high order subharmonic synchronization
- Low phase noise signal generation circuits for 60 GHz wireless broadband system
- A low phase-noise 38-GHz HBT MMIC oscillator utilizing a novel transmission line resonator
- A power combined W-band HBT oscillator
- Low cost multi-layer ceramic package for flip-chip MMIC up to W-band
- Millimeter-wave ceramic package for a surface mount
- Development of a 36 GHz millimeter-wave BGA package
- Optimized flip-chip interconnect for 38 GHz thin-film microstrip multichip modules
- RF W-band wafer-to-wafer transition
- Accurate RF and microwave system level modeling of wideband nonlinear circuits

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Circuit reduction technique for finding the steady state solution of nonlinear circuits
- Determining the steady-state responses in RF circuits using GMRES, CGS and BICGSTAB solution in sSPICE for Linux
- Rigorous RF and microwave oscillator phase noise calculation by envelope transient technique
- Techniques for oscillator nonlinear optimization and phase-noise analysis using commercial harmonic-balance software
- Large-displacement modelling and simulation of micromechanical electrostatically driven resonators using the harmonic balance method
- Efficient MM/FE GSMS technique for the CAD of broadband lateral coax feeds in waveguide
- Modeling of arbitrary shaped radiating structures by the wave concept iterative process
- Macro-elements for efficient FEM simulation of small geometric features in waveguide components (2000 Vol. I [MWSYM])

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- The perfectly matched layer as lateral boundary in finite-difference transmission-line analysis (2000 Vol. I [MWSYM])
- Analysis of planar microwave and millimeter-wave circuits with anisotropic layers based on generalized transmission line equations and on the method of lines
- Applying wavelets to electromagnetic field simulation: the method of lines
- FM demodulation using an injection-locked oscillator (2000 Vol. I [MWSYM])
- A fast response, programmable PA regulator subsystem for dual mode CDMA/AMPS handsets (2000 Vol. I [MWSYM])
- A comparison study of ESD protection for RFIC's: performance vs. parasitics
- Effects of offsets on bipolar integrated circuit mixer even order distortion terms (2000 Vol. I [MWSYM])
- MEMS microswitch arrays for reconfigurable distributed microwave components

IEEE © 2003

Papers by Issue

- A low voltage actuated micromachined microwave switch using torsion springs and leverage
- One and two-bit low-loss cascadable MEMS distributed X-band phase shifters
- Design of low actuation voltage RF MEMS switch
- High-isolation inductively-tuned X-band MEMS shunt switches
- Characterization of source-to-drain capacitance (C/sub ds/) effect of GaAs PHEMT for millimeter wave switch
- A tunable X-band active notch filter with low-distortion passband response
- Quasi dual-mode resonators
- A first practical model of very small and low insertion loss laminated duplexer using LTCC suitable for W-CDMA portable telephones
- TEM-mode planar dielectric waveguide resonator BPF for W-CDMA

IEEE © 2003

Papers by Issue

- A new circuit configuration to obtain large attenuation with a coupled-resonator band elimination filter using laminated LTCC
- A miniaturized bandpass filter with double surface electrodes
- Magnetic RF integrated thin-film inductors
- Fabrication of high frequency passives on BiCMOS silicon substrates
- A compact and wideband GaAs P-HEMT distributed amplifier IC based on a micro-machined CPW
- A compact 5-bit phase shifter MMIC for K-band satellite communication systems
- RF loss and crosstalk on extremely high resistivity (10 k-1 M/spl Omega/-cm) Si fabricated by ion implantation
- Design guide of coupling between inductors and its effect on reverse isolation of a CMOS LNA
- Unconditionally stable FDTD algorithm for solving three-dimensional Maxwell's equations

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Finite element time domain based diakoptic method for microwave circuit analysis
- Application of wavelet-Galerkin method to electrically-large optical waveguide problems
- Multi-resolution 2D-TLM technique using Haar wavelets
- An extension of the MRTD technique to the fast computation of the radiation from planar open structures
- Characterization of micromachined transmission lines using MRTD (multiresolution time domain technique)
- Improved autoregressive (AR) signal modeling for FDTD resonance estimation
- SiGe bipolar technologies for low phase noise RF and microwave applications (2000 Vol. I [MWSYM])
- A highly integrated dual-band tri-mode transceiver chipset for CDMA TIA/EIA-95 and AMPS applications (2000 Vol. I [MWSYM])
- A highly integrated radio for high performance, low-cost 2.4 GHz ISM cordless applications

IEEE © 2003

Papers by Issue

- An RF transceiver for WDCT in a 25 GHz Si bipolar technology
- Fabrication of high-performance on-chip suspended spiral inductors by micromachining and electroless copper plating
- Fully integrated micromachined capacitive switches for RF applications
- X-band and K-band lumped Wilkinson power dividers with a micromachined technology
- Micromachined branch line coupler in CMOS technology
- Micromachined circuit combining networks for W-band applications
- A new micromachined overlap CPW structure with low attenuation over wide impedance ranges
- Multilevel finite ground coplanar line transitions for high-density packaging using silicon micromachining
- Compact multi-level folded-line bandpass filters
- Aperture compensation technique for innovative design of ultra-broadband microstrip bandpass filter

IEEE © 2003

Papers by Issue

- Transmission line filters with advanced filtering characteristics
- 3D integrated narrow band filters for millimeter wave wireless applications
- A design of the novel coupled line bandpass filter using defected ground structure
- Microstrip triangular patch resonator filters
- Edge-coupled coplanar waveguide bandpass filter design (2000 Vol. I [MWSYM])
- Development of integrated three dimensional Bluetooth image reject filter
- A 40-Gbit/s monolithic digital OEIC module composed of uni-traveling-carrier photodiode and InP HEMT decision circuit
- Compact differential InP-based HBT VCO's with a wide tuning range at W-band
- A 50 GHz monolithic RSFQ digital phase locked loop
- A 13 GHz phase-locked loop development for micro- and millimeter wave applications

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Prospects of silicon-germanium-based technology for very high-speed circuits
- Time domain global modeling of EM propagation in semiconductor using irregular grids
- A global finite difference time domain analysis of a silicon nonlinear transmission line
- Interpolating wavelet scheme toward global modeling of microwave circuits
- Direct synthesis of microwave filters using inverse scattering TLM (transmission line matrix) method
- Extension of the lumped network (LN)-FDTD approach to the modelling of nonlinear elements
- Methods for the modeling of thin wire structures with the TLM method
- The inclusion of fringing capacitance and inductance in FDTD for the robust accurate treatment of material discontinuities (2000 Vol. I [MWSYM])

IEEE © 2003

Papers by Issue

- Low-power active mixer for Ku-band application using SiGe HBT MMIC technology (2000 Vol. I [MWSYM])
- A mm-wave monolithic Gilbert-cell mixer (2000 Vol. I [MWSYM])
- Approximate analytical modeling of current crowding effects in multi-turn spiral inductors (2000 Vol. I [MWSYM])
- Novel alternative design methods based upon combined amplification, matching and filtering approaches in MMIC technology (2000 Vol. I [MWSYM])
- Monolithic upconversion and reference IC for power amplifier linearization using GaAs HBTs (2000 Vol. I [MWSYM])
- A unified approach of PM noise calculation in large RF multitone autonomous circuits
- Analysis of mm-wave nonlinear circuits by combining genetic algorithm and harmonic balance technique
- The estimation of Volterra transfer functions with applications to RF power amplifier behavior evaluation for CDMA digital communication

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Fast prediction of the performance of wireless links by simulation-trained neural networks
- Linearity considerations of W-CDMA front-ends for UMTS
- Optimal-filter approach for nonlinear power amplifier modeling and equalization
- Computer-aided optimization of adjacent channel power in nonlinear communications amplifiers
- Two-tone IMD asymmetry in microwave power amplifiers
- A new method in characterizing the nonlinear current model of MESFETs using single-tone excitation
- Generalized distributed nonlinear device modeling for Krylov-subspace based microwave circuit analysis
- Applicability of non-linear modelling methods based on vectorial large-signal measurements to MOSFETs
- Fully physical coupled electro-thermal simulations and measurements of power FETs
- A computational load-pull system for evaluating RF and microwave power amplifier technologies

IEEE © 2003

Papers by Issue

- Effects of source and load impedance on the intermodulation products of GaAs FETs
- Driving waveforms for class-F power amplifiers [GaAs MESFETs]
- On robust suppression of third-order intermodulation terms in small-signal bipolar amplifiers
- Performance improvement of feedforward power amplifiers by using a novel injection combining technique
- Adaptive algorithms for feed-forward power amplifier linearizer
- Adaptive baseband/RF predistorter for power amplifiers through instantaneous AM-AM and AM-PM characterization using digital receivers
- Microwave power amplifiers with digitally-controlled power supply voltage for high efficiency and high linearity
- Nonlinear analysis of microwave frequency synthesizers: stability and incidental FM

IEEE © 2003

Papers by Issue

- A programmable high-isolation monolithic millimeter-wave SPST switch
- 1-26 GHz high power p-i-n diode switch
- 38 GHz MMIC PHEMT-based tripler with low phase-noise properties
- Broadband, planar, doubly balanced star mixers
- A passive-type even harmonic quadrature mixer using simple filter configuration for direct conversion receiver
- A CMOS resistive ring mixer MMICs for GSM 900 and DCS 1800 base station applications
- Analysis and experimental waveform study on inverse class class-F mode of microwave power FETs
- A 2 W, high efficiency, 2-8 GHz, cascode HBT MMIC power distributed amplifier
- Push-pull power amplifier integrated with quasi-Yagi antenna for power combining and harmonic tuning

IEEE © 2003

Papers by Issue

- A 20 GHz Doherty power amplifier MMIC with high efficiency and low distortion designed for broad band digital communication systems
- A 5 to 27 GHz MMIC power amplifier
- RF power amplifier integration in CMOS technology
- Demonstration of a high efficiency nonuniform monolithic gallium-nitride distributed amplifier
- A Ka-band HBT MMIC power amplifier
- An S-band high-power broadband transmitter
- Ka-band, 30 watts solid state power amplifier
- Designing commercially viable MM-wave modules
- Submillimeter quasioptical semiconductor isolators
- A 230 GHz low noise subharmonically pumped SIS mixer
- Low cost millimeterwave aperture coupled antenna array on polymer membrane substrate
- Improved photonic bandgap cavity and metal rod lattices for microwave and millimeter wave applications

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Reconfigurable transmission-type beamformer
- Characterization of a multi-mode microstrip aperture for phased array applications
- Measurement of the phase and amplitude distributions of coupled oscillator arrays
- Range demonstration of an ultra-wideband, continuous, time steered array using a fiber-optic, cascaded grating prism
- Index of Authors (2000 Vol. I [MWSYM])

IEEE © 2003

Papers by Issue

2000 Vol. II [MWSYM]

- Front Cover (2000 Vol. II [MWSYM])
- Table of Contents (2000 Vol. II [MWSYM])
- Technical Program Schedule (2000 Vol. II [MWSYM])
- Engraved NRD-guide for millimeter-wave integrated circuits
- Characterization of asymmetric coupled CMOS lines
- A novel low impedance line for MMIC using air-gap stacked structure
- A broadband CPW-to-waveguide transition using quasi-Yagi antenna
- Novel quadrature branch-line coupler using CPW-to-microstrip transitions
- Excitation of the microstrip higher order leaky modes by aperture-coupling method
- A novel dc-offset cancellation technique for even-harmonic direct conversion receivers

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A novel uniplanar balanced subharmonically pumped mixer for low-cost broadband millimeter-wave transceiver design
- A Ku-band frequency converter using 0.25 /spl mu/m PHEMT technology
- A new millimeter-wave MMIC mixer for sensor applications
- Ultra-small MMIC mixers for K- and Ka-band communications
- A narrow-band HTS bandpass filter at 18.5 MHz
- Superconductors and cryotechnology for space communications-adaptation of a new technology for applications
- Highly selective HTS band pass filter with multiple resonator cross-couplings
- High temperature superconducting nonlinear transmission lines
- Superconducting filter for IMT-2000 band (2000 Vol. II [MWSYM])

IEEE © 2003

Papers by Issue

- Superconducting microstrip line band-pass filter for mobile applications
- High-power waveguide integrated photodiode with distributed absorption
- 40 GHz broadband optical receiver combining a multimode waveguide photodiode flip-chip mounted on a GaAs-based HEMT distributed amplifier
- Bias free optical control of microwave circuits and antennas using improved optically variable capacitors
- Wide-band analog-digital photonic link with third-order linearization
- Design and characterization of a fiberoptic RF remoting link
- Integrated optic RF phase shifter for continuous beam steering at 1-1200 MHz
- X-band transmit/receive module overview
- X-band GaAs MMIC size reduction and integration
- Microwave flip chip and BGA technology
- Advanced technology for future space-based antennas

IEEE © 2003

Papers by Issue

- Characterization and modeling of nonlinear trapping effects in power SiC MESFETs
- Circuit design technique for high efficiency Class F amplifiers
- Analysis of class-F and inverse class-F amplifiers
- Class-E switching-mode high-efficiency tuned RF/microwave power amplifier: improved design equations
- Class E RF/microwave power amplifier: linear "equivalent" of transistor's nonlinear output capacitance, normalized design and maximum operating frequency vs. output capacitance
- Circuit to aid tuning of Class-E amplifier
- A simple method to cut down configuration of feedforward power amplifier
- A 25 watt and 50 watt Ka-band quasi-optical amplifier
- Electromagnetic modeling and experimental verification of a complete waveguide-based aperture coupled patch amplifier array

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A 5-watt, 37-GHz monolithic grid amplifier
- A 16-element reflection grid amplifier
- A 360/spl deg/ retrodirective self-oscillating mixer array [using HEMTs]
- A 1.6 W power amplifier module at 24 GHz using new waveguide-based power combining structures
- Development of K-band spatial combiner using active array modules in an oversized rectangular waveguide
- Oscillator reproducibility consideration in coupled oscillator phase-steering arrays
- A phased-array antenna using a multi-line phase shifter controlled by a piezoelectric transducer
- A beam-steerer using reconfigurable PBG ground plane
- Demonstration of a reconfigurable beamformer for simplified 2-D time-steered arrays
- Optically smart active antenna arrays
- A transmit/receive active antenna with fast low-power optical switching (2000 Vol. II [MWSYM])

IEEE © 2003

Papers by Issue

- A novel nonlinear statistical modeling technique for microwave devices
- Optimization of microwave circuits using analytically calculated gradients in the finite element method
- Efficient sensitivity analysis of transmission-line networks using model reduction techniques
- Spike leakage and suppression in frequency selective limiters
- Analysis of six-port disk circulator using subdivided ports
- MMW monolithic Y-junction circulator on single-crystal Sc-doped Ba-hexaferrite
- High Q VCO using an electro-acoustic device compatible with CMOS integrated circuit technology
- A miniature high-Q grating-mode-type SAW resonator and a wide-band 1-GHz SAW-VCO for mobile communications
- Microwave treatments for prostate disease (2000 Vol. II [MWSYM])

IEEE © 2003

Papers by Issue

- Advances in catheter ablation for the treatment of cardiac arrhythmias (2000 Vol. II [MWSYM])
- Radiometric sensing: an adjuvant to mammography to determine breast biopsy
- Thermoacoustic CT
- Cellular telephones: hazards or not?
- A compact S-band MMIC high power amplifier module
- A 7.4 to 8.4 GHz high efficiency PHEMT three-stage power amplifier
- Full W-band MMIC medium power amplifier
- Compact W-band solid-state MMIC high power sources
- A 3-10 GHz LCR-matched power amplifier using flip-chip mounted AlGaN/GaN HEMTs
- 14-W GaN-based microwave power amplifiers
- Broadband physics-based modeling of microwave passive devices through frequency mapping

IEEE © 2003

Papers by Issue

- Reduced order modeling of coupled on-chip interconnects for silicon-based RF integrated circuits
- Development of CAD formulas of integrated circuit components-simplified formulation followed by rigorous derivation
- Unified CAD model of microstrip line with backside aperture for multilayer integrated circuit
- A 183 GHz low noise amplifier module for the conical-scanning microwave imager sounder (CMIS) program
- A coplanar 148 GHz cascode amplifier MMIC using 0.15 /spl mu/m GaAs PHEMTs
- Low-cost 38 and 77 GHz CPW MMICs using ion-implanted GaAs MESFETs
- A 33 GHz power amplifier based on an extended resonance technique
- High efficiency MMIC frequency triplers for millimeter and submillimeter wavelengths

IEEE © 2003

Papers by Issue

- NbN hot electron bolometric mixer with intrinsic receiver noise temperature of less than five times the quantum noise limit
- Experimental investigation of WDM channel spacing in simultaneous upconversion millimeter-wave fiber transmission system at 60 GHz-band
- Measurements of thermal effects induced on a human head exposed to 900 MHz mobile phones
- Evaluation of the power absorbed in a human head model exposed to cellular phones equipped with helical antennas
- A study of uncertainties in modeling the handset antenna and human head interaction using the FDTD method
- Effect of the human tissue on EMI from a cellular telephone with a hearing aid
- Algorithm for retrieval of deep brain temperature in new-born infant from microwave radiometric data
- Microwave breast cancer detection

Papers by Issue

- Characterization of biological tissues up to millimeter wave: test fixture design
- Interconnects and transitions in multilayer LTCC multichip modules for 24 GHz ISM-band applications
- Application of digital PGA technology to 20 GHz microwave packages
- Multi-layer spiral inductors in a high-precision, fully-planar MCM-D process
- Properties of CPW in the sub-mm wave range and its potential to radiate
- New closed-form electromagnetic Green's functions in layered media
- Equivalent network for rectangular-waveguide H-plane step discontinuity-multi-transmission line and multi-port ideal transformer
- Full-wave analysis of a periodic array of rectangular lossy conductive thick patches

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Leaky modes of vertically stacked microstrips at higher order
- New efficient design of microwave inhomogeneous media filters
- Reconstruction of permittivity profiles in cylindrical objects illuminated by higher order modes
- Full-wave characterization of an edge-coupled coplanar-waveguide structure with backed conductor
- Reconstruction of the non-minimum phase function from amplitude only data
- BI-RME modeling of 3D waveguide components enhanced by the Ewald technique
- Multiport analysis of arbitrary circular-rod insets in rectangular waveguide by the generalized admittance matrix
- Mix-RWG current basis function and its simple implementation in MoM
- Time domain characterization of planar microwave transformers using the SCN-TLM method

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A higher-order FDTD using sine expansion function
- Development of three-dimensional unconditionally stable finite-difference time-domain methods
- Visualization of near-field and far-field in the time domain
- Optimal shape design of passive device using FDTD and design sensitivity analysis
- The application of the wave potential functions to the analysts of transient electromagnetic fields
- Determination of optimum conductivity profile for PML and PML-D using multiple-variables Pade approximation
- General design equations of three-port unequal power-dividers terminated by arbitrary impedances
- 40 to 90 GHz impedance-transforming CPW Marchand balun
- A very-small-sized reversed-phase hybrid ring
- A whispering gallery mode sapphire resonator with semi-spherical enclosure

IEEE © 2003

Papers by Issue

- Low loss passive microwave components in standard silicon technology
- Accurate analysis of silicon, VLSI-technology compatible spiral inductors
- A new network model for miniaturized hairpin resonators and its applications
- Improvements in losses and size of frequency tunable coplanar filter structures using MMIC negative resistance chips for multistandard mobile communication systems
- Low temperature cofired ceramic (LTCC) ridge waveguide multiplexers
- Application of the planar I/O terminal to dual mode dielectric waveguide filters
- Synthesis of cascaded quadruplet filters involving complex transmission zeros
- The design of a half-wavelength resonator BPF with attenuation poles at desired frequencies
- Microwave breakdown in output multiplexer filters

IEEE © 2003

Papers by Issue

- A design procedure for co-existing multi-mode waveguide bandstop filters
- Anisotropic permittivity extraction from phase propagation measurements using an anisotropic full-wave Green's function solver for coplanar ferroelectric thin film devices
- A novel HTS microstrip quasi-elliptic function bandpass filter using pseudo-lumped element resonator
- A novel triple-push oscillator approach
- 77 GHz planar Gunn VCOs on AlN substrates using novel flip-chip InP Gunn diodes
- Impact of 1/f noise in Ka-band InGaP/GaAs HBT frequency sources
- A very high-Q-feedback oscillator at 33 GHz using MMMIC-amplifiers
- MEMS devices for high isolation switching and tunable filtering
- Modeling of MEMS capacitive switches by TLM

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Membrane-supported Ka band resonator employing organic micromachined packaging
- A parametric model of MEMS capacitive switch operating at microwave frequencies
- Noise performance of submicron HEMT channels under low power consumption operation
- On the performance of low DC power consumption cryogenic amplifiers
- Temperature-dependent noise parameters and modeling of InP/InAlAs/InGaAs HEMTs
- Interlayer MEMS RF switch for 3D MMICS
- Simulation of noise-power ratio with the large-signal code CHRISTINE
- ACeS communications system phase noise and transient effects
- Optical distribution of local oscillators for a rotating antenna
- Data transmission using an optical microwave link for wireless communications

Papers by Issue

- Index of Authors (2000 Vol. II [MWSYM])

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

2000 Vol. III [MWSYM]

- Front Cover (2000 Vol. III [MWSYM])
- Table of Contents (2000 Vol. III [MWSYM])
- Technical Program Schedule (2000 Vol. III [MWSYM])
- An integrated RF front-end for multi-mode handsets
- A 5.8 GHz OFDM GaAs MESFET MMIC chip set
- A calibratable 4.8-5.8 GHz MMIC vector modulator with low power consumption for smart antenna receivers
- A new antenna switching architecture for mobile handsets
- Quadrature direct conversion receiver integrated with planar quasi-Yagi antenna
- A silicon MMIC active balun/buffer amplifier with high linearity and low residual phase noise
- A novel planar magic-T using microstrip-to-slotline transition
- A microwave octave-band lumped element quadrature coupler

IEEE © 2003

Papers by Issue

- Novel HDI microwave chip on flex (MCOF) broadside coupler designs
- Wideband 0-dB branch-line directional couplers
- A new waveguide directional coupler/hybrid type-favorably suited for millimeter wave application
- Enhanced dual polarization directional coupler for dual polarization beam forming networks
- Waveguide branch couplers for tight couplings (2000 Vol. III [MWSYM])
- The gain advantages of four cascaded single stage distributed amplifier configurations
- Multi-octave 200 MHz to 20 GHz amplifier for extended range digital log video amplifier application
- A compact PA MMIC module for K-band high-speed wireless systems
- Suppression of resonant leakage effects in coplanar MMIC packages using a silicon sub-mount layer
- Vertical integrated transformer using bondwires for MMICs

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Low voltage tunable barium strontium titanate thin film capacitors for RF and microwave applications
- A K-band linear phased array antenna based on Ba/sub 0.60/Sr/sub 0.40/TiO/sub 3/ thin film phase shifters
- Application of ferroelectrics in phase shifter design
- Ferroelectric-ferrite tunable phase shifters
- A ferroelectric tunable microstrip Lange coupler for K-band applications
- Full wave analysis of coplanar phase shifter printed on high purity ferroelectric material
- Performance limitation of a tunable resonator with a ferroelectric capacitor
- A 110 GHz scalable FET model based on 50 GHz S-parameter measurements
- Bias-dependent linear, scalable millimeter-wave FET model
- Empirical load-line capacitance models for HEMT
- Improved parameter extraction of small-sized FETs for low-power applications

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A new simplified and reliable HEMT modelling approach using pinched cold FET S-parameters
- A new analytical and broadband method for determining the HBT small-signal model parameters
- Direct extraction method for internal equivalent circuit parameters of HBT small-signal hybrid-/spl pi/ model
- A wireless pressure measurement system using a SAW hybrid sensor
- A realtime close-range imaging system with fixed antennas
- A pre-crash radar sensor system based on pseudo-noise coding
- Reduction of interference in microwave automotive radars
- A W-band vector modulator and its application to software radar for automotive collision avoidance
- Microwave backscatter modulation systems
- Active retrodirective array for remote tagging and wireless sensor applications

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- High Q two dimensional defect resonators-measured and simulated
- Tunable dielectric resonators with dielectric tuning disks in cylindrical enclosures
- An electronically tunable photonic bandgap resonator controlled by piezoelectric transducer
- A design of novel grooved circular waveguide polarizers (2000 Vol. III [MWSYM])
- Novel technique of phase velocity equalization for microstrip coupled-line phase shifters
- High power time domain measurement system with active harmonic load-pull for high efficiency base station amplifier design
- An active pulsed rf and pulsed dc load-pull system for the characterization of power transistors used in coherent radar and communication systems
- Measurement based nonlinear modeling of spectral regrowth

IEEE © 2003

Papers by Issue

- A low cost AM/PM sideband generator for low noise calibration
- Realistic sampling-circuit model for a nose-to-nose simulation
- A comprehensive millimeter-wave calibration development and verification approach
- A new method for characteristic impedance determination on lossy substrate
- Digital controlled adaptive feedforward amplifier for IMT-2000 band
- Optimization of feedforward amplifier power efficiency on the basis of input power statistics
- A 900 MHz 16-QAM direct carrier modulation transmitter using feedforward linearization
- Input adaptive linearizer system
- A linearized power amplifier MMIC for 3.5 V battery operated wide-band CDMA handsets

IEEE © 2003

Papers by Issue

- An 18 GHz-band MMIC linearizer using a parallel diode with a bias feed resistance and a parallel capacitor
- Analog predistortion linearizer for high power rf amplifier
- A multicarrier amplifier with low third-order intermodulation distortion
- Surface-wave band gaps and leaky modes on integrated circuit structures with planar periodic metallic elements
- Surface-wave suppression of resonance-type periodic structures
- Analysis and application of coupled microstrips on periodically patterned ground plane
- Numerical and experimental characterization of slow-wave microstrip line on periodic ground plane
- Dispersion characteristics of microstrip with periodic perturbations
- Revisiting guided-wave and leakage-wave modal properties in near cutoff region with the concept of complex effective dielectric constant

IEEE © 2003

Papers by Issue

- Formulas of microstrip with truncated substrate by synthetic asymptote-a novel analysis technique
- A 76-77 GHz pulsed-Doppler radar module for autonomous cruise control applications
- Theoretical and practical characterization of a broadband random noise radar
- Low power FMCW radar system for level gaging
- A pulse radar gauge for level measurement and process control
- Multiparameter microwave sensors for determining composition or condition of substances
- Design and stability test of a 2-40 GHz frequency doubler with active balun
- Wideband monolithic millimeter-wave phase shifter with minimum insertion loss variation
- Millimeter wave broadband frequency tripler in GaAs/InGaP HBT technology
- A K/sub a/ band MMIC super regenerative detector

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- High output power, broadband 28-56 GHz MMIC frequency doubler
- L-band glass-epoxy 5-bit phase shifter module using SW-bank chips and low cost L, C chips
- A novel method for nulling the LO leakage in resistive FET mixers
- High-power millimeter-wave planar doublers
- A new, simple, test-set for on-wafer characterization of millimeter-wave electro-optic devices
- A bilateral lightwave network analyzer
- Novel electromagnetic field probe using electro/magneto-optical crystals mounted on optical fiber facets for microwave circuit diagnosis
- Non-contact internal-MMIC measurement using scanning force probing
- Contrast quantification of millimeter-wave scanning near-field microscope with a slit probe

IEEE © 2003

Papers by Issue

- A novel W-band spectrometer for dielectric measurements (2000 Vol. III [MWSYM])
- A near-field alignment technique at millimeter and sub-millimeter wavelengths
- Tuning and measurements of couplings and resonant frequencies for cascaded resonators
- Computer diagnosis and tuning of microwave filters using model-based parameter estimation and multi-level optimization
- Filters with an almost constant stopband
- Full wave modeling of electric coupling probes in combline resonators and filters
- Mobius filters and resonators
- Single-passband, single-stopband narrowband filters
- Dispersion and radiation characteristics of conductor-backed CPW with finite ground width
- The influence of a top cover on the leakage from microstrip line (2000 Vol. III [MWSYM])

IEEE © 2003

Papers by Issue

- Behavioral feature of the space-wave leaky mode, the surface-wave leaky mode and the bound mode
- Mode-coupling effect between different two types of the surface-wave leaky mode on conductor-backed coplanar strips (CBCPS)
- Low-loss millimeter-wave propagation characteristics of NRD-guide surface-mounted on planar substrate for hybrid integrated circuit
- LMDS up- and down-converter MMIC
- A 25 GHz down-converter integrated with a CPW-fed lens antenna
- Chip multilayer antenna for 2.45 GHz-band application using LTCC technology
- A novel broadband receiver architecture for wireless communication and radar systems
- Chaotic radar systems
- Digital communications using self-phased arrays

IEEE © 2003

Papers by Issue

- Low distortion high power GaAs pseudomorphic heterojunction FETs for L/S-band digital cellular base stations
- 100 W L-band GaAs power FP-HFET operated at 30 V
- A 240 W push-pull GaAs power FET for W-CDMA base stations
- High power modular S-band solid state transmitter family for ATC and naval radar applications
- Modeling single- and multi-carrier performance of a helix TWTA with the 1-D parametric code, CHRISTINE
- Multi-megawatt X-band semiconductor microwave switches
- Fibre-integrated heterodyne optical injection phase-lock loop for optical generation of millimetre-wave carriers
- All-optical heterodyne RF signal generation using a mode-locked-laser frequency comb: theory and experiments
- A good prospect for broadband millimeter-wave fiber-radio access system-an approach to single optical component at antenna base station

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Optical millimeter wave generation utilizing a subharmonic reference
- 30 GHz microstrip HEMT oscillator using indirect optical injection locking
- A wide-band tunable filter technique based on double-diplexing and low-Q tuning elements
- Triple mode filters with coaxial excitation
- Accurate modelling of narrow-band filters for satellite communications
- A simplified analysis for high power microwave bandpass filter structures
- Six-pole triple mode filters in rectangular waveguide
- Transversal filter using whispering gallery quarter cut resonators
- Space mapping optimization of microwave circuits exploiting surrogate models
- Passive model-reduction of distributed networks with frequency-dependent parameters

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Modeling source inductance in FETs
- Coplanar-waveguide-to-microstrip transition model
- Electromagnetic modeling of linear pHEMTs for millimeter waves
- Integrated microstrip to NRD-guide transition using a spurious mode suppressing technique
- Ultra low loss transmission lines on low resistivity silicon substrate
- Computation of causal characteristic impedances
- Wide bandwidth microwave phase detection using optical intensity modulators
- Nonlinear distortion compensation of microwave fiber optic links with asymmetric adaptive filters
- Optoelectronic mixing in a self oscillating InP/GaInAs photo-heterojunction bipolar transistor
- Linearized optical directional-coupler modulators for analog rf/microwave transmission systems

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A novel fiber-optic link with remote heterodyning for phase stabilized transmission of microwave and millimeter wave signals
- General accuracy considerations of microwave on-wafer silicon device measurements
- Accurate determination of dielectric constant of substrate materials using modified Wolff model
- Vector signal characterization of 38 GHz power amplifier with 100 Mbps QPSK modulation
- A novel set-up for co-channel distortion ratio evaluation
- An automatic harmonic selection scheme for measurements and calibration with the nonlinear vectorial network analyser
- Effects of pin depth in LCP 3.5 mm, 2.4 mm, and 1.0 mm connectors
- In-circuit testing of complex circuits using on-wafer probing and electromagnetic coupled ground interconnects
- A modified open-ended coaxial probe for concave surface coating materials testing

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Measurement of a DSB modulated RF signal by use of discriminating filters and envelope detection
- Isolation in three-dimensional integrated circuits
- Development of microwave/millimeter wave integral passives for multi-layer organic MCMs
- A new concept of RF feed-through applied to multichip modules for space equipment
- Characterization of surface mount packages at microwave frequencies using wafer probes
- Development of finite ground coplanar (FGC) waveguide 90 degree crossover junctions with low coupling
- A Ku-band frequency-tunable active matched feedback MMIC amplifier using variable-capacitance elements
- Si/SiGe HBT active integrated antenna on high resistivity silicon substrate
- GaN Gunn diodes for THz signal generation
- Three dimensional power amplifier and special elements design

IEEE © 2003

Papers by Issue

- New methodology for microwave/millimeter-wave MMIC development
- Survivability of InP HEMT devices and MMICs under high RF input drive
- Global electromagnetic analysis to help the conception of an active module
- A new thin film passive integration technology for miniaturisation of mobile phone front end modules: integration of a dual-band power amplifier, switch and diplexer for GSM
- Surface integral equation modeling approach to the handset antenna and human body interaction
- Analysis of a passive spatial combiner using tapered slotline array in oversized coaxial waveguide
- Electro-thermal modelling and measurement of thermal time constants and natural convection in spatial power combining grid arrays
- Improved balanced crossed dipole quasi-optical frequency doubler

Click on title for a paper summary.

