STANDARD OVERHAUL PRACTICES MANUAL

Revision No. 33
Jul 01/2009

To: All holders of INTRODUCTION 20-00-00.

Attached is the current revision to this STANDARD OVERHAUL PRACTICES MANUAL

The STANDARD OVERHAUL PRACTICES MANUAL is furnished either as a printed manual, on microfilm, or digital products, or any combination of the three. This revision replaces all previous microfilm cartridges or digital products. All microfilm and digital products are reissued with all obsolete data deleted and all updated pages added.

For printed manuals, changes are indicated on the List of Effective Pages (LEP). The pages which are revised will be identified on the LEP by an R (Revised), A (Added), O (Overflow, i.e. changes to the document structure and/or page layout), or D (Deleted). Each page in the LEP is identified by Chapter-Section-Subject number, page number and page date.

Pages replaced or made obsolete by this revision should be removed and destroyed.

ATTENTION

IF YOU RECEIVE PRINTED REVISIONS, PLEASE VERIFY THAT YOU HAVE RECEIVED AND FILED THE PREVIOUS REVISION. BOEING MUST BE NOTIFIED WITHIN 30 DAYS IF YOU HAVE NOT RECEIVED THE PREVIOUS REVISION. REQUESTS FOR REVISIONS OTHER THAN THE PREVIOUS REVISION WILL REQUIRE A COMPLETE MANUAL REPRINT SUBJECT TO REPRINT CHARGES SHOWN IN THE DATA AND SERVICES CATALOG.

STANDARD OVERHAUL PRACTICES MANUAL

INTRODUCTION

1. General

- A. The instructions in this manual tell how to do standard shop procedures during maintenance functions from simple checks and replacement to complete shop-type repair.
- B. This manual is divided into separate sections:
 - (1) Title Page
 - (2) Transmittal Letter
 - (3) Highlights
 - (4) Effective Pages
 - (5) Contents
 - (6) Revision Record
 - (7) Record of Temporary Revisions
 - (8) Introduction
 - (9) Procedures
- C. Refer to SOPM 20-00-00 for a definition of standard industry practices, vendor names and addresses, and an explanation of the True Position Dimensioning symbols used.
- D. The data is general. It is not about all situations or specific installations. Use it as a guide to help you write minimum standards.
- E. If the component overhaul instructions are different from the data in this subject, use the component overhaul instructions.

STANDARD OVERHAUL PRACTICES MANUAL

INTRODUCTION - STANDARD PRACTICES

1. GENERAL

- A. The Boeing Standard Overhaul Practices Manual (SOPM), Document D6-51702, contains a Title Page, a Revision Record Page, a List of Effective Pages, a Table of Contents, and the individual standard overhaul practice manuals. These manuals are prepared by Boeing Commercial Airplanes Group.
- B. Each individual manual contains a Title Page, List of Effective Pages, Table of Contents, and the technical data for standard practices used during the overhaul of Boeing proprietary components. The technical data supplements data contained in the component-specific Boeing Commercial Jet Overhaul and Component Maintenance Manuals.
- C. The technical data is collected from Boeing Process Specifications. Details are added or changed with service experience. The data is general. It is not about all situations or specific installations. Use it to help you write minimum standards.
- D. Throughout the overhaul instructions, in the SOPM as well as in the component-related overhaul instructions, appears the phrase "standard industry practices." This can be defined as follows:
 - (1) Those practices which are within the limits of "good engineering practice."
 - (2) Those practices which are typical of mechanics who have the necessary license(s) to do work on the airplane and its parts and related equipment.
 - (3) Those practices locally used by each operator, such as an airline or a repair facility, which are their usual procedures.
 - (4) Those practices which are not new, special, or specified by the manufacturer.

