HERITAGE
AUCTIONS
EUROPE

Beste liefhebber,

Welkom bij de komende mei veiling van Heritage Auctions Europe, een wederom grote veiling met ruim 8600 kavels! We hebben met veel plezier de duizenden kavels gedetermineerd, gecatalogiseerd en gefotografeerd. Dank aan alle inzenders die dit mogelijk hebben gemaakt, in Nederland en internationaal.

Door de grootte is de veiling wederom verspreid over 6 dagen. Het duurt uiteraard even om zoveel kavels met succes van eigenaar te laten wisselen! Zoals altijd wordt er weer geveild in ons eigen kantoor aan de Energieweg 7 te IJsselstein, van maandag 22 tot er met zaterdag 27 mei.
De kijkdagen beginnen vrijdag 12 mei en lopen dagelijks door tot er met zaterdag 20 mei (uitgezonderd zondag 14 mei). Daarbij zijn er twee avondsessies, maandag 15 en woensdag 17 mei tot 21:00 uur. Wij adviseren u zoals altijd om ruimschoots gebruik te maken van deze dagen, bekijk alles uitgebreid om niets te missen! Uiteraard staan alle lots (impressiefoto's) en losse nummers op onze website www.ha-europe.com. Tevens kunt u alle LOSSE nummers ook TIJDENS de veiling nog bekijken, tot ca. 100 nummers voor afslag. Voor de indeling van de veiling en de kijkdagen kijkt u in het overzicht op de volgende pagina's.

Naast een groot en veelzijdig aanbod springen een aantal zaken in het oog deze veiling: op de eerste plaats zijn we uiteraard trots op het schitterende aanbod uit de imposante collectie Coenen met vele prachtige munten, met name Provinciaal en Middeleeuwen. Daarnaast presenteren we de 'property of a gentleman' met honderden munten VOC India en Ceylon, de indrukwekkende collectie Van Osch met meer dan 800 jetons en historiepenningen, verder de twee verloren gewaande proeven voor de Stuiver 1910 (ontwerp Wienecke), twee geweldige gouden penningen van Artis (Westerman) en meer. Bij de bankbiljetten vinden we een leuke selectie specimens en misdrukken Nederland en bij de antieke munten valt een meer dan aantrekkelijke collectie Seleuciden en Ptolemaeën op, samen met een uitgebreide collectie Romeinen (met name Republiek en Provinciaal). Tevens..., ach kijkt u zelf maar en laat u verrassen door zoveel moois!

Bij het doorbladeren van deze catalogus zal u de grote diversiteit opvallen van de aangeboden stukken en collecties. Mocht u zelf besluiten om (een deel van) uw collectie van de hand te doen of eens een goed gesprek te willen voeren over de aantrekkelijke condities van Heritage Auctions Europe, neem dan gerust contact met ons op. Uiteraard geldt dat ook voor inzendingen voor de veilingen van Heritage Auctions in de USA of Hong Kong, de grootste numismatische veilingen ter wereld.

Tot slot: zoals altijd kunt u weer op alle kavels live meebieden via internet. Na registratie op www.ha-europe.com kunt u inloggen en meebieden. Ook kunt u hier uw schriftelijke biedingen doorgeven. LET OP: bij het sluiten van de biedingen via onze website is het niet altijd zeker dat u op de veilingdag zelf de hoogste bieder bent, we moeten immers biedingen die per post of per e-mail binnen zijn gekomen nog verwerken. De kans bestaat dus dat u alsnog bericht krijgt dat u overboden wordt nadat de schriftelijke biedingen zijn gesloten, houdt u daar rekening mee.
Uw aanwezigheid tijdens de veilingdagen wordt uiteraard zeer gewaardeerd. Mocht u echter verhinderd zijn en kunt u niet via ons live computersysteem meebieden, dan voeren wij uw schriftelijke biedingen, zoals u dat van ons gewend bent, discreet en met zorg uit.

Wellicht tot ziens in IJsselstein en alvast heel veel succes op de veiling!

Dear collector,

Welcome to the May auction of Heritage Auctions Europe 2023! With over 8600 lots, this has again become a great auction, which was put together with great pleasure and expertise. We would like to thank all consigners, from all over the world, who made this possible.

Again we present a 6-day auction, due to the large number of lots, to be "hammered" in our office at the Energieweg 7 in IJsselstein (Netherlands), from Monday, May 22 to Saturday, May 27. The viewing days start on Friday May 12. Of course, all larger lots (impression photos) and single lots are to be found on our website www.ha-europe.com. You can also view all SINGLE lots during the auction, up to approximately 100 numbers before the auction. For details about the auction and the viewing days please have a look at the overview on the following pages.

As always you can participate in bidding for all lots live on the Internet. Your presence during the auction days is of course greatly appreciated. However, if you are unable to attend and cannot bid via our live computer system, we will handle your written bids discreetly and with care, as you have come to expect from us.

Hope to see you in IJsselstein and good luck at the auction!

With kind and numismatic regards,
Jacco Scheper and Huib Pelzer

High-tech Hologram

Het geavanceerde hologram dat direct is verwerkt in de achterkant van NGC-houders bevat 12 verschillende beveiligingskenmerken, waaronder een mix van zichtbare en onzichtbare elementen.

Online verificatie

Ga naar NGCcoin.com/Verify of gebruik de NGC-app om de certificeringsgegevens van NGC te bekijken en om hoge-resolutie beelden van de houder te bekijken van nagenoeg 15 miljoen munten.

Beveiligingsetiket

Microtekst, holografische folie en een watermerk met UV-inkt bieden ijzersterke bescherming tegen vervalsing.

Geavanceerde houder

NGC-houders zijn verzegeld met ultrasoon lassen-een veilig en schoon proces dat munten helpt beschermen en pogingen tot vervalsing laat zien.

NGC-houders bieden verzamelaars en handelaars ongekende gemoedsrust door inerte materialen van de hoogste kwaliteit te combineren met een groot aantal innovatieve beveiligingstechnologieën. Bescherm uw munten met dezelfde houder als het Smithsonian Institution gebruikt om haar belangrijkste zeldzaamheden te beschermen.

Heritage Auctions Europe Online

Online auction

Follow the auction at www.ha-europe.com. Here you can not only place your bids in advance, but also bid live during the auction.

In order to make full use of www.ha-europe.com you must register once. Processing your registration can take up to 1 business day, so do not wait until the last minute.