IEEE © 2003

Papers by Issue

- Influence of output impedance on power added efficiency of Si-bipolar power transistors
- Low-cost millimeter-wave transmitter using software radio techniques
- Cross modulation distortion in CDMA receivers
- 2 GHz band even harmonic type direct conversion receiver with ABB-IC for W-CDMA mobile terminal
- New type of high-speed pulse radar based on the NRD guide technology at 60 GHz band
- Monolithic GaAs surface acoustic wave chemical microsensor array
- Low-cost automobile crash-sensor using a 61 GHz active integrated SIMMWIC antenna
- 76 GHz post-wall waveguide fed parallel plate slot array with 45 degree linear polarization
- Index of Authors (2000 Vol. III [MWSYM])

IEEE © 2003

Papers by Issue

2001 Vol. I [MWSYM]

- Front Cover (2001 Vol. I [MWSYM])
- Table of Contents (2001 Vol. I [MWSYM])
- Technical Program Schedule (2001 Vol. I [MWSYM])
- Analysis of CDMA signal spectral regrowth and waveform quality (2001 Vol. I [MWSYM])
- Generalized autocorrelation analysis of spectral regrowth from bandpass nonlinear circuits
- Application of polyspectral techniques to nonlinear modeling and compensation
- Estimation of error vector magnitude using two-tone intermodulation distortion measurements [power amplifier]
- Investigation of behavioral model accuracy using a state-space and convolution-based transient simulator
- Efficient circuit-level analysis of large microwave systems by Krylov-subspace harmonic balance

IEEE © 2003

Papers by Issue

- A novel 3-way hybrid combiner/divider for high power C-class microwave amplifiers
- A novel Ka-band 1 to 8 power divider/combiner
- A low-loss serial power combiner using novel suspended stripline couplers
- A compact coaxial waveguide combiner design for broadband power amplifiers
- Broadband lumped-element 180-degree hybrids utilizing lattice circuits
- Design of high directivity directional couplers in multilayer ceramic technologies
- Three-dimensional millimeter-wave photonic integrated circuits on Si
- Wide bandwidth traveling-wave InGaAsP/InP electroabsorption modulator for millimeter wave applications
- High-power photonic microwave generation at K- and Ku-bands using a uni-traveling-carrier photodiode

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Direct opto-electronic synthesis of mW-level millimeter wave signals using an optical frequency comb generator and a uni-traveling-carrier photodiode
- Photodetection, photonic feeding coplanar patch antenna and transmitting experiment for radio-on-fiber system
- Experimental reduction of dispersion-induced effects in microwave/millimeter-wave optical systems employing SOA boosters
- RF mixers using standard digital CMOS 0.35 /spl mu/m process
- Broadband and compact SiBJT balanced up-converter MMIC using Si 3-D MMIC technology
- A highly linear single balanced mixer based on heterojunction interband tunneling diode (2001 Vol. I [MWSYM])
- A 60 GHz uniplanar MMIC 4X subharmonic mixer
- A monolithic HEMT diode balanced mixer for 100-140 GHz
- A full waveguide band MMIC tripler for 75-110 GHz

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- High gain PHEMT frequency doubler for 76 GHz automotive radar
- A stability ensuring design approach for frequency triplers
- A family of Q, V and W-band monolithic resistive mixers
- A novel planar array smart antenna system with hybrid analog-digital beamforming
- Digital beamforming for smart antennas
- Smart lens antenna arrays
- Adaptive beamforming of ESPAR antenna using sequential perturbation
- Microwave device combining filtering and radiating functions for telecommunication satellites
- An Internet controlled calibration system for TDMA smart antenna wireless base stations
- Temperature rise for the human head for cellular telephones and for peak SARs prescribed in safety guidelines (2001 Vol. I [MWSYM])

IEEE © 2003

Papers by Issue

- Power absorption and temperature elevations induced in the human head by dual-band phones
- Miniature sensor for measurement and control of temperatures by microwave radiometry in medical applications
- Analysis of planar strip array antenna for MRI
- Resonant slot antennas as transducers of DNA hybridization: a computational feasibility study
- A Zeeman-Stark/Markov model approach to study the EM-RF exposure of a potassium channel
- Non-invasive measurement of blood sugar level by millimeter waves
- A microwave radio for Doppler radar sensing of vital signs
- Sandwich type ferromagnetic RF integrated inductor (2001 Vol. I [MWSYM])
- Improved three-dimensional GaAs inductors
- Development of vertical planar coil inductors using plastic deformation magnetic assembly (PDMA)

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A low-loss planar microwave balun with an integrated bias scheme for push-pull amplifiers
- Graphical design of air-gap stacked Marchand balun
- High-Q frequency stable dual-mode whispering gallery sapphire resonator
- 2-D mechanical beam steering antenna fabricated using MEMS technology
- Microelectromechanical systems (MEMS) actuators for antenna reconfigurability
- 2 and 4-bit DC-18 GHz microstrip MEMS distributed phase shifters
- Lifetime characterization of capacitive RF MEMS switches
- Design of a novel digital phase shifter at X-band
- An ultra broad band reflection type 180/spl deg/ phase shifter with series and parallel LC circuits
- A high-performance GaAs SP3T switch for digital cellular systems

IEEE © 2003

Papers by Issue

- High isolation V-band SPDT switch MMIC for high power use [HEMTs application]
- Switches with capacitor cancelled parasitic inductance of FET
- A V-Band MMIC SPDT passive HEMT switch using impedance transformation networks
- New phase shifters and phased antenna array designs based on ferroelectric materials and CTS technologies (2001 Vol. I [MWSYM])
- A bi-directionally steering phased array antenna controlled by dual piezoelectric transducers
- A novel millimeter-wave beam-steering technique using a dielectric-image-line-fed grating film
- A method for determining noise coupling in a phased array antenna
- Performance of thinned antenna arrays using nonlinear processing in DBF radar applications

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A wide dynamic range switched-LNA in SiGe BiCMOS (2001 Vol. I [MWSYM])
- Dual bias feed SiGe HBT low noise linear amplifier (2001 Vol. I [MWSYM])
- A 1.4-dB-NF variable-gain LNA with continuous control for 2-GHz-band mobile phones using InGaP emitter HBTs (2001 Vol. I [MWSYM])
- A 1.7 mA low noise amplifier with integrated bypass switch for wireless 0.05-6 GHz portable applications (2001 Vol. I [MWSYM])
- Passive electromagnetic compensation of permittivity changes in microwave circuits
- 360-degree linear analog phase shifter design using tunable short-circuit terminated combline filters
- A novel low-loss slow-wave CPW periodic structure for filter applications
- Overlapping, multiple CPW stub structures for high density MMICs

IEEE © 2003

Papers by Issue

- LTCC-MLC balun for WLAN/Bluetooth
- MEMS single-pole double-throw (SPDT) X and K-band switching circuits
- DC-26 GHz MEMS series-shunt absorptive switches
- MEMS high Q microwave inductors using solder surface tension self-assembly
- Micromachined frequency-variable impedance tuners using resonant unit cells
- A reconfigurable double-stub tuner using MEMS devices
- Tunable lumped components with applications to reconfigurable MEMS filters
- A micromachined tunable CPW resonator
- SAW filter solutions to the needs of 3G cellular phones
- Optimized design and fabrication of a wireless pressure and temperature sensor unit based on SAW transponder technology

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Spurious suppression technique for edge-trap-type SAW resonators and their application to 1-GHz wide-band SAW-VCOs for mobile communications
- The application of dielectric thin films to enhance the properties of SAW devices
- A film bulk acoustic resonator (FBAR) duplexer for USPCS handset applications
- Laser measurements and simulations of FBAR dispersion relation
- Silicon based reconfigurable antennas
- Hilbert curve fractal antennas with reconfigurable characteristics
- Active antenna using multi-layer ceramic-polyimide substrates for wireless communication systems
- A Ka-band high-efficiency dielectric lens antenna with a silicon micromachined microstrip patch radiator
- A multifunctional antenna for terrestrial and satellite radio applications

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- LDMOS electro-thermal model validation from large-signal time-domain measurements
- Tunnel diode nonlinear model for microwave circuits and active antennas
- A simple bias dependant LF FET noise model for CAD
- Temperature-dependent modeling of high power MESFET using thermal FDTD method
- Full wave analysis of FET fingers using various semiconductor physical models
- Generation of multicarrier complex lowpass models of RF ICs
- A measurement based distributed low frequency noise HEMT model: application to design of millimeter wave automotive radar chip sets
- Pulse characterization of trapping and thermal effects of microwave GaN power FETs
- Thermal transients in microwave active devices and their influence on intermodulation distortion

IEEE © 2003

Papers by Issue

- A Krylov-subspace technique for the global stability analysis of large nonlinear microwave circuits
- Two-tone intermodulation distortion simulations in the time domain using a quasi-2D physical pHEMT model
- Nonlinear analysis of a microwave synthesizer based on a sampling-phase detector
- Comparison of wavelet- and time-marching-based microwave circuit transient analyses
- Efficient algorithm for steady-state stability analysis of large analog/RF circuits
- Novel artificial frequency mapping techniques for multi-tone simulation of mixers
- New system-level simulation of noise spectra distortion in FM-CW autonomous cruise control radar
- Spectrum management of pulse transmission by high-cut filter using magnetic loss
- Null pattern synthesis of ferroelectric smart antennas

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Ferroelectric thin-film based electrically tunable Ku-band coplanar waveguide components
- Performance and modeling of saw tooth edge mode isolators
- Possibility of ultra fine isolator for portable phone
- Modeling coplanar waveguide structures constructed of ferromagnetic metal
- Planar Ka-band high temperature superconducting filters for space applications
- Multi-stage dual-mode cross-slotted superconducting filters for telecommunication application
- Design of an image-type dielectric resonator to measure surface resistance of a high-T/sub c/ superconductor film
- Planar superconducting lumped element bandpass filter with spiral inductors
- Performance of a superconducting detector circuit using a Schottky barrier diode for bandwidth modulation
- Bias circuits for GaAs HBT power amplifiers

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- High-efficiency low-IM microwave PA design
- Highly linear CMOS RF MMIC amplifier using multiple gated transistors and its Volterra series analysis
- A novel high efficiency multioctave amplifier using cascaded reactively terminated single-stage distributed amplifiers for EW system applications
- A 2.4 GHz integrated CMOS power amplifier with micromachined inductors
- Monolithic 6W Ka-band high power amplifier
- A novel method for closed-loop error correction microwave and millimeter wave QPSK modulator
- Micromachined sub-millimeter and millimeter wave variable polarisation compensator
- Membrane-supported copper E-plane circuits
- Suppression of parasitic substrate modes in flip-chip packaged coplanar W-band amplifier MMICs
- A 60 GHz conical horn antenna excited with quasi-Yagi antenna

IEEE © 2003

Papers by Issue

- Design of a nonradiative dielectric Rotman lens in the millimeter wave frequency
- Nonlinear distortion suppression in directly modulated DFB lasers by sidemode optical injection
- A new, compact model for high-speed electro-optic modulators fully integrated within a microwave CAD environment
- Conformal imaging with a non-contacting microwave antenna array
- A low-power direct conversion receiver module for C-band wireless applications (2001 Vol. I [MWSYM])
- A GaAs HBT 5.8 GHz OFDM transmitter MMIC chip set (2001 Vol. I [MWSYM])
- A 2.5 V CMOS differential active inductor with tunable L and Q for frequencies up to 5 GHz (2001 Vol. I [MWSYM])
- Temperature dependence of intermodulation and linearity in GaN based devices (2001 Vol. I [MWSYM])

IEEE © 2003

Papers by Issue

- A new T circuit topology for the broadband modelling of symmetric inductors fabricated in CMOS technology (2001 Vol. I [MWSYM])
- Modeling of inductors and transformers (2001 Vol. I [MWSYM])
- 15 GHz wideband amplifier with 2.8 dB noise figure in SiGe bipolar technology (2001 Vol. I [MWSYM])
- 40-Gbit/s D-type flip-flop and multiplexer circuits using InP HEMT (2001 Vol. I [MWSYM])
- A direct Ku-band linear subharmonically pumped BPSK and I/Q vector modulator in multi-layer thin-film MCM-D (2001 Vol. I [MWSYM])
- Index of Authors (2001 Vol. I [MWSYM])

IEEE © 2003

Papers by Issue

2001 Vol. II [MWSYM]

- Front Cover (2001 Vol. II [MWSYM])
- Table of Contents (2001 Vol. II [MWSYM])
- Technical Program Schedule (2001 Vol. II [MWSYM])
- Novel design for coplanar waveguide to microstrip transition
- Microstrip fed coplanar stripline tee junction using coupled coplanar stripline
- Novel lumped-element coplanar waveguide-to-coplanar stripline transitions
- Integrated transition of coplanar to rectangular waveguides
- A novel microstrip mode to waveguide mode transformer and its applications
- Design of HNRD guide to E-plane waveguide transitions and directional couplers by transverse resonance technique
- High-voltage GaAs power-HBTs for base-station amplifiers
- A power PHEMT device technology for broadband wireless access

IEEE © 2003

Papers by Issue

- Silicon carbide MESFETs performances and application in broadcast power amplifiers
- A 240 W power heterojunction FET with high efficiency for W-CDMA base stations
- An ultra broad band 300 W GaAs power FET for W-CDMA base stations
- High power S-band solid-state amplifiers for surveillance and traffic control radars
- Ku-band Quadri-SSPA for Stentor satellite transmit active antenna
- Nonlinear III-V HBT compact models: do we have what we need?
- Global electrothermal CAD of complex nonlinear 3-D systems based on a fully physical time-dependent compact thermal model
- Improved large-signal model and model extraction procedure for InGaP/GaAs HBTs under high-current operations

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Waveform characterization and modeling of dynamic charge behavior of InGaP-GaAs HBTs
- Scalable large-signal device model for high power-density AlGaN/GaN HEMTs on SiC
- On the Gunn effect in GaAs HBTs
- Nonlinear effects in oscillators and synthesizers
- RF synthesizers: PLL switching speed and speed-up techniques, a short review
- An agile stored /spl Sigma//spl Delta/ sequence fractional-N synthesiser
- 6.7 GHz frequency synthesizer in 0.8 /spl mu/m silicon bipolar production technology
- GSM 900/DCS 1800 fractional-N frequency synthesizer with very fast settling time
- Phase decrement type direct frequency synthesizer driven by a DDS
- Effect of losses on the spectral transition of modal poles between the improper and the proper Riemann sheets

IEEE © 2003

Papers by Issue

- Low-frequency dispersion features of a new complex mode for a periodic strip grating on a grounded dielectric slab (2001 Vol. II [MWSYM])
- Guided-wave properties of synthesized nonradiative dielectric waveguide for substrate integrated circuits (SICs)
- Slow-wave propagation of microstrip consisting of electric-magnetic-electric (EME) composite metal strips
- TEM properties of shielded homogeneous multiconductor transmission lines with PEC and PMC walls
- Explicit eigenvalue approach to the efficient determination of the hybrid spectrum of ferrite-loaded circular waveguide
- Envelope-finite element (EVFE) technique - 2-D guided wave examples
- Evaluation and enhancement of supraconvergence effects on nonuniform and conformal FDTD meshes
- Fundamental gridding related dispersion effects in multiresolution time domain schemes (2001 Vol. II [MWSYM])

IEEE © 2003

Papers by Issue

- Development and application of an efficient FDTD/Haar MRTD numerical interface
- A novel adaptivity for EM time domain methods: scale adaptive time steps (SATS)
- Transmission line noise from standard and proton-implanted Si
- Dielectric properties of oxidized porous silicon in a low resistivity substrate
- A novel CPW structure for high-speed interconnects
- Small-size delay line based on a periodically loaded waveguide
- Frequency dependence of Bloch impedance in a periodic transmission line structure
- A photonic crystal joint (PCJ) for metal waveguides
- Efficient baseband/RF feedforward linearizer through a mirror power amplifier using software-defined radio and quadrature digital up-conversion

IEEE © 2003

Papers by Issue

- Adaptive RF Cartesian predistorter based on the low frequency even order IM terms
- A high efficiency feedforward amplifier with a series diode linearizer for cellular base stations
- A gain/phase imbalance minimization technique for LINC transmitter
- A novel DSP architecture of adaptive feedforward linearizer for RF amplifiers
- The novel programmable RF predistortion linearizer
- A GaAs MESFET transient model capable of predicting trap-induced memory effects under complex digital modulation
- Intermodulation distortion simulation using physical GaAs FET model
- Full extraction of PHEMT state functions using time domain measurements
- Large-signal look-up table model for InP HEMTs including non-quasi-static and impact ionisation effects

IEEE © 2003

Papers by Issue

- Nonlinear noise modeling of a PHEMT device through residual phase noise and low frequency noise measurements
- Intrinsic noise currents in deep submicron MOSFETs
- NIST: responding to basic needs, responding to special needs
- Radio-frequency metrology from NBS to NIST: the legacy
- Primary frequency standards at NIST
- Broadband Josephson voltage standards
- The electronic kilogram
- Behavioral feature of fast-wave modes on printed-circuit transmission lines of open and packaged types
- Structural conditions for offering high-performance printed-circuit devices in millimeter-wave range
- High frequency leaky-mode excitation on microstrip line
- Spurious radiation from a practical source on a leaky covered microstrip line

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Proper definition of voltage for a leaky two-layer stripline consistent with its characteristic impedance
- A generalized approach to wide-band S-parameter extraction from FD-TD simulations applicable to evanescent modes in inhomogeneous guides
- Modified Yee's cell for finite-difference time-domain modeling of periodic boundary guiding structure
- A new multiresolution near-field to near-field transform suitable for multi-region FDTD schemes
- A global modeling approach using interpolating wavelets
- Performance of three-dimensional graded ADI-FDTD algorithm
- Reconstruction of microwave structures using two-dimensional inverse TLM (Transmission Line Matrix) method
- A 1 W CMOS power amplifier for GSM-1800 with 55% PAE
- A high efficiency 0.25 /spl mu/m CMOS PA with LTCC multi-layer high-Q integrated passives for 2.4 GHz ISM band

IEEE © 2003

Papers by Issue

- Variable gain power amplifier for mobile WCDMA applications (2001 Vol. II [MWSYM])
- A single supply high performance PA MMIC for GSM handsets using quasi-enhancement mode PHEMT
- E-PHEMT, single supply, high efficient power amplifiers for GSM and DCS applications
- An extended Doherty amplifier with high efficiency over a wide power range (2001 Vol. II [MWSYM])
- Analysis and experimental study of an L-band new topology Doherty amplifier
- Current mode class-D power amplifiers for high efficiency RF applications (2001 Vol. II [MWSYM])
- A compact LTCC Ku-band transmitter module with integrated filter for satellite communication applications
- A microwave frequency generation unit for space applications
- Low cost Ka band transmitter modules for LMDS equipment mass production

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A complete integrated TX/RX front-end combining 3D topologies and global synthesis
- Design and characterization of a low cost ISM-band sub carrier multiplexed broadband digital microwave radio link
- RF LDMOS characterization and its compact modeling
- Direct extraction and modeling method for temperature dependent large signal CAD model of Si-BJT
- An accurate large-signal model for a high-efficient Si bipolar GSM power transistor
- Analysis of low frequency memory and influence on solid state HPA intermodulation characteristics
- An improved behavioral modeling technique for high power amplifiers with memory
- Broadband access networks: evolution and convergence implications for equipment providers
- Wireless aspects of broadband access
- A combined optical-wireless broadband Internet access: transmission challenges

IEEE © 2003

Papers by Issue

- In-band optical crosstalk in fiber-radio WDM networks
- Neural inverse space mapping EM-optimization
- An approach for knowledge-aided-design (KAD) of microwave circuits using artificial neural networks
- Exact adjoint sensitivity analysis for neural based microwave modeling and design
- New technique using poles and modes derivatives for frequency and geometry parameterization of microwave structures
- Extending Spice-like analog simulator with a time-domain full-wave field solver
- Efficient FDTD modeling of irises/slots in microwave structures
- Time domain characterization of multichip module elements
- Full-wave analysis and model-based parameter estimation approaches for Y-matrix computation of microwave distributed RF circuits

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Analysis of signal integrity in high-speed digital ICs, by combining MOSFET modeling and the LE-FDTD method
- Interpolating wavelet Galerkin model of time dependent inhomogeneous electrically-large optical waveguide problems
- Time domain optical response of electro-optic modulator using FDTD (2001 Vol. II [MWSYM])
- A 6 GHz, 50 watt low distortion push-pull GaAs power FET optimized for 12 V class A-B operation
- High-power broadband AlGaN/GaN HEMT MMICs on SiC substrates (2001 Vol. II [MWSYM])
- New design method of non-uniform distributed power amplifiers. Application to a single stage 1 W PHEMT MMIC
- 20-30 GHz broadband MMIC power amplifiers with compact flat gain PHEMT cells
- X-band MMIC power amplifier with an on-chip temperature compensation circuit (2001 Vol. II [MWSYM])

IEEE © 2003

Papers by Issue

- A novel base feed design for high power, high frequency heterojunction bipolar transistors
- High efficiency S-band class AB push-pull power amplifier with wideband harmonic suppression
- A flexible multiband frontend for software radios using high IF and active interference cancellation
- A highly-integrated low-power direct conversion receiver MMIC for broadband wireless applications
- High-speed low-cost direct conversion digital receiver
- A 156 Mbps compact FSK modulator module for 38 GHz wireless LANs
- An electromagnetic characterization of indoor radio environment in microwave WLAN systems
- A low profile 77 GHz three beam antenna for automotive radar
- Proposal of millimeter-wave holographic radar with antenna switching

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Fully integrated automotive radar sensor with versatile resolution (2001 Vol. II [MWSYM])
- A reconfigurable active retrodirective/direct conversion receiver array for wireless sensor systems
- A novel card-type transponder designed using retrodirective antenna array
- Satellite systems for multimedia and Internet traffic
- Ka band satellite system architecture for local loop Internet access
- User equipment antennas for broadband NGSO satellite communications systems
- Outdoor units for Ka/Ku-band satellite interactive terminals
- Multi-carrier 16QAM over a linearized TWTA
- Expanded space mapping design framework exploiting preassigned parameters
- Multi-level passive order reduction of interconnect networks
- Fast analysis and optimization of combline filters using FEM

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Integrated CAD procedure for iris design in a multi-mode waveguide environment
- Decomposition synthesis approach to design of RF and microwave active circuits
- UHF frequency selective limiters
- Very low loss wideband isolators for mm-wavelengths
- A novel nonreciprocal ferrite image guide
- An ultra miniature isolator with broadband isolation using ferrite gyrator
- A method of effective use of ferrite for microwave absorber
- Phase shifters using (Ba,Sr)TiO/sub 3/ thin films on sapphire and glass substrates
- MOS varactors with ferroelectric films
- Waveguiding properties of a line of periodically arranged passive dipole scatterers
- New type of millimeter wave antenna by using the high permittivity LSE NRD guide

IEEE © 2003

Papers by Issue

- An efficient method for solving 3D dielectric planar circuit with parabolic equation
- Design of surface-wave band-gaps for planar integrated circuits using multiple periodic metallic patch arrays
- Space leakage of power from the slotline
- Derivation of analytical dyadic Green's function modifications for microstrip attenuation in transmission layered structures
- On the penetration of the longitudinal component of EM fields into metals
- Modal cutoff in coaxial transmission lines of conical and cylindrical geometries
- Fullwave analysis of transverse and longitudinal couplings in silicon RFIC. Effect of buried diffusions
- Frequency/time-domain modeling of microstrip circuits by a modified spectral domain approach
- Efficient analysis of waveguide-to-microstrip and waveguide-to-coplanar line transitions

IEEE © 2003

Papers by Issue

- A 3-D method of moments for the analysis of real life MMICs
- Generalized polygonal basis functions for the electromagnetic simulation of complex geometrical planar structures
- FD-FD GSM technique for the CAD and optimization of combline filters
- Electromagnetic modeling of multi-layer microwave circuits by the longitudinal decomposition approach
- A novel cold-FET method for determining extrinsic capacitances using a capacitive transmission line model
- Modeling of 3-D planar conducting structures on lossy silicon substrate in high frequency integrated circuits
- Modeling and investigation of instabilities in heterojunction interband tunnel diodes for microwave applications
- MOSFET bulk effect behaviour and estimation for microwave-frequency modeling
- A new analytical small-signal model of dual-gate GaAs MESFET

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Measurement-based extrinsic modeling of RF components
- Design and implementation of micromachined lumped quadrature (90/spl deg/) hybrids
- Q-enhancement of spiral inductor with N/sup +/-diffusion patterned ground shields
- A design mapping formula of asymmetrical multi-element coupled line directional couplers
- A general design formula of multi-section power divider based on singly terminated filter design theory
- A new balanced amplifier using 6-port power divider
- 60 GHz coplanar waveguide couplers and slotline transition on polished beryllium oxide
- Integration of optimized low-pass filters in band-pass filters for out-of-band improvement (2001 Vol. II [MWSYM])
- Non adjacent resonators effects on coupling and resonant frequency in combline filters
- Evanescent-mode bandpass filters based on ridged waveguide sections and inductive strips

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A compact elliptic-function BPF using triple-mode cavities for terrestrial digital television transmitters
- Circular-to-rectangular waveguide diplexers
- K-band monolithic double-balanced resistive mixer with integrated balanced oscillator
- Fundamental limitations of conversion loss and output power on an even harmonic mixer with junction capacitance
- A K-band subharmonic down-converter in a GaAs metamorphic HEMT process
- Performance comparison of single and dual stage MMIC limiters
- Novel frequency doubler using feedforward for fundamental frequency component suppression
- A compact T/R switching circuit using quadrature couplers and drain-driven HPAs
- Comparison of different adaptation algorithms for adaptive digital predistortion based on EDGE standard

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- An internally matched LTCC 3G W-CDMA 180 watt LDMOS power amplifier
- Effect of efficiency optimization on linearity of LINC amplifiers with CDMA signal
- Ultra-linear distributed class-AB LDMOS RF power amplifier for base stations
- Experimental investigation on efficiency and linearity of microwave Doherty amplifier
- Numerical investigation of vertical contactless transitions for multilayer RF circuits
- Direct conversion receiver for digital beamforming at 8.45 GHz
- Reflective antenna arrays based on shorted ring slots
- Analysis and design of active antenna arrays
- Direction finding using spectral estimation with arbitrary antenna arrays

IEEE © 2003

Papers by Issue

- Broadband planar antenna with low side lobes levels capabilities and high cross-polarisation rejection for DBS reception
- A low noise active integrated antenna receiver for monopulse radar applications
- A quasi-optical linearizer
- Study of design parameters in waveguide-based spatial power combining amplifier arrays using FDTD
- Broadband analysis of a D-band holographic power combining circuit
- Index of Authors (2001 Vol. II [MWSYM])

IEEE © 2003

Papers by Issue

2001 Vol. III [MWSYM]

- Front Cover (Vol. III [MWSYM])
- Table of Contents (2001 Vol. III [MWSYM])
- Technical Program Schedule (2001 Vol. III [MWSYM])
- Low phase noise, fully integrated monolithic VCO in X band based on HBT technology
- Conditions for broadband MMIC voltage-controlled oscillators based on theory and experiments
- Solid-state high power RF oscillator
- High-power AlGaN/GaN FET-based VCO sources
- Reduced flicker noise in microwave oscillators using feedforward amplifiers
- A wideband voltage-tunable dielectric resonator oscillator controlled by a piezoelectric transducer
- Compact high-order planar ring-resonator filters optimized in noise in coplanar technology

IEEE © 2003

Papers by Issue

- Tunable active filters having multilayer structure using LTCC (2001 Vol. III [MWSYM])
- Full wave analysis and design of RF tunable filters
- Tunable RF filters using thin film barium strontium titanate based capacitors
- Hybrid resonator microstrip line electrically tunable filter
- Design of tunable ferroelectric filters with a constant fractional band width
- Design of CT and CQ filters using approximation and optimization (2001 Vol. III [MWSYM])
- A method for the direct synthesis of general sections
- Temperature characteristics of combline resonators and filters
- Periodic structures for original design of voluminous and planar microwave filters
- A design of planar elliptic bandpass filter using SMD type partially metallized rectangular dielectric resonators

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Full-wave design of canonical waveguide filters by optimization
- Length reduction of evanescent-mode ridge waveguide bandpass filters
- Zolotarev bandpass filters (2001 Vol. III [MWSYM])
- Current status and emerging trends in RF power FET technologies
- 7-MHz, 1.1-kW demonstration of the new E/F/sub 2,odd/ switching amplifier class
- High-efficiency high-level modulator for use in dynamic envelope tracking CDMA RF power amplifiers
- Electronically tunable class-E power amplifier
- A GSM-EDGE high power amplifier utilising digital linearisation
- Integrated electro-thermal probe
- Calibrating electro-optic sampling systems
- A three-port vector network analyzer - measurement system, calibration and results

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Microwave on-wafer characterization of three-port devices using shield-based test-fixtures
- Accurate transmission line characterization on high and low-resistivity substrates
- Automated test and tuning system for microwave filters
- Low phase-noise GaInP/GaAs-HBT MMIC oscillators up to 36 GHz
- Monolithic 38 GHz coplanar feedback VCOs fabricated by a production PHEMT technology
- Low phase-noise PHEMT-based MMIC VCOs for LMDS applications
- Coplanar and microstrip oscillators in SiGe SIMMWIC technology
- Low jitter silicon bipolar based VCOs for applications in high speed optical communication systems
- Push-push oscillators for 94 and 140 GHz applications using standard pseudomorphic GaAs HEMTs

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Negative resistance optimized in noise for losses compensation in microstrip resonators
- Using a negative capacitance to increase the tuning range of a varactor diode in MMIC technology (2001 Vol. III [MWSYM])
- Compact MMIC active inductor
- Microstrip miniaturized loop-filters with high out-of-band rejection for future 3G mobile terminals
- Wideband bandpass filter design with three-line microstrip structures
- A 60 GHz-band planar dielectric waveguide filter for flip-chip modules (2001 Vol. III [MWSYM])
- Design of coupled resonators group delay equalizers
- High power C-band dielectric resonator filters for output multiplexers
- Analysis of power handling capacity of band pass filters
- Low-loss filters in rectangular waveguide with rigorous control of spurious responses through a smart modal filter

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Observations on the stopband performance of tapped line filters
- Stop-band improvement of rectangular waveguide filters using different width resonators: selection of resonator widths
- Diplexer design using pre-synthesized waveguide filters with strongly dispersive inverters
- Filter topologies with minimum peak stored energy
- 2.7 THz waveguide tripler using monolithic membrane diodes
- Fabrication of 200 to 2700 GHz multiplier devices using GaAs and metal membranes
- A 200-300 GHz SIS mixer-preamplifier with 8 GHz IF bandwidth
- 200, 400 and 800 GHz Schottky diode "substrateless" multipliers: design and results
- An I-Q mixer at 76.5 GHz using flip-chip mounted silicon Schottky diodes

IEEE © 2003

Papers by Issue

- Performance of a 1.2 THz frequency tripler using a GaAs frameless membrane monolithic circuit
- A 5 mW-290 GHz heterostructure barrier tripler in a waveguide configuration
- A method to compare vector nonlinear network analyzers
- Analysis and measurement of multi-tone intermodulation distortion of microwave frequency converters
- NPR and co-channel distortion ratio: a happy marriage?
- Linearity optimization of a distributed base station amplifier using an automated high-speed measurement protocol
- Ultra-linear power amplifier characterization using dynamic range extension techniques
- Direct measurement of the maximum operating region in GaAs HBTs for RF power amplifiers
- Benefits of SiGe over silicon bipolar technology for broadband mixers with bandwidth above 10 GHz
- 40 Gb/s 4:1 multiplexer and 1:4 demultiplexer IC module using SiGe HBTs

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- 40 Gb/s analog IC chipset for optical receivers - AGC amplifier, full-wave rectifier and decision circuit implemented using self-aligned SiGe HBTs
- Low-frequency noise and phase noise behavior of advanced SiGe HBTs
- SiGe power heterojunction bipolar transistors (HBTs) fabricated by fully self-aligned double mesa technology
- 185 GHz monolithic amplifier in InGaAs-InAlAs transferred-substrate HBT technology
- A new via fence structure for crosstalk reduction in high density stripline packages
- Coupling between microstrip lines embedded in polyimide layers for 3D-MMICs on Si
- Silicon substrate coupling noise modeling, analysis, and experimental verification for mixed signal integrated circuit design
- RF-microwave multi-layer integrated passives using fully organic System on Package (SOP) technology

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Design of embedded high Q-inductors in MCM-L technology
- A highly integrated transceiver module for 5.8 GHz OFDM communication system using multi-layer packaging technology
- EM-based multidimensional parameterized modeling of general passive planar components
- Using efficient multivariate adaptive sampling by minimizing the number of computational electromagnetic analysis needed to establish accurate interpolation models
- Accurate closed-form expressions for the frequency-dependent line parameters of on-chip interconnects on lossy silicon substrate
- Microstrip line on ground plane with closely spaced perforations-simple CAD formulas by synthetic asymptote
- An extrinsic-inductance independent approach for direct extraction of HBT intrinsic circuit parameters (2001 Vol. III [MWSYM])
- Consistent small-signal and RF-noise parameter modelling of carbon doped InP/InGaAs HBT

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Dual-mode and quad-mode Mobius bandpass filters
- Analysis and design of mass-producible cross-coupled, folded E-plane filters
- Modified conductor loaded cavity resonator with improved spurious performance
- A practical triple-mode monoblock bandpass filter for base station applications
- Low-cost dual-mode asymmetric filters in rectangular waveguide
- Analysis and design of grooved circular waveguide dual-mode filters
- Small filters based on slotted cylindrical ring resonators (2001 Vol. III [MWSYM])
- Dual-mode filters for cellular base stations using metallized dielectric resonators
- 65-145 GHz InP MMIC HEMT medium power amplifiers
- A new direct millimeter wave six-port receiver (2001 Vol. III [MWSYM])

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Wireless multi-channel TV-signal distribution system by using NRD guide transmitter and receiver at 60 GHz
- Wideband low-phase-noise high-power W-band signal sources
- 155 Mbit/s data transmission at 60 GHz using a 1/spl times/4 patch array antenna with variable optical delay lines
- Fault tolerance analysis and measurement of a spatial power amplifier
- A K-band full-duplex transmit-receive lens array
- Quasi-optical power amplifier using TEM waveguide concept
- A 16-element reflection grid amplifier with improved heat sinking
- A 1 watt, 38 GHz monolithic grid oscillator
- A 94-GHz overmoded waveguide oscillator with Gunn diodes
- A retrodirective diode grid array using four-wave mixing
- An experimental and theoretical characterization of a broadband arbitrarily-polarized rectenna array

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- 5.8 GHz circular polarized rectifying antenna for microwave power transmission
- A 1-10 GHz 0.18/spl mu/m-CMOS chipset for multi-mode wireless applications
- A 0.18 /spl mu/m foundry RF CMOS technology with 70 GHz F/sub t/ for single chip system solutions
- Deep trench guard technology to suppress coupling between inductors in silicon RF ICs
- Physics and compact modeling of SOI substrates with buried ground plane (GPSOI) for substrate noise suppression
- Low-loss passive components on BCB-based 3D MMIC technology
- Microwave noise and power performance of metamorphic InP heterojunction bipolar transistors (HBTs) (2001 Vol. III [MWSYM])
- Broadband time-domain characterization of multiple flip-chip interconnects

IEEE © 2003

Papers by Issue

- Ka band power pHEMT technology for space power flip-chip assembly
- Design and analysis of low cost IC package solution for 10 Gbit/s applications
- LTCC as MCM substrate: design of strip-line structures and flip-chip interconnects
- Vertical transitions in low temperature co-fired ceramics for LMDS applications
- Characterization of high-density micromachined interconnects
- Design and optimization for coaxial-to-microstrip transition on multilayer substrates
- Temperature compensated planar narrow-band notch filter with fully automated laser-trimming
- MoM/BI-RME analysis of boxed microwave circuits based on arbitrarily shaped elements
- Fast electromagnetic analysis of dense shielded integrated circuits using the adaptive integral method (AIM)

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Full wave analysis of electromagnetic coupling in realistic RF multilayer PCB layouts using cascaded parallel plate waveguide model
- A new global-analysis model for microwave circuits with lumped elements
- Analysis of multi-layer integrated inductors with wave concept iterative procedure (WCIP)
- Numerical cost of gradient computation within the method of moments and its reduction by means of a novel boundary-layer concept
- Automated intelligent mode selection for fast mode matching analysis of waveguide discontinuities
- A 183 GHz low noise amplifier module with 5.5 dB noise figure for the conical-scanning microwave imager sounder (CMIS) program
- Low noise amplifiers in InP technology for pseudo correlating millimeter wave radiometer
- Simple model for dynamic range estimate of GaAs amplifiers

IEEE © 2003

Papers by Issue

- Modeling of low-frequency noise in GaInP/GaAs hetero-bipolar transistors
- Microwave noise and small-signal parameters scaling of InP/InGaAs DHBT with high DC current gain
- An all-cryogenic low phase-noise hybrid K-band oscillator for satellite communications
- Dual 5 MHz PCS receiver front end
- Compact quasi-lumped element HTS microstrip filters
- Optoelectronic RF harmonic generation and mixing in high-T/sub c/ superconducting film
- Novel method for calculation and measurement of unloaded Q-factor of superconducting dielectric resonators
- Generalized multi-gridding technique for the TLM method using the symmetrical super-condensed node (SSCN)
- A novel adaptive approach to modeling MEMS tunable capacitors using MRTD and FDTD techniques
- A multi-threaded time domain TLM algorithm for symmetric multi-processing computers