2. MANUAL IDENTIFICATION

- A. We put the manuals into different groups because of the different types of data. Each manual has a special manual number.
- B. Each manual number has six digits, in three two-digit parts.
 - (1) The first part is 20 as specified by Air Transport Association Specification 100 for standard practices.
 - (2) The second part is the section number, and puts the manuals into groups. Each group is about a different type of data, as follows:
 - (a) 00 thru 09 is for introductory data
 - (b) 10 thru 19 is for repair and replacement procedures
 - (c) 20 thru 29 is for inspection procedures
 - (d) 30 thru 39 is for cleaning procedures
 - (e) 40 thru 49 is for finishing procedures
 - (f) 50 thru 59 is for installation procedures
 - (g) 60 thru 69 is for lists of specifications and materials
 - (h) 70 thru 79 is for protection, packaging and storage procedures
 - (3) The third part is assigned in numerical sequence. It identifies one individual manual; that is, all pages about a specified subject.

20-00-00

STANDARD OVERHAUL PRACTICES MANUAL

3. LISTS OF EFFECTIVE PAGES

- A. Each individual manual has a list of effective pages (LEP). The LEP is a list of all pages in that manual with the date of the latest revision to each page. This list will show if your copy of that manual contains the latest pages. The SOPM Front Matter Introduction has a numerical index of the manuals in the SOPM, equivalent to a traditional Table of Contents, which gives the date of the latest revision for each individual manual, which will show if your copy of the LEP for a manual is up to date. The SOPM Front Matter Introduction LEP shows the latest date of the index pages, which will tell you if your copy of the Table of Contents is up to date.

4. SOURCE DOCUMENT CROSS-REFERENCE

- A. Some of the manuals include procedures from Boeing Process Specifications and other source documents. Here is a list of these source documents and their equivalent SOPM subjects. This list does not include source documents which are only referenced in the manuals.

6. VENDORS

- A. In the SOPM, we refer to vendors by name or, if applicable, their assigned Commercial and Government Entity (CAGE) code number.
- (1) The CAGE codes are listed in the Federal Cataloging Handbook H4/H8, and are also available on-line from the Business Identification Number Cross-reference System (BINCS) at https://www.bpn.gov/bincs/begin_search.asp.
 - (2) Codes that end in B, such as V0395B, were assigned by the Boeing Spares organization for vendors not in the Federal Cataloging Handbook H4/H8 or BINCS.
- B. The lists below give you the codes, names, and mailing addresses of the vendors referred to in the SOPM.
- C. Vendors with no code:
- ALCOR CHEMICAL CO., INC., 9328 BERNICE, SCHILLER PARK, ILLINOIS 60176 (SOPM 20-60-01)
- CHICAGO CIRCUIT DRILLING CO., 8331 ARTESIA BLVD., BUENA PARK, CALIFORNIA 90621 (SOPM 20-11-01)
- CUSTOM COMPONENTS LTD., UNIT 3, FELTRIM BUSINESS PARK, SWORDS CO., DUBLIN, IRELAND (SOPM 20-50-19, BAC5000 PAR. 5.7)
- DEVONSHIRE CONSULTING AND MARKETING LTD., UNIT 19, THE BUSINESS CENTRE, EVERITT CLOSE, WELLINGTON NORTHANTS, UNITED KINGDOM NN8 2QE (SOPM 20-10-02, BAC5436)
- ELNIC, INC., 657 MASSMAN DRIVE, NASHVILLE, TENNESSEE 37210 (SOPM 20-42-08)
- MICRO PRECISION DIV. OF MICROMATIC HONE CO., LOS ANGELES, CALIFORNIA (SOPM 20-30-01)
- MICROTECH CORP., PASADENA, CALIFORNIA (SOPM 20-30-01)
- PNJ MACHINING INC., 2601 INTER AVE., PUYALLUP, WASHINGTON 98372 (SOPM 20-50-19, BAC5000 PAR. 5.7)
- UTD CORP. (SOPM 20-11-01, BAC5891, BSS7010)
- D. Vendors with Commercial and Government Entity (CAGE) codes. (Refer to the latest issue of the Federal Cataloging Handbook H4/H8 or BINCS for up-to-date information).