Proxy bidding

For proxy bids, please use www.ha-europe.com to place your bids in advance. The system is fast and flawless and it has now been proven that the number of errors is lower than with the known handwritten bidlists. Another advantage is that you get instant feedback and the possibility to raise your bids if necessary. In addition, your bids are processed immediately. This can give an advantage up to 48 hours. Important if equal bids are placed!

Live bidding 

We offer all of our lots to be not only auctioned at our office, but simultaneously online. To bid live, you must sign up for the specific auction. In order to sign up for an auction, log in at www.ha-europe.com and then click on the blue 'Register Live'-button at the particular auction. An orange 'Register'-button appears on the next page. Processing your request can take up to 1 business day, so do not wait until the last minute. The 'Bid Live'-button will turn orange shortly prior to the auction.

Terms of Sale (Dutch)

Geldende bij de aankoop in veiling van roerende zaken.

Artikel 1 toepasselijkheid

1.1 Deze algemene voorwaarden zijn van toepassing op alle onderdelen van de relatie tussen de veilinghouder en de koper waaronder die betreffende koop, verkoop, bemiddeling, waardering, beoordeling, taxaties, catalogisering, bewaring en overige diensten. Onder koper wordt mede de aspirant koper verstaan die deelneemt aan de veiling ongeacht of deze in persoon biedt, per telefoon, door achterlating van een schriftelijke of mondelinge biedopdracht, elektronisch of door middel van het internet en ongeacht of een koopovereenkomst tot stand komt.
1.2 Afwijking van deze algemene voorwaarden is alleen mogelijk indien en voor zover uitdrukkelijk schriftelijk door de veilinghouder aanvaard.
1.3 De toepasselijkheid van de algemene voorwaarden wordt aan de veilingbezoekers kenbaar gemaakt door publicatie in de catalogus voorafgaande aan de veiling en/of mededeling voorafgaand aan de veiling en/of vermelding via internet/op de website van de veilinghouder. Een ieder die aan een veiling deelneemt geeft daardoor te kennen de toepasselijkheid van deze voorwaarden volledig te aanvaarden.

Artikel 2 informatie-/onderzoeksplicht

2.1 Omschrijvingen in de catalogus en alle schriftelijke of mondelinge inlichtingen worden door de veilinghouder en zijn personeel naar beste weten verstrekt.
2.2 De koper dient vóór de koop de staat en de beschrijving van een voorwerp in de catalogus of kavellijst ten eigen genoegen nauwkeurig en deskundig te (laten) inspecteren en een eigen oordeel te vormen over de mate waarin het voorwerp overeenkomt met de beschrijving ervan en de koper dient waar redelijkerwijs nodig of gewenst onafhankelijk advies van deskundigen in te roepen, terwijl de koper niet op illustraties in de catalogus dient af te gaan. Indien in de catalogus bepaalde gebreken of onvolkomenheden zijn vermeld, beoogt dat een indicatie te zijn die niet uitputtend is en waaraan de koper geen rechten kan ontlenen.
2.3 De veilinghouder kan niet aansprakelijk gehouden worden voor de onjuistheid van de beschrijving in de catalogus of op andere wijze kenbaar gemaakt, van materialen zoals bijvoorbeeld houtsoorten, stoffen, legeringen, aardewerk, porselein en diamant, een en ander met uitzondering van edele metalen. De veilinghouder aanvaardt alleen aansprakelijkheid voor onjuiste omschrijvingen voor zover voorzien in artikel 6 van deze voorwaarden.

Artikel 3 bieden

3.1 De koper kan in persoon bieden, tevens accepteert de veilinghouder biedingen:
- Schriftelijk
- Telefonisch
- Fax
- E-mail
- Internet, zowel voor de veiling als via de LiveBid. Let op! LiveBid wordt belast met 3% extra commissie, zoals vermeldt in artikel 3.6.

Kavels worden toegewezen aan de hoogst biedende. Bij een gelijk bod van 2 schriftelijke bieders wordt het betreffende kavel toegewezen aan de bieder wiens bieding het eerst ontvangen is.
3.2 Schriftelijke biedopdrachten dienen ondubbelzinnig en duidelijk te zijn en naar het oordeel van de veilinghouder tijdig genoeg voor de aanvang van de veilingzitting door de veilinghouder te zijn ontvangen. Indien er meerdere schriftelijke biedopdrachten door de veilinghouder worden ontvangen waarbij de te bieden bedragen gelijk zijn en deze biedingen ter veiling de hoogste biedingen op het voorwerp zijn, wordt het voorwerp verkocht aan de persoon wiens bieding door de veilinghouder het eerst is ontvangen.
3.3 Biedopdrachten hoeven slechts te worden uitgevoerd indien de veilinghouder redelijkerwijs daartoe gelegenheid heeft en de veilinghouder heeft te allen tijde het recht van het voeren van een biedopdracht af te zien.
3.4 Indien koper telefonisch of -indien mogelijk- elektronisch of via internet wil bieden, dient dit uiterlijk 24 uur voor de veiling schriftelijk met de veilinghouder te worden overeengekomen. Afwijking van deze termijn kan alleen met uitdrukkelijke schriftelijke instemming van de veilinghouder.
3.5 De veilinghouder sluit steeds iedere aansprakelijkheid ter zake van het om welke redenen dan ook niet slagen van een telefonische bieding uit, evenals het om welke redenen dan ook niet slagen van een schriftelijke bieding, elektronische bieding of bieding door middel van het internet.
3.6 Alle biedingen zijn onderhevig aan een aankoopcommissie.
- Drieëntwintig procent (23%) commissie en €2 kavelgeld voor ieder gekocht kavel bij alle Postzegel- en Muntveilingen
- Vijfentwintig procent (25%) commissie en €2 kavelgeld voor ieder gekocht kavel bij alle Kunst en Curiosaveilingen

Kavels verkregen via LiveBid worden belast met 3% extra commissie.

Artikel 4 totstandkoming koopovereenkomst

4.1 De koop komt tot stand bij definitieve toewijzing. Van definitieve toewijzing is sprake wanneer de veilinghouder het bod van de koper heeft geaccepteerd dan wel het voorwerp aan de koper heeft toegeslagen.
4.2 Alle voorwerpen worden verkocht in de toestand waarin zij zich op het ogenblik van toewijzing bevinden. Wezenlijke wijzigingen in de toestand die blijken na verschijning van de catalogus en/of het tonen op de kijkdagen en/of op het internet waaronder ernstige beschadiging of breuk, of herroeping van de omschrijving van een voorwerp in de catalogus en/of het internet zullen voorafgaand aan de verkoop worden medegedeeld. Na een dergelijke mededeling (bijvoorbeeld in een "sale room notice") kunnen aan de oude omschrijving geen rechten worden ontleend.