IEEE © 2003

Papers by Issue

- Construction of solutions to electromagnetic problems in terms of two collinear vector potentials (2001 Vol. III [MWSYM])
- Analysis of lumped element transistor structures using MRTD: the equivalent source method
- Efficient time-domain electromagnetic analysis using CDF biorthogonal wavelet expansion
- A wavelet-based FDTD-multigrid-method
- Analysis and design of a planar antenna for a millimetre-wave emitter using TLM
- Analysis of differential vias in a multilayer parallel plate environment using a physics-based CAD model
- 3D-FDTD subgridding technique applied to radiating structures
- Enhanced forward coupling phenomena between microstrip lines on periodically patterned ground plane
- Coupled TLM-thermal analysis in the time domain

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Lumped and distributed device embedding techniques in time domain TLM field models
- Analysis of multiport waveguide structures by a higher-order FDTD methodology based on non-orthogonal curvilinear grids
- FDTD study of resonance processes in microstrip ring resonators with different excitation geometries
- An unconditionally stable finite element time domain solution of active nonlinear microwave circuits using perfectly matched layers
- Optimal shape design of dielectric structure using FDTD and topology optimization
- Electronic design assistance tool for circuit optimization: application to microwave power amplifiers
- Nonlinear statistical modeling of large-signal device behavior
- A computer aided design technique for hybrid and monolithic microwave amplifiers employing distributed equalizers with lumped discontinuities

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Statistical construction of a representative CAD model from a measured population for RF design applications
- SMX - A novel object-oriented optimization system
- A robust algorithm for automatic development of neural network models for microwave applications (2001 Vol. III [MWSYM])
- Steady-state determination for RF circuits using Krylov-subspace methods in SPICE
- Interactive "visual" design of matching and compensation networks for microwave active circuits
- Efficient sensitivity analysis of lossy multiconductor transmission lines with nonlinear terminations (2001 Vol. III [MWSYM])
- Software tool for the design of narrow band band-pass filters
- Optimization of waveguide diplexers using shadow specifications
- Micromachined RF MEMS tunable capacitors using piezoelectric actuators

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Digitally controllable variable high-Q MEMS capacitor for RF applications
- Nonlinear electro-mechanical modeling of MEMS switches
- An electromechanical model for MEMS switches
- Digital generation of RF signals for wireless communications with band-pass delta-sigma modulation
- A CMOS 6-bit, 1 GHz ADC for IF sampling applications
- A silicon-on-insulator 28-V RF power LDMOSFET for 1-GHz integrated power amplifier applications
- A software GPS receiver for weak signals
- Simple design equations for broadband class E power amplifiers with reactance compensation
- Multi-harmonic tuning behavior of MOSFET RF power amplifiers
- Study of self-heating effects in GaN HEMTs
- InGaP PHEMTs for wireless power applications

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Novel asymmetric gate-recess engineering for sub-millimeter-wave InP-based HEMTs
- A calibrated RF/IF monolithic vector analyzer
- Design techniques of reducing chip area and highly integrated MMIC for W-band application
- A novel accurate design method for the hairpin type coupled line bandpass filter
- Hairpin filters with tunable transmission zeros
- Adjustment of a temperature compensated Ka-band ring resonator VCO using fully automated laser-trimming
- Monolithic quantum tunnel diode-based C-band oscillator and LNA
- Calibrated linear and nonlinear pulsed RF measurements on an amplifier
- Measurement of group velocities of various microwave transmission lines via FM reflectometry

IEEE © 2003

Papers by Issue

- Millimeter wave measurements of temperature dependence of complex permittivity of GaAs plates by a circular waveguide method
- Infrared temperature characterization of high power RF devices
- Near-field microwave microscopy of thin film resonators
- 28 GHz LMDS channel measurements and modeling for parameterized urban environments
- C/Ku-band pulsed transmitters for Poseidon 2 Altimeter
- The RF module design for W-CDMA/GSM dual band and dual mode handset
- Bias control technique for CDMA driver amplifier to decrease current
- Multi-carrier microwave breakdown in air-filled components
- Analysis of proposals to reduce SAR levels from GSM terminals
- High-accuracy digital 5-bit 0.8-2 GHz MMIC RF attenuator for cellular phones

IEEE © 2003

Papers by Issue

- Micromachined 60 GHz GaAs power sensor with integrated receiving antenna
- A sensor system based on SiGe MMICs for 24 GHz automotive applications
- Acoustic sensing using radio frequency detection and capacitive micromachined ultrasonic transducers
- Millimeter-wave printed circuit antenna system for automotive applications
- Spectrum correlation of beat signals in the FM-CW radar level meter and application for precise distance measurement
- K-band direct detect MMIC Si micromachined radiometer
- A rugged active sensor for microwave aquametry
- Index of Authors (2001 Vol. III [MWSYM])

2002 Vol. I [MWSYM]

- Front Cover (2002 Vol. I [MWSYM])
- Table of Contents (2002 Vol. I [MWSYM])
- Technical Program Schedule (2002 Vol. I [MWSYM])
- Integrated even harmonic type direct conversion receiver for W-CDMA mobile terminals (2002 Vol. I [MWSYM])
- An analog baseband chain for a UMTS zero-IF receiver in a 75 GHz SiGe BiCMOS technology (2002 Vol. I [MWSYM])
- A 2-GHz RF front-end transceiver chipset in CMOS technology for PCS and IMT-2000 applications (2002 Vol. I [MWSYM])
- System analysis of a W-CDMA base-station PA employing adaptive digital predistortion (2002 Vol. I [MWSYM])
- Ku-band MMIC's in low-cost, SMT compatible packages (2002 Vol. I [MWSYM])
- ESD protection of RF circuits in standard CMOS process (2002 Vol. I [MWSYM])

IEEE © 2003

Papers by Issue

- Novel BiCMOS compatible, short channel LDMOS technology for medium voltage RF and power applications (2002 Vol. I [MWSYM])
- Electromagnetic coupling effects in RFCMOS circuits (2002 Vol. I [MWSYM])
- Ultra low-power VCO based on InP-HEMT and heterojunction interband tunnel diode for wireless application (2002 Vol. I [MWSYM])
- Correlation of nonlinear distortion in digital phased arrays: measurement and mitigation
- Planar implementation of the partially overlapped subarrays for millimeterwave beam steerable antenna applications
- A novel multibeam grating antenna with applications to low-cost millimeter-wave beam-steering
- Highly integrated RF-modules for Ka-Band multiple-beam active phased array antennas
- High performance voltage controlled bi-directional amplifiers in support of component reuse for large aperture phase array

IEEE © 2003

Papers by Issue

- Experimental investigation of a varactor loaded reflectarray antenna
- A 50-Gbit/s 1:4 demultiplexer IC in InP-based HEMT technology
- A 0.15-/spl mu/m GaAs MHEMT transimpedance amplifier IC for 40-Gb/s applications
- A fully integrated 40-Gbit/s clock and data recovery circuit using InP/InGaAs HBTs
- 40-Gb/s optical receiver IC chipset - including a transimpedance amplifier, a differential amplifier, and a decision circuit - using GaAs-based HBT technology
- 40-GHz MMICs for optical modulator driver applications
- Design of a miniaturized stripline-to-microstrip-line coupler
- A high-directivity microstrip directional coupler with feedback compensation
- An all 50 ohm divider/combiner structure
- Vertical balun and Wilkinson divider

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Analysis and design of a high-performance planar Marchand balun
- Analysis and design of low-loss planar microwave baluns having three symmetric coupled lines
- Coupled electromagnetic/nonlinear optimization of self-oscillating microstrip antennas with far-field performance specifications
- Analog frequency divider by variable order 6 to 9
- Intermodulation distortion behavior in LDMOS transistor amplifiers
- Augmented behavioral characterization for modeling the nonlinear response of power amplifiers
- Extraction of accurate behavioral models for power amplifiers with memory effects using two-tone measurements
- Statistical modeling of the interaction of multiple signals in nonlinear RF systems

Papers by Issue

- Modeling of passive elements with ASITIC (2002 Vol. I [MWSYM])
- Modeling of frequency dependent losses in two-port and three-port inductors on silicon (2002 Vol. I [MWSYM])
- Characterization and modeling of on-chip inductor substrate coupling effect (2002 Vol. I [MWSYM])
- Characterization and modeling of small-signal substrate resistance effect in RF CMOS (2002 Vol. I [MWSYM])
- A new methodology for the computation of the substrate parasitics of octagonal inductors (2002 Vol. I [MWSYM])
- Review of SiGe process technology and its impact on RFIC design (2002 Vol. I [MWSYM])
- High performance circuits in 0.18 /spl mu/m SiGe BiCMOS process for wireless applications (2002 Vol. I [MWSYM])
- Low-frequency noise figures-of-merit in RF SiGe HBT technology (2002 Vol. I [MWSYM])
- COM2 enhanced graded base SiGe technology for high speed applications (2002 Vol. I [MWSYM])

IEEE © 2003

Papers by Issue

- Advanced passive devices for enhanced integrated RF circuit performance (2002 Vol. I [MWSYM])
- High quality factor and high self-resonant frequency monolithic inductor for millimeter-wave Si-based IC's
- Two-port type ferromagnetic RF integrated inductor
- RF MIM capacitors using high-K Al/sub 2/O/sub 3/ and AlTiO/sub x/ dielectrics
- Performance analysis of monolithic RF transformers by experimental characterization
- Lumped and distributed lattice-type LC-baluns
- Design of a novel lumped element backward directional coupler based on parallel coupled-line theory
- Toggle-switch - a new type of RF MEMS switch for power applications
- Low contact resistance series MEMS switches
- High-isolation BST-MEMS switches
- RF MEMS capacitive switches fabricated with HDICP CVD SiN/sub x/

IEEE © 2003

Papers by Issue

- A study of thermal effects in RF-MEM-switches using a time domain approach
- Steady state thermal analysis and high-power reliability considerations of RF MEMS capacitive switches
- A balanced resistive mixer avoiding an IF balun
- A compact L-band LTCC mixer with high image rejection
- An even harmonic mixer using self-biased anti-parallel diode pair
- A monolithic, 2 to 18 GHz upconverter
- A robust high voltage Si LDMOS model extraction process to achieve first pass linear RFIC amplifier design success (2002 Vol. I [MWSYM])
- Large-signal modeling of GaN FET and nonlinearity analysis using Volterra series (2002 Vol. I [MWSYM])
- Direct parameter extraction on RF-CMOS (2002 Vol. I [MWSYM])

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Low frequency noise characterization and modeling of microwave bipolar devices: application to the design of low phase noise oscillator (2002 Vol. I [MWSYM])
- Linearity analysis of CMOS for RF application (2002 Vol. I [MWSYM])
- RF power devices for wireless communications (2002 Vol. I [MWSYM])
- SiGe/Si power HBTs for X- to K-band applications (2002 Vol. I [MWSYM])
- RF power characteristics of SiGe heterojunction bipolar transistor with high breakdown voltage structures (2002 Vol. I [MWSYM])
- Design techniques for improved microwave performance of small outline packages (2002 Vol. I [MWSYM])
- Spiral inductor performance in deep-submicron bulk-CMOS with copper interconnects (2002 Vol. I [MWSYM])
- Digital beamforming and calibration for smart antennas using real-time FPGA processing

IEEE © 2003

Papers by Issue

- A smart antenna receiver array using a single RF channel and digital beamforming (2002 Vol. I [MWSYM])
- A 62/66 GHz frequency offset retrodirective array
- A compact beamforming matrix module for use in multibeam communication satellites
- Smart antenna system implementation based on digital beam-forming and software radio technologies
- RF power handling of capacitive RF MEMS devices
- A very-low-loss 2-bit X-band RF MEMS phase shifter
- A low-loss Ka-band distributed MEMS 2-bit phase shifter using metal-air-metal capacitors
- V-band low-loss and low-voltage distributed MEMS digital phase shifter using metal-air-metal capacitors
- Differential multi-finger MEMS tunable capacitors for RF integrated circuits
- Miniaturized and broadband V-band balanced frequency doubler for highly integrated 3-D MMIC

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Integrated quadrupler circuit in coplanar technology for 60 GHz wireless applications
- Some rules for the choice of the C(V) characteristic for the design of frequency triplers with symmetrical varactors
- Microwave variable delay line using a membrane impregnated with liquid crystal
- Tunable inverted-microstrip phase shifter device using nematic liquid crystals
- Harmonic rejection filters for the dominant and the higher waveguide modes based on the slotted strips
- A novel compact millimeter wave diplexer
- Broadband TEM-mode planar-rectangular dielectric waveguide bandpass filter and its miniaturization
- /spl lambda//4 stepped-impedance resonator bandpass filters fabricated on coplanar waveguide
- A stepped cavity resonator with optimized spurious performance and its applications to BPFs

IEEE © 2003

Papers by Issue

- Efficient analysis of waveguide filters by the integral equation technique and the BI-RME method
- Generation of RF pulsewidth modulated microwave signals using delta-sigma modulation
- Using silicon-germanium mainstream BiCMOS technology for X-band and LMDS (25-30 GHz) microwave applications
- Low frequency noise in boron doped poly-SiGe resistors
- A fully-integrated broadband amplifier MMIC employing a novel chip size package
- RF performance tradeoffs of SiGe HBT fabricated by reduced pressure chemical vapor deposition
- A novel equivalent circuit and modeling method for defected ground structure and its application to optimization of a DGS lowpass filter
- Microwave planar active filters in GaAs and SiGe technologies
- GSM 900/DCS 1800 fractional-N modulator with two-point-modulation

IEEE © 2003

Papers by Issue

- On the stability of millimeter-wave power amplifiers
- Output harmonic termination techniques for AlGaN/GaN HEMT power amplifiers using active integrated antenna approach
- An advanced 2 watt high power amplifier for CDMA 900 MHz system
- 2W Ku-band coplanar MMIC HPA using HBT for flip-chip assembly
- 1 and 2 watt MMIC power amplifiers for commercial K/Ka-band applications
- Characteristics of microwave power GaN HEMTs on 4-inch Si wafers
- Intercept point behavior of Ka-band GaAs high power amplifiers
- Traveling-wave tube amplifier performance evaluation and design optimization for applications in multi-level digital communications

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- An adaptive Volterra predistorter for the linearization of RF high power amplifiers
- A low cost traveling wave tube for wireless communications
- Effects of anti-aliasing filters in feedback path of adaptive predistortion
- Error signal reuse in a feedforward amplifier
- RF-interconnect for multi-Gb/s digital interface based on 10 GHz RF-modulation in 0.18 /spl mu/m CMOS
- 50 GHz high output voltage distributed amplifiers for 40 Gb/s EO modulator driver application
- Development of 4-Gsps 2-bit ADC with GaAs ICs for radio astronomy
- 0.25/spl mu/m pHEMT 40Gb/s E/O modulator drivers
- Suppression of the parallel-plate noise in high-speed circuits using a metallic electromagnetic band-gap structure
- Results on a direct digital receiver operated with fast learning networks

IEEE © 2003

Papers by Issue

- A 6.5-mW receiver front-end for Bluetooth in 0.18-/spl mu/m CMOS (2002 Vol. I [MWSYM])
- An active SiGe sub-harmonic direct-conversion receiver front-end design for 5-6 GHz band applications (2002 Vol. I [MWSYM])
- Soft breakdown and hot carrier reliability of CMOS RF mixer and redesign (2002 Vol. I [MWSYM])
- High-Q copper inductors on standard silicon substrate with a low-k BCB dielectric layer (2002 Vol. I [MWSYM])
- Geometry and bias current optimization for SiGe HBT cascode low-noise amplifiers (2002 Vol. I [MWSYM])
- High linearity low-k BCB-bridged AlGaAs/InGaAs power HFETs (2002 Vol. I [MWSYM])
- Performance of a CMOS Bluetooth transceiver IC with copper RF passives (2002 Vol. I [MWSYM])
- Effects of dummy patterns and substrate on spiral inductors for sub-micron RF ICs (2002 Vol. I [MWSYM])

IEEE © 2003

Papers by Issue

- Schottky Junction Transistors for micropower RFICs (2002 Vol. I [MWSYM])
- ESD protection design for 900-MHz RF receiver with 8-kV HBM ESD robustness (2002 Vol. I [MWSYM])
- Improvements to performance of spiral inductors on insulators (2002 Vol. I [MWSYM])
- Octave tunable, highly linear, RC-ring oscillator with differential fine-coarse tuning, quadrature outputs and amplitude control for fiber optic transceivers (2002 Vol. I [MWSYM])
- A 2.45GHz fully-differential CMOS image-reject mixer for Bluetooth application (2002 Vol. I [MWSYM])
- Super compact RFIC inductors in 0.18/spl mu/m CMOS with copper interconnects (2002 Vol. I [MWSYM])
- High performance single supply power amplifiers for GSM and DCS applications using true enhancement mode FET technology (2002 Vol. I [MWSYM])

IEEE © 2003

Papers by Issue

- Integrated 2.4 GHz CMOS quadrature VCO with symmetrical spiral inductors and differential varactors (2002 Vol. I [MWSYM])
- A fully monolithic SiGe quadrature voltage controlled oscillator design for GSM/DCS-PCS applications (2002 Vol. I [MWSYM])
- Hot carrier and soft breakdown effects on VCO performance (2002 Vol. I [MWSYM])
- A 1.5-V 4-GHz dynamic-loading regenerative frequency doubler in a 0.35-/spl mu/m CMOS process (2002 Vol. I [MWSYM])
- Very low phase-noise fully-integrated coupled VCOs (2002 Vol. I [MWSYM])
- Wide-tuning-range dual-VCOs for cable modem receivers (2002 Vol. I [MWSYM])
- A 5.8 GHz fully integrated low power low phase noise CMOS LC VCO for WLAN applications (2002 Vol. I [MWSYM])

IEEE © 2003

Papers by Issue

- A 5 GHz fast-switching CMOS frequency synthesizer (2002 Vol. I [MWSYM])
- A Wilkinson power divider on a low resistivity Si substrate with a polyimide interface layer for wireless circuits (2002 Vol. I [MWSYM])
- Development and verification of a new non-linear MOSFET model (2002 Vol. I [MWSYM])
- Design and analysis of a multi-layer transformer balun for silicon RF integrated circuits (2002 Vol. I [MWSYM])
- Smoothing gate capacitance models for CMOS radio frequency and microwave integrated circuits CAD (2002 Vol. I [MWSYM])
- Index of Authors (2002 Vol. I [MWSYM])

IEEE © 2003

Papers by Issue

2002 Vol. II [MWSYM]

- Front Cover (2002 Vol. II [MWSYM])
- Table of Contents (2002 Vol. II [MWSYM])
- Technical Program Schedule (2002 Vol. II [MWSYM])
- A 20 W 2080-2200 MHz hybrid power amplifier optimized for error amplifier applications
- A 15 watt PFP GaAs PHEMT MMIC power amplifier for 3G wireless transmitter applications
- 70% high efficient C-band 27 W hetero-structure FET for space application
- Ka-band coupled-cavity TWT amplifiers for military radar and commercial satellite communication
- High performance microwave power modules for military and commercial systems
- Production and operation of a high-efficiency DBS-band klystron utilizing a multistage depressed collector

IEEE © 2003

Papers by Issue

- Development of RF carbon nanotube resonant circuit sensors for gas remote sensing applications
- Integrated microwave sensor for cavity-length measurement with sub-millimeter accuracy
- A planar resonant sensor for the complex permittivity characterization of materials
- Microwave reflection tomography array for damage detection in concrete structures
- Wireless IDT ice sensor
- High performance air gap transmission lines for millimeter wave applications
- Reconfigurable quasi-fractal transmission line structures
- Miniaturized slow-wave coplanar waveguide circuits on high-resistivity silicon
- Modeling of real-shaped LTCC stripline structure having sharpened edges and embedded pores

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- High-isolation bonding pad with depletion-insulation structure for RF/microwave integrated circuits on bulk silicon CMOS
- Porosity effects on coplanar waveguide porous silicon interconnects
- Substrate loss mechanisms for microstrip and CPW transmission lines on lossy silicon wafers
- Ultra low phase noise SiGe HBT. Application to a C band sapphire resonator oscillator
- A low phase noise silicon 9 GHz VCO and an 18 GHz push-push oscillator
- A novel microwave oscillator using double-sided MIC
- C-band oscillator using high-Q inductors embedded in multi-layer organic packaging
- A differentially-tuned CMOS LC VCO for low-voltage full-rate 10 Gb/s CDR circuit
- Implicit space mapping EM-based modeling and design exploiting preassigned parameters

IEEE © 2003

Papers by Issue

- Wide-band compact modeling of spiral inductors in RFICs
- On the synthesis of equivalent circuit models for multiports characterized by frequency-dependent parameters (2002 Vol. II [MWSYM])
- New extraction algorithm for GaAs-HBTs with low intrinsic base resistance
- Uncertainty estimation and optimal extraction of intrinsic FET small signal model parameters
- An analytic expression for the HBT extrinsic base-collector capacitance derived from S-parameter measurements
- Enhanced PML-like ABCs for layered media transmission line termination
- Global modeling of active microwave devices incorporating a novel large-signal time-domain full-hydrodynamic physical simulator using wavelet-based adaptive grids
- Coupling front tracking and wavelet techniques for fast time domain simulations

IEEE © 2003

Papers by Issue

- Demonstration and suppression of numerical divergence errors in FDTD analysis of practical microwave problems
- Analysis of guided wave structures using 3-D envelope-finite element (EVFE) technique
- A surface impedance approach for modeling multilayer conductors in FDTD
- Power amplifier module with digital adaptive predistortion for cellular phone (2002 Vol. II [MWSYM])
- Feedforward amplifier for WCDMA base stations with a new adaptive control method
- A novel technology for linearizing traveling wave tube amplifiers
- New linearization method for the modulated signals with high peak-to-average ratio: peak-to-average ratio reduction and expansion
- Reduction of intermodulation distortion in active phased array antenna systems using a distortion controller

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A compact Ka-band 156 Mbps transceiver for a wireless LAN system using PTFE/FR-4 laminated MCMs
- An obstacle sensing radar system for a railway crossing application: a 60 GHz millimeter wave spread spectrum radar
- Highly integrated microwave point-to-point outdoor unit optimized for ultra high volume manufacturing
- Architecture and algorithm for high precision image rejection and spurious rejection mixers using digital compensation
- Power-amplifier transient tracking in OFDM
- Analysis and synthesis of in-line coaxial-to-waveguide adapters
- A transition from microstrip to dielectric-filled rectangular waveguide in surface mounting
- A millimeter-wave perpendicular coax-to-microstrip transition
- Mono-grooved circular waveguide polarizers
- Analysis of coupling characteristics between transmission lines with a buried meshed-ground in LTCC-MCMs

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- 45 GHz highly integrated phase-locked loop frequency synthesizer in SiGe bipolar technology
- Single-chip 20-GHz VCO and frequency divider in SiGe technology
- 38 GHz push-push GaAs-HBT MMIC oscillator
- A 40 GHz-band fully monolithic VCO with a one-wave length microstrip resonator for accurate oscillation frequency
- A Ku band InGaP/GaAs HBT MMIC VCO with a balanced and a differential topologies
- A new behavioral model taking into account nonlinear memory effects and transient behaviors in wideband SSPAs
- Accurate prediction of PHEMT intermodulation distortion using the nonlinear discrete convolution model
- An electrothermal BSIM3 model for large-signal operation of RF power LDMOS devices
- Nonlinear amplifier modeling taking into account HF memory frequency

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Equivalent circuit of radiating longitudinal slots in dielectric filled rectangular waveguides obtained with FDTD method
- Custom hardware implementation of the finite-difference time-domain (FDTD) method
- Analysis of CMOS interconnections combining LE-FDTD method and SOC procedure
- Modeling and optimization of RF reconfigurable tuners with computationally efficient time-domain techniques
- Application of C-COM for microwave integrated-circuit modeling
- Comparison of the efficiency of electromagnetic solvers in the time- and frequency-domain for the accurate modeling of planar circuits and MEMS
- A 6 watt LDMOS broadband high efficiency distributed power amplifier fabricated using LTCC technology
- Optimum bias conditions for linear broadband InGaP/GaAs HBT power amplifiers (2002 Vol. II [MWSYM])

IEEE © 2003

Papers by Issue

- High efficiency wideband 6 to 18 GHz PHEMT power amplifier MMIC
- A broadband, push-pull power MMIC operating at K/Ka-band frequencies
- A new amplifier power combining scheme with optimum efficiency under variable outputs
- W-band InP/InGaAs/InP DHBT MMIC power amplifiers
- RF performance and thermal analysis of AlGaN/GaN power HEMTs in presence of self-heating effects
- A 0.9-2.6 GHz broadband RF front-end for direct conversion transceivers
- Six-port direct digital receiver (SPDR) and standard direct receiver (SDR) results for QPSK modulation at high speeds
- Development of a low-IF receiver and a fixed wireless utility network
- A microwave communication link with self-heterodyne direct down conversion and system predistortion (2002 Vol. II [MWSYM])

IEEE © 2003

Papers by Issue

- The danger of high-frequency spurious effects on wide microstrip line (2002 Vol. II [MWSYM])
- Frequency dependent characteristics of radiation from a voltage source on a covered microstrip line
- Approximate analytical evaluation of the continuous spectrum in a substrate-superstrate dielectric waveguide (2002 Vol. II [MWSYM])
- Significant contribution of nonphysical leaky mode to the fields excited by a practical source in printed-circuit transmission lines
- Novel selected modes on the conductor-backed slotline
- A symmetry device to speed up circuit simulation and stability tests
- Feasible adjoint sensitivity technique for EM design optimization (2002 Vol. II [MWSYM])
- On passive time-domain macromodels of distributed transmission line networks

IEEE © 2003

Papers by Issue

- Fast and accurate C.A.D. of narrow band waveguide filters applying an electromagnetic segmentation method
- Coupling of large number of vias in electronic packaging structures and differential signaling
- Full wave analysis of isolated pockets to improve isolation performances in silicon based technology
- Novel technique for determining bias, temperature and frequency dependence of FET characteristics
- Towards a unified method to implement transit-time effects in Pi-topology HBT compact models
- Measurement and modelling of static and dynamic breakdowns of power GaInP/GaAs HBTs
- A simple practical technique for estimating the junction temperature and the thermal resistance of a GaAs HBT
- A novel extraction method for a fully electro-thermal large-signal model of HBT
- High performance silicon bipolar power amplifier for 1.8 GHz applications

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A 2.4 GHz high efficiency SiGe HBT power amplifier with high-Q LTCC harmonic suppression filter
- The maximum operating region in SiGe HBTs for RF power amplifiers
- Implementation of RF power MOS in 0.18/spl mu/m CMOS technology for single chip solution
- Performance of GaAs on silicon power amplifier for wireless handset applications
- Broadband high-efficiency monolithic InGaP/GaAs HBT power amplifiers for 3G handset applications
- InGaP PHEMTs for 3.5GHz W-CDMA applications
- Broadband highly integrated LTCC front-end module for IEEE 802.11a WLAN applications
- DCS 1800 base station receiver integrated in 0.25 /spl mu/m CMOS
- Development of SOI based MMICs for wireless LAN applications

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Design of high speed master-slave D-type flip-flop in InP DHBT technology (2002 Vol. II [MWSYM])
- A GaAs MHEMT distributed amplifier with 300-GHz gain-bandwidth product for 40-Gb/s optical applications
- Negative refractive index metamaterials supporting 2-D waves
- Characteristics of Ka band waveguide using electromagnetic crystal sidewalls
- Terahertz pulse propagation in plastic photonic crystal fibers
- Radiation from ground plane photonic bandgap microstrip waveguides
- Dispersion characteristics of EME microstrip at first higher order
- PBG-enhanced inductor
- Reduced size capacitive defect EBG resonators
- Advanced microwave modeling framework exploiting automatic model generation, knowledge neural networks and space mapping

IEEE © 2003

Papers by Issue

- Neural based dynamic modeling of nonlinear microwave circuits (2002 Vol. II [MWSYM])
- A systematic approach to a reliable neural model for pHEMT using different numbers of training data
- A novel design approach for microwave planar filters
- EM-simulator based parameter extraction and optimization technique for microwave and millimeter wave filters
- Computer-aided tuning of microwave filters using fuzzy logic (2002 Vol. II [MWSYM])
- A general framework for SPICE-TLM interconnection
- FDTD study of surface waves in microstrip and patch structures
- Time domain field synthesis with 3D symmetric condensed node TLM
- Towards accurate time-domain simulation of highly conductive materials
- Lumped device modeling with FDTD including packaging effects

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A new 2-D image reconstruction algorithm based on FDTD and design sensitivity analysis (2002 Vol. II [MWSYM])
- Measurements on dielectric and radiation loss of flexible circular dielectric waveguides in Q-band
- A technique for reducing the size of amplifiers using defected ground structure
- A new sandwich structure of photonic bandgap
- Amplifier design using /spl lambda//4 high impedance bias line with defect ground structure (DGS)
- A derivation of a class of 3-port baluns from symmetrical 4-port networks
- An inverted coplanar coupler with integral microstrip interfaces and bias crossover
- Dividing and filtering function integration for the development of a band-pass filtering power amplifier
- Design method of a dual band balun and divider
- TFBAR filters for 2 GHz wireless applications

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Ferromagnetic composite-based and magnetically-tunable microwave devices
- Field distributions in six-port gyroelectric semiconductor circulators with coplanar waveguide (CPW) feeders
- A novel microwave absorber with surface-printed conductive line patterns
- Design of narrow-band tunable band-pass filters based on dual mode SrTiO/sub 3/ disc resonators
- Microwave characterization of thin film BST material using a simple measurement technique
- High-Q millimeter-wave MEMS varactors: extended tuning range and discrete-position designs
- Silicon micromachined RF MEMS resonators
- Gas damping model for a RF MEM switch and its dynamic characteristics
- Digital-type RF MEMS switched capacitors
- Series switch compatible with CMOS technology
- Low-cost low actuation voltage copper RF MEMS switches

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Atomic layer deposition (ALD) technology for reliable RF MEMS
- Polyimide film based RF MEMS capacitive switches
- Distributed MEMS phase shifters on silicon using tapered impedance unit cells
- 40 GHz monolithic integrated mixer in SiGe bipolar technology
- Designing reliable high-power limiter circuits with GaAs PIN diodes
- A 94 GHz high performance quadruple subharmonic mixer MMIC
- Harmonic boosting for high performance mixers
- Development of Ku-band Receiver/Downconverter for satellite transponders
- The design of SiGe HBT LNA for IMT-2000 mobile application
- THz radiation using high power, microfabricated, wideband TWTs

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Simulation and measurement results of 150 GHz integrated silicon IMPATT diodes
- A set of integrated circuits for 60 GHz radio front-end
- Millimeter wave direct quadrature converter integrated with antenna for broad-band wireless communications
- A novel HMSM photodetector with resonant cavity for short haul communications
- Effect of substrate modes in 40 Gbit travelling wave LiNbO/sub 3/ modulators
- Experimental results for a CW-mode optically controlled microwave switch with a carrier-confinement structure
- Direct carrier modulation for wireless digital communications using an improved microwave-photonic vector modulator (MPVM) approach
- A novel dual frequency rectenna for high efficiency wireless power transmission at 2.45 and 5.8 GHz
- Optimization of the array parameters in waveguide-based spatial power combiners with hard horn feeds

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Radio-wave beam shaping using holograms
- How to increase locking range of coupled oscillator cells without lowering Q
- Bandwidth improvement in a tile based spatial power amplifier
- A 10 GHz integrated class-E oscillating annular ring element for high-efficiency transmitting arrays
- A new millimeter-wave printed dipole phased array antenna using microstrip-fed coplanar stripline tee junctions
- A novel broadband T/R module for phased array applications in wireless communications
- Multi-layer spatial angular filter with air gap tuner to suppress the grating lobes of microstrip patch arrays
- Integrated MEM antenna system for wireless communications
- The design of T/R module for X-band APAA system used in satellite communications
- Experimental APAA for satellite communications

IEEE © 2003

Papers by Issue

- A novel K-band frequency-controlled beam-steering quasi-Yagi array with mixing frequency compensation
- A frequency autonomous retrodirective array transponder
- Effects of local oscillator phase noise on interference rejection capability of CDMA receivers using adaptive antenna arrays
- A balanced adaptive beamforming system for broadband wireless communications
- Impulse ground penetrating radar for nondestructive evaluation of pavements
- Reentrant resonators for microwave measurement units
- An adaptive multi-functional array for wireless sensor systems
- Compact multibeam imaging antenna for automotive radars
- A new approach for RIN peak and phase noise suppression in microchip lasers
- Index of Authors (2002 Vol. II [MWSYM])

IEEE © 2003

Papers by Issue

2002 Vol. III [MWSYM]

- Front Cover (2002 Vol. III [MWSYM])
- Table of Contents (2002 Vol. III [MWSYM])
- Technical Program Schedule (2002 Vol. III [MWSYM])
- Suppression of multi-path couplings in MCM with a flip-chipped SiGe-MMIC
- Flip-chip mounted, Ku band power amplifier compliant with space applications
- W-band flip-chip interconnects on thin-film substrate
- A locally matching technique for broadband flip-chip transition design
- Development of an organic wafer-level packaging platform for highly integrated RF transceivers
- Design of inductors in organic substrates for 1-3 GHz wireless applications
- Integrated inductors in the chip-to-board interconnect layer fabricated using solderless electroplating bonding

IEEE © 2003

Papers by Issue

- Intrinsic noise characteristics of AlGaN/GaN HEMTs
- A 2.4-GHz/5-GHz CMOS low noise amplifier with high-resistivity ELTRAN(R) SOI-Epi/sup TM/ wafers
- A modified cascode type low noise amplifier using dual common source transistors
- Ku-band low noise MMIC amplifier with bias circuit for compensation of temperature dependence and process variation
- A 7.9-9.7 GHz on-chip radar receiver front-end for future adaptive X-band smart skin array antennas
- Synthesis of advanced microwave filters without diagonal cross-couplings (2002 Vol. III [MWSYM])
- A method for the direct synthesis of cascaded quintuplets
- Parameter extraction for symmetric coupled-resonator filters (2002 Vol. III [MWSYM])
- Design procedure for waveguide filters with cross-couplings
- Dual-mode filters with grooved dielectric resonators for cellular-radio base stations

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A dual mode filter with trifurcated iris and reduced footprint
- Method of spurious mode compensation applied to manifold multiplexer design
- A new X-band 180/spl deg/ high performance phase shifter using (Ba, Sr)TiO/sub 3/ thin films
- A wide bandwidth monolithic BST reflection-type phase shifter using a coplanar waveguide Lange coupler
- Bandwidth and losses of 4-port ferrite coupled line circulators
- Modeling and optimization of parallel line edge mode microstrip isolators
- SAW FEMs for GSM-based multi-band cellular phones with direct-conversion demodulation
- Bulk acoustic wave resonators and filters for applications above 2 GHz
- Contactless probing of high-frequency electrical signals with scanning probe microscopy

IEEE © 2003

Papers by Issue

- Millimeter-wave network analyzers based on photonic techniques
- Optoelectronic techniques for improved high speed electrical risetime
- Picosecond imaging circuit analysis of ULSI microprocessors
- Electric-field observation of pico-pulse propagation on right-angle bends by miniature photoconductive near-field probe
- Field-tunable probe for combined electric and magnetic field measurements
- A Ka-band perpendiculary-fed patch array for spatial power combining
- A waveguide mode-converter feed for a 5-W, 34-GHz grid amplifier
- A 10-GHz high-efficiency active antenna sub-array
- Quasi-optical E-band MEMS switching arrays
- A circularly polarized rectifying antenna array for wireless microwave power transmission with over 78% efficiency

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A multi-element 150/300 GHz spatial power dividing/combining frequency doubler
- Design of an LTCC integrated tri-band direct conversion receiver front-end module
- An L-band, LTCC frequency doubler using embedded lumped element filters
- 3D integrated LTCC module using /spl mu/BGA technology for compact C-band RF front-end module
- Low temperature cofired ceramic: an enabler of high power RF integrated amplifiers
- High performance RF passive integration on Si smart substrate
- Micromachined low dispersion interconnects for optoelectronic array packaging
- Use of a transparent conductive thin-film on a glass substrate in active integrated antenna arrays with double strong coupling
- T-ray imaging: new possibilities in the far infrared

IEEE © 2003

Papers by Issue

- THz spectroscopy - techniques and applications
- Submillimeter-wave polarimetric compact ranges for scale-model radar measurements
- THz techniques in plasma diagnostics
- Remote detection of bioparticles in the THz region
- Suspended resonators for filters-reduced /spl lambda//sub g/ excitation of evanescent cavities using high dielectric constant feedlines (2002 Vol. III [MWSYM])
- Lumped-element conductor-loaded cavity resonators
- Novel coupling schemes for microwave resonator filters (2002 Vol. III [MWSYM])
- Folded quarter-wave resonator filters with Chebyshev, flat group delay, or quasi-elliptical function response
- Stepped impedance resonator bandpass filters with tunable transmission zeros and its application to wide stopband design

IEEE © 2003

Papers by Issue

- A Ku-band low-loss stripline low-pass filter for LTCC modules with low-impedance lines to obtain plural transmission zeros
- Design and analysis of novel compact inductor resonator filter
- Class E with parallel circuit - a new challenge for high-efficiency RF and microwave power amplifiers
- Demonstration of a switchless Class E/F/sub odd/ dual-band power amplifier
- Push/pull class-DE switching power amplifier
- Harmonic tuned PAs design criteria
- Finite DC feed inductor in class E power amplifiers-a simplified approach
- Active cancellation of switching noise for DC-DC converter-driven RF power amplifiers
- A novel EER transmitter using two-point delta-sigma modulation scheme for WLAN and 3G applications

IEEE © 2003

Papers by Issue

- Dielectric sleeve resonator techniques for variable-temperature microwave characterization of ferroelectric materials
- Error analysis of the unloaded Q-factors of a transmission-type resonator measured by the insertion loss method and the return loss method
- Comparing unloaded Q-factor of a high-Q dielectric resonator measured using the transmission mode and reflection mode methods involving S-parameter circle fitting
- Removal of cable and connector dispersion in time-domain waveform measurements on 40 Gb integrated circuits
- Solid-state 8 GHz transient signal digitizer characterization
- A sampled-line reflectometer for submillimeter-wave measurements
- Sampling circuit on silicon substrate for frequencies beyond 50 GHz
- Implementing subcarrier-based control in optical networking

Papers by Issue

- Nonlinear distortion and crosstalk in microwave fiber-radio links
- Optical delivery of modulated millimetre-wave signals using free-running laser heterodyne with frequency drift cancellation
- 10- and 39-GHz-band InP/InGaAs HPT direct optical injection-locked oscillator ICs for optoelectronic clock recovery circuits
- A WDM fiber-radio experiment incorporating a wavelength-self-tunable single-side-band filter
- A circuit model of traveling wave electroabsorption modulator
- Predistortion circuit design for II and III order simultaneous linearization in multiservice telecommunications apparatuses
- Compact LNA and VCO 3-D MMICs using commercial GaAs PHEMT technology for V-band single-chip TRX MMIC
- A 60 GHz millimeter-wave MMIC chipset for broadband wireless access system front-end

Click on title for a paper summary.

