MODEL: Super G3 Fax Board-J1
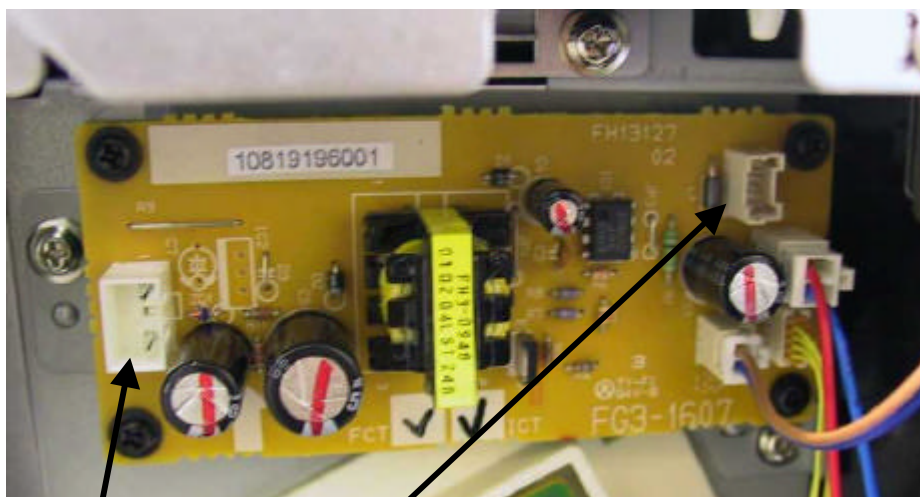

SUBJECT: Installation of Fax Board-J1

Details:

The Super G3 Fax Board-J1 is now available for the iR2200/2800 and 3300 models.

It has been brought to our attention that the installation procedure provided with the fax board, *(page 3, item 5),* shows 2 cables from the fax board connecting to the off hook detection PCB. In fact only one cable will be present.   When installed, a total of three cables are connected to the off hook detection PCB, leaving two connectors unused.

To / From Fax Board J1

THESE CONNECTORS ARE NOT USED

< Upgrading >

The host iR should be upgraded to system firmware version 11.02 or higher.

< Product Fax Drivers >

At the time of writing this ATI, no fax drivers are supplied in the box with the Fax Board-J1. The correct version to use is V1.50 for Windows and this is available via the Canon Intranet/Dealernet.

> **NOTE:**   No fax drivers are currently available for Apple Mac.