Artikel 5 verplichtingen koper

5.1 De koper dient zich op eerste verzoek van de veilinghouder te legitimeren.
5.2 De koper wordt geacht voor zichzelf te hebben gekocht en is aansprakelijk voor betaling zonder zich op een lastgever te kunnen beroepen.
5.3 De rechten en plichten uit hoofde van de koopovereenkomst en deze algemene voorwaarden komen uitsluitend toe aan de koper en kunnen door deze niet aan derden worden overgedragen.

Artikel 6 terugnameverplichting veilinghouder

6.1 Tenzij uitdrukkelijk voor bepaalde voorwerpen in de catalogus of kavellijst uitgesloten, is - onverminderd de artikelen 2 en 4.2 - de veilinghouder bereid een geveild voorwerp tegen gelijktijdige restitutie van de in rekening gebrachte koopprijs en veilingkosten terug te nemen, indien de koper binnen een periode van zes weken na de verkoop ten genoegen van de veilinghouder bewijst dat het geveilde zulke ernstige verborgen gebreken vertoont of de verstrekte omschrijving zo onjuist is, dat indien deze gebreken of de juiste omschrijving aan de koper op het ogenblik van toewijzing bekend waren geweest, hij van de koop zou hebben afgezien of slechts tegen een aanmerkelijk lagere prijs gekocht zou hebben. Dit geldt niet indien de gebreken alleen de conditie van het voorwerp betreffen (zoals bijvoorbeeld slijtage en restauraties).
6.2 De veilinghouder is niet bereid tot terugname indien de omschrijving in de catalogus voorafgaande aan of tijdens de veiling werd herroepen en de juiste omschrijving mondeling of schriftelijk aan het publiek werd medegedeeld.
6.3 De bereidheid tot terugname vervalt ook als de koper het geveilde niet kan teruggeven in dezelfde staat als waarin het zich bij toewijzing bevond, zulks ter beoordeling van de veilinghouder.

Artikel 7 rechten veilinghouder en veilingmeester

7.1 De veilinghouder en de veilingmeester die leiding geeft aan de veiling behouden zich de volgende rechten voor:
a. zonder opgave van redenen personen als bieder of koper te weigeren;
b. te allen tijde wijziging te brengen in de orde van verkoop;
c. voorwerpen te doen uitvallen of toe te voegen;
d. kopen te combineren of te splitsen;
e. kopen niet te gunnen of op te houden;
f. vergissingen bij biedingen en toewijzing te herstellen, of een koop ongedaan te maken zonder dat een bieder van vergissingen gebruik mag maken en zich in dat geval op een tot stand gekomen koopovereenkomst mag beroepen;
g. na toewijzing onmiddellijk gehele of gedeeltelijke betaling te vorderen, terwijl bij weigering of onmacht van betaling de veilinghouder en de veilingmeester het recht hebben de koopovereenkomst ongedaan te maken en daarna het betreffende voorwerp te herveilen en het bod van de nalatige bieder niet weer aan te nemen;
h. indien de koper weigert op eerste verzoek volledige naam en adres aan de veilinghouder bekend te maken en daarop betrekking hebbende legitimatie te tonen, de koopovereenkomst te ontbinden en te herveilen;
i. voorwerpen niet over te schrijven van de rekening van de oorspronkelijke koper op die van een ander;
j. gedurende de veiling geen voorwerpen af te geven;
k. namens kopers of verkopers biedingen uit te brengen;
l. voorwerpen waarover tijdens of kort na de veiling een geschil gerezen is, opnieuw in veiling te brengen, en een eventuele koopovereenkomst te ontbinden.

Artikel 8 betaling/eigendomsoverdracht

8.1 De betaling door de koper van de koopsom in Euro verhoogd met veilingkosten, andere kosten, waaronder indien van toepassing, het verschuldigd volgrecht, en eventuele BTW, één en ander als door de veilinghouder vast te stellen, moet vóór de aflevering van de gekochte voorwerpen plaatsvinden en binnen de door de veilinghouder te stellen termijn, zonder dat korting of verrekening is toegestaan, een en ander tenzij anders is overeengekomen.
8.2 Een beroep op de zogenaamde margeregeling kan uitsluitend worden gedaan indien vooraf aan de veiling aan alle ter zake geldende voorschriften is voldaan onder andere met betrekking tot de inkoopverklaring. Zulks ter uitsluitende beoordeling van de veilinghouder.
8.3 De eigendom van de voorwerpen gaat niet eerder over dan na volledige betaling van de koopsom en in geval van niet-tijdige betaling niet eerder dan na volledige betaling van de koopsom inclusief de in artikel 9 genoemde kosten.

Artikel 9 niet-tijdige betaling

9.1 Bij niet-tijdige betaling zal de veilinghouder aan de koper rente in rekening mogen brengen gelijk aan de wettelijke rente verhoogd met 3% dan wel – naar keuze van de veilinghouder – 1% per maand, te rekenen vanaf de datum waarop de betalingstermijn is verstreken. Tevens komen alle gerechtelijke en buitengerechtelijke kosten voor rekening van de nalatige koper, welke kosten worden begroot op 15% van de koopsom vermeerderd met de veilingkosten met een minimum van € 250 (zegge: tweehonderdvijftig Euro), onverminderd het recht om de werkelijke kosten te verhalen.
9.2 De veilinghouder heeft tevens het recht om, indien de koper de betalingstermijn overschrijdt en daardoor van rechtswege in verzuim is, de koopovereenkomst schriftelijk te ontbinden. Eventuele gedeeltelijke betalingen vervallen in geval van ontbinding bij wijze van vergoeding van schade aan de veilinghouder die tevens het recht heeft de volledige schade, zoals een mindere opbrengst, en kosten op de koper te verhalen en het geveilde onmiddellijk of later te herveilen of uit de hand te verkopen. De nalatige koper kan geen aanspraak maken op een eventuele meeropbrengst.

Artikel 10 ophaaltermijn

10.1 De koper is verplicht de gekochte voorwerpen tot zich te nemen en af te (laten) halen binnen de door de veilinghouder aan te geven termijn. Behoudens het recht van de veilinghouder een kortere of langere termijn aan te geven geldt als uiterlijke ophaaltermijn, een termijn van vijf werkdagen na de laatste veilingdag.
10.2 Bij nalatigheid van de koper het gekochte af te nemen en op te (laten) halen binnen de gestelde termijn is de koper van rechtswege in verzuim en is het gestelde in artikel 9 van overeenkomstige toepassing. Tevens heeft de veilinghouder het recht het gekochte voor rekening en risico van de koper in opslag te geven, waarbij vervoerskosten en het daaraan verbonden risico eveneens ten laste van de koper komen.