IEEE © 2003

Papers by Issue

- A 60 GHz MMIC chipset for 1-Gbit/s wireless links
- A highly integrated MMIC chipset for 60 GHz broadband wireless applications
- A compact 60 GHz sub-harmonically pumped mixer MMIC integrated with an image rejection filter
- GaAs HBT operating as integrated V- to W-band Gunn oscillator
- A rugged microstrip tapered balun printed dipole reference for SAR system verification
- Evaluation of human exposure in the vicinity of a base-station antenna using the multiple-region/FDTD hybrid method
- Theoretical evaluation of UMTS/GSM electromagnetic fields on neuronal network response
- A parallel FDTD tool for the solution of large dosimetric problems: an application to the interaction between humans and radiobase antennas

IEEE © 2003

Papers by Issue

- Confocal microwave imaging for breast tumor detection: application to a hemispherical breast model
- Study of the activity of neurological cell solutions using complex permittivity measurement
- A compact low-cost add-on module for Doppler radar sensing of vital signs using a wireless communications terminal
- Modeling of planar annular applicators for microwave thermotherapy
- A two zero fourth order microwave waveguide filter using a simple rectangular quadruple-mode cavity
- 26 GHz TM/sub 11/spl delta// mode dielectric resonator filter and duplexer with high-Q performance and compact configuration
- Low-spurious coaxial-line bandpass filter with saucer-loaded stepped-impedance resonators
- 60-GHz-band dielectric waveguide filters with cross-coupling for flip-chip modules

IEEE © 2003

Papers by Issue

- A novel compact coplanar filter
- Novel low-pass filter for broad-band spurious suppression
- Improvement of microstrip open loop resonator filter using aperture
- Full wave optimization of stripline tapped-in ridge waveguide bandpass filters
- AlGaN/GaN HFET amplifier performance and limitations
- A 36 W CW AlGaN/GaN-power HEMT using surface-charge-controlled structure
- Applications of SiC MESFETs and GaN HEMTs in power amplifier design
- Trapping effects in wide-bandgap microwave FETs
- Broadband thermoelectric microwave power sensors using GaAs foundry process
- Novel method for vector mixer characterization and mixer test system vector error correction
- Compensating differences between measurement and calibration wafer in probe-tip calibrations

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A study of the effect of envelope impedance on intermodulation asymmetry using a two-tone time domain measurement system
- Simulations of noise-parameter uncertainties
- A 94 GHz single-chip FMCW radar module for commercial sensor applications
- A 38/76 GHz automotive radar chip set fabricated by a low cost PHEMT technology
- A MMIC-based 75-110 GHz signal source
- A Gunn diode based surface mount 77 GHz oscillator for automotive applications
- A comparison of W-band monolithic resistive mixer architectures
- A micromachined finite coplanar line-to-silicon micromachined waveguide transition for millimeter and submillimeter wave applications
- Hybrid analysis of three-dimensional structures by the method of lines using novel nonequidistant discretization

IEEE © 2003

Papers by Issue

- 3D hybrid finite-difference method for lossy structures based on quasi-static field solutions
- Accuracy limitations of perfectly matched layers in 3D finite-difference frequency-domain method
- Coupled Pade approximation-finite element method applied to microwave device design
- Electromagnetic modeling of interconnects for mixed-signal integrated circuits from DC to multi-GHz frequencies
- An efficient integral equation solver for the electromagnetic modeling of highly-integrated planar RF/microwave circuits
- Simulation of resonant modes of rectangular DR in MIC environment using MPIE-MoM with combined entire-domain and sub-domain basis functions
- A tunable active MMIC filter for on-chip X-band radar receiver front-ends
- Active impedance inverter: analysis and its application to the bandpass filter design

IEEE © 2003

Papers by Issue

- A filter synthesis technique applied to the design of multistage broadband microwave amplifiers (2002 Vol. III [MWSYM])
- A super-compact super-broadband tapered uniplanar PBG structure for microwave and millimeter-wave applications
- A novel planar silicon waveguide filter at 45 GHz based on a periodic structure
- A folded coupled-line structure and its application to filter and diplexer design
- Narrow-band, band-pass filters with zig-zag, hairpin-comb resonators
- Multiple output photonic RF phase shifters for optically controlled radar systems
- Flexible beamformer and remoting head for optically controlled phased array antennas
- A novel 2N beams heterodyne optical beamforming architecture based on N/spl times/N optical Butler matrices

IEEE © 2003

Papers by Issue

- Photonic true-time delay beamformer for broadband wireless access networks at 40 GHz band
- Optical mixing of antenna signals in WDM systems
- Folded dual-mode HTS microstrip band pass filter
- Ultra selective 22-pole, 10-transmission zero superconducting bandpass filter surpasses 50-pole Chebyshev rejection
- A low-loss 5GHz bandpass filter using HTS coplanar waveguide quarter-wavelength resonators
- Tuning superconducting microwave filters by laser trimming
- Design of sapphire rod resonators to measure the surface resistance of high temperature superconductor films
- Shunt capacitor approximation for HTS microstrip circuit design
- TE-mode propagation properties of the coupled planar Kerr-like nonlinear waveguides

IEEE © 2003

Papers by Issue

- Generation of wideband electromagnetic response through a Laguerre expansion using early time and low frequency data
- New design of high-Q sapphire resonator with distributed Bragg reflector
- Ferrite filled reflector mode converter for axially corrugated waveguides
- New transmission line structure with suppressed eddy current effects
- An analytical method for the microwave imaging of cylindrically stratified media
- Resonant tunneling of microwave energy in thin film multilayer metal/dielectric structures
- High functionality mode transformers with bandwidth control and mode selectivity
- Frequency parameterization of open structures by modal decomposition using finite elements and spherical modes

IEEE © 2003

Papers by Issue

- Novel wave effects on anisotropic and ferrite planar slab waveguides in connection with singularity theory
- FEM-based reduced-order model for steady-state skin-effect analysis in lossy lines
- Modified RWG basis functions for analysis of periodic structures
- Line-integral formulation of the hybrid MM/FEM technique
- Efficient calculation of effective material parameters in metamaterials using FDTD and a modal approach
- An efficient technique for the iterative solution of large dense matrices arising in method of moments simulation of MMIC problems
- Multiple scattering among vias in planar waveguides using SMCG method
- Development of an unconditionally stable full-wave 2D ADI-FDTD method for analysis of arbitrary waveguiding structures

IEEE © 2003

Papers by Issue

- Direct EM based optimization of advanced waffle-iron and rectangular combline filters
- A new time domain near field to far field transformation for FDTD in two dimensions
- 2-D envelope finite element (EVFE) technique - implementation of PML and dispersive medium
- Efficient transient simulation of transmission lines
- Inductance formula of a square spiral inductor on grounded substrate by duality and synthetic asymptote
- Electromagnetic/Circuit co-optimization of lumped component and physical layout parameters using generalized layout components
- CAD of multipactor-free waveguide components for communication satellites
- CAD of waveguide structures with production based radii at arbitrary double (E-H) plane steps and junction ports
- Electrothermal modeling of multi-fingered PHEMTs applying a global approach

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Accurate computer aided design of interdigital filters applying a coupling identification method
- Language design requirements for VHDL-RF/MW/sup TM/
- CAD of integrated passives on printed circuit boards through utilization of multiple material domains
- EM-based optimization exploiting partial space mapping and exact sensitivities (2002 Vol. III [MWSYM])
- ANN and EM based models for fast and accurate modeling of excitation loops in combline-type filters
- IC package and bonding wire modeling software and its application to RFIC design
- Constrained EM-based modeling of passive components
- Microwave noise sources in AlGaAs/GaAs HBTs
- A practical small-signal equivalent circuit model for RF-MOSFETs valid up to the cut-off frequency
- The equivalent circuit modeling of defected ground structure with spiral shape

IEEE © 2003

Papers by Issue

- HBT small signal T and /spl pi/ model extraction using a simple, robust and fully analytical procedure
- Completely consistent 'no-charge' PHEMT model including DC/RF dispersion
- An empirical HBT Large Signal Model for CAD
- A new large-signal InP/InGaAs single HBT model including self-heating and impact ionization effects
- Large-signal circuit-based time domain analysis of high frequency devices including distributed effects
- The "Smoothie" data base model for the correct modeling of non-linear distortion in FET devices
- The assessment of output digital spectra in quasi enhancement-mode pHEMTs by a modified large-signal model
- Extraction of a polynomial LDMOS model for distortion simulations using small-signal S-parameter measurements
- Direct observation of loadlines in MESFET by using average RF gate and drain currents

IEEE © 2003

Papers by Issue

- Implementation of a scalable and statistical VBIC model for large-signal and intermodulation distortion analysis of SiGe HBTs
- Repeat measurements and metrics for nonlinear model development
- Simulation of RF circuits driven by modulated signals without bandwidth constraints
- Global coupled EM-electrical-thermal simulation and experimental validation for a spatial power combining MMIC array (2002 Vol. III [MWSYM])
- Analysis and elimination of parametric oscillations in monolithic power amplifiers
- Nonlinear analysis of a microwave fractional synthesizer
- A universal parameterized nonlinear device model formulation for microwave circuit simulation
- Characterization of intermodulation distortion in multicarrier transmission systems

IEEE © 2003

Papers by Issue

- M-ary PSK signal power spectrum at the output of a nonlinear power amplifier
- A semi-lumped balun fabricated by low temperature co-fired ceramic
- Low-cost flip-chip alternatives for millimeter wave applications
- X-band microstrip bandpass filter using photoimageable thick-film materials
- Novel lumped-element coplanar waveguide-to-coplanar stripline transitions with low-pass and high-pass characteristics
- RF-microwave multi-band design solutions for multilayer organic system on package integrated passives
- Coupling between microstrip lines with finite width ground plane embedded in polyimide layers for 3D-MMICs on Si
- A novel directional coupler for PCB and LTCC applications
- High performance spiral inductors embedded on organic substrates for SOP applications

IEEE © 2003

Papers by Issue

- A novel signal processing approach for microwave Doppler speed sensing
- Ultra-fast broadband EMI measurement in time domain using classical spectral estimation
- An accurate complex behavior test bed suitable for 3G power amplifiers characterization
- A new satellite repeater amplifier characterization system for large bandwidth NPR and modulated signals measurements
- Quantitative extraction and compensation of excess inductance: case study of a digital attenuator chip
- Vector corrected noise temperature measurements
- Sensitivity analysis of calibration standards for fixed probe spacing on-wafer calibration techniques [vector network analyzers]
- Estimation of deep-seated profile of temperature distribution inside biological tissues by means of multifrequency microwave thermograph

IEEE © 2003

Papers by Issue

- A bioelectromagnetic overview of the Universal Mobile Telecommunication System (UMTS)
- 3D scalar microwave image reconstruction algorithm
- Index of Authors (2002 Vol. III [MWSYM])

Papers by Issue

- K/sub a/-Band MMIC Beam Steered Transmitter Array
- 4:1 Bandwidth Digital Five Bit MMIC Phase Shifters
- A Multioctave Active MMIC Quadrature Phase Shifter
- A DC-18GHz GaAs MESFET Monolithic Variable Slope Gain-Equalizer IC
- A GaAs HBT Monolithic Microwave Switched-Gain Amplifier with +31 Db to -31 Db Gain in 2 dB Increments
- A 3 Chip GaAs Double Conversion TV Tuner System with 70 dB Image Rejection (1989 [MCS])
- A Monolithic 60 GHz Diode Mixer in FET Compatible Technology (1989 [MCS])
- A W-Band Channelized Monolithic Receiver (1989 [MCS])
- Silicon Bipolar Fixed and Variable Gain Amplifier MMICs for Microwave and Lightwave Applications Up to 6 GHz (1989 [MCS])
- Monolithic HEMT LNAs for Radar, EW, and COMM (1989 [MCS])

IEEE © 2003

Papers by Issue

- Monolithic V-Band Pseudomorphic-MODFET Low-Noise Amplifiers (1989 [MCS])
- A Monolithic 40-GHz HEMT Low-Noise Amplifier (1989 [MCS])
- GaAs Molecular Beam Epitaxy Monolithic Power Amplifiers at U-Band (1989 [MCS])
- An Ultra Wide Bandwidth Power Divider on MMIC Operating 4 to 10 GHz (1989 [MCS])
- Silicon Bipolar Double Balanced Active Mixer MMICs for RF and Microwave Applications Up to 6 GHz (1989 [MCS])
- Design and Performance of a 2-18 GHz Monolithic Matrix Amplifier (1989 [MCS])
- A Novel 4-18 GHz Monolithic Matrix Distributed Amplifier (1989 [MCS])
- Index of Authors (1989 [MCS])
- Back Cover (1989 [MCS])

Papers by Issue

- GaAs HBT MMIC Broadband Amplifiers from DC to 20 GHz
- High-Gain, Low-Noise Monolithic HEMT Distributed Amplifiers Up to 60 GHz
- Monolithic 9 to 70 GHz Distributed Amplifier
- 5-100 GHz InP CPW MMIC 7-Section Distributed Amplifier
- Octave Band Eleven Watt Power Amplifier MMIC
- A 2.5 Watt X-Band High Efficiency MMIC Amplifier
- 5 W Monolithic HBT Amplifier for Broadband X-Band Applications
- Rectification Failure in GaAs MESFETs Subjected to Single Pulses of Intense Microwave Radiation
- A Novel Aperture-Isolation Circuit for Use in Phased Array Systems
- Miniature Monolithic Microwave Frequency Diplexers
- A New Concept to Cancel Insertion Phase Variation in MMIC Amplitude Controller

IEEE © 2003

Papers by Issue

- Design and Fabrication of Two-Pole Monolithic Bulk Acoustic Filters
- Implementation of RF/Microwave Receiver Components on a Semi-Custom Silicon Bipolar Array
- An MMIC Amplifier for Automatic Level Control Applications
- A Monolithic GaAs HBT Upconverter
- Three Channel I.F. Multiplexers
- European MMIC Activities (1990 [MCS])
- MIMIC Technology Transportability (1990 [MCS])
- Multifunction Chip Set for T/R Module Receive Path (1990 [MCS])
- A Single Chip 2-20 GHz T/R Module
- Monolithic Ka Band VCO Using Quarter Micron GaAs MESFETs and Integrated High-Q Varactors (1990 [MCS])
- K/sub u/- and K-Band GaAs MMIC Varactor-Tuned FET Oscillators Using MEV Ion-Implanted Burried-Layer Back Contacts (1990 [MCS])

IEEE © 2003

Papers by Issue

- A Monolithic 94 GHz Balanced Mixer
- An X-Band Monolithic Double Double-Balanced Mixer for High Dynamic Receiver Application
- A High Power 2-18 GHz T/R Switch (1990 [MCS])
- A Compact Broadband, Six-Bit MMIC Phasor with Integrated Digital Drivers (1990 [MCS])
- Broad Band Monolithic Cross Point Switch Matrices
- A 10-14 GHz Linear MMIC Vector Modulator with Less Than 0.1dB and 0.8° Amplitude and Phase Error (1990 [MCS])
- Index of Authors (1990 [MCS])
- Back Cover (1990 [MCS])

- Session II -- Low-Noise and Low-Power Amplifier

IEEE © 2003

Papers by Issue

- Monolithic L-Band Amplifiers Operating at Milliwatt and Sub-Milliwatt DC Power Consumptions
- A Novel MMIC PHEMT Low Noise Amplifier for GPS Applications
- Ultra-Flat Low-Power Process Insensitive Ku-Band HEMT Feedback MMIC
- A 2.5 dB Low Noise 6 to 18 GHz HEMT MMIC Amplifier
- Broadband 0.25 Micron Ion-Implant MMIC Low Noise Amplifiers on GaAs
- Design and Characterization of High Performance 60 GHz Pseudomorphic MODFET LNAs in CPW-Technology Based on Accurate S-Parameter and Noise Models (1992 [MCS])
- Session III -- MMIC Power Amplifiers
- A UHF Band 1.3W Monolithic Amplifier with Efficiency of 63%
- A New Power Amplifier Topology with Series Biasing and Power Combining of Transistors
- High Efficiency Broadband Power Amplifier MMIC

IEEE © 2003

- Session I -- Opening Session (1993 [MCS])
- The Commercial Markets for MMIC's
- Present and Future of Mobile Communications in Japan (Invited Paper)
- Session II -- MMIC for Personal Communications

IEEE © 2003

Papers by Issue

- GaAs JFET Front-End MMICs for L-Band Personal Communications
- A High Performance 1.5 dB Low Noise GaAs PHEMT MMIC Amplifier for Low Cost 1.5-8 GHz Commercial Applications
- Session III -- Commercial MMIC Applications I
- High-Efficiency AlGaAs/GaAs HBT Power Amplifier MMIC for 1.9GHz Japanese Digital Cordless Phone
- A 2.4GHz Single Chip Transceiver
- Low Voltage, High Power T/R Switch MMIC Using LC Resonators
- 12 GHz Low-Noise MMIC Amplifier Designed with a Noise Model that Scales with MODFET Size and Bias
- A 20-50GHz MMIC Amplifier with 21dBm Output Power and its Application as a Frequency Doubler
- Session IV -- MM-Wave MMICs I
- A W-Band Single-Chip Transceiver for FMCW Radar
- A Ka-Band HEMT MMIC 1 Watt Power Amplifier

IEEE © 2003

Papers by Issue

- A D-Band Monolithic Fundamental Oscillator Using InP-Based HEMT's (1993 [MCS])
- A Broadband, Planar, Doubly Balanced Monolithic Ka-Band Diode Mixer (1993 [MCS])
- A Coplanar Millimeterwave Resonator on Silicon
- Session V -- Commercial MMIC Applications II
- A Low Cost 77 GHz Monolithic Transmitter for Automotive Collision Avoidance Systems
- Miniaturized Low Noise Variable MMIC Amplifiers with Low Power Consumption for L-Band Portable Communication Applications
- Low Noise Wideband Fiber Optic MMIC-Based Receiver
- Monolithic Image Rejection Optoelectronic Up-Converters that Employ the MMIC Process (1993 [MCS])
- Picosecond MODFET IC Pulse Sharpener
- Session VI -- MMW MMICs II
- InP Based HBT Millimeter-Wave Circuit Performance to Technology and 40 GHz

IEEE © 2003

Papers by Issue

- Rigorous Design of a 94 GHz MMIC Doubler
- A Fully Integrated 35 GHz MMIC Receiver with On-Chip LO
- The Demonstration of Ka-Band Multi-Functional MMIC Circuits Fabricated on the Same PHEMT Wafer with Superior Performance
- High Performance Q-Band 0.15µm InGaAs HEMT MMIC LNA
- Session VII -- Advanced MMIC Technology (Joint with IMS)
- A Highly-Efficient 7-Watt 16 GHz Monolithic Pseudomorphic HEMT Amplifier (1993 [MCS])
- The Inductive Connection Effects of a Mounted SPDT in a Plastic SO8 Package (1993 [MCS])
- An MMIC Linearized Amplifier Using Active Feedback (1993 [MCS])
- Session VIII -- Broadband MMIC Circuits (Joint with IMS)
- A Highly Integrated MMIC K-band Transmit/Receive Chip (1993 [MCS])
- A New Compact Wideband Balun

Papers by Issue

- Panel (1996 [MCS])
- Session I -- MMIC Advancements for Military and Commercial Applications
- Affordability Strategies in Military Microwave Systems
- MMICs for Commercial Applications the Low-Cost High Volume Production Techniques
- A Microwave Radar for Vehicular Applications
- Session II -- Power Amplifiers
- A Miniaturized GaAs Power Amplifier for 1.5 GHz Digital Cellular Phones
- High Efficiency Power HFETS for Low Power Wireless Applications
- Performance Comparison of 1 Watt Ka-Band MMIC Amplifiers Using Pseudomorphic HEMTs and Ion-Implanted MESFETs
- An Ion-Implanted 13 Watt C-Band MMIC with 60% Peak Power Added Efficiency
- K through Ka-Band Driver and Power Amplifiers

Papers by Issue

- Session III -- Signal Generation and Control
- A 15/60 GHz One-Stage MMIC Frequency Quadrupler
- A GaAs Single Chip 2.4 GHz PLL Frequency Multiplier
- A Technique for Improving the Distortion of GaAs Variable Attenuator IC Using Squeezed-Gate FET Structure
- A High-Performance Broadband MMIC PHEMT Resistive Drain Mixer for 28-40 GHz Band PCN Applications
- A Broadband Planar Monolithic Ring Mixer
- Session IV -- BiCMOS and HBT MMIC Technologies (Invited Session)
- Low-Voltage Broadband BiCMOS MMICs for Low-Cost High-Speed Wireless Networks Applications
- Advances in GaAs HBT Power Amplifiers for Cellular Phones and Military Applications (Invited Paper)
- Session V -- Receiver Technology
- A 1.9GHz Single-Chip RF Front-End GaAs MMIC for Personal Communications

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A Silicon BiCMOS Transceiver Front-End MMIC Covering 900 and 1900 MHz Applications
- A 1.0V GaAs Receiver Front-End IC for Mobile Communication Equipment
- Low DC Power Monolithic Low Noise Amplifier for Wireless Applications at 5 GHz
- Three-Dimensional MMIC Technology for Multifunction Integration and its Possible Application to Masterslice MMIC
- Ultra Low Noise Q-Band Monolithic Amplifiers Using InP- and GaAs-Based O.1µm HEMT Technologies
- Monolithic Single FET Mixers with Coplanar Technology to Convert Between V and C Band
- Session VI -- Small Signal IC's and Passive Components
- Suspended Membrane Inductors and Capacitors for Application in Silicon MMIC's
- A Novel Loss Compensation Technique for High-Q Broad-Band Active Inductors

IEEE © 2003

Papers by Issue

- A Quenchable GaAs HBT X-Band VCO for Switched Band Synthesizer Architectures
- 60 GHz-Band Ultra-Miniature Monolithic T/R Modules for Multimedia Wireless Communication Systems
- InAlAs/InGaAs/InP-HEMT Technologies for High-Yield Analog/Digital ICS
- An Investigation of IM3 Distortion in Relation to Bypass Capacitor of GaAs MMIC's
- A Novel MMIC Source Impedance Tuner for On-Wafer Microwave Noise Parameter Measurements
- Session VII -- Low Noise Millimeter Wave MMICs (Joint with IMS)
- Status of InP HEMT Technology for Microwave Receiver Applications (Invited)
- High Performance, High Yield Millimeter-Wave MMIC LNAs Using InP HEMTs (1996 [MCS])
- A 60 GHz-Band Low Noise HJFET Amplifier Module for Wireless LAN Applications (1996 [MCS])

IEEE © 2003

Papers by Issue

- A Ka-Band GaInP/GaAs HBT Four-Stage LNA (1996 [MCS])
- Development of 44 GHz GaAs MMIC-Based Low-Noise Amplifiers for EHF Nulling Antenna
- A Low Noise Heterodyne 89 GHz MMIC Module for the Multifrequency Imaging Microwave Radiometer (MIMR)
- A Technique for Deriving Noise-Parameters of Millimeter-Wave Low-Noise HEMTs and its Application to MMIC LNA Design (1996 [MCS])
- Session VIII -- Large Signal Generation and Application (Joint with MTT)
- Monolithic VCO Using a Novel Active Inductor (1996 [MCS])
- A High-Performance and Miniaturized Dual-Use (Antenna/Local) GaAs SPDT Switch IC Operating at +3V/0V (1996 [MCS])
- High Efficiency X-Ku Band MMIC Power Amplifiers (1996 [MCS])
- Fully-Matched, High-Efficiency Q-Band 1 Watt MMIC Solid State Power Amplifier (1996 [MCS])

IEEE © 2003

Papers by Issue

- Highly Efficient Compact Q-Band MMIC Power Amplifier Using 2-mil Substrate and Partially-Matched Output (1996 [MCS])
- A Practical MMIC Negative Resistance Structure for X and Ku Band Applications (1996 [MCS])
- GaAs Monolithic Integrated Microwave Power Sensor in Coplanar Waveguide Technology (1996 [MCS])
- Session IX -- MMIC Systems Components (Joint with IMS)
- A MMIC Radar Chip for Use in Air-to-Air Missile Fuzing Applications (1996 [MCS])
- A Silicon MOS Process for Integrated RF Power Amplifiers (1996 [MCS])
- Frequency Translation MMICs Using InP HEMT Technology (1996 [MCS])
- A Novel Type of Constant Impedance Traveling Wave Phase Shifter for InP-Based MMICs (1996 [MCS])
- Active Coplanar Up-Converter for High Gain V-Band Applications (1996 [MCS])

IEEE © 2003

Papers by Issue

- 26 GHz Coplanar SiGe MMICS (1996 [MCS])
- MMICs for Sensor Applications (1996 [MCS])
- Session WE3F -- MMWMC Open Forum Papers (Joint with IMS)
- A Linear Class AB Single-Ended to Differential Transconverter Suitable for RF Circuits (1996 [MCS])
- Distributed Small Signal Model for Multi-Fingered GaAs PHEMT/MESFET Devices (1996 [MCS])
- A SIMMWIC 76 GHz Front-End with High Polarization Purity (1996 [MCS])
- A High Efficiency Complementary GaAs Power FET Technology for Single Supply Portable Applications (1996 [MCS])
- Index of Authors (1996 [MCS])
- Floor Plan, San Francisco Hilton & Towers (1996 [MCS])
- Floor Plan, Moscone Center (1996 [MCS])
- IMS Hotels (1996 [MCS])

Papers by Issue

1997 [RFIC]

- Front Cover (1997 [RFIC])
- Copyright (1997 [RFIC])
- 1997 IEEE Radio Frequency Integrated Circuits (RFIC) Symposium Schedule Overview
- 1997 IEEE Radio Frequency Integrated Circuits Symposium Schedule
- Message from the General Chairman (1997 [RFIC])
- Steering Committee (1997 [RFIC])
- Workshops (1997 [RFIC])
- Panel Session: Device Technology Choices for Commercial Portable Power Amplifier Products (1997 [RFIC])
- Table of Contents (1997 [RFIC])
- Wireless portable communications trends and challenges
- Traditional and emerging technologies and applications in the radio frequency identification (RFID) industry

IEEE © 2003

Papers by Issue

- On-chip matching Si-MMIC for mobile communication terminal application
- High gain, high efficiency, low voltage, medium power Si-bipolar transistor suitable for integration
- A 5.8-GHz 1-V low-noise amplifier in SiGe bipolar technology
- A silicon MOS MMIC upconverter for CATV applications
- A GaAs MMIC MMDS downconverter
- A low-cost packaged MMIC chip set for 5.8 GHz ISM band applications
- Single 2.2 V operation MMIC power amplifier utilizing SrTiO/sub 3/ capacitors for 2.4 GHz wireless communication systems
- Embedded transmission line (ETL) MMIC for low-cost, high-density wireless communication applications
- Monolithic GaAs multi-throw switches with integrated low-power decoder/driver logic

IEEE © 2003

Papers by Issue

- Low power, monolithic tunable recursive filters having variable and uniform gain
- AlGaAs/GaAs HBT limiting amplifier for 10 Gbps optical transmission system
- Analog RF-optoelectronic integrated circuit receivers
- The future of RFIC transceiver technology
- Highly integrated RF-ICs for GSM and DECT
- A novel 12-24 GHz broadband HBT distributed active balanced mixer
- A monolithic 24-GHz frequency source using InP-based HEMT-HBT integration technology
- A novel monolithic HEMT-HBT Ka-band VCO-mixer design
- Ultra-fast, low-power integrated circuits in a scaled submicron HBT IC technology
- Monolithic 77- and 94-GHz InP-based HBT MMIC VCOs
- 50-100 GHz octave band MMIC mixers
- High frequency interconnects on silicon substrates

IEEE © 2003

Papers by Issue

- SiGe SIMMWICs
- A fully monolithic HMIC low noise amplifier
- Three-dimensional masterslice MMIC on Si substrate (1997 [RFIC])
- SiGe MMICs and flip-chip MICs for low-cost microwave systems
- Silicon low noise amplifier chips for multi-chip module integration on a silicon-based substrate
- An integrated bipolar transmitter for DECT
- A highly integrated radio transceiver chipset for DECT
- Noise figure & associated conversion gain of a GaAs heterojunction bipolar transistor mixer
- An integrated 2 GHz 500 mW bipolar amplifier
- A new paradigm for base station receivers: high IF sampling + digital filtering
- A self calibrating quadrature generator with wide frequency range

IEEE © 2003

Papers by Issue

- Silicon RF GCMOS performance for portable communications applications (1997 [RFIC])
- High dynamic range variable gain amplifier for CDMA applications (1997 [RFIC])
- A novel integrated microwave bias network for low cost multistage amplifiers (1997 [RFIC])
- MMIC GaAs transimpedance amplifiers for optoelectronic applications (1997 [RFIC])
- Ka-band ultra low noise MMIC amplifier using pseudomorphic HEMTs (1997 [RFIC])
- Silicon RF-GCMOS IC technology for RF mixed-mode wireless applications (1997 [RFIC])
- Optimization of high Q CMOS-compatible microwave inductors using silicon CMOS technology (1997 [RFIC])
- Low-frequency noise characteristics of self-aligned AlGaAs/GaAs HBTs with a noise corner frequency below 3 kHz (1997 [RFIC])

IEEE © 2003

Papers by Issue

- 28 V low thermal impedance HBT with 20 W CW output power (1997 [RFIC])
- High-reliability GaAs HBT monolithic microwave amplifier (1997 [RFIC])
- Systematic investigations on MESFETs and passive components transplanted by epitaxial lift off onto host materials with various resistivities (1997 [RFIC])
- Compact integrated coplanar T/R-modules for automotive applications (1997 [RFIC])
- A V-band GaAs MMIC chip set on a highly reliable WSi/Au refractory gate process (1997 [RFIC])
- A D-LDD (double lightly-doped drain) structure H-MESFET for MMIC applications (1997 [RFIC])
- Low phase noise Ka-band VCOs using InGaP/GaAs HBTs and coplanar waveguide (1997 [RFIC])
- 1 Watt, 65% PAE K-band AlGaAs/GaAs heterojunction bipolar transistors using emitter air-bridge technology (1997 [RFIC])

IEEE © 2003

Papers by Issue

- A monolithic GaAs PIN switch network for a 77 GHz automotive collision warning radar (1997 [RFIC])
- Temperature analysis and on-chip compensation for an UHF VCO
- Multilayer passive components for uniplanar Si/SiGe MMICs (1997 [RFIC])
- Analysis of ground bond wire arrays for RFICs (1997 [RFIC])
- Index of Authors (1997 [RFIC])
- Back Cover (1997 [RFIC])

IEEE © 2003

Papers by Issue

1998 [RFIC]

- Front Cover (1998 [RFIC])
- Table of Contents (1998 [RFIC])
- Wireless communications devices and technology: future directions
- RF design challenges for CDMA cellular and PCS mobile handsets
- Recent trends and status of Japanese RFICs for commercial applications
- K-band Si/SiGe HBT MMIC amplifiers using lumped passive components with a micromachined structure
- A 1-157 GHz InP HEMT traveling-wave amplifier
- 76 GHz flip-chip MMICs for automotive radars
- An 18-40 GHz monolithic ring mixer
- Coplanar transceive MMIC for 77 GHz automotive applications based on a nonlinear design approach

