

MODEL: iR2200i & iR3300i

SUBJECT: Launch of Models to the UK Marketplace

Detail:

<Overview >

The iR2200i and iR3300i models have now been launched by Canon UK Ltd and are essentially, 'intelligent' updates of the existing iR2200, 2800 and 3300 products.

Please note that there is no iR2800i

The purpose of this ATI is to cover the main hardware differences between the current iR (Image Runner) products and the new iRi (Intelligent) models. The iR2200i and iR3300i models come in 2 boxes. The main body of the machine in one box and the scanner assembly, with DADF-H1 already attached, in the other. Fitting these two units together is fairly straightforward, however, care must be exercised when lifting the scanner assembly – B1. This is due to the weight and the bulky nature of the product. These products are supplied with DADF-H1, Printer Board Kit C1 and Super G3 Fax Board–J1 as standard. The most obvious visual difference is the larger colour LCD touch screen.

< Installation >

The procedure for this can be found as a separate file, stored with this ATI on Notes/Intranet/Dealersnet under Product Technical Bulletins.

Filename iR2200i install pro.pdf

< Training >

No additional hardware technical training will be necessary due to the similarity with the earlier iR2200 Series. The 'intelligent' features are covered by the IPO (Intelligent Product Overview) course and is targeted at the Systems Technicians

< Consumables >

The iR2200i and iR3300i use the same drum and toner as the earlier products. The MSDS database and CE Certifications have been updated.

< Spare Parts >

The Parts Catalogue is available on microfiche, part number FY8-31FV-F000, or on the iR2200 Series compilation CD Rom, part number CD-iR2200-01Z.