Artikel 11 onverkochte voorwerpen

11.1 Indien een voorwerp ter veiling onverkocht blijft, heeft de veilinghouder gedurende een periode van veertien dagen na de veiling het recht doch nimmer de plicht het onverkochte voorwerp alsnog te verkopen tenzij anders overeengekomen met de inbrenger.
11.2 De veilinghouder zal een dergelijke verkoop na veiling ("aftersale") alleen aangaan indien die verkoop kan geschieden voor een prijs die resulteert in een bedrag dat minimaal gelijk is aan de netto verkoopopbrengst waarop de verkoper recht zou hebben gehad indien het voorwerp voor de voor deze veiling geldende limiet zou zijn verkocht, zulks tenzij een andere regeling met verkoper wordt overeengekomen.
11.3 Een aankoop door een koper in de zin van dit artikel geldt als aankoop ter veiling waarop deze algemene voorwaarden onverkort van toepassing zullen zijn.

Artikel 12 aansprakelijkheid veilinghouder

12.1 De veilinghouder is nimmer aansprakelijk voor schade ontstaan aan schilderijlisten, overige omlijstingen en al wat daarvan deel uitmaakt zoals glasplaten, passe-partouts etc., behoudens het geval dat de schade is veroorzaakt door opzet of bewuste roekeloosheid van de veilinghouder en/of door hem ingeschakelde hulppersonen of personeelsleden.
12.2 In geen geval is de veilinghouder aansprakelijk voor bedrijfs-, gevolg-, vermogens- en/of indirecte schade.
12.3 De veilinghouder is nimmer aansprakelijk voor enig ongeval of enige vorm van schade iemand overkomen in of nabij de gebouwen of terreinen waar gelegenheid is tot inbreng, opslag of bezichtiging, waar de veiling plaats heeft of waar de verkochte goederen worden afgehaald, behoudens het geval dat de schade is veroorzaakt door opzet of bewuste roekeloosheid van de veilinghouder en/of door hem ingeschakelde hulppersonen of personeelsleden en/of behoudens voor zover door een verzekering van de veilinghouder gedekt.
12.4 Het betreden van de gebouwen of terreinen geschiedt op eigen risico.

Artikel 13 foto's en illustraties

13.1 De veilinghouder is gerechtigd alle ter verkoop aangeboden voorwerpen te fotograferen, te illustreren of anderszins in beeld te brengen en af te (doen) beelden op welke wijze dan ook, zowel voor, tijdens als na de veiling, rekeninghoudende met geldende wettelijke bepalingen. De veilinghouder behoudt het auteursrecht op al deze afbeeldingen.

Artikel 14 diversen

14.1 Nietigheid, vernietiging of onverbindendheid van één der bepalingen van deze algemene voorwaarden laat de geldigheid van de overige bepalingen onverlet. In het geval één of meer bepalingen nietig, vernietigd of onverbindend zijn, worden tussen koper en veilinghouder vervangende bepalingen overeengekomen die wel geldig zijn en die het meest de inhoud en strekking van de nietige, vernietigde of onverbindend gebleken bepaling(en) benaderen.
14.2 Op deze algemene voorwaarden is uitsluitend Nederlands recht van toepassing.
14.3 Alle geschillen ter zake van, voortvloeiende uit of verbandhoudende met een tussen de veilinghouder en de koper gesloten koopovereenkomst, de totstandkoming van een koopovereenkomst of deze algemene voorwaarden worden uitsluitend ter beslechting voorgelegd aan de bevoegde rechter van de woonplaats of plaats van vestiging van de veilinghouder, tenzij uit de wet anders voortvloeit behoudens het recht van de veilinghouder om het geschil aanhangig te maken bij de bevoegde rechter van de woonplaats van de koper.

Extract of the conditions of sale

The auction sale occurs by upward bidding in euro. To the hammer price a buyer's premium will be added of 23% and 2 euro for every bought lot. Purchases via the livebid system have an alternate buyer's premium of 26% and 2 euro for every bought lot.

Lots are assigned to the highest bidder. In case of two even bids the concerning lot will be assigned to the first bidder. Bidders can submit postal bids at www.ha-europe.com.
Please notice: no bids below the starting price will be accepted!

The auction sale takes place with increasing steps as follows: up to 40 euro with 2 or 3 euro, from 40 to 100 euro with 5 euro, from 100 to 300 euro with 10 euro, from 300 to 500 euro with 20 euro, and from 500 to 1000 with 50 euro and above 1000 euro with 100 euro.
The auctioneer has the right to deviate from these amounts. Starting prices in the catalogue described as 'bod' have a minimum of 5 euro. Bids under the starting price are not accepted.

During and after the auction lots bought can be taken along by the purchaser. This is possible after direct payment (cash or bank) or after permission of the auctioneer to wire the amount within an agreed period. Payment with creditcard is also possible, the auctioneer will charge 5% extra to the invoice due to bankcosts. Cheques are not accepted. Every bidder is considered to buy for him- or herself and can never be entitled 'in-betweens' without responsibility.

Purchases will not be shipped before the invoice is paid in full. Heritage Auctions Europe (HAE) takes no responsibilities for bank or wire transfer surcharges (which some banks charge).

A minimum of 30 euro will be charged for shipping costs. Heritage Auctions Europe is free to raise these costs if the actual shipping costs are higher than invoiced. We attempt to ship as quickly as possible, but operate a queue system with purchases shipped in order of payment. Buyers will receive a tracking number once the package is ready to be shipped out.
We reserve the right to decline to ship lots deemed too fragile, heavy or large for postal services. Every effort is made to pack securely but we are not a professional shipping company. Our services are used at the buyers risk and we cannot be held responsible for damage in transit.

Ownership of the lots remains with the seller until payment has been done in full. Buyer's risk is valid from the moment of knock-down.

All lots are sold as viewed. Authenticity of every single lot (or lots with no more than 2 pieces) is guaranteed.

All disputes during or after the auction are decided by a present supervisor. All parties are subject to his/her pronouncement. Any disputes followed by legal actions will be handled according to the conditions as deposited at the Court of Law in Utrecht under no. 383/1999 (15/11/1999). Only the Dutch text of conditions of sale is in force.

According to Dutch taxlaw your VAT-number will NOT exclude VAT. All prices are reserve prices.