IEEE © 2003

Papers by Issue

- Highly selective novel MMIC microwave active recursive filter
- A high performance switched-LNA IC for CDMA handset receiver applications
- A low noise amplifier for a multi-band and multi-mode handset
- Novel active differential phase splitters in RFIC for wireless applications (1998 [RFIC])
- A low distortion GaAs quadrature modulator IC
- New type of class A/F amplifier MMIC for use in commercial PCS multiple modulation format base station power amplification
- 49% efficiency power amplifier MMIC utilizing SrTiO/sub 3/ capacitors for 3.5 V Li-ion battery operated CDMA cellular phones
- IMD elimination and ACPR improvement for an 800 MHz HBT MMIC power amplifier

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A 3.4 V, 1 watt cellular DAMPS GaAs MESFET power amplifier with 50% efficiency
- A highly integrated T/R module for active phased array antennas
- Integration trends with RF silicon technologies in mobile radio applications
- Recent MMW technology development and its military and commercial applications
- A 2.7 V image reject receiver for DECT
- A 900 MHz image-reject transceiver Si bipolar IC
- A single-chip 1.9 GHz RF transceiver MMIC using GaAs MESFET
- A single-chip PHS front-end MMIC with a true single +3 V voltage supply
- Architectures of highly integrated RFICs for 900 MHz US digital cordless systems
- A DECT RF transmitter with integrated VCOs suitable for open loop GFSK modulation

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Interference issues in silicon RFIC design
- Highly accurate spurious-free integrated VCO resonator in a GSM transceiver using circuit-package co-design
- Plastic microwave multi-chip modules for wireless communication applications
- Analysis and performance of BGA interconnects for RF packaging
- VCO linearisation by frequency feedback
- On the optimum width of GaAs MESFETs for low noise amplifiers
- Design of high performances Gilbert-cell mixers for GSM/DCS front-ends
- Silicon monolithic balanced oscillators using on-chip suspended active resonators
- A sub 1-V SOI CMOS low noise amplifier for L-band applications
- Micropower CMOS RF components for distributed wireless sensors

IEEE © 2003

Papers by Issue

- Silicon-on-sapphire MOSFET distributed amplifier with coplanar waveguide matching
- F-inductor and BC-MOS technology for monolithic silicon RFICs
- Improvement of the quality factor of RF integrated inductors by layout optimization
- Unaided 2.5 Gb/s silicon bipolar clock and data recovery IC
- GaInP/GaAs HBT broadband monolithic transimpedance amplifiers and their high frequency small and large signal characteristics (1998 [RFIC])
- K/Ka-band low-noise embedded transmission line (ETL) MMIC amplifiers (1998 [RFIC])
- Integrated 1.55 /spl mu/m receivers using GaAs MMICs and thin film InP detectors (1998 [RFIC])
- A Ka-band 4-bit monolithic phase shifter using unresonated FET switches (1998 [RFIC])
- A wideband pHEMT downconverter MMIC for satellite communication systems (1998 [RFIC])

IEEE © 2003

Papers by Issue

- A 2-V operation RF front-end GaAs MMIC for PHS hand-set (1998 [RFIC])
- A 1.9 GHz single-chip RF front-end GaAs MMIC with low-distortion cascode FET mixer for personal handy-phone system terminals (1998 [RFIC])
- A monolithic even harmonic quadrature mixer using a balance type 90 degree phase shifter for direct conversion receivers (1998 [RFIC])
- An 18 GHz Si bipolar mold package prescaler (1998 [RFIC])
- A Q-factor enhancement technique for MMIC inductors (1998 [RFIC])
- A 44 GHz low noise block downconvertor MMIC suitable for EHF satellite communication applications (1998 [RFIC])
- A highly integrated multi-functional chip set for low cost Ka-band transceiver (1998 [RFIC])
- V-band single chip, direct carrier BPSK modulation transmitter with integrated patch antenna (1998 [RFIC])

IEEE © 2003

Papers by Issue

- A Ka-band monolithic single-chip transceiver using sub-harmonic mixer (1998 [RFIC])
- Millimeter-wave three-dimensional masterslice MMICS (1998 [RFIC])
- A 900 MHz ISM band transceiver RFIC chip set and RF module (1998 [RFIC])
- GaAs RFICs for CDMA/AMPS dual-band wireless transmitters (1998 [RFIC])
- A bipolar upconversion modulation loop transmitter for dual-band mobile communications (1998 [RFIC])
- IF-band MMICs for high-speed wireless signal processing (1998 [RFIC])
- A high dynamic range, digitally tuned, Q-enhanced LC bandpass filter for cellular/PCS receivers (1998 [RFIC])
- A 44 GHz InP-based HBT double-balanced amplifier with novel current re-use biasing (1998 [RFIC])
- A 60 GHz 256 QAM balanced vector modulator for short range LOS communication applications (1998 [RFIC])

IEEE © 2003

Papers by Issue

- A single-chip 94-GHz frequency source using InP-based HEMT-HBT integration technology (1998 [RFIC])
- Fully integrated Q-band MMIC transmitter and receiver chips using resistive PHEMT mixers (1998 [RFIC])
- Low cost GaAs PHEMT MMICs for millimeter wave sensor applications
- X-band Si bipolar transistor single-chip transceiver using three-dimensional MMIC technology (1998 [RFIC])
- Direct conversion for FLEX paging receivers - A feasibility study (1998 [RFIC])
- A Si BJT RF dual band receiver IC for DAB (1998 [RFIC])
- A low voltage RF receiver for digital satellite radio (1998 [RFIC])
- A Si BJT IF downconverter/AGC IC for DAB
- RF micromachined varactors with wide tuning range (1998 [RFIC])
- Modeling of spiral inductors on lossy substrates for RFIC applications (1998 [RFIC])

IEEE © 2003

Papers by Issue

- Sub-micron silicon RFIC technologies: an overview
- Extraction of parasitic parameters of dummy devices on different silicon substrates (1998 [RFIC])
- Parasitic-aware design and optimization of CMOS RF integrated circuits (1998 [RFIC])
- Index of Authors (1998 [RFIC])

Papers by Issue

1999 [RFIC]

- Front Cover (1999 [RFIC])
- Table of Contents (1999 [RFIC])
- CMOS RF: (still) no longer an oxymoron
- Packaging technologies for RFICs: current status and future trends
- CMOS RF ICs for 900 MHz-2.4 GHz band wireless communication networks
- A micro-power CMOS RF front-end for embedded wireless devices
- An RF front-end for the direct conversion WCDMA receiver
- A compact direct conversion receiver for C-band wireless applications
- A 2.7 V mixed signal processor for CDMA/AMPS cellular phones
- C-band Si 3DMMIC transceiver for wireless applications

IEEE © 2003

Papers by Issue

- A new GaAs variable gain amplifier MMIC with a wide-dynamic-range and low-voltage-operation linear attenuation circuit
- A plastic package GaAs MESFET 5.8 GHz receiver front-end with on-chip matching for ETC system
- A low power 15 GHz frequency divider in a 0.8 /spl mu/m silicon bipolar production technology
- Even harmonic type direct conversion receiver ICs for mobile handsets: design challenges and solutions
- Sigma-delta ADC and DAC for digital wireless communication
- Ceramic technology for integrated packaging for wireless
- cdmaOne(R) (IS-95) technology overview and evolution
- The MSM3000/sup TM/ dual-mode CDMA+AMPS ASIC: for increased functionality and standby time of handsets
- 2.7 volt performance of high dynamic range receiver ICs for dual-band CDMA handsets

IEEE © 2003

Papers by Issue

- Highly integrated MMIC upconverters/drivers for cellular and PCS CDMA handsets
- A CDMA/FM upconvertor and variable-gain driver amplifier integrated circuit
- 66 GHz static frequency divider in transferred-substrate HBT technology
- 76-GHz MMIC chip set for compact, low cost and highly reliable automotive radar system
- A 427 mW, 20% compact W-band InP HEMT MMIC power amplifier
- High performance D-band (118 GHz) monolithic low noise amplifier
- 15 dB gain, DC-20 GHz InP HBT balanced analog mixer and variable gain amplifier with 27 dB of dynamic range
- A miniature PHEMT switched-LNA for 800 MHz to 8.0 GHz handset applications
- A fully-integrated BiCMOS voltage-controlled oscillator for DECT application

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A single-chip Si-bipolar 1.6 GHz VCO with integrated bias network
- A low quiescent current, 40% efficiency three-stage PHEMT power amplifier MMIC for PCS CDMA application
- Ku-band Si MOSFET monolithic amplifiers with low-loss on-chip matching networks
- 5 GHz SiGe HBT monolithic radio transceiver with tunable filtering
- A true enhancement mode device technology suitable for dual mode dual band power amplifier applications
- Advances in millimeter-wave FET MMIC technology
- Up- and down-converter chip set for LMDS using three-dimensional masterslice MMIC technology
- A high gain, low power MMIC LNA for Ka-band using InP HEMTs
- High reliability non-hermetic 0.15 /spl mu/m GaAs pseudomorphic HEMT MMIC amplifiers
- UTSi(R) phase locked loops: production 2 GHz RF CMOS

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A balanced monolithic oscillator at K-band
- Noise power optimization of monolithic CMOS VCOs
- Low noise first-order active recursive filter
- Development of three dimensional ceramic-based MCM inductors for hybrid RF/microwave applications
- Silicon UTSi(R) CMOS RFIC for CDMA wireless communications systems
- A novel high-Q inductor based on Si 3D MMIC technology and its application
- 1.9 GHz/5.8 GHz-band on-chip matching Si-MMIC low noise amplifiers fabricated on high resistive Si substrate
- An S-band low-noise amplifier with self-adjusting bias for improved power consumption and dynamic range in a mobile environment
- A 5.2 GHz variable gain LNA MMIC for adaptive antenna combining
- GaAs MESFET dual-gate mixer with active filter design for Ku-band applications

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A 3 V GaAs MESFET monolithic transmitter with cross-coupled common-source, common-gate pair linear mixer for cellular hand-held phones
- Author Index (1999 [RFIC])

IEEE © 2003

Papers by Issue

2000 [RFIC]

- Front Cover (2000 [RFIC])
- Table of Contents (2000 [RFIC])
- Bluetooth radio architectures
- RF and system requirements for cable modem applications
- An introduction to IEEE 802.11 wireless LANs
- Broadband tuner on a chip for cable modem, HDTV, and legacy analog standards
- Symphony-a sigma delta synthesizer [PLLs]
- A direct conversion transceiver for multi-band GSM application
- 67-GHz static frequency divider using 0.2-/spl mu/m self-aligned SiGe HBTs
- Monolithic resistive mixers for 60 GHz direct conversion receivers
- Monolithic power amplifiers covering 70-113 GHz

IEEE © 2003

Papers by Issue

- A high-performance 85-119 GHz GCPW MMIC low noise amplifier
- Applications of virtual modeling to the development of a 39 GHz MMIC transceiver on multilayer Multi Chip Assembly (MCA) substrate
- A novel RFIC for UHF oscillators
- A fully-monolithic SiGe differential voltage-controlled oscillator for 5 GHz wireless applications
- A fully integrated SiGe bipolar 1.4 GHz Bluetooth voltage-controlled oscillator
- A low phase noise monolithic VCO in SiGe BiCMOS
- A fully integrated 5.35-GHz CMOS VCO and a prescaler
- A highly integrated commercial GPS receiver
- Analog baseband IC for use in direct conversion W-CDMA receivers
- A low-IF polyphase receiver for GSM using log-domain signal processing
- Low cost 900 MHz single-chip cordless telephone receiver

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A 3.2 V, 45% efficient, novel Class AB+C CDMA MMIC power amplifier using quasi enhancement mode PHEMTs
- An ultra low current consumption two step power control driver MMIC with self current control for wideband-CDMA handsets
- A single supply very high power and efficiency integrated PHEMT amplifier for GSM applications
- Effect of bias scheme on intermodulation distortion and its use for the design of PCS Tx driver
- The current status of RF and microwave amplifier intermodulation performance
- A monolithic 2.8 V, 3.2 W silicon bipolar power amplifier with 54% PAE at 900 MHz
- A 1.9 GHz low voltage CMOS power amplifier for medium power RF applications
- A low power 900 MHz transmitter IC with audio baseband for ISM applications using 0.25 /spl mu/m BiCMOS

IEEE © 2003

Papers by Issue

- A base-band to RF BiCMOS transmitter RFIC for dual-band CDMA/AMPS wireless handsets
- Monolithic LNAs up to 10 GHz in a production-near 65 GHz f/sub max/ silicon bipolar technology
- A new design approach for variable-gain low noise amplifiers
- A completely integrated 1.9 GHz receiver front-end with monolithic image reject filter and VCO
- Fully differential dual-band image reject receiver in SiGe BiCMOS
- The performance limiting factors as RF MOSFETs scale down
- Ultra low power GaAs MMIC low noise amplifier for smart antenna combining at 5.2 GHz
- 0.4-8 GHz broadband MMICs in novel RF chip size package for optical video distribution system
- A 0.5-16 GHz capacitively coupled HBT medium power amplifier MMIC with active bias regulation

IEEE © 2003

Papers by Issue

- A low noise 2-20 GHz feedback MMIC-amplifier
- A family of monolithic inductor-varactor SiGe-HBT VCOs for 20 GHz to 30 GHz LMDS and fiber-optic receiver applications
- An 18-21 GHz InP DHBT linear microwave Doherty amplifier
- A subharmonically pumped I/Q vector modulator MMIC for Ka band satellite communication
- Monolithic GaAs-InGaP HBT balanced vector modulators for millimeter-wave wireless systems
- A mixed Si and GaAs chip set for millimeter-wave automotive radar front-ends
- Ka-band RF MEMS phase shifters for phased array applications
- HBT low-noise performance in a 0.18 /spl mu/m SiGe BiCMOS technology (2000 [RFIC])
- Design of GaAs MMIC transistors for the low-power low noise applications (2000 [RFIC])

IEEE © 2003

Papers by Issue

- High gain-density K-band P-HEMT LNA MMIC for LMDS and satellite communication (2000 [RFIC])
- High performance 60-GHz coplanar MMIC LNA using InP heterojunction FETs with AlAs/InAs superlattice layer
- Design and performance of wideband, low-noise, millimeter-wave amplifiers for microwave anisotropy probe radiometers (2000 [RFIC])
- Design and characterization of MMIC active cold loads (2000 [RFIC])
- FM demodulation using an injection-locked oscillator (2000 [RFIC])
- A fast response, programmable PA regulator subsystem for dual mode CDMA/AMPS handsets (2000 [RFIC])
- A comparison study of ESD protection for RFICs: performance vs. parasitics
- Effects of offsets on bipolar integrated circuit mixer even order distortion terms (2000 [RFIC])

IEEE © 2003

Papers by Issue

- SiGe bipolar technologies for low phase noise RF and microwave applications (2000 [RFIC])
- A highly integrated dual-band tri-mode transceiver chipset for CDMA TIA/EIA-95 and AMPS applications (2000 [RFIC])
- A highly integrated radio for high performance, low cost 2.4 GHz ISM cordless applications
- A RF transceiver for WDCT in a 25 GHz Si bipolar technology
- Low-power active mixer for Ku-Band application using SiGe HBT MMIC technology (2000 [RFIC])
- A MM-wave monolithic Gilbert-cell mixer (2000 [RFIC])
- Approximate analytical modeling of current crowding effects in multi-turn spiral inductors (2000 [RFIC])
- Novel alternative design methods based upon combined amplification, matching and filtering approaches in MMIC technology (2000 [RFIC])
- Monolithic upconversion and reference IC for power amplifier linearization using GaAs HBTs (2000 [RFIC])

Papers by Issue

2001 [RFIC]

- Front Cover (2001 [RFIC])
- Table of Contents (2001 [RFIC])
- Wireless LAN revolution: from silicon to systems
- A W-CDMA zero-IF front-end for UMTS in a 75 GHz SiGe BiCMOS technology
- Dual-band/tri-mode receiver IC for N- and W-CDMA systems using 6"-PHEMT technology
- High-performance quadrature modulators for broadband wireless communication
- A versatile receiver IC supporting WCDMA, CDMA and AMPS cellular handset applications
- Fully integrated W-CDMA IF chip-set for UMTS mobiles
- A 50% efficiency InGaP/GaAs HBT power amplifier module for 1.95 GHz wide-band CDMA handsets
- SiGe-power amplifiers in flipchip and packaged technology

Papers by Issue

- A nonlinear capacitance cancellation technique and its application to a CMOS class AB power amplifier
- RF power performance of LDMOSFETs on SOI: an experimental comparison with bulk Si LDMOSFETs
- A 0.35 /spl mu/m CMOS 2.5 GHz complementary -G/sub M/ VCO using PMOS inversion mode varactors
- HiperLAN 5.4 GHz low power CMOS synchronous oscillator (2001 [RFIC])
- High performance flip-chip multi-mode, multi-band VCO IC using a standard low cost BiCMOS process
- A 5.7 GHz Hiperlan SiGe BiCMOS voltage-controlled oscillator and phase-locked-loop frequency synthesizer
- A fully integrated PLL frequency synthesizer LSI for mobile communication system
- A flexible 10-300 MHz receiver IC employing a bandpass sigma-delta ADC
- A completely integrated 1.8 volt 5 GHz tunable image reject notch filter

IEEE © 2003

Papers by Issue

- A monolithic 2-V 950-MHz CMOS bandpass amplifier with a notch filter for wireless receivers
- Tuned LNA for RFICs using boot-strapped inductor
- A 2.4 GHz CMOS transceiver for Bluetooth
- A highly integrated GPS receiver for cellular handset
- The first very low-IF RX, 2-point modulation TX CMOS system on chip Bluetooth solution
- A fully integrated CMOS frequency synthesizer for Bluetooth
- Student-designed Bluetooth radio in silicon-on-sapphire
- A 2.5 V CMOS switched-capacitor channel-select filter with image rejection and automatic gain control
- Design and modeling of compact on-chip transformer/balun using multi-level metal windings for RF integrated circuits
- A complete physical frequency dependent lumped model for RF integrated inductors
- Microwave filters on a low resistivity Si substrate with a polyimide interface layer for wireless circuits

IEEE © 2003

Papers by Issue

- On-board probing of broadband RF amplifiers using CPW interconnects
- Modeling of lead-frame plastic CSPs for accurate prediction of their low-pass filter effects on RFICs (2001 [RFIC])
- RF circuit performance degradation due to soft breakdown and hot carrier effect in 0.18 /spl mu/m CMOS technology
- Reduced intermodulation distortion of AlGaAs/InGaAs doped-channel FETs by air-bridge gate process
- Systematic analysis of RF distortion in SiGe HBT's
- Field-modulating plate (FP) InGaP MESFET with high breakdown voltage and low distortion
- Large signal bias-dependent modeling of PHEMTs by pulsed measurements
- 20-GHz InP-HBT voltage-controlled oscillator with wide tuning range
- The design of CMOS transimpedance amplifier based on BSIM large-signal model

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- Monolithic Ka-band even-harmonic quadrature resistive mixer for direct conversion receivers
- Compensation of MMIC spread in 60 GHz telecommunication module by automatic output power control
- A 23-GHz low-noise amplifier in SiGe heterojunction bipolar technology
- A single chip FSK/ASK 900 MHz transceiver in a standard 0.25 um CMOS technology
- A highly integrated UHF data receiver for vehicle applications
- 1W 900 MHz direct conversion CMOS transmitter for paging applications
- A 1-chip RF transceiver MMIC for ETC with surface via-hole isolation technique
- A 1-5 GHz low-power single-chip receiver IC for optical video distribution system
- Power controller for dual band TDMA power amplifiers

IEEE © 2003

Click on title for a paper summary.

Papers by Issue

- A 450 MHz CMOS RF power detector
- Design of an LTCC switch diplexer front-end module for GSM/DCS/PCS applications
- A monolithic Si PCS-CDMA power amplifier with an impedance-controllable biasing scheme
- A wide dynamic range switched-LNA in SiGe BiCMOS (2001 [RFIC])
- Dual bias feed SiGe HBT low noise linear amplifier (2001 [RFIC])
- A 1.4-dB-NF variable-gain LNA with continuous control for 2-GHz-band mobile phones using InGaP emitter HBTs (2001 [RFIC])
- A 1.7 mA low noise amplifier with integrated bypass switch for wireless 0.05-6 GHz portable applications (2001 [RFIC])
- 1.8 V RF AGC and mixer implemented with a novel four-terminal HBT (FHBT)
- Design and performance of a highly integrated wideband active downconverter MMIC

IEEE © 2003

Papers by Issue

- A 2.5 GHz low noise high linearity LNA/mixer IC in SiGe BiCMOS technology
- A 1.9 GHz double-balanced subharmonic mixer for direct conversion receivers
- A 1 GHz-band low distortion up-converter with a linear in dB control VGA for digital TV tuner
- A low-power direct conversion receiver module for C-band wireless applications (2001 [RFIC])
- A GaAs HBT 5.8 GHz OFDM transmitter MMIC chip set (2001 [RFIC])
- A 2.5 V CMOS differential active inductor with tunable L and Q for frequencies up to 5 GHz (2001 [RFIC])
- Temperature dependence of intermodulation and linearity in GaN based devices (2001 [RFIC])
- A new 'T' circuit topology for the broadband modelling of symmetric inductors fabricated in CMOS technology (2001 [RFIC])
- Modeling of inductors and transformers (2001 [RFIC])

IEEE © 2003

Papers by Issue

- 15 GHz wideband amplifier with 2.8 dB noise figure in SiGe bipolar technology (2001 [RFIC])
- 40-Gbit/s D-type flip-flop and multiplexer circuits using InP HEMT (2001 [RFIC])
- A direct Ku-band linear subharmonically pumped BPSK and I/Q vector modulator in multi-layer thin-film MCM-D (2001 [RFIC])
- Index of Authors (2001 [RFIC])

IEEE © 2003

Papers by Issue

2002 [RFIC]

- Front Cover (2002 [RFIC])
- Table of Contents (2002 [RFIC])
- The world-wide wireless web
- From "cellphone" to "remote control on life": how wireless communications will change the way we live over the next 20 years
- Requirements for high performance RF/UHF ICs and possible solutions
- Direct conversion receiver design for mobile phone systems - challenges, status and trends
- RF local oscillator path for GSM direct conversion transceiver with true 50% duty cycle divide by three and active third harmonic cancellation
- W-CDMA SiGe TX-IC with high dynamic range and high power control accuracy
- A direct-conversion W-CDMA front-end SiGe receiver chip

IEEE © 2003

Papers by Issue

- Highly integrated, dual band/tri-mode SiGe BiCMOS transmitter IC for CDMA wireless applications
- Efficiency improvement techniques at low power levels for linear CDMA and WCDMA power amplifiers
- An overview of efficiency enhancements with application to linear handset power amplifiers
- Switched-mode tuned high-efficiency power amplifiers: historical aspect and future prospect
- A broadband monolithic S-band class-E power amplifier
- 1/f noise of NMOS and PMOS transistors and their implications to design of voltage controlled oscillators
- A 900 MHz low phase noise CMOS quadrature oscillator
- A 0.18 /spl mu/m CMOS 2.45 GHz, low-power quadrature VCO with 15% tuning range
- A 1.8-V 6/9-GHz switchable dual-band quadrature LC VCO in SiGe BiCMOS technology
- A 1 V 3.8-5.7 GHz differentially-tuned VCO in SOI CMOS
- Design of high-speed fiber optic datalinks

IEEE © 2003

Papers by Issue

- A 37/spl sim/50 GHz InP HBT VCO IC for OC-768 fiber optic communication applications
- Amplifier array for 12 parallel 10 Gb/s optical-fiber links fabricated in a SiGe production technology
- Front-end CMOS chipset for 10 Gb/s communication
- Application of quasi-static method of moments for the design of OC-192 and OC-768 fiber optic integrated circuits
- CMOS components for 802.11b wireless LAN applications
- A 3 V, 0.35 /spl mu/m CMOS Bluetooth receiver IC
- Integrated CMOS transceivers using single-conversion standard IF or low IF RX for digital narrowband cordless systems
- A highly integrated, versatile GPS receiver for E911 applications
- A SiGe transceiver chipset for 100 Mbps/1 Gbps digital communication over cable system
- Automatic synthesis of a 2.1 GHz SiGe low noise amplifier

IEEE © 2003

Papers by Issue

- Highly linear SiGe BiCMOS LNA and mixer for cellular CDMA/AMPS applications
- An even harmonic type direct conversion SiGe-MMIC receiver for W-CDMA mobile terminals
- A 2.6 V GSM/PCN dual band variable gain low noise RF down conversion mixer
- A +2.4/0 V controlled high power GaAs SPDT antenna switch IC for GSM application
- A 2-18 GHz wideband high dynamic range receiver MMIC
- A 3-33 GHz PHEMT MMIC distributed drain mixer
- Ka-band direct digital receiver using 0.25 /spl mu/m GaAs PHEMTs
- A single-chip 24 GHz receiver front-end using a commercially available SiGe HBT foundry process
- Low power, high speed PLL fabricated in UTSi/sup (R)/ process
- A 2V, 2.3/4.6 GHz dual-band CMOS frequency synthesizer

IEEE © 2003

Papers by Issue

- A low jitter 5.3-GHz 0.18-/spl mu/m CMOS PLL based frequency synthesizer
- Design considerations in a BiCMOS dual-modulus prescaler
- Time delay considerations in high-frequency phase-locked loops
- The MSM5100/sup TM/ cdma2000 + AMPS + gpsOne/sup TM/ + Bluetooth multimode ASIC for 3G handsets
- A re-configurable receiver architecture for 3G mobiles
- A highly integrated 0.25 /spl mu/m BiCMOS chipset for 3G UMTS/WCDMA handset RF sub-system
- A CMOS transmit/receive IF chip-set for WCDMA mobiles
- 4G RF systems on chip or on module?
- Gain controllable very low voltage (/spl les/ 1 V) 8-9 GHz integrated CMOS LNAs
- Step gain amplifier with impedance unchanged in gain control
- Enhancement mode PHEMT low noise amplifier with LNA linearity control (IP3) and mitigated bypass switch

IEEE © 2003

Papers by Issue

- Low noise, high linearity, wide bandwidth amplifier using a 0.35 /spl mu/m SiGe BiCMOS for WLAN applications
- A 5.8-GHz two-stage high-linearity low-voltage low noise amplifier in a 0.35-/spl mu/m CMOS technology [WLANs]
- A 14.5 GHz, 0.35 /spl mu/m frequency divider for dual-modulus prescaler
- A high sensitivity static 2:1 frequency divider up to 19 GHz in 120 nm CMOS
- A low-power 20 GHz static frequency divider with programmable input sensitivity
- 36 GHz dual-modulus prescaler in SiGe bipolar technology
- A GSM/EDGE dual-mode, 900/1800/1900-MHz triple-band HBT MMIC power amplifier module
- A 20 mA quiescent current CV/CC parallel operation HBT power amplifier for W-CDMA terminals
- A new "active" predistortor with high gain using cascode-FET structures
- Integrated distributed amplifier with passive-free input driver

IEEE © 2003

Papers by Issue

- Integrated even harmonic type direct conversion receiver for W-CDMA mobile terminals (2002 [RFIC])
- An analog baseband chain for a UMTS zero-IF receiver in a 75 GHz SiGe BiCMOS technology (2002 [RFIC])
- A 2-GHz RF front-end transceiver chipset in CMOS technology for PCS and IMT-2000 applications (2002 [RFIC])
- System analysis of a W-CDMA base-station PA employing adaptive digital predistortion (2002 [RFIC])
- Ku-band MMIC's in low-cost, SMT compatible packages (2002 [RFIC])
- ESD protection of RF circuits in standard CMOS process (2002 [RFIC])
- Novel BiCMOS compatible, short channel LDMOS technology for medium voltage RF & power applications (2002 [RFIC])
- Electromagnetic coupling effects in RFCMOS circuits (2002 [RFIC])

IEEE © 2003

Papers by Issue

- Ultra low-power VCO based on InP-HEMT and heterojunction interband tunnel diode for wireless application (2002 [RFIC])
- Modeling of passive elements with ASITIC (2002 [RFIC])
- Modeling of frequency dependent losses in two-port and three-port inductors on silicon (2002 [RFIC])
- Characterization and modeling of on-chip inductor substrate coupling effect (2002 [RFIC])
- Characterization and modeling of small-signal substrate resistance effect in RF CMOS (2002 [RFIC])
- A new methodology for the computation of the substrate parasitics of octagonal inductors (2002 [RFIC])
- Review of SiGe process technology and its impact on RFIC design (2002 [RFIC])
- High performance circuits in 0.18 /spl mu/m SiGe BiCMOS process for wireless applications (2002 [RFIC])
- Low-frequency noise figures-of-merit in RF SiGe HBT technology (2002 [RFIC])

IEEE © 2003

Papers by Issue

- COM2 enhanced graded base SiGe technology for high speed applications (2002 [RFIC])
- Advanced passive devices for enhanced integrated RF circuit performance (2002 [RFIC])
- A robust high voltage Si LDMOS model extraction process to achieve first pass linear RFIC amplifier design success (2002 [RFIC])
- Large-signal modeling of GaN FET and nonlinearity analysis using Volterra series (2002 [RFIC])
- Direct parameter extraction on RF-CMOS (2002 [RFIC])
- Low frequency noise characterization and modeling of microwave bipolar devices: application to the design of low phase noise oscillator (2002 [RFIC])
- Linearity analysis of CMOS for RF application (2002 [RFIC])
- RF power devices for wireless communications (2002 [RFIC])
- SiGe/Si power HBTs for X- to K-band applications (2002 [RFIC])

IEEE © 2003

Papers by Issue

- RF power characteristics of SiGe heterojunction bipolar transistor with high breakdown voltage structures (2002 [RFIC])
- Design techniques for improved microwave performance of small outline packages (2002 [RFIC])
- Spiral inductor performance in deep-submicron bulk-CMOS with copper interconnects (2002 [RFIC])
- A 6.5-mW receiver front-end for Bluetooth in 0.18-/spl mu/m CMOS (2002 [RFIC])
- An active SiGe sub-harmonic direct-conversion receiver front-end design for 5-6 GHz band applications (2002 [RFIC])
- Soft breakdown and hot carrier reliability of CMOS RF mixer and redesign (2002 [RFIC])
- High-Q copper inductors on standard silicon substrate with a low-k BCB dielectric layer (2002 [RFIC])
- Geometry and bias current optimization for SiGe HBT cascode low-noise amplifiers (2002 [RFIC])

IEEE © 2003

Paper Index

- 5-GHz 20-Watt GaAs FET Amplifier for MLS
- 5-GHz Band 30 Watt Power GaAs FETs
- 5-GHz CMOS wireless LANs
- 5-GHz SiGe HBT monolithic radio transceiver with tunable filtering
- 5-mW and 5% efficiency 216-GHz InP-based heterostructure barrier varactor tripler

6

- 6 GHz 16 QAM MIC Modulator with Phase Linearity Improved
- 6 GHz 5W GaAs FET Power Amplifier for 78 Mbits/s 8-Phase PSK Signal Transmission
- 6 to 18 GHz Single-Ended and Push-Pull MMIC Amplifiers for High-Gain Modules
- 6 to 18 GHz Transmit/Receive Modules for Multifunction Phased Arrays
- 6.7 GHz frequency synthesizer in 0.8 /spl mu/m silicon bipolar production technology
- 60 and 70 GHz (HEMT) Amplifiers

IEEE © 2003

Paper Index

- 60 GHz coplanar waveguide couplers and slotline transition on polished beryllium oxide
- 60 GHz flip-chip assembled MIC design considering chip-substrate effect
- 60 GHz GaAs MMIC Technology for a High Data Rate Mobile Broadband Demonstrator
- 60 GHz high-efficiency HEMT MMIC chip set development for high-power solid state power amplifier
- 60 GHz Integrated Circuit Quadriphase Exciter and Modulator
- 60 GHz millimeter-wave source using two-mode injection-locking of a Fabry-Perot slave laser
- 60 GHz Power Amplifier Using PHEMT
- 60 GHz Short Range Transceivers and Applications for Minimum Delay Spread LAN
- 60 GHz Sources Using Optically Driven HBTs
- 60 GHz-Band Ultra-Miniature Monolithic T/R Modules for Multimedia Wireless Communication Systems
- 600 GHz Planar-Schottky-Diode Subharmonic Waveguide Mixers

Paper Index

- A 23 GHz Monolithic MESFET DRO as Self-Oscillating Mixer
- A 23.8-GHz SOI CMOS tuned amplifier
- A 230 GHz low noise subharmonically pumped SIS mixer
- A 230 Watt S-Band SiGe HBT
- A 230-GHz Radiometer System Employing a Second-Harmonic Mixer (Short Papers)
- A 230-Watt S-Band SiGe Heterojunction Bipolar Transistor
- A 2-32 GHz Coplanar Waveguide InAlAs/InGaAs-InP HBT Cascode Distributed Amplifier
- A 2-32 GHz Coplanar Waveguide InAlAs/InGaAs-InP HBT Cascode Distributed Amplifier
- A 23-GHz low-noise amplifier in SiGe heterojunction bipolar technology
- A 240 W power heterojunction FET with high efficiency for W-CDMA base stations
- A 240 W push-pull GaAs power FET for W-CDMA base stations
- A 2450 Mhz Slab-Loaded Direct Contact Applicator with Choke (1980 [MWSYM])

IEEE © 2003

Paper Index

- A 2450-MHz Slab-Loaded Direct Contact Applicator with Choke (Dec. 1980 [T-MTT])
- A 25 GHz down-converter integrated with a CPW-fed lens antenna
- A 25 Ohm, 2W, 8-14 GHz HBT Power MMIC with 20 dB Gain and 40% Power Added Efficiency
- A 25 watt and 50 watt Ka-band quasi-optical amplifier
- A 25 Watt, 5 GHz GaAs FET Amplifier for MLS
- A 250-GHz Microshield Bandpass Filter
- A 25KW Solid State Transmitter for L-Band Radars
- A 25-W 5-GHz GaAs FET Amplifier for a Microwave Landing System
- A 2-6.2 GHz, 300 mW GaAs MESFET Amplifier
- A 26.5 GHz silicon MOSFET 2:1 dynamic frequency divider
- A 26.5-40.0 GHz GaAs FET Amplifier
- A 26-GHz Band Integrated Circuit of a Double-Balanced Mixer and Circulators
- A 26-GHz High Performance MIC Transmitter/Receiver for Digital Radio Subscriber Systems (1984 [MWSYM])

IEEE © 2003

Paper Index

- A Continuous Comparison at 97 GHz Radiometer
- A Continuous Comparison Radiometer at 97 GHz (Corrections)
- A Continuously Tunable 65--115-GHz Gunn Oscillator
- A Continuously Variable Coaxial-Line Attenuator
- A Continuously Variable Dielectric Phase Shifter (Correspondence)
- A Continuously Variable Ku-Band Phase/Amplitude Control Module
- A continuum model of the dynamics of coupled oscillator arrays for phase-shifterless beam scanning
- A continuum model of the dynamics of coupled oscillator arrays for phase-shifterless beam scanning (Corrections)
- A Contour Formula for Compensated Microstrip Steps and Open Ends
- A contour-based approach to the multimode network representation of waveguide transitions
- A contribution to the modeling of longitudinally periodic waveguides by the help of the TLM method

Paper Index

- A Fully Integrated 35 GHz MMIC Receiver with On-Chip LO
- A fully integrated 40-Gbit/s clock and data recovery circuit using InP/InGaAs HBTs
- A fully integrated 5.35-GHz CMOS VCO and a prescaler
- A fully integrated active inductor with independent voltage tunable inductance and series-loss resistance
- A fully integrated broad-band amplifier MMIC employing a novel chip-size package
- A fully integrated CMOS frequency synthesizer for Bluetooth
- A fully integrated Ku-band Doherty amplifier MMIC
- A fully integrated multiconductor model for TLM (1998 Vol. III [MWSYM])
- A fully integrated multiconductor model for TLM (Dec. 1998, Part II [T-MTT])
- A fully integrated PLL frequency synthesizer LSI for mobile communication system
- A fully integrated SiGe bipolar 1.4 GHz Bluetooth voltage-controlled oscillator
- A Fully Integrated SIS Mixer for 75-110 GHz

Paper Index

- A New "Phased-Type" Image Enhanced Mixer
- A new 2-D image reconstruction algorithm based on FDTD and design sensitivity analysis (2002 Vol. II [MWSYM])
- A new 2-D image reconstruction algorithm based on FDTD and design sensitivity analysis (Dec. 2002 [T-MTT])
- A New 34-GHz 3.5-mm Low-Cost Utility Coaxial Connector Featuring Low Leakage, Low Standing-Wave Ratio, and Long Life (Short Papers)
- A new 3D FDTD multigrid technique with dielectric traverse capabilities
- A new 3-dB power divider for millimeter-wavelengths
- A New 3-Way Power Divider with Various Output Power Ratios
- A New 40 GHz Digital Distribution Radio with Single Local Oscillator
- A New 6-18GHz, -3dB Multisection Hybrid Coupler Using Asymmetric Broadside, and Edge Coupled Lines
- A New A/D Converter Using Surface Acoustic Waves
- A new absorbing boundary condition structure for waveguide analysis

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A New Accurate Equivalent Network for Stripline Circulators
- A New Active Array Module for Spatial Power Combiners and Active Antennas (Short Papers)
- A new active phase shifter using a vector sum method
- A New Adaptive Double Envelop Feedback (ADEF) Linearizer for Mobile Radio Power Amplifiers
- A New Adaptive Double Envelope Feedback (ADEF) Linearizer for Solid State Power Amplifiers
- A New Algorithm for the Accurate Alignment of Microwave Networks
- A new algorithm for the incorporation of arbitrary linear lumped networks into FDTD simulators
- A New Algorithm for the Wide-Band Analysis of Arbitrarily Shaped Planar Circuits
- A new amplifier power combining scheme with optimum efficiency under variable outputs
- A New Analytic Design Technique for Two-and Three-Way Warped Mode Combline Directional Couplers
- A new analytical and broadband method for determining the HBT small-signal model parameters

Click on title for a paper summary.

