

Introduction to Line Sweeping Principles Training Course

Specialized Line Sweeping Principles Training using any Vendor's Line Sweeping Product

An intense one-day instructor led training course that focuses on line sweeping principles. Bring your own line sweeping instrument regardless of manufacture and we will teach you how to use it.

- **Hands-on:** Learn by doing the task and not by watching. 50% of the course is hands-on.
- **Critical Emphasis:** Fine tune the points and techniques that are of particular importance to your operations. Our skilled instructors and staff can tailor the module to meet your requirements.

Schedule: Training sessions can be easily scheduled months in advance. Get more specific details regarding class location, including information on discounts or having a dedicated training session at your company site.