Onthul de ware schoonheid *van uw munten*

Verzamelmunten kunnen beschadigd raken en het uiterlijk kan veranderen als ze niet goed worden bewaard en verpakt. Ook kunnen ze beschadigd raken door het milieu en de omgeving, verkeerd gebruik en veranderingen in de natuur. Vervuiling op oppervlakken zoals PVC en andere resten, vuil, aanslag, vlekken en afzetting kunnen het uiterlijk minder mooi maken en kunnen munten zelfs permanent beschadigen.

NCS heeft een professionele aanpak van numismatische conservatie ontwikkeld en kan deze schadelijke deeltjes verwijderen, waardoor het uiterlijk van een munt aanzienlijk kan worden verbeterd.

NCS, dat door het Smithsonian Instituuut wordt gezien als een autoriteit op het gebied van conservering, heeft de expertise en ervaring om het oorspronkelijke uiterlijk van uw munt terug te brengen en de ware schoonheid ervan te onthullen.

Wat kan professionele conservatie door NCS doen voor mijn munten?

Alle soorten munten zijn onderhevig aan oppervlakkige vervuiling en negatieve reacties op de omgeving. In veel gevallen worden munten bewaard of verkocht in zachte plastic mapjes of muntverpakkingen die polyvinylchloride (PVC) bevatten, chemicaliën die langzaam inwerken op de oppervlakte van een munt. PVC en andere resten leiden uiteindelijk tot permanente schade.

Door bepaalde problemen komen munten niet langer in aanmerking voor beoordeling door Numismatic Guaranty Corporation (NGC), een onafhankelijk partner van NCS, als ze niet eerst professioneel worden geconserveerd. Na conservatie door NCS kunnen munten aan NGC worden overgedragen voor certificering. Hierna worden ze, afhankelijk van de staat van het oppervlak, numeriek op kwaliteit ingedeeld of door NGC Details op kwaliteit ingedeeld.

Hieronder volgen enkele voorbeelden van professionele conservatie door NCS.

ca 14.30 hours CEST
Netherlands Kingdom lots (900-1512) with livebid

18.00 hours CEST
Coins and medals absentee bids only (1600-1951)

Please make sure to submit your absentee bids in time.
See page 7 for the deadlines.

Advice:
Take a look on our website www.ha-europe.com.
You will find the photos of all lots, including those not published in our catalogue.

Another advice:
Enter your postal bids at www.ha-europe.com. This prevents errors and lost bid slips.
Your bids are also processed faster, which provides a time advantage of up to 48 hours.
This is important when equal bids are placed.
You will also receive immediate feedback and the option to increase your bid if necessary.

Heritage Auctions is the largest numismatic auction house in the world with over 1,500,000 members/bidders. No other auction house even comes close! Consigning to our auctions is possible via HAE in IJsselstein, inquire about the possibilities. Call +31(0)30-6063944 or info@ha-europe.com

194	10 Gulden 1875 over 74 (Sch.--) - Obv: Head right / Rev: Crowned arms divide 10-G - Gold 6.72 g. - UNC, possibly unique In 1875 werd in Nederland weer een gouden 10-guldenstuk ingevoerd. Vóór die tijd konden grotere sommen geld alleen in zilveren munt worden betaald. De invoering van een gouden munt was noodzakelijk geworden door de gestage daling van de zilverprijs, die rond 1870 had ingezet en die nog tientallen jaren zou aanhouden. Door deze prijsdaling van het zilver daalde immers ook de waarde van de (zilveren) Nederlandse gulden, en daarmee zijn koopkracht in het buitenland. Bovendien brachten particuliere handelaars steeds meer zilver, dat zij nu goedkoop konden inkopen, naar de Utrechtse Munt om daarvan rijksdaalders te laten slaan. Vanaf 1840 was per jaar gemiddeld voor zo'n 12 miljoen gulden aan zilveren guldens en rijksdaalders geslagen; in 1870 was dit bedrag 16,5 miljoen, in 1871 17 miljoen en in 1872 al 33,5 miljoen. De remedie was voor iedereen duidelijk. De koopkracht van de gulden kon alleen behouden blijven als grotere sommen geld voortaan in gouden munt konden worden voldaan. De goudprijs was immers wel stabiel. Natuurlijk moest de aanmunting van zilveren guldens en rijksdaalders dan wel gestopt worden. Met dit laatste punt werd begonnen. In 1873 werd besloten dat 's Rijks Munt voorlopig geen zilver van particulieren meer in ontvangst mocht nemen. Daarnaast werd gewerkt aan een wet die gouden Nederlandse munten moest introduceren. Omdat zo'n wet al op korte termijn te verwachten was, werd bij 's Rijks Munt gelijk begonnen met het voorbereiden van de productie van dergelijke munten. Hulpstempelsnijder J.P.M. Menger kreeg in 1873 opdracht een stempel voor de voorzijde te maken; stempelsnijder J.P. van der Kellen dat voor de keerzijde. In de Tweede Kamer bestond echter geen overeenstemming over de toekomst van het Nederlandse muntwezen. Moest er alleen maar een gouden munt aan het bestaande stelsel worden toegevoegd ? Moesten de omlopende zilveren gulden en rijksdaalders buiten koers worden gesteld ? Moest er soms een geheel nieuw muntstelsel worden ontworpen ? Het duurde tot 1875 voor het besluit er kwam. Bij wet van 6 juni 1875 werd een nieuw gouden 10-guldenstuk ingevoerd terwijl de aanmunting van zilveren guldens en rijksdaalders in opdracht van particuliere handelaars werd gestaakt, maar de bestaande stukken nog wel hun geldigheid behielden. De nieuwe gouden 10-guldenstukken dienden vanaf 1 juli 1875 bij 's Rijks Munt verkrijgbaar zijn. Dit was alleen mogelijk omdat daar al vanaf 1873 aan de ontwikkeling van deze munt gewerkt was, steeds in de overtuiging dat een nieuwe Muntwet elk moment kon worden uitgevaardigd. In 1874 was waarschijnlijk alles al in gereedheid gebracht om met de muntslag te kunnen beginnen. Het is dan ook volkomen aannemelijk dat er in 1874 al proeven met de nieuwe muntstempels zijn genomen. Hier is helaas geen resultaat van bewaard gebleven. Een eerste aanwijzing is pas recent aan het licht gekomen doordat een gouden 10-guldenstuk opdook waarop, verborgen onder het cijfer '5' van het jaartal 1875, het duidelijke restant van een cijfer '4' zichtbaar is. Hiervoor moet in 1875 een keerzijde-proefstempel met het jaartal 1874 zijn gebruikt. Gezien de 'rommelige' achtergrond van de '5' is de wijziging niet op een moederstempel maar op een gewoon werkstempel uitgevoerd. De grote oplagen waarin de nieuwe gouden tientjes in 1875 geproduceerd moesten worden, waarbij de stempelproductie af en toe ontoereikend kan zijn geweest, zal deze noodgreep nodig hebben gemaakt. NB. Het keerzijde-stempel is vervaardigd uit een stempel voor een proefaanmunting uit 1874, waarvan geen afslagen bewaard zijn gebleven. Zie De Muntkoerier van april 2023.	*1000*