IEEE © 2003

Paper Index

- A new analytical and scaleable noise model for HFET
- A new analytical small-signal model of dual-gate GaAs MESFET
- A New and Efficient Approach to the Analysis and Design of GaAs MESFET Microwave Oscillators
- A new antenna switching architecture for mobile handsets
- A New Aperture Admittance Model for Open-Ended Waveguides
- A New Aperture Admittance Model for Open-Ended Waveguides (Correction)
- A New Aperture Admittance Model for Open-Ended Waveguides (Feb. 1994 [T-MTT])
- A new approach for a phase controlled self-oscillating mixer
- A New Approach for Analysis of Resonant Structures Based on the Spatial Finite-Difference and Temporal Differential Formulation (Short Papers)
- A new approach for optical millimeter wave generation utilizing locking techniques
- A new approach for RIN peak and phase noise suppression in microchip lasers

IEEE © 2003

Paper Index

- A New Approach for the Design of Microwave and Filters Using Dielectric Oscillators Resonators
- A new approach for the experimental circuit modeling of coupled interconnection structures based on causality
- A new approach for the extraction of SPICE compatible models from measured parameters of microwave circuits
- A New Approach in CAD of MM-Wave IMPATT Oscillators
- A New Approach in the Computation of Ultrahigh Degree Equal-Ripple Polynomials for 90°-Coupler Synthesis
- A New Approach to Active Phased Arrays Through RF-Wafer Scale Integration
- A new approach to amplifier linearization by the generalized baseband signal injection method
- A New Approach to Designing Active MMIC Tuning Elements Using Second-Generation Current Conveyors
- A New Approach to Dispersion Analysis of Graded Index Optical Fibers
- A new approach to estimate complex permittivity of dielectric materials at microwave frequencies using waveguide measurements

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A new approach to FET model scaling and MMIC design based on electromagnetic analysis
- A new approach to nonlinear analysis of noise behavior of synchronized oscillators and analog-frequency dividers
- A New Approach to Quasi-Static Analysis with Application to Microstrip
- A New Approach to the Computer-Aided Design of Microwave Circuits
- A New Approach to the Computer-Aided Design of Nonlinear Networks and its Application to Microwave Parametric Frequency Dividers
- A new approach to the design of dual-mode rectangular waveguide filters with distributed coupling
- A New Approach to the Design of Graded-Index Guided Wave Devices
- A New Approach to the Design of LED Based Gb/s Digital Fiber Optic Link
- A New Approach to the Microstrip Lines with Finite Strip Thickness and Conductivity

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A new approach to the optimization of passive microwave structures on the basis of a FDTD-method
- A New Approach to the RF Power Operation of MESFET's
- A New Approximation for the Capacitance of a Rectangular-Coaxial-Strip Transmission Line (Short Papers)
- A new asymmetrically grooved NRD guide leaky-wave antenna for millimeter-wave application
- A New Automated Noise and Gain Parameter Measurement System
- A New Automatic Frequency Regulation System (Correspondence)
- A new balanced amplifier using 6-port power divider
- A New Balanced Type Ferrite Switch
- A New Balanced-Type RF-Band SAW Filter Using SAW Resonators
- A New Balanced-Unbalanced Type RF-Band SAW Filter
- A New Band-Splitting Filter for Guided-Millimeter-Wave Transmission Systems

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A new beam-scanning technique by controlling the coupling angle in a coupled oscillator array
- A new behavioral model taking into account nonlinear memory effects and transient behaviors in wideband SSPAs
- A New Boundary Description in Two-Dimensional TLM Models of Microwave Circuits
- A New Boundary Integral Approach to the Determination of the Resonant Modes of Arbitrarily Shaped Cavities
- A New Broad-Band Absorption Modulator for Rapid Switching of Microwave Power
- A new broadband coplanar waveguide to slotline transition
- A new calculation approach of transistor noise parameters as a function of gatewidth and bias current
- A New Characterization Approach to Extract HBT's Models for Non-Linear Microwave CAD
- A New Chart for the Solution of Transmission Line and Polarization Problems
- A New Chip Interconnection Technic for Ultra High-Speed and Millimeter-Wave Applications

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A new circuit configuration to obtain large attenuation with a coupled-resonator band elimination filter using laminated LTCC
- A New Circuit Structure for Microwave Frequency Doublers (1993 [MCS])
- A New Circuit Structure for Microwave Frequency Doublers (1993 Vol. I [MWSYM])
- A new circuit topology for continuous group delay synthesis
- A New Class of Basis Functions for the Solution of the E-Plane Waveguide Discontinuity Problem
- A New Class of Branch-Line Directional Couplers
- A New Class of Broad-Band Microwave 90-Degree Phase Shifters
- A New Class of Distributed Prototype Filters with Applications to Mixed Lumped/Distributed Component Design
- A new class of dual-mode directional couplers for compact dual-polarization beam-forming networks
- A new class of eigenfunction expansion methods for fast frequency-domain analysis of waveguides
- A New Class of E-Plane Integrated Millimeter-Wave Filters

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A New Class of Leaky Modes on Open Dielectric Waveguides
- A New Class of Low Loss Reactive Wall Waveguides
- A New Class of Microstrip Directional Couplers
- A New Class of Microwave Active Filters
- A new class of miniature radiationless CPW shunt stubs printed on the center conductor
- A new class of multisection 180/spl deg/ hybrids based on cascadable hybrid-ring couplers
- A New Class of Nonreciprocal Components Using Slot Line (Short Papers)
- A New Class of Optimized Finline and E-Plane Metal Insert Filters with Improved Characteristics
- A New Class of Self-Protecting Low-Noise Microwave Amplifiers
- A new coax to troughguide transition
- A New Compact 90° IF Combiner
- A New Compact Band-Pass Filter Employing Three Parallel-Coupled Lines
- A New Compact Wideband Balun

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A New Compact Wideband Balun (1993 Vol. I [MWSYM])
- A New Computer Aid for Microwave Filter Design
- A New Computer-Controlled Klinger Cavity Mode Conversion Test Set
- A New Concept for Broadbanding the Ferrite Substrate Circulator Based on Experimental Modal Analysis
- A New Concept for Broadbanding the Ferrite Substrate Circulator Based on Experimental Modal Analysis (Comments and Authors' Reply)
- A New Concept of LANs: Passive Microwave Links Hooked Onto a Fiber Optic Backbone
- A new concept of RF feed-through applied to multichip modules for space equipment
- A New Concept to Cancel Insertion Phase Variation in MMIC Amplitude Controller
- A New Concept: An Electronically Tunable MMIC Flatness Corrector
- A New Configuration Providing Negative Resistance at a Higher Frequency than that of the Negative Resistance Device by Itself

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A New Constant-Resistance ASK Modulator Using Double-Sided MIC
- A New Coplanar Waveguide/Slotline Double-Balanced Mixer
- A new coupling structure for dual mode dielectric resonators
- A New Criterion for Linear 2-Port Stability Using a Single Geometrically Derived Parameter
- A New Cylindrical Electron Gun for Low-Power Tunable Gyrotrons with High Magnetic Compression Ratios (Short Papers)
- A New Definition of Characteristic Impedance
- A new design approach for variable-gain low noise amplifiers
- A new design concept for low-loss SAW filters based on different-width split-finger SPUDT
- A New Design for 1-CM Rutile Traveling Wave Masers (Short Papers)
- A New Design Method for Maximum Gain Formulation of a Microwave Amplifier Subject to Noise Figure and Input VSWR
- A new design of microwave filters by using continuously varying transmission lines

IEEE © 2003

Paper Index

- A new design procedure for single-layer and two-layer 3-line baluns
- A new design procedure for single-layer and two-layer three-line baluns
- A New Development of an Equivalent Circuit Model for Magnetostatic Forward Volume Wave Transducers
- A New Dielectric Loaded Cavity for High Power Microwave Filtering
- A New Digital Phase Shifter Architecture Suitable for MMIC's (Short Papers)
- A New Diplexer - Realized in Stripline
- A New Direct Digital Receiver Performing Coherent PSK Reception
- A new direct millimeter wave six-port receiver (2001 Vol. III [MWSYM])
- A new direct millimeter-wave six-port receiver (Dec. 2001 [T-MTT])
- A new dispersion model for microstrip line
- A new dynamic electro-thermal nonlinear model for silicon RF LDMOS FETs

Click on title for a paper summary.

IEEE © 2003

Paper Index

- A new dynamic load-line measurement method with EOS and load-pull system for power FET design
- A New Edge Element Analysis of Dispersive Waveguiding Structures
- A New Edge Element Analysis of Dispersive Waveguiding Structures (Authors' Reply)
- A New Edge Element Analysis of Dispersive Waveguiding Structures (Comments)
- A new edge element for the modeling of field singularities in transmission lines and waveguides
- A New Edge Mode Isolator in the VHF Range (Abstract)
- A New Edge-Mode Isolator in the Very High Frequency Range
- A New Edge-Mode Isolator in the Very High Frequency Range (Comments)
- A New Effective Approach for High Yield Microwave Matching Network and Amplifier Design
- A New Electric Field Integral Equation for Heterogeneous Dielectric Bodies of Revolution (Corrections)

IEEE © 2003

Paper Index

- A New Electric Field Integral Equation for Heterogeneous Dielectric Bodies of Revolution (Short Papers)
- A New Electronic Phase Shifter (Correspondence)
- A New Element-Saving Equivalent Circuit for the Analysis of General Coupled n-Wire Transmission Lines
- A new empirical I-V model for HEMT devices
- A New Empirical Large-Signal HEMT Model (Short Papers)
- A new empirical large-signal model of Si LDMOSFETs for high-power amplifier design
- A New Empirical Nonlinear Model for HEMT and MESFET Devices
- A New Empirical Nonlinear Model for HEMT-Devices
- A new enhanced coupling structure of microstrip ring resonator with two coupled lines and a slit
- A New Equivalent Network Method for Analyzing Discontinuity Properties of Open Dielectric Waveguides
- A New Evanescent-Mode Filter for Densely Packaged Waveguide Applications

IEEE © 2003

Paper Index

- A New Extraction Method for Noise Sources and Correlation Coefficient in MESFET (Short Papers)
- A new extraction method for the two-parameter FET temperature noise model
- A new extraction method to determine bias-dependent source series resistance in GaAs FET's
- A new extrinsic equivalent circuit of HEMT's including noise for millimeter-wave circuit design
- A new family of all-inductive dual-mode filters
- A New Fast and Accurate Algorithm for the Computation of Microstrip Capacitances
- A new FDTD algorithm based on alternating-direction implicit method
- A New FEM Approach for Open Boundary Laplace's Problem (Short Papers)
- A new FET frequency multiplier
- A new field-probing technique for millimeter-wave components
- A New Finite Element Method Formulation Applied to D.R. Microwave Filter Design

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A new finite element model for reduced order electromagnetic modeling
- A New Finite-Difference Technique for Higher-Order Modes in Arbitrarily Shaped Waveguides
- A New Finite-Difference Time-Domain (FDTD) Algorithm for Efficient Field Computation in Resonantor Narrow-Band Structures
- A New Finite-Difference Time-Domain Algorithm for Solving Maxwell's Equations
- A New Finite-Difference Time-Domain Formulation and its Equivalence with the TLM Symmetrical Condensed Node
- A New Finite-Difference Time-Domain Formulation and its Equivalence with the TLM Symmetrical Condensed Node (Comments and Authors' Reply)
- A New Finite-Difference Time-Domain Formulation Equivalent to the TLM Symmetrical Condensed Node
- A new finite-element solution for parameter extraction of multilayer and multiconductor interconnects
- A New Fin-Line Ferrite Isolator for Integrated Millimeter-Wave Circuits

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A New Fin-Line Ferrite Isolator for Integrated Millimeter-Wave Circuits (Comments)
- A New Form of Ferrite Device for Millimeter-Wave Integrated Circuits (Short Papers)
- A New Form of High-Power Microwave Duplexer
- A New Formula for Attenuation in Coaxial Cables (Correspondence)
- A New Formulation for the Analysis of Non-Uniform Transmission Lines Using Frequency-Varying Basis Functions
- A New Formulation for Yield Optimization
- A New Formulation of the Boundary Condition at Infinity for a Hybrid Radiation Mode and its Application to the Analysis of Radiation Modes of Microstrip Lines
- A New Formulation of the Boundary Condition at Infinity for a Hybrid Radiation Mode and its Application to the Analysis of the Radiation Modes of Microstrip Lines (Corrections)
- A New Four-Port Automatic Network Analyzer: Part I--Description and Performance
- A New Four-Port Automatic Network Analyzer: Part II--Theory

IEEE © 2003

Paper Index

- A New Free-Wave Dielectric and Magnetic Properties Measurement System at Millimetre Wavelengths
- A New Frequency Domain Approach to the Analysis of Nonlinear Microwave Circuits
- A New Frequency Domain Symmetrical Condensed TLM Node
- A New Frequency-Domain TLM Algorithm Using a Decoupled Symmetrical Condensed Node
- A New Frequency-Domain TLM Symmetrical Condensed Node Derived Directly from Maxwell's Equations
- A New Full-Wave Integral Equation Method for the Analysis of Coplanar Strip Circuit Using the Mixed-Potentials Eigenfunction Expansion Technique
- A New GaAs Power MESFET Structure for Improved Power Capabilities
- A New GaAs Power-MESFET with Large Unit Gate Width
- A new GaAs variable gain amplifier MMIC with a wide-dynamic-range and low-voltage-operation linear attenuation circuit

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A new GaAs variable-gain amplifier MMIC with a wide-dynamic-range and low-voltage-operation linear attenuation circuit
- A New Gel Phantom Used for Three Dimensional Measurement of the Local SAR
- A New Generalised Approach to the Design of Microwave Oscillators
- A New Generation of Power Klystrons on the Base of Multiple-Beam Design
- A New Global Finite Element Analysis of Microwave Circuits Including Lumped Elements (1996 Vol. I [MWSYM])
- A New Global Finite Element Analysis of Microwave Circuits Including Lumped Elements (Dec. 1996, Part II [T-MTT])
- A new global time domain electromagnetic simulator of microwave circuits including lumped elements based on finite element method
- A new global time-domain electromagnetic simulator of microwave circuits including lumped elements based on finite-element method

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A new global-analysis model for microwave circuits with lumped elements
- A new high performance phase shifter using Ba/sub x/Sr/sub 1-x/TiO/sub 3/ thin films
- A New High-Power Variable Attenuator (Correspondence)
- A New High-Precision Method for the Measurement of the VSWR of Coaxial Connectors
- A new high-temperature superconducting double-hybrid coupler with wide bandwidth
- A new hybrid FDTD-BIE approach to model electromagnetic scattering problems
- A New Hybrid Mode Boundary Integral Method for Analysis of MMIC Waveguides with Complicated Crossection
- A new hybrid mode-matching/numerical method for the analysis of arbitrarily shaped inductive obstacles and discontinuities in rectangular waveguides
- A New Hybrid Symmetrical Condensed Node for the Frequency-Domain TLM Method
- A new hybrid technology for millimeter-wave integrated circuits

IEEE © 2003

Paper Index

- A New Impedance-Matched Wide-Band Balun and Magic Tee
- A New Implementation of a Multiport Automatic Network Analyzer
- A New Implementation of a Multiport Network Analyzer (Corrections)
- A New Instrument for the Measurement of Resonant Field Distributions in Microwave Housings and Packages
- A New Integrated Waveguide-Microstrip Transition (Short Papers)
- A New Interdigital Electrode Transducer Geometry
- A New Interpretation of the Spectral Domain Immittance Matrix Approach
- A New Isolator Using a Solid-State Plasma Waveguide (Correspondence)
- A new iterative diakoptics-based multilevel moments method for planar circuits
- A New Large Signal HBT Model
- A New Large Signal HBT Model (1994 Vol. II [MWSYM])

IEEE © 2003

Paper Index

- A New Large-Signal AlGaAs/GaAs HBT Model Including Self-Heating Effects, with Corresponding Parameter-Extraction Procedure
- A new large-signal InP/InGaAs single HBT model including self-heating and impact ionization effects
- A New Large-Signal Model Based on Pulse Measurement Techniques for RF Power MOSFET
- A New Leaky Waveguide for Millimeter Waves Using Nonradiative Dielectric (NRD) Waveguide-Part I: Accurate Theory
- A New Leaky Waveguide for Millimeter Waves Using Nonradiative Dielectric (NRD) Waveguide-Part II: Comparison with Experiments
- A New Lightwave-Microwave Signal Conversion Method
- A new linear amplifier using low-frequency second-order intermodulation component feedforwarding
- A new linearization technique for MOSFET RF amplifier using multiple gated transistors
- A New Load-Pull Characterization Method for Microwave Power Transistors

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A New Lock Indicator Circuit for Microwave and Millimeter-Wave Phase Locked Loops (Short Papers)
- A New Look at Noise in Transferred Electron Oscillators (1977 [MWSYM])
- A New Look at Noise in Transferred Electron Oscillators (Dec. 1977 [T-MTT])
- A New Look at the 3D Condensed Node TLM Scattering
- A New Look at the Perfectly Matched Layer (PML) Concept for the Reflectionless Absorption of Electromagnetic Waves
- A New Low Loss SAW Filter Structure with Extremely Wide Bandwidth for Mobile Communication Systems
- A New Low-Noise FET Structure
- A new lumped-elements power-combining amplifier based on an extended resonance technique
- A new macromodeling approach for nonlinear microwave circuits based on recurrent neural networks (2000 Vol. II [MWSYM])
- A new macromodeling approach for nonlinear microwave circuits based on recurrent neural networks (Dec. 2000 [T-MTT])

IEEE © 2003

Paper Index

- A New Measurement Approach for Phase Noise at Close-In Offset Frequencies of Free-Running Oscillators (1996 Vol. III [MWSYM])
- A New Measurement Approach for Phase Noise at Close-In Offset Frequencies of Free-Running Oscillators (Dec. 1996, Part II [T-MTT])
- A New Measurement Method of the Noise Parameters of Two-Port Devices
- A New Measurement System for Oscillator Noise Characterization
- A new method for active device load equivalent circuit extraction for MMICs
- A New Method for Calculating TE and TM Cutoff Frequencies of Uniform Waveguides with Lunar or Eccentric Annular Cross Section
- A New Method for Calculating TE and TM Cutoff Frequencies of Uniform Waveguides with Lunar or Eccentric Annular Cross Section (Comments)
- A New Method for Calculating the Capacitance of a Circular Disk for Microwave Integrated Circuits (Short Papers)

IEEE © 2003

Paper Index

- A new method for characteristic impedance determination on lossy substrate
- A New Method for Designing Wide-Band Parametric Amplifiers
- A New Method for Determination of Single Sideband Noise Figure (1994 Vol. III [MWSYM])
- A New Method for Determination of Single-Sideband Noise Figure (Dec. 1994, Part II [T-MTT])
- A New Method for Determining the FET Small-Signal Equivalent Circuit
- A New Method for Discontinuity Analysis in Shielded Microstrip
- A New Method for Measurement of Complex Permittivity of Liquids Using the Phase Information of Standing Waves (Short Papers)
- A New Method for Measuring Dielectric Constant Using the Resonant Frequency of a Patch Antenna
- A New Method for Measuring Dielectric Properties of Material Media Using a Microstrip Cavity

IEEE © 2003

Paper Index

- A New Method for Measuring Properties of Dielectric Materials Using a Microstrip Cavity (Short Papers)
- A New Method for Measuring Properties of Unhomogeneous Materials Using a Two-Polarization Forward-Scattering Measurement
- A New Method for Measuring the Properties of Dielectric Substrate
- A New Method for Obtaining the Shape Sensitivities of Planar Microstrip Structures by a Full-Wave Analysis
- A New Method for On Wafer Noise Measurement
- A New Method for On-Wafer High Frequency Noise Measurement of FET's
- A New Method for Six-Port Swept Frequency Automatic Network Analysis (Short Papers)
- A New Method for Solving Discontinuity Problems in Microstrip Lines
- A New Method for Solving Potential Problems which Contain Straight or Curved Strip Conductors
- A New Method for the Analysis of the Dispersion Characteristics of Microstrip Lines

IEEE © 2003

Paper Index

- A New Method for the Calculation of the Equivalent Inductances of Coplanar Waveguide Discontinuities
- A New Method for the Characterization of Groove-Guide Leaky-Wave Antenna with an Asymmetrically Located Metal Strip
- A new method for the design of a quasi-optical mode converter with a special reflector
- A New Method for the Modal Analysis Having Symmetrically Distributed of Optical Fibers Multiple Cores
- A New Method for the Time-Domain Analysis of Lossy Coupled Transmission Lines
- A New Method for the Transient Simulation of Causal Linear Systems Described in the Frequency Domain
- A new method in characterizing the nonlinear current model of MESFETs using single-tone excitation
- A new method of accurately determining resonant frequencies of cylindrical and ring dielectric resonators
- A New Method of Analyzing and Modeling Integrated Optoelectronic Components

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A New Method of Broad-Band Equalization Applied to Microwave Amplifiers
- A New Method of Modeling Three-Dimensional MIC/MMIC Circuits: The Space-Spectral Domain Approach
- A New Method of Pulse Dispersion Analysis for Simple-Mode Optical Fibers
- A New Method of Reducing Phase Noise in GaAs FET Oscillators
- A New Method of Synthesizing Matched Broad-Band TEM-Mode Three-Ports
- A New Method of Third-Order Intermodulation Reduction in Nonlinear Microwave Systems
- A New Method to Calculate Parameters of Configurable Integrated Test Model
- A New Method to Determine the Source Resistance of FET from Measured S-Parameters Under Active-Bias Conditions
- A new methodology for the computation of the substrate parasitics of octagonal inductors (2002 [RFIC])
- A new methodology for the computation of the substrate parasitics of octagonal inductors (2002 Vol. I [MWSYM])

IEEE © 2003

- A new structure for a six-port reflectometer using a silicon MOSFET for power measurement
- A New Structure of Microwave Ultrawide-Band Differential Phase Shifter
- A new systematic and efficient method of analysis for conductor-backed coplanar-waveguide directional couplers
- A new 'T' circuit topology for the broadband modelling of symmetric inductors fabricated in CMOS technology (2001 [RFIC])
- A new T circuit topology for the broadband modelling of symmetric inductors fabricated in CMOS technology (2001 Vol. I [MWSYM])
- A New Technique for Calibrating Dual Six-Port Networks with Application to S Parameter Measurements
- A New Technique for Designing Highly Stable High Efficiency Varactor Multiplier Chains
- A New Technique for Dispersive-Reflection Spectroscopy in the Far Infrared
- A new technique for in-fixture calibration using standards of constant length

IEEE © 2003

Paper Index

- A New Technique for Magnetostatic Wave Delay Lines
- A New Technique for Measuring an Electromagnetic Field by a Coil Spring
- A New Technique for Measuring the Permittivity and Loss Tangent of Cylindrical Dielectric Rods
- A New Technique for Multimode Power Measurement (1962 [MWSYM])
- A New Technique for Multimode Power Measurement (Correction)
- A New Technique for Multimode Power Measurement (Nov. 1962 [T-MTT])
- A New Technique for Obtaining High Isolations in Microwave Mixers Based on the Concepts of Distributed Mixing and Transversal Filtering (1995 [MCS])
- A New Technique for Obtaining High Isolations in Microwave Mixers Based on the Concepts of Distributed Mixing and Transversal Filtering (1995 Vol. II [MWSYM])
- A New Technique for Synthesis of Broad-Band Parametric Amplifiers

IEEE © 2003

Paper Index

- A New Technique for the Analysis of the Dispersion Characteristics of Microstrip Lines
- A New Technique for the Characterization of Microwave Avalanche Diodes (Correspondence)
- A New Technique for the Measurement of Spinwave Linewidths from the Saturation of the Ferrimagnetic Resonance Line
- A New Technique for the Quasi-TEM Analysis of Conductor-Backed Coplanar Waveguide Structures
- A new technique for the stable incorporation of static field solutions in the FDTD method for the analysis of thin wires and narrow strips
- A New Technology for Si Microwave Power Transistor Manufacturing
- A New Temperature Stabilized Waveguide Circulator
- A new temporal basis function for the time-domain integral equation method
- A New Termination Condition for the Application of FDTD Techniques to Discontinuity Problems in Close Homogeneous Waveguide

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A new termination condition for the application of the TLM method to discontinuity problems in closed homogeneous waveguide
- A new theory of the characteristic impedance of general printed transmission lines applicable when power leakage exists
- A new thin film passive integration technology for miniaturisation of mobile phone front end modules: integration of a dual-band power amplifier, switch and diplexer for GSM
- A new time domain near field to far field transformation for FDTD in two dimensions
- A new time-domain measurement technique for microwave devices
- A New TLM Node for Berenger's Perfectly Matched Layer
- A new tool for slot-microstrip transition simulation
- A New Transmission Line Approach for Designing Spiral Microstrip Inductors for Microwave Integrated Circuits
- A New Transmission Line of Round Conductor and Parallel Plane with Symmetrically Placed Slit (Short Papers)
- A New Type Circulator for Millimeter Integrated Circuits

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A New Type of Active Antenna for Coupled Gunn Oscillator Driven Spatial Power Combining Arrays
- A New Type of Annular Ring Waveguide Cavity for Resonator and Filter Applications
- A New Type of Circular Polarizer Using Crossed Dipoles
- A New Type of Fast Switching Dual-Mode Ferrite Phase Shifter
- A New Type of Fast-Switching Dual-Mode Ferrite Phase Shifter
- A New Type of Isolator for Millimeter-Wave Integrated Circuits Using a Nonreciprocal Traveling-Wave Resonator
- A New Type of Isolator Using the Edge-Guided Mode (Letters)
- A New Type of Latching Switchable Ferrite Junction Circulator (Mar. 1968 [T-MTT])
- A New Type of Latching, Switchable, Ferrite-Junction Circulator (1967 [MWSYM])
- A New Type of Lightweight Low Frequency Electromagnetic Hyperthermia Applicator

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A New Type of Lightweight Low-Frequency Electromagnetic Hyperthermia Applicator
- A New Type of Low-Pass Filter that Attenuates by Dissipation (Correspondence)
- A New Type of Optoelectronic Millimeter-Wave Finline Switches (1992 Vol. I [MWSYM])
- A New Type of Optoelectronic Millimeter-Wave Finline Switches (Dec. 1992 [T-MTT])
- A New Type of Quasi-Optical Waveguide Component (Correspondence)
- A New Type of the Narrow-Pulse Distortion Caused by the Simultaneous-Propagation Effect of Both Bound and Leaky Modes on Printed-Circuit Transmission Lines
- A New Type of Waveguide Ring Cavity for Resonator and Filter Applications
- A New Type of Waveguide Structures with Photonic Band Structures
- A New Type of Waveguide-to-Stripline Transition (Correspondence)

IEEE © 2003

Paper Index

- A new ultra-wideband, ultra-short monocycle pulse generator with reduced ringing
- A New Understanding for Characterizing Acoustic Rectangular-Rod Waveguides and 3D Discontinuities
- A new unequal three-tone signal method for AM-AM and AM-PM distortion measurements suitable for characterization of satellite communication transmitters/transponders
- A new uniplanar broad-band singly balanced diode mixer
- A New Variable Microwave Attenuator (Correspondence)
- A New Variational Formulation, Applicable to Shielded and Open Multilayered Transmission Lines with Gyrotropic Non-Hermitian Lossy Media and Lossless Conductors
- A new via fence structure for crosstalk reduction in high density stripline packages
- A New Via Hole Structure for Power GaAs MESFET's and MMIC
- A new waveguide directional coupler/hybrid type-favorably suited for millimeter wave application
- A New Way to Optically Control a Millimeter-Wave Oscillator (Short Papers)

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A New W-Band Coplanar Waveguide Test Fixture
- A New Weather Radar for General Aviation
- A New Wide-Band and Reduced-Size Uniplanar Magic-T
- A New Wire Node for Modeling Thin Wires in Electromagnetic Field Problems Solved by Transmission Line Modeling (Short Papers)
- A new X-band 180/spl deg/ high performance phase shifter using (Ba, Sr)TiO/sub 3/ thin films
- A new, compact model for high-speed electro-optic modulators fully integrated within a microwave CAD environment
- A new, simple, test-set for on-wafer characterization of millimeter-wave electro-optic devices
- A New, Small-Sized Transmission Line Impedance Transformer, with Applications in High-Speed Optoelectronics
- A New, Specifically Monolithic Approach to Microwave Power Amplifiers
- A Nine HEMT Spatial Amplifier
- A Nine-MESFET Two-Dimensional Power-Combining Array Employing an Extended Resonance Technique

Click on title for a paper summary.

IEEE © 2003

Paper Index

- A Noncoherent W-Band Transceiver
- A Non-Contact Interconnection through an Electrically Thick Ground Plate Common to Two Microstrip Lines
- A Non-Contacting Probe for Measurements on High-Frequency Planar Circuits
- A Nondegenerate Millimeter Wave Parametric Amplifier with a Solid-State Pump Source
- A Nondegenerate Traveling-Wave Parametric Amplifier
- A Nondestructive Microwave Beam Lead Diode Measurement
- A Nonlinear Analysis of Schottky-Barrier Diode Upconverters
- A Nonlinear Analysis of the Effects of Transient Electromagnetic Fields on Excitable Membranes
- A nonlinear and dispersive APML ABC for the FD-TD methods
- A nonlinear ARMA model for simulating power amplifiers
- A nonlinear capacitance cancellation technique and its application to a CMOS class AB power amplifier
- A Non-Linear Design and Optimization Procedure for GaAs MESFET Oscillators

IEEE © 2003

Paper Index

- A Note on the Derivation of the Fields in a Radial Line (Correspondence)
- A Note on the Dielectric-Filled Waveguide as a Delay Line for Pulse Compression (Correspondence)
- A Note on the Difference Between Equiangular and Archimedes Spiral Antennas (Correspondence)
- A Note on the Double Fresnel Integral (Letters)
- A Note on the Finite-Element Solution of Exterior-Field Problems (Short Papers)
- A Note on the Mixed Potential Representation of Electric Fields in Layered Media (Short Papers)
- A Note on the Mode Characteristics of a Ferrite Slab (Short Papers)
- A Note on the Optimum Source Conductance of Crystal Mixers
- A Note on the Phase Velocity in Continuously Loaded Coaxial Cables (Correspondence)
- A Note on the Synthesis of Coupled-Line Directional Couplers and All-Pass Networks (Correspondence)
- A Note on Varactor Frequency Tripler (Correspondence)

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A Note on Wave Propagation in Periodic Media (Correspondence)
- A novel 12-24 GHz broadband HBT distributed active balanced mixer
- A novel 1-D periodic defected ground structure for planar circuits
- A Novel 2-4 GHz Multi-Passband Tunable and Gain Controlled Miniature Active Equalizer/Filter
- A novel 2-D multi-mode parallel time domain diakoptics and its application in filter analysis and design
- A novel 2N beams heterodyne optical beamforming architecture based on N/spl times/N optical Butler matrices
- A novel 3.5-GHz microwave counter using an opto-electronic harmonic heterodyne technique
- A novel 3-dB coupler for MMIC using air-gap stacked microstrip lines
- A Novel 3V, 7 mA PHEMT GaAs Active MMIC Mixer/LNA for Wireless Applications
- A novel 3-way hybrid combiner/divider for high power C-class microwave amplifiers

IEEE © 2003

Paper Index

- A Novel 4-18 GHz Monolithic Matrix Distributed Amplifier (1989 [MCS])
- A Novel 4-18 GHz Monolithic Matrix Distributed Amplifier (1989 Vol. I [MWSYM])
- A Novel 6 to 18 GHz 180-Degree Bit Phase Shifter Configuration Having Very Small Amplitude and Phase Errors
- A novel accurate design method for the hairpin type coupled line bandpass filter
- A Novel Active Antenna with Self-Mixing and Wideband Varactor-Tuning Capabilities for Communication and Vehicle Identification Applications
- A novel active inductor and its application to inductance-controlled oscillator
- A novel adaptive approach to modeling MEMS tunable capacitors using MRTD and FDTD techniques
- A novel adaptivity for EM time domain methods: scale adaptive time steps (SATS)
- A novel algorithm based on the domain-decomposition method for the full-wave analysis of 3-D electromagnetic problems

IEEE © 2003

Paper Index

- A Novel Algorithm for Bias-Dependent Cascode FET Modeling
- A novel amplifying antenna array using patch-antenna couplers-design and measurement
- A Novel Amplitude and Phase Linearizing Technique for Microwave Power Amplifiers
- A Novel Analytic Method for the Broadband Determination of Electromagnetic Impedances and Material Parameters
- A Novel Analytical Approach for the Nonlinear Microwave Circuits and Experimental Characterisation of the Nonlinear Behaviour of a New MESFET Device Structure
- A Novel Aperture Coupled Microstrip "Magic-T"
- A Novel Aperture Isolation Circuit for Use in Phased Array Systems
- A Novel Aperture-Isolation Circuit for Use in Phased Array Systems
- A novel approach for determining the GaAs MESFET small-signal equivalent-circuit elements
- A Novel Approach for Integrating High-Q Band-Pass Filters Into Microwave Integrated Circuit Assemblies

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A Novel Approach for the Large Signal Analysis and Optimisation of Microwave Frequency Doublers
- A novel approach to 3-D modeling of packaged RF power transistors
- A Novel Approach to Computer Automated Microwave Circuit Mask Design
- A novel approach to extracting small-signal model parameters of silicon MOSFET's
- A novel approach to modeling the nonlinear propagation characteristics of HTS planar transmission lines
- A Novel Approach to Statistical Modeling Using Cumulative Probability Distribution Fitting
- A novel approach to the analysis of microwave regenerative analog frequency dividers
- A Novel Approach to the Design of a High Power Automatic Impedance Measuring Scheme
- A Novel Approach to the Design of Multiple-Probe High-Power Microwave Automatic Impedance Measuring Schemes
- A Novel Approach to the Synthesis of Mixed Lumped and Distributed Lossy Networks

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A novel base feed design for high power, high frequency heterojunction bipolar transistors
- A Novel Baseband-1.5 GHz Monolithic HBT Variable Gain Amplifier with PIN Diode Gain Control (1995 [MCS])
- A Novel Baseband-1.5 GHz Monolithic HBT Variable Gain Amplifier with PIN Diode Gain Control (1995 Vol. I [MWSYM])
- A Novel Biased Anti-Parallel Schottky Diode Structure for Subharmonic Mixing
- A Novel Branch-Line Coupler Design for Millimeter-Wave Applications
- A Novel Broad-Band Balun (Correspondence)
- A novel broad-band Chebyshev-response rat-race ring coupler
- A Novel Broadband Double Balanced Mixer for the 18-40 GHz Range
- A novel broadband receiver architecture for wireless communication and radar systems
- A novel broadband T/R module for phased array applications in wireless communications

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A Novel CAD Tool and Concept Compatible with the Requirements of Multilayer GaAs MMIC Technology
- A Novel Calibration Verification Procedure for Millimeter-Wave Measurements
- A novel card-type transponder designed using retrodirective antenna array
- A Novel Cascode Feedback GaAs MMIC LNA with Transformer-Coupled Output Using Multiple Fabrication Processes
- A Novel Cavity Resonator Measurement Method for Leaky Waveguides
- A Novel Cavity Resonator Measurement Method for Leaky Waveguides (Mar. 1989 [T-MTT])
- A novel circularly polarized W-band direct detection receiver for six-port polarimetric radar systems
- A Novel Class of Generalized Chebyshev Low-Pass Prototype for Suspended Substrate Stripline Filters
- A Novel Clock Extraction Circuit Using a New NRZ-to-PRZ Converter and a Dielectric Resonator Filter for 10Gbit/s Optical Receiver

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A novel clock recovery circuit for fully monolithic integration
- A novel clock recovery circuit for fully monolithic integration (Dec. 1999 [T-MTT])
- A novel cold-FET method for determining extrinsic capacitances using a capacitive transmission line model
- A novel common-gate mixer for wireless applications
- A novel compact coplanar filter
- A novel compact millimeter wave diplexer
- A Novel Compact Monolithic Active Regulated Self-biased InP HEMT Amplifier
- A Novel Computerized Multiharmonic Active Load-Pull System for the Optimization of High Efficiency Operating Classes in Power Transistors
- A Novel Concept for mm-Wave MMIC Interconnects and Packaging
- A novel configuration for 1:N multiport power dividers using series/parallel transmission-line division and a polyimide/alumina-ceramic structure for HPA module implementation
- A Novel Continuously Variable Delay Line

Click on title for a paper summary.