Obv.: VOC- monogram surmounted by the value · 48 ST· , countermark of a C between the monogram and the rim; 4 sets of scrolls within a rope-like inner circle and an outer circle of pearls / rev.: Coat of Arms of the city of Batavia (an upright sword within a laurel wreath); similar double circle with legend BATAVIÆ left and ANNO 1645 right, scrolls dividing the legend on top and bottom (Ref.: Scho. 12, RRR) - Granulated surface, plain edge, VF for issue.** **Ref.: Scho. 12, RRR** Provenance: Mario L. Sacripante coll. Received during the 1960's as present from the director of the National Museum in Jakarta as thanks for his services. Explanatory report: On Feb. 26, 1645 notification was given that the Japanese 'schuitzilver' (silver ingots) on hand were to be used for the provisional production of a limited amount of Batavian Crowns by the burgher goldsmith Jan Ferman and a Chinaman named Conjok "to the relieve of our necessity". Thus these coins were true emergence coins, and the first silver Dollar-sized coin minted in the Orient. The larger silver coins were hoarded by the inhabitants, to be sold at great profit upon arrival of Chinese junks. Weight & fineness: For every 1000 thails or Japanese ingots (weighing 1370 reals or 37,605.77 grams) 1487 specimen were to be delivered. While allowing a melting loss of 1½ %, the weight had to be 7/8 of a Lion dollar (Leeuwendaalder). The weight of Dutch Lion-dollar of 48 stivers is 27.684 g. with a silver fineness of 0.750, which was considered the actual representative of the imaginary 'Real' (a money of account of 48 stivers). The Batavian Crown, however, being an emergency coin, was of lower weight. An XRF test of coin concerned reveals a silver content of 80.357 – 80.937 %, Cu 16.379 – 16.67 % & Pb 2,31 - 2.32 %. This is more than the fineness of the Lion-dollar, which is 750/1000. However, when the amount of fine silver is calculated for 7/8 of the Lion-dollar it comes to 27.684x 0.75x 7/8 =18.168 g. For the 48 stiver concerned (weight 23.27 g.) the amount of fine-silver would accordingly be between 18.699 – 18.834 g. The fine silver content is thus practically the same as given in the instructions and complies also to the fineness of the Spanish 8 real pieces. The Batavian Crown was often referred to as real. The remark by Bucknill (The Coins of the Dutch East Indies, 1931) that 'The coins were made of a poor grade of silver' is not confirmed by the actual fineness found by this XRF test and must been due to visual observation of the cast coins he had seen.	*3000*

Verenigde Oost-Indische Compagnie (1602-1799)

Batavia

Production process:
Before the arrival of the Dutch on Java the coin production was basically done by casting the technic. During the 16th and 17th century cast copper cash coins and tin pitjis were produced by the Sultanates of Bantam and Cheribon on Java. There was also a large scale production of Chinese and Japanese type bronze cash coins, the so-called 'Shima-sen', but also lead-tin imitations.
By giving the instructions for the production to the goldsmith Jan Ferman and Chinaman Conjok it is obvious that the first person has to look after the fineness of the silver and the second on the production, which no-doubt would have been by the Chinese art of casting. Starting in the late 5th century AD, the majority of Chinese coins were cast in two-piece moist sand moulds into which a master coin (called a 'seed') was used to make many impressions. Channels were cut to connect the impressions and, after joining the two pieces, molten metal was poured in. When taken apart, the mould yielded what looked like a tree studded in coins, which was then cut apart.
The impression of the mould's sand grains leaves a granular surface. The coins were run over a rasp to smooth the surfaces, often leaving a series of parallel file marks which wear off very quickly and are only visible on very high grade specimens. The lower points on the coin are not affected by the rasp and usually retain some evidence of the pebbled surface.
Cutting the coins from the tree left a rough spot on the edges which was then filed smooth. The coins were cast with wide rims to allow for this filing.
For the Chinese this method was easy, very fast and, because all of the coins were impressed with the same seed coin, thousands and even millions of identical coins were possible, allowing calligraphy variations to be used as mint and date control marks. Each coin would be exactly the same diameter except for small size variations caused by filing the edges. The only major drawback was in controlling the weights. It was impossible to control the exact depth of each seed impression, and a slightly deeper impression gave a heavier coin and a shallow one a light coin. Weights could vary as much as 25% from coin to coin, so officials concerned themselves with the average weight of one thousand coins, not the weight of each individual coin.
The coin concerned shows all the aspects of the production by the Chinese casting process, viz.: a somewhat grained, and adjusted edge by cutting off the rough surface, the result of casting. This is also confirmed by Bucknill "The coins were made of a poor grade of silver, were cast in moulds and have a plain edge".

Provenance of the coin.
Mario L. Sacripante, an Air Force sergeant in the Office of the Air Attaché in the American Embassy in Jakarta met in the early 1960's the director of the National Museum in Jakarta. On hearing he was a coin collector, the director ask him whether he could help the staff with a numismatic exhibit, as there was no curator for the museum's numismatic exhibit. The last one has been Mr. J.P. Moquette.
Sacripante, agreed and while working in the museum, said he saw old mint records in Dutch indicating that 22,000 crowns were made. Moreover he writes "There were in the museum storeroom minting tools and equipment such as crucibles, screw presses and even dies and moulds for the 1645 and 1646 crown and subsidiary coins."
Before he left Indonesia, when his tour of duty was finishing, the museum director presented him with a three-piece set of the 1645 Batavia Crown and its two subsidiary coins, the 12 and 24 stivers, as well as several VOC ducatons, of which the museum had many stacks.

390 3000

The present coin, consigned now for this auction by Sacripante's son, must be 1645 Batavia Crown Mario L. Sacripante received from the museum director when he took leave.

Countermark C
Bucknill (p.33-34) observes that to meet the difficulties to suppress the counterfeiting, the Dutch authorities on Java often resort to countermarking and records that this also applied to the 1645 Batavian crown. No further details about the kind countermark are given. On some specimen a countermark of a 'crown' as on a specimen in the National Numismatic Collection with the National Bank in Amsterdam (ZENO 212888). Not all Batavian crowns of 1645 show such a countermark. It is in line with Bucknill's observation that to suppress the counterfeiting the authorities has started to mark the original specimen by a minute countermark. Similarly on a 24 stiver piece 1645, auctioned by Heritage Auctions (Sale #3071, 6 - 7 January 2019, Session IV, Lot 34321), shows a small cinque-foil counter stamp (ZENO 212331). The countermark C has not been observed earlier and its purpose remains so far a guess. The C most likely must be the initial of a Dutch word.

'Seed' coins:
The series of the Batavian Crown show, due to the casting process by which the currency issues were produced, a rather granular surface, much to the contrary of the well prepared 'seed' coins.
It are those 'seed' coins which were most likely cast in finely engraved soapstone moulds which were, as reported by Sacripante in the early 1960's, still present in the museum's storeroom. After casting, these 'seed' coins were very accurately tooled, as can be clearly observed on the specimen of the 48 Stiver 1645 shown on ZENO #39313. The currency coins were cast in moist sand moulds into which the master or seed coin was used to make the impressions.
A pretty large number of coins of this series (48 ST [14]; 24 ST [6]; 12 ST [7]) were studied in June 2009 by Arent Pol of the Money Museum in Utrecht. This study included also Sacripante's 1646 crown. His provisional opinion was that the well-produced and therefore attractive specimen may have been later productions intended for collectors, much in contrast with casted specimen with a rather rough granulated appearance, which he regarded to be the authentic specimen. In his study of these coins, the production process, however, seems to have been overlooked, as for that process master or seed coins were required for impression of the sand moulds, and could not have been produced later for collectors.

Resumé:
It seems to be sufficient proved that the Batavian crown of 1645, contrary to NGC's opinion that the coin is 'not genuine', is an authentic specimen, produced by the adopted casting process and that the more well prepared coins were the required 'seed' coins used in this casting process. The countermarking may have been introduced somewhat later in the year 1645, to distinguish them from counterfeit specimen and continued to be applied on the 1646 issues too.
The way the currency specimen have been produced, may make them aesthetically perhaps somewhat less attractive, but as an original historical edifice, very important and not less desirable.

433	Tin doit ND (1796) - 7.43 g. Emergency issue (Ref. Scho.485§; Passon - ; N.vdCh. 30; ZENO 310288) - The Company's bale-mark, surmounted by a B (Batavia) / rev.: D U I T, with round hole in centre. On May 5, 1796 it was suggested that to meet the acute scarcity of doits, to strike tin doits. For this purpose they got in touch with the 'burger-heemraad' TEISSEIRE, who took tests, did some calculating and proposed "that within 8 days one picul of doits a day could be produced, soon after that two or three a day and within a month, 10 a day". These doits were made current on May 26, 1796, simultaneously with "bonks". The contractor made the mistake of not only commissioning Chinees pewterers to supply the blanks but also allowing them to produce the iron dies, with the result that a large number of counterfeit doits alloyed with lead were made. The fraud was detected and the doits of this coinage were not put into circulation. The doits that had already been struck, were melted down and as far as was known to Netscher/v.d. Chijs and Scholten, there were no longer any of them in existence. Nevertheless one (ZENO 310304) or perhaps two more specimen are presently known. Chisel-mark across the obverse, perhaps applied for demonetizing the issue. Exceptionally rare R4 - VF	*750*

534	Borneo, Gongsi lead-tin local cash coin (40.12 g.; 43 mm.), Federation of the He Shun mining Gongsi. Obv.: He Shun Gong Si, 14 Chinese characters punched on the rim, which according to Schaank refers to the 14 gongsis of the He-shun federation / rev.: corrupt Manchu inscription. In 1776 the 14 mining gongsis around Montrado, formed a federation known as He-shun. (Compare to Zeno # 252169 (with tentative reading of 14 characters in comments). Around 1808 the He-shun federation originally consisting of 14 gongsis had dwindled to only seven members. Early in 1819 a quarrel arose between Da-gang and San-tiao-gou about the presidency of the He-shun federation, resulting in a withdrawal of the latter with its allies Shi-wu-fen and Tai-he. They settled north of the Selakau river, San-tiao-gou with its capital at Seminis and Shi-wu-fen at Loemar. The He-shun federation consisted thus of four gongsis. After the detection of a conspiracy of Keng-wei and Xin-wu together with San-tiao-gou against Da-gang, these He-shun gongsis were dissolved by Da-gang on 8 October 1837, leaving Da-gang now synonymous with He-shun in absolute power in Montrado until 1854. Some members of the Keng-wei and Xin-wu gongsis migrated eastwards to Tajan and northwards to Sarawak, respectively – Extremely Rare, perhaps a unique specimen - VF+ Ref.: .: Yih and de Kreek: The Gongsi cash pieces of Western Borneo and Banka in the Ethnographical Museum at Rotterdam", Numismatic Chronicle 153, 171-96 (1996) (https://www.zeno.ru/showgallery.php?cat=2867); S.H. In 1612 the Dutch concluded a treaty with the Sultan of Golconda to buy of the tolls at Machhlipatan for an annual amount of 3000 “old” Pagodas. In 1676 the were discharged from paying the yearly toll. A firman of 1639 mentions in this connection 3000 “Masulipatan Pagodas”, from which it appears that at that time the were put on a par with the “old” Pagodas. They are also called “old” 3-Swami Pagodas. They were struck at Pulicat and later at Negapatnam, for trade in North Coromandel. The 3-Swami Pagoda was at least struck up to 1758 at Negapatnam. RR XF. 📷 *631*	Tuticorin-Colombo, AV pagoda (3.40 g.) Obv. Rather crude standing Vishnu / rev.: rev.: convex and granulated surface. llikely struck at Tuticorin or Colombo during 1760-1794. From about 1760 Porto Novo Pagodas of the new Negapatnam die (1747 issue) were struck at Tuticorin. (weight 3.406 g., fineness 0,800). These issues probably can't be distinguished from the Negapatnam issues. The fineness, as in Negapatnam, was decreased in 1767 to 0,769. During the period of the Anglo-Dutch war, the mint for precious metals was shifted from Tuticorin to Colombo (1780-1786). During this period Porto Novo Pagodas, with a fineness of 0,625, were struck at Colombo. After the mint at Tuticorin was re-established again (August 1786), the minting of Pagodas seems to have continued till the closure of the mint in 1794. The low gold content indicates that this coin may have been struck at Colombo or during the period 1786-1794 at Tuticorin. Other than by the gold contents, there is no way to distinguish between the issues of either Negapatnam, Tuticorin or Colombo. aXF. Ref.: Scho. 1259; Passon 48.1	*250*