IEEE © 2003

Paper Index

- A Novel Coplanar Slow-Wave Structure
- A novel coplanar transmission line to rectangular waveguide transition
- A Novel Coupling Method for Dual Mode Waveguide or Dielectric Resonator Filters
- A Novel Coupling Method for Dual-Mode Dielectric Resonators and Waveguide Filters
- A novel CPW DC-blocking topology with improved matching at W-band
- A novel CPW structure for high-speed interconnects
- A novel dc-offset cancellation technique for even-harmonic direct conversion receivers
- A Novel Deposit/Spin Waveguide Interconnection (DWSI) for Semiconductor Integrated Optics
- A novel design approach for microwave planar filters
- A novel design concept for a super compact power amplifier module (SCPAM) using a multilayer substrate
- A Novel Design for a MMIC 180 Degree Phase Shifter (1992 [MCS])

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A Novel Design for a MMIC 180 Degree Phase Shifter (1992 Vol. I [MWSYM])
- A Novel Design of an X-Band High-Power Ferrite Phase Shifter (Short Papers)
- A Novel Design to Reduce Losses at Dielectric Waveguide Discontinuities
- A novel dimension-reduction technique for the capacitance extraction of 3-D VLSI interconnects
- A novel directional coupler for PCB and LTCC applications
- A novel distortion analysis method for amplifiers considering frequency characteristics
- A novel drain current I-V model for MESFET
- A novel DSP architecture of adaptive feedforward linearizer for RF amplifiers
- A novel dual frequency rectenna for high efficiency wireless power transmission at 2.45 and 5.8 GHz
- A novel dual-mode bandpass filter with wide stopband using the properties of microstrip open-loop resonator
- A novel EER transmitter using two-point delta-sigma modulation scheme for WLAN and 3G applications

IEEE © 2003

Paper Index

- A novel electromagnetic bandgap metal plate for parallel plate mode suppression in shielded structures
- A Novel Energy Relation in Eigen Modes of Transmission Line and its Application to the Derivation of Variational Expression for Propagation Constant
- A novel envelope-termination load-pull method for ACPR optimization of RF/microwave power amplifiers
- A novel equivalent circuit and modeling method for defected ground structure and its application to optimization of a DGS lowpass filter
- A Novel Exponential Power Combiner/Divider
- A novel extraction method for a fully electro-thermal large-signal model of HBT
- A Novel Extraction Method for Accurate Determination of HBT Large-Signal Model Parameters
- A novel FET model including an illumination intensity parameter for simulation of optically controlled millimeter-wave oscillators

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A novel fiber-optic link with remote heterodyning for phase stabilized transmission of microwave and millimeter wave signals
- A Novel Frequency Divider Configuration for Micro- and Millimeter-Wave Signals
- A Novel GaAs FET Oscillator with Low Phase Noise
- A Novel General Approach for the Optimum Design of Microwave and Millimeter Wave Subharmonic Mixers
- A novel gold-coated multimode fiber sensor
- A Novel Harmonic Balancing Bridge for Characterizing Microwave Modules for Phased Array Antenna Service
- A Novel HBT Active Transformer Balanced Schottky Diode Mixer
- A Novel HBT Distributed Amplifier Design Topology Based on Attenuation Compensation Techniques (1994 [MCS])
- A Novel HBT Distributed Amplifier Design Topology Based on Attenuation Compensation Techniques (1994 Vol. I [MWSYM])

IEEE © 2003

Paper Index

- A Novel HBT Distributed Amplifier Design Topology Based on Attenuation Compensation Techniques (Dec. 1994, Part II [T-MTT])
- A Novel Heterojunction Bipolar Transistor Active Feedback Design
- A Novel Heterojunction Bipolar Transistor VCO Using an Active Tunable Inductance
- A novel high efficiency multioctave amplifier using cascaded reactively terminated single-stage distributed amplifiers for EW system applications
- A novel high frequency single-sideband transmitter using constant-envelope modulation
- A Novel High Power Harmonic Suppressor (1962 [MWSYM])
- A Novel Highly Accurate Synthetic Technique for Determination of the Dispersive Characteristics in Periodic Slow Wave Circuits
- A Novel High-Power Harmonic Suppressor (Nov. 1962 [T-MTT])
- A novel high-Q and wide-frequency-range inductor using Si 3-D MMIC technology

Click on title for a paper summary.

IEEE © 2003

Paper Index

- A novel high-Q image guide resonator using band-gap structures
- A novel high-Q inductor based on Si 3D MMIC technology and its application
- A novel high-Q inductor based on Si 3D MMIC technology and its application (1999 Vol. II [MWSYM])
- A novel high-Q optical microwave processor using hybrid delay-line filters
- A novel HMSM photodetector with resonant cavity for short haul communications
- A novel HTS microstrip quasi-elliptic function bandpass filter using pseudo-lumped element resonator
- A novel implementation of Berenger's PML for FDTD applications
- A Novel Injection-Locked Oscillator MMIC with Combined Ultrawide-Band Active Combiner/Divider and Amplifiers
- A novel integrated microwave bias network for low cost multistage amplifiers (1997 [RFIC])
- A novel integrated microwave bias network for low cost multistage amplifiers (1997 Vol. I [MWSYM])

IEEE © 2003

Paper Index

- A novel interpretation of transistor S-parameters by poles and zeros for RF IC circuit design
- A novel Ka-band 1 to 8 power divider/combiner
- A Novel K-Band Balanced FET Up-Converter
- A novel K-band frequency-controlled beam-steering quasi-Yagi array with mixing frequency compensation
- A novel K-band tunable microstrip bandpass filter using a thin film HTS/ferroelectric/dielectric multilayer configuration
- A novel leaky NRD guide with a double-layer dielectric slab
- A Novel Leaky-Mode Cylindrical Dielectric Resonator Used as Feeds of Omnidirectional Antenna for Wireless Communications
- A Novel Loss Compensation Technique for High-Q Broad-Band Active Inductors
- A Novel Lossy Microstrip Dispersion Model
- A novel low impedance line for MMIC using air-gap stacked structure
- A Novel Low-Loss Dielectric Waveguide for Millimeter and Submillimeter Wavelengths

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A novel low-loss low-crosstalk interconnect for broad-band mixed-signal silicon MMICs
- A novel low-loss slow-wave CPW periodic structure for filter applications
- A novel low-loss slow-wave microstrip structure
- A Novel Low-Noise Downconverter System Using a Microstrip Coupled Transmission-Mode Dielectric Resonator (Short Papers)
- A Novel Matched Diplexer Configuration in E-Plane Technology
- A Novel Measurement Technique for Amplifier-Type Active Antennas
- A novel method for closed-loop error correction microwave and millimeter wave QPSK modulator
- A Novel Method for Modeling Coupling Between Several Microstrip Lines in MIC's and MMIC's
- A Novel Method for Modeling Coupling Between Several Microstrip Lines in MIC's and MMIC's (Comments)
- A novel method for nulling the LO leakage in resistive FET mixers

Click on title for a paper summary.

IEEE © 2003

Paper Index

- A Novel Method for the Analysis of Microwave Two-Port Active Mixers (Short Papers)
- A novel method of pulse power amplification using a CW injection locked oscillator pair
- A Novel Microstrip Antenna Using Alumina-Ceramic/Polyimide Multilayer Dielectric Substrate
- A novel microstrip mode to waveguide mode transformer and its applications
- A novel microstrip ring hybrid incorporating a PBG cell
- A novel microwave absorber with surface-printed conductive line patterns
- A Novel Microwave Limiter-Discriminator: Design and Analysis
- A novel microwave oscillator using double-sided MIC
- A novel millimeter-wave beam-steering technique using a dielectric-image-line-fed grating film
- A Novel Millimeter-Wave HEMT Noise Modeling Procedure
- A Novel Millimeter-Wave IC on Si Substrate Using Flip-Chip Bonding Technology

IEEE © 2003

Paper Index

- A Novel MMIC Active Filter with Lumped and Transversal Elements
- A Novel MMIC Active Filter with Lumped and Transversal Elements (Comments and Reply)
- A Novel MMIC Active Filter with Lumped and Transversal Elements (Dec. 1989 [T-MTT])
- A Novel MMIC Approach to Sampling Phase/Frequency Detection for Microwave Quartz-Lock Oscillators
- A Novel MMIC Biphase Modulator with Variable Gain Using Enhancement-Mode FETs Suitable for 3 V Wireless Applications
- A Novel MMIC Coupler - Measured and Simulated Data
- A Novel MMIC Filter - Measured and Simulated Data
- A Novel MMIC PHEMT Low Noise Amplifier for GPS Applications
- A Novel MMIC Power Amplifier for Pocket-Size Cellular Telephones
- A Novel MMIC Source Impedance Tuner for On-Wafer Microwave Noise Parameter Measurements
- A Novel MMIC X-Band Phase Shifter

IEEE © 2003

Paper Index

- A Novel MMIC, X-Band, Phase Shifter
- A Novel Monolithic Balanced Switching Low Noise Amplifier (1994 [MCS])
- A Novel Monolithic Balanced Switching Low Noise Amplifier (1994 Vol. II [MWSYM])
- A Novel Monolithic HBT-p-i-n-HEMT Integrated Circuit with HBT Active Feedback and p-i-n Diode Variable Gain Control
- A Novel Monolithic HEMT Harmonic Mixer at Q-Band
- A Novel Monolithic HEMT LNA Integrating HBT-Tunable Active-Feedback Linearization by Selective MBE
- A novel monolithic HEMT-HBT Ka-band VCO-mixer design
- A Novel Monolithic Linearized HEMT LNA Using HBT Tuneable Active Feedback
- A Novel Monolithic LNA Integrating a Common-Source HEMT with an HBT Darlington Amplifier
- A Novel MSW Programmable Barker Coder/Decoder
- A novel multibeam grating antenna with applications to low-cost millimeter-wave beam-steering

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A novel nanostructured microstrip device for tunable stopband filtering applications at microwaves
- A novel nonlinear statistical modeling technique for microwave devices
- A novel nonreciprocal ferrite image guide
- A novel on-wafer resistive noise source
- A novel oscillating rectenna for wireless microwave power transmission
- A Novel Parallel Running System of Four Oscillators Coupled through an Eight-Port Hybrid
- A novel PBG coplanar waveguide
- A novel periodic electromagnetic bandgap structure for finite-width conductor-backed coplanar waveguides
- A Novel Phase Noise Reduction Technique for MMIC Frequency Synthesizers that Uses Newly Developed Pulse Generator LSI
- A novel phase noise reduction technique in oscillators using defected ground structure
- A Novel Phase Shifter Using a GaAs MESFET in Passive Configuration

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A novel photonic bandgap structure for low-pass filter of wide stopband
- A novel planar array smart antenna system with hybrid analog-digital beamforming
- A Novel Planar Diode Mixer for Submillimeter-Wave Applications
- A Novel Planar Double-Balanced 6-18 GHz MMIC Mixer (1994 [MCS])
- A Novel Planar Double-Balanced 6-18 GHz MMIC Mixer (1994 Vol. I [MWSYM])
- A novel planar magic-T using microstrip-to-slotline transition
- A novel planar silicon waveguide filter at 45 GHz based on a periodic structure
- A Novel Polarization-Independent Beam Splitter
- A Novel Power Combiner for MIC and MMIC Amplifiers
- A Novel Quasi-Optical Frequency Multiplier Design for Millimeter and Submillimeter Wavelengths
- A Novel Quasi-Optical Frequency Multiplier Design for Millimeter and Submillimeter Wavelengths (Corrections)

IEEE © 2003

Paper Index

- A novel quasi-optical resonator for the surface near-millimeter waves
- A Novel Quasi-TEM Analysis of Valley Microstrip Lines with Slit for Use in Multilayered MMICs
- A Novel Rectangular Waveguide with Double T-Septums (Short Papers)
- A Novel Resonant-Type GaAs SPDT Switch IC with Low Distortion Characteristics for 1.9 GHz Personal Handy-Phone System
- A novel RF to baseband monolithic microwave receiver with on-chip tuning
- A novel RFIC for UHF oscillators
- A novel scheme for reception using an active microstrip antenna
- A Novel Series Diode Linearizer for Mobile Radio Power Amplifiers
- A novel set-up for co-channel distortion ratio evaluation
- A novel signal processing approach for microwave Doppler speed sensing

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A novel simplified four-port scattering parameter model for design of four-pair twisted-pair cabling systems for local area networks
- A Novel Single Device Balanced Resistive HEMT Mixer
- A Novel Solid-State Modulator for Millimeter Waves
- A novel split-resonator high power HTS planar filter
- A Novel Split-Waveguide Mount Design for Millimeter- and Submillimeter-Wave Frequency Multipliers and Harmonic Mixers
- A Novel Strip-Line Circulator (Correspondence)
- A novel structure of tightly coupled lines for MMIC/MHMIC couplers and phase shifters
- A Novel Sub-Harmonic Pumping Direct Conversion Receiver with High Instantaneous Dynamic Range
- A novel surface-mountable millimeter-wave bandpass filter
- A Novel Synthesis Technique for Conducting Scatterers Using TLM Time Reversal
- A novel tap input coupling structure for a narrow bandpass filter using TM/sub 010/ mode of a microstrip circular-disk resonator

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A novel technique for analysis of electromagnetic scattering from microstrip antennas of arbitrary shape
- A Novel Technique for Evaluation and Integration of Connectorless (Drop-In) Microwave Components
- A Novel Technique for HEMT Tripler Design
- A Novel Technique for Increasing the Scanning Range of Infinite Arrays of Microstrip Patches
- A Novel Technique for Making Precision Waveguide Twists (Correspondence)
- A Novel Technique for Measuring Small Signal S-Parameters of an RF/Microwave, Transistor, Power Amplifying Stage for Use in Power Amplifier Stability Analysis
- A Novel Technique for the Analysis of Dielectric Height Variations in Microstrip Circuits
- A Novel Technique for Tuning Dielectric Resonators
- A Novel Technique to Realize SMSK Conversion and Matched Filters at Microwave Frequencies
- A novel technology for linearizing traveling wave tube amplifiers

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A novel TEM waveguide using uniplanar compact photonic-bandgap (UC-PBG) structure
- A Novel Three Phase-States Phase Shifter
- A novel time domain characterization technique of intermodulation in microwave transistors: application to the visualization of the distortion of high efficiency power amplifiers
- A Novel Traveling-Wave Parametric Amplifier
- A Novel Treatment of Open Dielectric Waveguides
- A novel triple-push oscillator approach
- A novel tunable microwave optical notch filter
- A Novel Type of Constant Impedance Traveling Wave Phase Shifter for InP-Based MMICs
- A Novel Type of Constant Impedance Traveling Wave Phase Shifter for InP-Based MMICs (1996 [MCS])
- A Novel Type of Waveguide Polarizer with Large Cross-Polar Bandwidth (Short Papers)
- A novel ultrawideband microwave differential phase shifter

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A novel uniplanar balanced subharmonically pumped mixer for low-cost broadband millimeter-wave transceiver design
- A Novel Uniplanar Bi-Phase(0°-180°) Modulator/Mixer
- A novel uniplanar compact PBG structure for filter and mixer applications
- A Novel Varactor Tunable Coplanar Waveguide-Slotline Gunn VCO
- A novel vector network analyzer (1998 Vol. II [MWSYM])
- A novel vector network analyzer (Dec. 1998, Part II [T-MTT])
- A Novel Waveguide Y-Junction Circulator with a Ferrite Sphere for Millimeter Waves (Short Papers)
- A novel waveguide-to-microstrip transition for low-cost millimeter-wave and MMIC applications
- A novel waveguide-to-microstrip transition for millimeter-wave module applications
- A Novel Wavelet Based Time Domain Simulation Approach
- A novel W-band spectrometer for dielectric measurements (2000 Vol. III [MWSYM])

Paper Index

- A Numerical TRL De-Embedding Technique for the Extraction of S-Parameters in a 2/sup 1/2/D Planar Electromagnetic Simulator
- A Numerically Efficient Finite-Element Formulation for the General Waveguide Problem without Spurious Modes
- A numerically efficient technique for the analysis of slots in multilayer media
- A Numerically Efficient Technique for the Method of Moments Solution for Planar Periodic Structures in Layered Media
- A Numerically Optimized Contiguous Diplexer
- A One Watt CW Avalanche Diode Source or Power Amplifier
- A One Watt CW, 20% Efficient X-Band Avalanche Diode Amplifier
- A One-Chip Integrated Optical/RF Transducer Using a HEMT Optomicrowave Mixer and a Slot Antenna
- A One-GHz Ferroelectric Limiter
- A One-Watt CW High-Efficiency X-Band Avalanche-Diode Amplifier (Correspondence)
- A Packaged 20-GHz 1-W GaAs MESFET with a Novel Via-Hole Plated Heat Sink Structure

IEEE © 2003

Paper Index

- A Pair of Hybrid Symmetrical Condensed TLM Nodes
- A parallel connected Marchand balun using spiral shaped equal length coupled lines
- A Parallel Coupled Microstrip Filter Design Procedure
- A parallel FDTD tool for the solution of large dosimetric problems: an application to the interaction between humans and radiobase antennas
- A Parallel-Plate Waveguide Approach to Microminiaturized, Planar Transmission Lines for Integrated Circuits
- A Parallel-Strip Point-Contact Diode Mount for Video Detection of Millimeter Waves (Correspondence)
- A Parameter Extraction Technique for Heterojunction Bipolar Transistors
- A parametric model of MEMS capacitive switch operating at microwave frequencies
- A Parametric Study of the Attenuation Constant of Lossy Microstrip Lines (Short Papers)
- A Partial Variational Approach for Arbitrary Discontinuities in Planar Dielectric Waveguides

IEEE © 2003

Paper Index

- A Periodic Branching Filter for Millimeter-Wave Integrated Circuits
- A Periodic Planar Gunn Diode Power Combining Oscillator (Short Papers)
- A Periodic Second Harmonic Spatial Power Combining Oscillator
- A Periodic Second Harmonic Spatial Power Combining Oscillator (May 1992 [T-MTT])
- A Periodic Spatial Power Combining MESFET Oscillator
- A Periodic Spatial Power Combining MESFET Oscillator (Short Papers)
- A Periodic Structure of Cylindrical Posts in a Rectangular Waveguide
- A perpendicularly-fed patch array for quasi-optical power combining
- A Perturbation Method for the Analysis of Wave Propagation in Inhomogeneous Dielectric Waveguides with Perturbed Media
- A Perturbation Procedure for Nearly Rectangular, Homogeneously Filled, Cylindrical Waveguides

IEEE © 2003

Paper Index

- A Perturbation Theory for Dielectric and Optical Waveguides with Application to the Launching of Surface Modes
- A Perturbation Theory for Microstrip Propagation
- A Phase Alignment Network for Space Diversity Combining
- A Phase Compensated, Motion Insensitive Coaxial Connector
- A Phase Controlled Self-Oscillating Mixer
- A Phase Modulator with Gain for Microwave Millimeter-Wave Systems
- A Phase Noise Reduction Technique for MMIC Frequency Synthesizers that Uses a New Pulse Generator LSI
- A phase noise reduction technique in microwave oscillator using high-Q active filter
- A phased-array antenna using a multi-line phase shifter controlled by a piezoelectric transducer
- A phase-interpolation direct digital synthesizer with an adaptive integrator
- A Phase-Locking Method for Beam Steering in Active Array Antennas
- A PHEMT Based Monolithic Plane Wave Amplifier for 42 GHz

IEEE © 2003

Paper Index

- A phenomenologically based transient SPICE model for digitally modulated RF performance characteristics of GaAs MESFETs
- A photoconductive correlation receiver for time-hopped wireless spread-spectrum radio
- A photomixer local oscillator for a 630-GHz heterodyne receiver
- A photonic bandgap (PBG) structure for guiding and suppressing surface waves in millimeter-wave antennas
- A photonic crystal joint (PCJ) for metal waveguides
- A physical frequency-dependent compact model for RF integrated inductors
- A physical large signal Si MOSFET model for RF circuit design
- A physical, yet simple, small-signal equivalent circuit for the heterojunction bipolar transistor
- A physically based analytic model of FET Class-E power amplifiers-designing for maximum PAE

IEEE © 2003

Paper Index

- A Physically Based Small-Signal Circuit Model for Heterostructure Acoustic Charge Transport Devices (Dec. 1993 [T-MTT])
- A Physically Based with Self Heating Large Signal HBT Model and Transit Time Effects
- A Physically-Based Small-Signal Circuit Model for Heterostructure Acoustic Charge Transport Devices (1993 Vol. III [MWSYM])
- A physically-based transient SPICE model for GaAs MESFET's
- A physics-based electro-thermal model for microwave and millimetre wave HEMTs
- A physics-based GaAs PHEMT noise model for low drain bias operation using characteristic potential method
- A Physics-Based MESFET Empirical Model
- A Physics-Based Temperature-Dependent SPICE Model for the Simulation of High Temperature Microwave Performance of HBT's and Experimental Results
- A PIN Diode for mm-Wave Digital Modulation

IEEE © 2003

Paper Index

- A PIN Diode Switch that Operates at 100 Watts CW at C-Band
- A Planar 4.0 GHz Reactively Steered Adaptive Array
- A planar 4.5-GHz DC-DC power converter
- A Planar 94-GHz Transceiver with Switchable Polarization
- A planar active lens oscillator on a dielectric slab
- A Planar Broadband Balanced Doubler Using a Novel Balun Design
- A Planar Broadband MIC Balanced Varactor Doubler Using a Novel Grounded-CPW to Slotline Transition
- A planar circuit design for high order sub-harmonic mixers
- A Planar Electro-Optic Beam Splitter with a Sawtooth Electrode
- A Planar Electrooptic Beam Splitter with a Zig-Zag Electrode
- A Planar Integral Equation Method for the Analysis of Dielectric Ridge Structures Using Generalized Boundary Conditions
- A Planar Integrated Antenna and Receiver Front End

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A Planar Log-Periodic Mixtenna for Millimeter and Submillimeter Wavelengths
- A planar orthomode transducer
- A planar parabola-feed frequency multiplier
- A Planar Quasi-Optical Mixer Using a Folded-Slot Antenna (Short Papers)
- A Planar Quasi-Optical SIS Receiver
- A Planar Quasi-Optical SIS Receiver Suitable for Array Applications
- A Planar Quasi-Optical Subharmonically Pumped Mixer Characterized by Isotropic Conversion Loss
- A Planar Quasi-Optical Subharmonically Pumped Mixer Characterized by Isotropic Conversion Loss (Corrections)
- A planar resonant sensor for the complex permittivity characterization of materials
- A planar varactor array multiplier chain to 300 GHz
- A Planar Wideband 80-200 GHz Subharmonic Receiver
- A Planar Wideband Millimeter-Wave Subharmonic Receiver
- A planar X-band electromagnetic band-gap (EBG) 3-pole filter

IEEE © 2003

Paper Index

- A Scattering-Type Transverse Resonance Formulation and its Application to Open, Conductor-Backed and Shielded Slotline (M)MIC Structures
- A Scattering-Type Transverse Resonance Technique for the Calculation of (M)MIC Transmission Line Characteristics (Dec. 1991 [T-MTT])
- A Scheme to Lower the Resonant Frequency of the Microstrip Patch Antenna
- A Second Generation Dual Six-Port Network Analyser
- A second harmonic class-F power amplifier in standard CMOS technology
- A Selective Survey of Microwaves in Scandinavia and Western Europe (Abstract)
- A self calibrating quadrature generator with wide frequency range
- A Self-Balancing Microwave Radiometer for Non-Invasively Measuring the Temperature of Subcutaneous Tissues During Localized Hyperthermia Treatments of Cancer
- A Self-Calibration Concept for Establishing the Complex Measurement Ability of Homodyne Network Analyzers

IEEE © 2003

Paper Index

- A self-consistent method for complete small-signal parameter extraction of InP-based heterojunction bipolar transistors (HBT's)
- A Self-Diplexing Quasi-Optical Magic Slot Balanced Mixer
- A Self-Mixing Active Antenna for Communication and Vehicle Identification Applications
- A semianalytical parameter extraction of a SPICE BSIM3v3 for RF MOSFET's using S-parameters
- A semianalytical parameter-extraction procedure for HBT equivalent circuit
- A Semiautomated Six Port for Measuring Millimeter-Wave Power and Complex Reflection Coefficient
- A Semi-Automated Sixport for Measuring Millimeter Wave Power and Complex Reflection Coefficient (1977 [MWSYM])
- A Semi-Automatic 3-Port Network Analyzer
- A Semi-Automatic Technique for Tuning a Reflectometer (Correspondence)
- A Semidistributed HEMT Model for Accurate Fitting and Extrapolation of S-Parameters and Noise Parameters (Short Papers)

Paper Index

- A Semi-Infinite Array of Parallel Metallic Plates of Finite Thickness for Microwave Systems
- A semi-lumped balun fabricated by low temperature co-fired ceramic
- A Semi-Monolithic Wideband VCO with Output Power Control Capability Using an Active Power Splitter
- A Semi-Transparent Mirror-Type Directional Coupler for Optical Fiber Applications (Letters)
- A Sensitive Method for Measuring Complex Permittivity with a Microwave Resonator
- A Sensitivity Figure for Yield Improvement
- A sensor system based on SiGe MMICs for 24 GHz automotive applications
- A Series of CAD Techniques for Designing Microwave Feedback Amplifiers and Simplifying the Design of Reactively Matched Single-Ended Amplifiers
- A series of InGaP/InGaAs HBT oscillators up to D-band
- A Series Transformation for Diaphragm-Type Discontinuities in Waveguide (Short Papers)

IEEE © 2003

Click on title for a paper summary.

Paper Index

- A Series-Connected Traveling-Wave Parametric Amplifier (Correspondence)
- A set of integrated circuits for 60 GHz radio front-end
- A seven-element S-band coupled-oscillator controlled agile-beam phased array
- A Short History of Microwave Acoustics
- A Short History of Microwave Acoustics (Corrections)
- A Short Rugged Ferrite Half-Wave Plate for a Single-Sideband Modulator (Correspondence)
- A short-open deembedding technique for method-of-moments-based electromagnetic analyses
- A Short-Slot Waveguide Latching Ferrite Switch (1970 [MWSYM])
- A Short-Slot Waveguide Latching Ferrite Switch (Dec. 1970 [T-MTT])
- A Shunt Technique for Microwave Measurements
- A Si BJT IF downconverter/AGC IC for DAB
- A Si BJT IF downconverter/AGC IC for DAB (1998 Vol. I [MWSYM])

IEEE © 2003

Paper Index

- A Si BJT RF dual band receiver IC for DAB (1998 [RFIC])
- A Si BJT RF dual band receiver IC for DAB (1998 Vol. I [MWSYM])
- A Si micromachined conformal package for a K-band low noise HEMT amplifier
- A Si Wide-Band MMIC Amplifier Family for L-S Band Consumer Product Applications
- A Si/SiGe HBT dielectric resonator push-push oscillator at 58 GHz
- A Si-Bipolar AGC Amplifier IC with High Gain and Wide Dynamic Range for 10 Gb/s Optical-Fiber Receivers
- A Side-Arm-Switched Directional Coupler as a Single-Step Attenuator of High Long-Term Stability
- A SiGe HBT power amplifier with 40% PAE for PCS CDMA applications
- A SiGe MMIC 6-bit PIN diode phase shifter
- A SiGe MMIC variable gain cascode amplifier
- A SiGe transceiver chipset for 100 Mbps/1 Gbps digital communication over cable system

IEEE © 2003

Paper Index

- A Signal Averaging Technique for a Wide Bandwidth Absorbing Boundary Condition in the TLM Method
- A Signal-to-Noise Enhancer Using Two MSSW Filters and its Application to Noise Reduction in DBS Reception
- A Silicon BiCMOS Transceiver Front-End MMIC Covering 900 and 1900 MHz Applications
- A silicon MMIC active balun/buffer amplifier with high linearity and low residual phase noise
- A Silicon Monolithic Technology for 1-2 GHz Analog Signal Processing
- A silicon MOS MMIC upconverter for CATV applications
- A Silicon MOS Process for Integrated RF Power Amplifiers
- A Silicon MOS Process for Integrated RF Power Amplifiers (1996 [MCS])
- A silicon-on-insulator 28-V RF power LDMOSFET for 1-GHz integrated power amplifier applications
- A SIMMWIC 76 GHz Front-End with High Polarization Purity
- A SIMMWIC 76 GHz Front-End with High Polarization Purity (1996 [MCS])

IEEE © 2003

Paper Index

- A Simple Analysis of a Symmetric Waveguide Five-Port Junction
- A Simple Analysis of Single- and Double-V-Groove Guides (Short Papers)
- A Simple Analysis of Thick Microstrip on Anisotropic Substrates (Technical Notes)
- A simple and accurate MESFET channel-current model including bias-dependent dispersion and thermal phenomena
- A simple and analytical parameter-extraction method of a microwave MOSFET
- A Simple and Rigorous Analysis of the Transmission Properties of a Sector Horn Junction in a Rectangular Waveguide
- A Simple and Rugged Wide-Band Gas Discharge Detector for Millimeter Waves
- A simple and systematic method for the design of tapered nonlinear transmission lines
- A Simple Approach to Mode Analysis for Parabolic Waveguides
- A Simple Artificial Anisotropic Dielectric Medium

IEEE © 2003

Paper Index

- A Simple Artificial Anisotropic Dielectric Medium (Correction)
- A simple bias dependant LF FET noise model for CAD
- A Simple Broad-Band Device De-Embedding Method Using an Automatic Network Analyzer with Time-Domain Option
- A Simple Circuit Model for Resonant Mode Coupling in Packaged MMICs
- A Simple Convolution Procedure for Calculating Currents Induced in the Human Body for Exposure to Electromagnetic Pulses
- A Simple Coupled-Mode Analysis Method for Multiple-Core Optical Fiber and Coupled Dielectric Waveguide Structures (1988 Vol. II [MWSYM])
- A Simple Coupled-Mode Analysis Method for Multiple-Core Optical Fiber and Coupled Dielectric Waveguide Structures (Dec. 1988 [T-MTT])
- A Simple Design Procedure for Small Percentage Bandwidth Round-Rod Interdigital Filters (Correspondence)
- A Simple Diode Parametric Amplifier Design for Use at S, C, and X Band

IEEE © 2003

Paper Index

- A Simple Electric Near Field Probe for Microwave Circuit Diagnostics
- A Simple Empirical Noise Model of Submicron-Gate GaAs MESFET for CAD Applications
- A simple equation for analysis of nonuniform transmission lines
- A simple error correction method for two-port transmission parameter measurement
- A simple evaluation of losses in thin microstrips
- A Simple Experimental Technique for Determining Coupling Between Dielectric Resonators
- A Simple Formula for Calculating Approximate Values of the First Zeros of a Combination Bessel Function Equation (Correspondence)
- A Simple Formula for the Capacitance of a Disc on Dielectric on a Plane (Short Papers)
- A Simple Formula for the Concentration of Charge on a Three-Dimensional Corner of a Conductor (Short Papers)
- A Simple Formulation for Complex Modes of Image Lines

IEEE © 2003

Paper Index

- A simple procedure for impedance matching and tuning of microwave couplers for an electron linear accelerator
- A Simple Quasi-Optical Mixer for 100-120 GHz
- A Simple Quasi-Static Determination of Basic Parameters of Multilayer Microstrip and Coplanar Waveguide
- A simple recursive formula for calculating the S-parameters of finite periodic structures
- A Simple Relation Between Cavity Q and Maximum Rejection for Narrow-Band Microwave Band-Stop Filters (Correspondence)
- A Simple Technique for Calculating the Propagation Dispersion of Multiconductor Transmission Lines in Multilayer Dielectric Media
- A Simple Technique for Investigating Defects in Coaxial Connectors (Short Papers)
- A Simple Technique for Minimization of ABC-Induced Error in the FDTD Analysis of Microstrip Discontinuities
- A Simple Technique for Real-Time Measurement of Complex Reflection Coefficient (Correspondence)

IEEE © 2003

Paper Index

- A Simple Technique for the Accurate Determination of the Microwave Dielectric Constant for Microwave Integrated Circuit Substrates (Correspondence)
- A Simple Technique for the Design of MMIC 90° Phase-Difference Networks
- A Simple Technique for the Generation of Short Rectangular RF Pulses from a CW Source (Correspondence)
- A Simple Transmission System for 2.45 GHz Multiple Wireless Gates
- A Simple Tuning Circuit for Waveguide and Transmission Line Systems (Correspondence)
- A Simple Way to Model Curved Metal Boundaries in FDTD Algorithm Avoiding Staircase Approximation
- A Simple Way to Model Curved Metal Boundaries in FDTD Algorithm Avoiding Staircase Approximation (Comment)
- A Simplified "Real Frequency" Technique Appliable to Broadband Multistage Microwave Amplifiers
- A Simplified "Real Frequency" Technique Applied to Broad-Band Multistage Microwave Amplifiers

IEEE © 2003

Paper Index

- A Simplified 2D Graded Mesh FD-TD Algorithm for Calculating the Characteristic Impedance of Shielded or Open Planar Waveguides with Finite Metallization Thickness
- A Simplified Algorithm for Leaky Network Analyzer Calibration
- A simplified analysis for high power microwave bandpass filter structures
- A simplified broad-band large-signal nonquasi-static table-based FET model
- A Simplified Calibration of Two-Port Transmission Line Devices
- A Simplified Calibration Procedure for Cryogenic Microwave Measurements
- A Simplified Circuit Model for Microstrip (Short Papers)
- A simplified derivation of the capacitance of a two-wire transmission line
- A Simplified Field Analysis of a Distributed IMPATT Diode Using Multiple Uniform Layer Approximation (Short Papers)
- A simplified formulation to analyze inhomogeneous waveguides with lossy chiral media using the finite-element method

IEEE © 2003

Paper Index

- A simplified large-signal HBT model for RF circuit design
- A Simplified Large-Signal Simulation of a Lumped Element TEO Based on a Phase Plane Technique (Short Papers)
- A simplified method to predict the conversion loss of FET resistive mixers
- A Simplified Microwave Model of the GaAs Dual-Gate MESFET
- A simplified MPIE analysis for planar circuits with N-fold rotational symmetry and lumped elements
- A simplified normalization FDTD formula and its application to VIP combline bandpass filters
- A Simplified PML for Use with the FDTD Method
- A simplified procedure to calculate the power gain definitions of FETs
- A Single Barrier Varactor Quintupler at 170 GHz (Short Papers)
- A Single Chip 2-20 GHz T/R Module
- A Single Chip 2-20 GHz T/R Module (1990 Vol. I [MWSYM])

IEEE © 2003

Paper Index

- A Single Chip C-Band GaAs Monolithic Five Bit Phase Shifter with on Chip Digital Decoder
- A single chip FSK/ASK 900 MHz transceiver in a standard 0.25 um CMOS technology
- A Single Chip Monolithic Integrated S-Band Frequency Discriminator
- A Single Chip X-Band Phase Shifter with 6 Bit Uncorrected Phase Resolution and More Than 8 Bit Corrected Phase Resolution (1992 [MCS])
- A Single Chip X-Band Phase Shifter with 6 Bit Uncorrected Phase Resolution and More Than 8 Bit Corrected Phase Resolution (1992 Vol. I [MWSYM])
- A Single MESFET Down-Converter for TVRO Application
- A single six-port based automated network analyzer
- A Single Stability Parameter for Linear 2-Port Circuits
- A single supply high performance PA MMIC for GSM handsets using quasi-enhancement mode PHEMT
- A single supply very high power and efficiency integrated PHEMT amplifier for GSM applications
- A single-bias diode-regulated 60 GHz monolithic LNA

IEEE © 2003

Paper Index

- A single-chip 1.9 GHz RF transceiver MMIC using GaAs MESFET
- A single-chip 24 GHz receiver front-end using a commercially available SiGe HBT foundry process
- A single-chip 94-GHz frequency source using InP-based HEMT-HBT integration technology (1998 [RFIC])
- A single-chip 94-GHz frequency source using InP-based HEMT-HBT integration technology (1998 Vol. I [MWSYM])
- A single-chip coplanar 0.8-/spl mu/m GaAs MESFET K/Ka-band DRO
- A single-chip GaAs MMIC image-rejection front-end for digital European cordless telecommunications
- A Single-Chip MMIC Transceiver for 2.4GHz Spread Spectrum Communication
- A single-chip PHS front-end MMIC with a true single +3 V voltage supply
- A single-chip Si-bipolar 1.6 GHz VCO with integrated bias network
- A single-chip Si-bipolar 1.6-GHz VCO with integrated-bias network

Click on title for a paper summary.

Paper Index

- Analysis and Design of a Millimeter-Wave Bandpass Filter with a Stopband in the Specified Higher Frequencies
- Analysis and Design of a Novel Microstrip-to-Waveguide Transition/Combiner
- Analysis and Design of a Novel Noncontacting Waveguide Backshort
- Analysis and design of a planar antenna for a millimetre-wave emitter using TLM
- Analysis and Design of a Single-Resonator GaAs FET Oscillator with Noise Degeneration
- Analysis and design of a vertical CPW transition between microstrip planes
- Analysis and design of active antenna arrays
- Analysis and design of an inhomogeneous transformer with hard wall waveguide sections
- Analysis and Design of an X-Band Actively Compensated IMPATT Diode Amplifier
- Analysis and Design of Asymmetric and Multiple Coupled Finline Couplers and Filters

IEEE © 2003

Click on title for a paper summary.

Paper Index

- Analysis and Design of Branch-Line Hybrids with Coupled Lines
- Analysis and Design of Broadband, High Efficiency Feedforward Amplifiers
- Analysis and design of circular ridged waveguide components
- Analysis and Design of Dispersive Interdigital Surface-Wave Transducers
- Analysis and Design of Evanescent-Mode Waveguide Dielectric Resonator Filters
- Analysis and design of feedforward power amplifier
- Analysis and Design of Feeding Structures for Microstrip Leaky Wave Antenna (1995 Vol. I [MWSYM])
- Analysis and Design of Feeding Structures for Microstrip Leaky Wave Antenna (Sep. 1996 [T-MTT])
- Analysis and Design of Five Port Circular Disc Structures for Six-Port Analyzers
- Analysis and Design of Four-Port and Five-Port Microstrip Disc Circuits
- Analysis and Design of Full-Band Matched Waveguide Bends

IEEE © 2003

Click on title for a paper summary.

Paper Index

- Analysis and Design of GaAs MESFET Mixers
- Analysis and design of grooved circular waveguide dual-mode filters
- Analysis and design of H-plane waveguide bends with compact size, wide-band and low return loss characteristics
- Analysis and Design of Ideal Non Symmetrical Coupled Microstrip Directional Couplers
- Analysis and design of impedance-transforming planar Marchand baluns
- Analysis and design of integrated active circulator antennas
- Analysis and Design of Kemp-Type 3 dB Quadrature Couplers (Short Papers)
- Analysis and design of large leaky-mode array employing the coupled-mode approach
- Analysis and design of low-loss planar microwave baluns having three symmetric coupled lines
- Analysis and Design of Lumped- and Lumped-Distributed-Element Directional Couplers for MIC and MMIC Applications
- Analysis and design of mass-producible cross-coupled, folded E-plane filters

IEEE © 2003

Click on title for a paper summary.

Paper Index

- Analysis and Design of MESFET Gate Mixers
- Analysis and Design of Microslab Waveguide
- Analysis and Design of Microslab™ Waveguide
- Analysis and Design of Microstrip-Slot Line for Phase Shifting Applications
- Analysis and Design of Microstrip-to-Waveguide Transitions
- Analysis and Design of Microwave Balanced Mixers
- Analysis and Design of Microwave Linearized Amplifiers Using Active Feedback
- Analysis and design of microwave structures using broad frequency band and shape driven edge finite element models
- Analysis and Design of Multi-Octave MMIC Active Baluns Using a Distributed Amplifier Gate Line Termination Technique
- Analysis and Design of Multi-Octave MMIC Active Baluns Using a Distributed Amplifier Gate Line Termination Technique (1995 [MCS])
- Analysis and design of novel structures of artificial transmission lines for MMIC/MHMIC technology

IEEE © 2003

Click on title for a paper summary.

Paper Index

- Analysis and design of periodic structures for microstrip lines by using the coupled mode theory
- Analysis and Design of Quadruple-Ridged Waveguides
- Analysis and Design of Slot-Coupled Directional Couplers Between Double-Sided Substrate Microstrip Lines (1991 Vol. II [MWSYM])
- Analysis and Design of Slot-Coupled Directional Couplers Between Double-Sided Substrate Microstrip Lines (Dec. 1991 [T-MTT])
- Analysis and Design of Slow-Wave Structures Using an Integral Equation Approach
- Analysis and Design of Spurline Bandstop Filters
- Analysis and Design of TE/sub 11/-to-HE/sub 11/ Corrugated Cylindrical Waveguide Mode Converters
- Analysis and Design of Wide-Band Matched Waveguide Bends Including Discontinuities
- Analysis and development of millimeter-wave waveguide-junction circulator with a ferrite sphere
- Analysis and elimination of parametric oscillations in monolithic power amplifiers

IEEE © 2003

Click on title for a paper summary.

Paper Index

- Analysis and Evaluation of a Method of Measuring the Complex Permittivity and Permeability of Microwave Insulators
- Analysis and Exact Synthesis of Cascaded Commensurate Transmission-Line C-Section All-Pass Networks
- Analysis and Exact Synthesis of Cascaded Commensurate Transmission-Line C-Section All-Pass Networks (Addendum)
- Analysis and Experiment Concerning the Cutoff Frequencies of Rectangular Striplines (Short Papers)
- Analysis and Experimental Evaluation of Distributed Overlay Structures in Microwave Integrated Circuits
- Analysis and experimental study of an L-band new topology Doherty amplifier
- Analysis and Experimental Validation of a Type of Three-Microstrip Directional Coupler
- Analysis and experimental waveform study on inverse class class-F mode of microwave power FETs
- Analysis and Improvement of Intermodulation Distortion in GaAs Power FET's

IEEE © 2003

Paper Index

- Analysis and Intrinsic Properties of the General Nonuniform Transmission Line
- Analysis and Linearization of a Broadband Microwave Phase Modulator Using Volterra System Approach
- Analysis and measurement of hard horn feeds for the excitation of quasi-optical amplifiers
- Analysis and measurement of hard-horn feeds for the excitation of quasi-optical amplifiers
- Analysis and measurement of mode polarizers in square waveguide
- Analysis and measurement of multi-tone intermodulation distortion of microwave frequency converters
- Analysis and Measurement of NRD-Guide Leaky Wave Coupler in Ka Band
- Analysis and Measurement of Transducer End Radiation in SAW Filters on Strongly Coupling Substrates
- Analysis and Measurements of Coplanar Waveguide Discontinuities
- Analysis and Measurements of Nonradiative Dielectric Waveguide Bends (1986 [MWSYM])

IEEE © 2003

Click on title for a paper summary.

Paper Index

- Analysis and Measurements of Nonradiative Dielectric Waveguide Bends (Aug.1986 [T-MTT])
- Analysis and Modeling of "Two-Gap" Coaxial Line Rectangular Waveguide Junctions
- Analysis and Modeling of Coupled Dispersive Interconnection Lines (Short Papers)
- Analysis and Modelng of Coupled Right Angle Microstrip Bend Discontinuities
- Analysis and optimization of a phase shifter controlled by a piezoelectric transducer
- Analysis and Optimization of E-Plane Directional Couplers
- Analysis and optimization of grid oscillators
- Analysis and Optimization of Microwave Circuits & Devices Using Neural Network Models
- Analysis and Optimization of Millimeter- and Submillimeter-Wavelength Mixer Diodes
- Analysis and optimization of noise and gain performances for various topologies of microwave ring resonator planar active filters

IEEE © 2003

Paper Index

- Analysis and Optimization of Third Order Intermodulation Distortion Mechanisms in AiGaAs/GaAs Heterojunction Bipolar Transistors
- Analysis and performance of BGA interconnects for RF packaging
- Analysis and Realization of L -Band Dielectric Resonator Microwave Filters (Authors' Response to Comments)
- Analysis and Realization of L -Band Dielectric Resonator Microwave Filters (Reply to Comments)
- Analysis and Realization of L-Band Dielectric Resonator Microwave Filters
- Analysis and Realization of L-Band Dielectric Resonator Microwave Filters (Comments on)
- Analysis and Sensitivities of Noisy Networks Using Nodal Approach
- Analysis and Sensitivity Evaluation of 2p-Port Cascaded Networks
- Analysis and Sensitivity Evaluation of 2p-Port Cascaded Networks (Jul. 1981 [T-MTT])

IEEE © 2003

Paper Index

- Analysis and Synthesis Equations for Edge-Coupled Suspended Substrate Microstrip Line
- Analysis and Synthesis of Broad-Band Symmetric Power Dividing Trees
- Analysis and Synthesis of Coplanar Coupled Lines on Substrates of Finite Thicknesses (Short Papers)
- Analysis and Synthesis of Guides with Closely Spaced Discontinuities
- Analysis and synthesis of in-line coaxial-to-waveguide adapters
- Analysis and Synthesis of Tapered Fin-Lines
- Analysis and Synthesis of Tapered Microstrip Transmission Lines
- Analysis and Synthesis of Ttriplate Branch-Line 3dB Coupler Based on the Planar Circuit Theory
- Analysis and Synthesis of Waveguide Multi-Aperture Directional Couplers (1968 [MWSYM])
- Analysis and Synthesis of Waveguide Multiaperture Directional Couplers (Dec. 1968 [T-MTT])

IEEE © 2003

Paper Index

- Analysis of a Buried Layer Millimeter-Wave Phase Shifter (Short Papers)
- Analysis of a Centered-Inclined Waveguide Slot Coupler
- Analysis of a Circular Waveguide Cavity Loaded with Thick Ferrite Disks
- Analysis of a Class of Cylindrical Multiconductor Transmission Lines Using an Iterative Approach
- Analysis of a Coaxial-to-Waveguide Adaptor Including a Discended Probe and a Tuning Post
- Analysis of a Coaxial-to-Waveguide Adaptor Incorporating a Dielectric Coated Probe
- Analysis of a Coupled Slotline on a Double-Layered Substrate Containing a Magnetized Ferrite (Short Papers)
- Analysis of a CPW on Electric and Magnetic Biaxial Substrate
- Analysis of a Cylindrical-Rectangular Microstrip Structure with an Airgap
- Analysis of a Differential Phase Shifter
- Analysis of a Double Step Microstrip Discontinuity in the Substrate Using the 3-D-FDTD Method (Short Papers)

IEEE © 2003

Click on title for a paper summary.

Paper Index

- Analysis of a General Coaxial-Line/Radial-Line Region Junction (Short Papers)
- Analysis of a Grounded Junction Circulator
- Analysis of a Hemispherical Dielectric Resonator Antenna with an Airgap
- Analysis of a J-Band Pulsed Read IMPATT Oscillator
- Analysis of a Longitudinal Gyroelectric Discontinuity Inside a Fiber Waveguide
- Analysis of a Magnetically-Shielded Cellular Phone Antenna Using Finite-Difference Time-Domain Method
- Analysis of a Microstrip Covered with a Lossy Dielectric
- Analysis of a Microstrip Crossover Embedded in a Multilayered Anisotropic and Lossy Media
- Analysis of a Microstrip Line Terminated with a Shorting Pin
- Analysis of a Microwave FET Oscillator Using an Efficient Computer Model for the Device (Short Papers)
- Analysis of a Microwave Power Amplifier Using a Combiner/Divider with Circular Cavities

IEEE © 2003

Paper Index

- Analysis of a Microwave Radiometer for Precise Standardization of Noise Sources
- Analysis of a Microwave Resonator-Feedback Oscillator (Correspondence)
- Analysis of a Narrow Capacitive Strip in Waveguide
- Analysis of a Negative Conductance Amplifier Operated with a Nonideal Circulator
- Analysis of a New Configuration of Coplanar Stripline (Short Papers)
- Analysis of a nonconfocal suspended strip in an elliptical cylindrical waveguide
- Analysis of a partially sealed package for microstrip-line circuits
- Analysis of a passive spatial combiner using tapered slotline array in oversized coaxial waveguide
- Analysis of a Printed Wire Loop Antenna
- Analysis of a ridge waveguide using overlapping T-blocks
- Analysis of a Shielded Microstrip Line with Finite Metallization Thickness by the Boundary Element Method (Short Papers)

IEEE © 2003

Paper Index

- Analysis of a slot-coupled T-junction between circular-to-rectangular waveguide
- Analysis of a Tapered Circular Waveguide Using Spherical Modes
- Analysis of a Thin Slot Discontinuity in the Reference Plane of a Microstrip Structure
- Analysis of a Three-Dimensional Arbitrarily Shaped Dielectric or Biological Body Inside a Rectangular Waveguide (Jul. 1978 [T-MTT])
- Analysis of a Three-Dimensional Arbitrarily-Shaped Dielectric or Biological Body Inside a Rectangular Waveguide (1978 [MWSYM])
- Analysis of a Transition Between Rectangular and Circular Waveguides (Short Papers)
- Analysis of a Transmission Cavity Wavemeter
- Analysis of a Tunable Single Mode Optical Fiber Coupler
- Analysis of a Two-Section Coupler (Correspondence)
- Analysis of a Waveguide Hybrid Junction by Rank Reduction

IEEE © 2003

Paper Index

- Analysis of a Waveguide Mounting Configuration for Electronically Tuned Transferred-Electron-Device Oscillators and its Circuit Application
- Analysis of a Waveguide-Disk Load
- Analysis of a Wide Compound Slot-Coupled Parallel Waveguide Coupler and Radiator
- Analysis of a Wide Radiating Slot in the Ground Plane of a Microstrip Line
- Analysis of a Wide Resonant Strip in Waveguide
- Analysis of a Wire in a Rectangular Cavity
- Analysis of an Arbitrarily-Shaped Planar Circuit a Time-Domain Approach
- Analysis of an Array of Four Microstrip Patch Resonators Printed on an Anisotropic Substrate (Short Papers)
- Analysis of an Efficient TE/sub 0,n/-to-TE/sub 0,n+p/-Mode Converter in Circular Waveguides
- Analysis of an Elliptical Conducting Rod Between Parallel Ground Planes by Conformal Mapping
- Analysis of an End Launcher for a Circular Cylindrical Waveguide

IEEE © 2003

Paper Index

- Analysis of an End Launcher for a Circular Cylindrical Waveguide (Comments)
- Analysis of an End Launcher for a Circular Cylindrical Waveguide (Correction)
- Analysis of an End Launcher for an X-Band Rectangular Waveguide
- Analysis of an experimental technique for determining Van der Pol parameters of a transistor oscillator
- Analysis of an Infinite Array of Rectangular Anisotropic Dielectric Waveguides Using the Finite-Difference Method (Short Papers)
- Analysis of an Inhomogeneously Loaded Rectangular Waveguide with Dielectric and Metallic Losses
- Analysis of an N-Port Consisting of a Radial Cavity and E-Plane Coupled Rectangular Waveguides (Short Papers)
- Analysis of an N-Way Radial Cavity Divider with a Coaxial Central Port and Waveguide Output Ports
- Analysis of an Oval Symmetrically Located Inside a Rectangular Boundary by Conformal Mapping (Short Papers)
- Analysis of Anisotropic Conductors on Anisotropic Substrates

Paper Index

- Full Characterization of GaAs Power MESFET and Accurate Load-Pull Contours Prediction
- Full extraction of PHEMT state functions using time domain measurements
- Full implementation of an implicit nonlinear model with memory in an harmonic balance software
- Full MMIC millimeter-wave front end for a 76.5 GHz adaptive cruise control car radar
- Full Monolithic Sampling Head IC
- Full multimodal analysis of an open rectangular groove waveguide
- Full Nonlinear Analysis of Detector Using Ritz-Galerkin Theory Circuits
- Full Nonlinear Noise Analysis of Microwave Mixers
- Full RF Characterization for Extracting the Small-Signal Equivalent Circuit in Microwave FET's
- Full Scale Hybrid Lidar-Radar System
- Full Two-Port On-Wafer Vector Network Analysis to 120 GHz Using Active Probes

IEEE © 2003

Paper Index

- Full Wave Analysis of Microstrip Floating Line Structures by Wavelet Expansion Method
- Full Wave Analysis of Microwave Monolithic Circuit Devices Using a Generalized Yee-Algorithm Based on an Unstructured Grid
- Full Wave Analysis of Propagation Characteristics of a through Hole Using the Finite-Difference Time-Domain Method (1991 Vol. III [MWSYM])
- Full Wave Analysis of Propagation Characteristics of a through Hole Using the Finite-Difference Time-Domain Method (Dec. 1991 [T-MTT])
- Full Wave Analysis of Slot Line and Coplanar Waveguide on a Magnetic Substrate
- Full Wave Analysis of Tapered Microstrip Lines Using the Conformal Grids FD-TD Method
- Full Wave Approach for the Analysis of Open Planar Waveguides with Finite Width Dielectric Layers and Ground Planes

IEEE © 2003

Click on title for a paper summary.

Paper Index

- Full Wave Approach for the Analysis of Open Planar Waveguides with Finite Width Dielectric Layers and Ground Planes (Comments)
- Full wave BIE analysis of travelling waves in unbiased/velocity saturated FET structures with linearly controlled current density
- Full Wave Characterization of a through Hole via Using the Matrix-Penciled Moment Method
- Full Wave Characterization of Microstrip Open End Discontinuities Patterned on Anisotropic Substrates Using Potential Theory
- Full Wave Design of Multi-Hole Back-to-Back Microstrip Couplers
- Full Wave Modeling of Conducting Posts in Rectangular Waveguides and its Applications to Slot Coupled Combline Filters
- Full wave modeling of electric coupling probes in combline resonators and filters
- Full Wave Modeling of Electrically Wide Microstrip Open End Discontinuities via a Deterministic Spectral Domain Method

IEEE © 2003

Click on title for a paper summary.

Paper Index

- Full wave network representation for rectangular, circular, and elliptical to elliptical waveguide junctions
- Full wave optimization of stripline tapped-in ridge waveguide bandpass filters
- Full W-band MMIC medium power amplifier
- Full-Band Low-Loss Continuous Tracking Circulation in K Band (Comments)
- Full-Band Low-Loss Continuous Tracking Circulation in K Band (Short Papers)
- Full-Band Matching of Waveguide Discontinuities
- Full-duplex broadband fiber-wireless system incorporating baseband data transmission and a novel dispersion tolerant modulation scheme
- Full-duplex fiber-optic RF subcarrier transmission using a dual-function modulator/photodetector
- Full-Wave Analyses of Composite-Metal Multidielectric Lossy Microstrips
- Full-Wave Analysis and Design of a New Double-Sided Branch-Line Coupler and its Complementary Structure

IEEE © 2003

Paper Index

- Full-wave analysis and model-based parameter estimation approaches for Y-matrix computation of microwave distributed RF circuits
- Full-wave analysis and modeling of multiconductor transmission lines via 2-D-FDTD and signal-processing techniques
- Full-Wave Analysis of 3D Metallization Structures Using a Spectral Domain Technique
- Full-Wave Analysis of a Lossy Rectangular Waveguide Containing Rough Inner Surfaces
- Full-wave analysis of a new microstrip-to-waveguide interconnect configuration
- Full-wave analysis of a nonradiative dielectric waveguide with a pseudochiral /spl Omega/-slab
- Full-Wave Analysis of a Perfectly Conducting Wire Transmission Line in a Double-Layered Conductor-Backed Medium
- Full-wave analysis of a periodic array of rectangular lossy conductive thick patches

IEEE © 2003

Paper Index

- Full-wave analysis of a split-cylinder resonator for nondestructive permittivity measurements
- Full-Wave Analysis of a Strip Crossover
- Full-Wave Analysis of a Transversely Magnetized Ferrite Nonradiative Dielectric Waveguide
- Full-Wave Analysis of a Two Slot Microstrip Filter Using a New Algorithm for Computation of the Spectral Integrals
- Full-wave analysis of a wide class of microstrip resonators fabricated on magnetized ferrites with arbitrarily oriented bias magnetic field
- Full-Wave Analysis of an Infinitely Long Magnetic Surface Wave Transducer
- Full-Wave Analysis of Aperture Coupled Microstriplines
- Full-Wave Analysis of Aperture Coupled Shielded Microstrip Lines
- Full-Wave Analysis of Aperture-Coupled Microstrip Lines
- Full-Wave Analysis of Cascaded Junction Discontinuities of Shielded Coplanar Type Transmission Line Considering the Finite Metallization Thickness Effect

IEEE © 2003

Paper Index

- Full-wave analysis of circular microstrip resonators in multilayered media containing uniaxial anisotropic dielectrics, magnetized ferrites, and chiral materials
- Full-wave analysis of coaxial mounting structure
- Full-Wave Analysis of Conductor Losses on MMIC Transmission Lines (1989 Vol. III [MWSYM])
- Full-Wave Analysis of Conductor Losses on MMIC Transmission Lines (Oct. 1990 [T-MTT])
- Full-Wave Analysis of Coplanar Discontinuities Considering Three-Dimensional Bond Wires
- Full-Wave Analysis of Coplanar Strips Considering the Finite Strip Metallization Thickness (Short Papers)
- Full-Wave Analysis of Coplanar Waveguide and Slotline Using the Time-Domain Finite-Difference Method
- Full-Wave Analysis of Coplanar Waveguide Discontinuities Using the Frequency Domain TLM Method
- Full-Wave Analysis of Coplanar Waveguides by Variational Conformal Mapping Technique
- Full-Wave Analysis of Coupled Finline Discontinuities (Short Papers)

IEEE © 2003

Paper Index

- Full-Wave Analysis of Coupled Perfectly Conducting Wires in a Multilayered Medium
- Fullwave Analysis of Coupled-Finline Discontinuities
- Full-wave analysis of coupling between combline resonators and its application to combline filters with canonical configurations
- Full-wave analysis of coupling between cylindrical combline resonators
- Full-wave analysis of cross-aperture waveguide couplers
- Full-Wave Analysis of Dielectric Waveguides Using Tangential Vector Finite Elements
- Full-Wave Analysis of Discontinuities in Conductor-Backed Coplanar Waveguides Using the Method of Lines
- Full-Wave Analysis of Discontinuities in Planar Waveguides by the Method of Lines Using a Source Approach (Comments and Reply)
- Full-Wave Analysis of Discontinuities in Planar Waveguides by the Method of Lines Using a Source Approach (Short Papers)

IEEE © 2003

Paper Index

- Full-Wave Analysis of Discontinuities in Uniplanar and Multiplanar Transmission Lines Using the Frequency-Domain TLM Method
- Full-Wave Analysis of Guided Wave Structures Using a Novel 2-D FDTD
- Full-Wave Analysis of Guiding Structures Using a 2-D Array of 3-D TLM Nodes
- Full-Wave Analysis of Lossy Quasi-Planar Transmission Line Incorporating the Metal Modes
- Full-Wave Analysis of Lossy Transmission Line Incorporating the Metal Modes
- Fullwave Analysis of Microstrip In-Line and Offset Gaps in Fully and Laterally Open Environments Using a Deterministic Spectral Domain Approach
- Full-Wave Analysis of Microstrip Open-End and Gap Discontinuities
- Full-wave analysis of MICs in multilayer dielectric media in a rectangular waveguide
- Full-wave analysis of multiconductor transmission lines on anisotropic inhomogeneous substrates

IEEE © 2003

Click on title for a paper summary.

Paper Index

- Full-Wave Analysis of Multilayer Coplanar Lines (Short Papers)
- Full-Wave Analysis of Multiple Lossy Microstrip Lines on Multilayered Bi-Anisotropic Substrates and Imperfect Ground Metallization
- Full-wave analysis of nonplanar transmission lines on layered medium by means of MPIE and complex image theory
- Full-wave analysis of packaged microwave circuits with active and nonlinear devices: an FDTD approach
- Fullwave Analysis of Planar Microwave Circuits by Integral Equation Methods and Bilinear Transformations (Short Papers)
- Full-Wave Analysis of Quasi-Optical Structures
- Full-Wave Analysis of Radiating Planar Resonators with the Method of Lines
- Full-wave analysis of radiation from a microstrip amplifier
- Full-Wave Analysis of Strip Transmission Line on Circular Dielectric Rod

IEEE © 2003

Paper Index

- Full-Wave Analysis of Superconducting Microstrip Lines on Anisotropic Substrates Using Equivalent Surface Impedance Approach
- Full-Wave Analysis of Superconducting Microstrip Lines on Sapphire Substrates
- Full-Wave Analysis of the Influence of Conductor Shape and Structure Details on Losses in Coplanar Waveguide
- Fullwave Analysis of the Radiative Properties of Short-Circuit Discontinuities in Modified Coplanar Stripline
- Fullwave Analysis of Three and Four-Port Rectangular Waveguide Junctions
- Full-Wave Analysis of Three-Dimensional Planar Structures
- Fullwave analysis of transverse and longitudinal couplings in silicon RFIC. Effect of buried diffusions
- Full-Wave Analysis of Various Coplanar Bends and T-Junctions with Respect to Different Types of Air-Bridges
- Full-Wave Analysis of Waveguides Involving Finite-Size Dielectric Regions
- Full-wave analysis of X-band MMIC pre-matched power cell

Click on title for a paper summary.

Paper Index

- Interperiod Capacitance Calculations for Three-Dimensional Multiconductor Systems
- Interpolating wavelet Galerkin model of time dependent inhomogeneous electrically-large optical waveguide problems
- Interpolating wavelet scheme toward global modeling of microwave circuits
- Interpolation/Extrapolation of Frequency Domain Responses Using the Hilbert Transform
- Interpolative Response Modeling for Monte Carlo Simulation
- Interpretation of Interaction of Fabry-Perot Resonator Fields with Plasmas
- Interstitial Equal-Phased Arrays for EM Hyperthermia
- Intrinsic Attenuation (Correction)
- Intrinsic Attenuation (Jul. 1964 [T-MTT])
- Intrinsic Attenuation (May 1963 [T-MTT])
- Intrinsic Insertion Loss of a Mismatched Microwave Network
- Intrinsic limitations of GaAs device cooling for microwave low noise applications
- Intrinsic microwave phase noise of fiber-optic links

IEEE © 2003

Paper Index

- Intrinsic Modes of Radiation in Ferrite Patch Antennas
- Intrinsic noise characteristics of AlGaN/GaN HEMTs
- Intrinsic noise currents in deep submicron MOSFETs
- Intrinsic Pulsation in Stripe-Geometry DH Semiconductor Lasers
- Intrinsic Response Time of Normally Off MESFET's of GaAs, Si, and InP
- Introducing the 1995 IEEE All-Society Periodicals Package (Advertisement) (Jan. 1995 [T-MTT])
- Introducing the Through-Line Deembedding Procedure
- Introduction - Microwave Filters: A Maturing Art
- Introduction (Aug. 1969 [T-MTT])
- Introduction (Jul. 1994, Part II [T-MTT])
- Introduction (Mar. 2002 [T-MTT])
- Introduction (Nov. 1969 [T-MTT])
- Introduction (Nov. 1970 [T-MTT])
- Introduction (Sep. 1968 [T-MTT])
- Introduction (Sep. 1984 [T-MTT])

Paper Index

- Invariance of S/sub 21//S/sub 12/ and K-Factor Under Parallel Operation of Linear Two-Port Devices (Short Papers)
- Invariant Definitions of the Unloaded Q Factor (Short Papers)
- Inverse of exact solution by synthetic asymptote-an example of stripline
- Inverse Scattering Method for One-Dimensional Inhomogeneous Lossy Medium by Using a Microwave Networking Technique
- Inverse scattering of dielectric cylinders by a cascaded TE-TM method
- Inverse scattering of nonuniform, symmetrical coupled lines
- Inverse scattering using the finite-element method and a nonlinear optimization technique
- Inversion of Microwave Thermographic Data by the Singular Function Method
- Inverted Strip Dielectric Waveguide for Millimeter-Wave Integrated Circuits
- Inverted Stripline Antennas Integrated with Passive and Active Solid-State Devices
- Inverted-Resonator Evanescent Mode Filters

Paper Index

- Investigating high-T/sub c/ superconductors-a cryogenic microwave broad-band calibration
- Investigating nonlinear propagation in dielectric slab waveguides
- Investigation and application to LNA of an InP-HEMT operated at ultra low DC power levels
- Investigation and Evaluation of Low Loss Interconnects on Soft Substrates Clad to Aluminum
- Investigation and modeling of impact ionization with regard to the RF and noise behavior of HFET
- Investigation and Modeling of Impact Ionization with Regard to the RF- and Noise Behaviour of HFET
- Investigation into intermodulation distortion in HEMTs using a quasi-2-D physical model
- Investigation of "Twist" Mode Propagation in Indium Antimonide at 70 GHz
- Investigation of a Single-Sideband Mixer Anomaly (1983 [MWSYM])
- Investigation of a Single-Sideband Mixer Anomaly (Dec. 1983 [T-MTT])

IEEE © 2003

Click on title for a paper summary.

Paper Index

- Investigation of Active Antenna Arrays at 60 GHz
- Investigation of behavioral model accuracy using a state-space and convolution-based transient simulator
- Investigation of Coupling Structures for Coplanar Bandpass Filters
- Investigation of FECTED performance for millimeter-wave applications
- Investigation of HBT Oscillator Noise through 1/f Noise and Noise Upconversion Studies
- Investigation of integration paths in the spectral-domain analysis of leaky modes on printed circuit lines
- Investigation of microstrip and coplanar transmission lines on lossy silicon substrates without backside metallization
- Investigation of microwave propagation in high-temperature superconducting waveguides
- Investigation of Millimeter Wave Reflex Klystron Amplifiers (Correspondence)
- Investigation of Millimeter-Wave Scattering from Frequency Selective Surfaces

IEEE © 2003

Paper Index

- Investigation of MMIC Flip Chips with Sealants for Improved Reliability without Hermeticity
- Investigation of MMIC inductor coupling effects
- Investigation of mode coupling due to ohmic wall losses in overmoded uniform and varying-radius circular waveguides by the method of cross sections
- Investigation of Multiple Rectangular Aperture Irises in Rectangular Waveguide Using TE/sup x over sub mn/-Modes
- Investigation of numerical errors of the two-dimensional ADI-FDTD method [for Maxwell's equations solution]
- Investigation of Passive Bandpass Filters Using MMIC Technology
- Investigation of Periodic Structures in a Fin Line: A Space-Spectral Domain Approach (Short Papers)
- Investigation of Planar Antennas for Submillimeter Receivers
- Investigation of static and quasi-static fields inherent to the pulsed FDTD method
- Investigation of subharmonic mixer based on a quantum barrier device

IEEE © 2003