655	Ceylon, AR larin. The larin, also known as "koku ridi" was in use in Kandy from 17th to early part of the 19th century were made by private parties, five of which went to a piece-of-eight, or a Spanish Dollar. The larin was frequently used by the VOC as silver currency and shortage of it caused monetairy problems and the need to produce equivalents in copper (Scho. 1288 & 1295). Lot of 4 different specimen of Ceylon provenance. Average VF.	*50*

656	AE VI stivers or ½ larin (66.47 g.; 126 x 15.84 x 6.30 mm). Colombo, ND (c. 1660-1720). The 6 stiver pieces were made as emergency coins from Japanese copper bars to compensate for the silver larins which were hoarded by the local people and caused for a temporary shortage of silver. The rate of the silver larin, at that time, was 12 stivers and the VI stivers therefore circulated for a ½ silver larin. The Japanese copper bars were struck on each end with the value VI / St within a leafy wreath. Neither lenght (which vary from aprox. 98 to 127 mm.) nor weight is constant. These emergency VI stivers are extremely rare and rarely offered for sale. XF. Ref.: Scho. 1288; Passon 53.4	*2000*

It was decided by a Res. of Colombo dated 1785 Oct. 20, to strike half copper larins in the shape of small bars with two round countermarks on either end and declare them current at the rate of 4 ¾ Indian stivers or half larin, because the rate of the silver larin in 1785 was 9½ stivers. This is the reason for this rather odd denomination and for this reason one of the most commonly imitated VOC-coin of Ceylon. Genuine examples therefore are rarely offered for sale. Please make sure to submit your absentee bids in time.
See page 7 for the deadlines.

Advice:
Take a look on our website www.ha-europe.com.
You will find the photos of all lots, including those not published in our catalogue.

Another advice:
Enter your postal bids at www.ha-europe.com. This prevents errors and lost bid slips.
Your bids are also processed faster, which provides a time advantage of up to 48 hours.
This is important when equal bids are placed.
You will also receive immediate feedback and the option to increase your bid if necessary.

FOURTH SESSION

Fourth session, Thursday May 25, 2023

09.30 hours CEST

Currency (5400-6554) with livebid 

Please make sure to submit your absentee bids in time.
See page 7 for the deadlines.

Advice:
Take a look on our website www.ha-europe.com.
You will find the photos of all lots, including those not published in our catalogue.

Another advice:
Enter your postal bids at www.ha-europe.com. This prevents errors and lost bid slips.
Your bids are also processed faster, which provides a time advantage of up to 48 hours.
This is important when equal bids are placed.
You will also receive immediate feedback and the option to increase your bid if necessary.

Be in time with your bids! Use the online bidding system on our website www.ha-europe.com, send them in by email to info@ha-europe.com, or hand them to us in person.
Best of luck!

6893	10 Cents Yr.20 (1931) - Antimony (KM429, Hsu1, Zeno285555) - Obv: Chinese legend Chung Hua Min Kuo Nien / Rev: Sun within beaded circle - 5.10 g. - NGC VF Details, cleaned (5786156-005), rare coin, the only Chinese coin struck in antimony, maybe more attractive looking than the grade suggests, Guizhou (Kweichow) had a great shortage of copper coins and had to rely on Szechuan for coin supplies during the early Republican era. With the intention to reduce Szechuan's influence, the Kweichow government planned to cast its own copper coins but failed; because Kweichow was rich in lead and antimony, but had little copper. The Kweichow government was, therefore, forced to revise its plan and to mint antimony coins instead. According to the revised plan, the mintage was 500 thousand, each one had a face value of 10 Wen, and the issuing year was the 20th Yr. of the Republic of China (1931). The plan, however, was not executed smoothly. Firstly, the Arsenal of Kueiyang, which was responsible for minting the antimony coins, didn't have enough capacity in meeting the time schedule and output as demanded. The antimony coins were delayed in issuing for 2 years, they were not put into circulation until in the 22nd Yr. of the Republic of China (1933), even though their surfaces were all inscribed with the 20th Yr.. Secondly, immediately after the antimony coins were put into circulation in the markets, the Kweichow government came to know that they were not welcomed by the people, as the antimony was too soft and easily worn. Due to it, the market value of the antimony coins had been depreciated to one quarter of its face value. As a result, the Kweichow government has to give-up its plan. Those antimony coins now are renowned not just for what it was made of (it seems the only coin in the world made of antimony), but also for the scarcity of surviving specimens, particularly those in good condition	*500*

Beginning April 1618 (Julian calendar), Jahangir entered in his diary an innovation in coinage "Prior to this, it has been the rule that one side of gold coins my name has been engraved, and on the other side the name of the minting place, the month, and the regnal year. Around this time it occurred to me that instead of the month a figure of the constellation representing the month should be depicted. For example, for the month of Farwardin a figure of Aries could be made, and for the month of Ardibihisht the figure of Taurus, and so on for every month in which a coin was minted one side would bear a picture of the constellation in which the sun rose. This method is peculiarly my own and has never been used before." (The Jahangirnama)	*250*

The mint of Sheopur must have closed about 1860 and as the style and calligraphy of the coin differs considerable from the Sheopur issues (KM.203), it is assumed that it was struck, as a commemorative issue, at a different mint, most likely Lashkar. Presuming the regnal year may be of the British Raj, the coin may have been struck about 1874, which coincides with the issue of similar style Chandori-type coins at Lashkar	*30*

7254	Rupee-sized AE uniface trial strike of the improved ‘Char Minar’-design, ND (probably 1902-1903) - 30 mm, 9.31 g., edge with straight milling - good VF, because of the trouble and loss on account of the handmade currency, the Hyderabad Government decided to make a machine made currency of a more intricate design which could not be easily copied by counterfeiters. For this reason in 1319H. (1901/02) over 700,000 Rupees of the Char Minar-type were struck and sent to the Central Treasury. They were however rejected before they went into circulation because of poor design and other imperfections and subsequently withdrawn from the Treasury to the Mint, melted and in 1321H. re-coined with a new “Char Minar”-design, which type became current up to the demonetisation of the Hyderabad currency in 1953. The Char Minar on the 1321H. and subsequent issues look much more slender than on the issue of 1319H. As the issue of 1319H. was most probably rejected on account of the somewhat clumsy design of the Char Minar an improved design was required, which is shown by this pattern (Ref: The introduction of machine-struck coinage in the state of Hyderabad, by Jan Lingen ONS-NL 153 (1997) p.13-19, #28)	*200*
