

Model: iR2200/2800/3300/
iR2200i/iR3300i

Ref. No. : FF-T01-L5-000035-01

Date : September 27, 2002

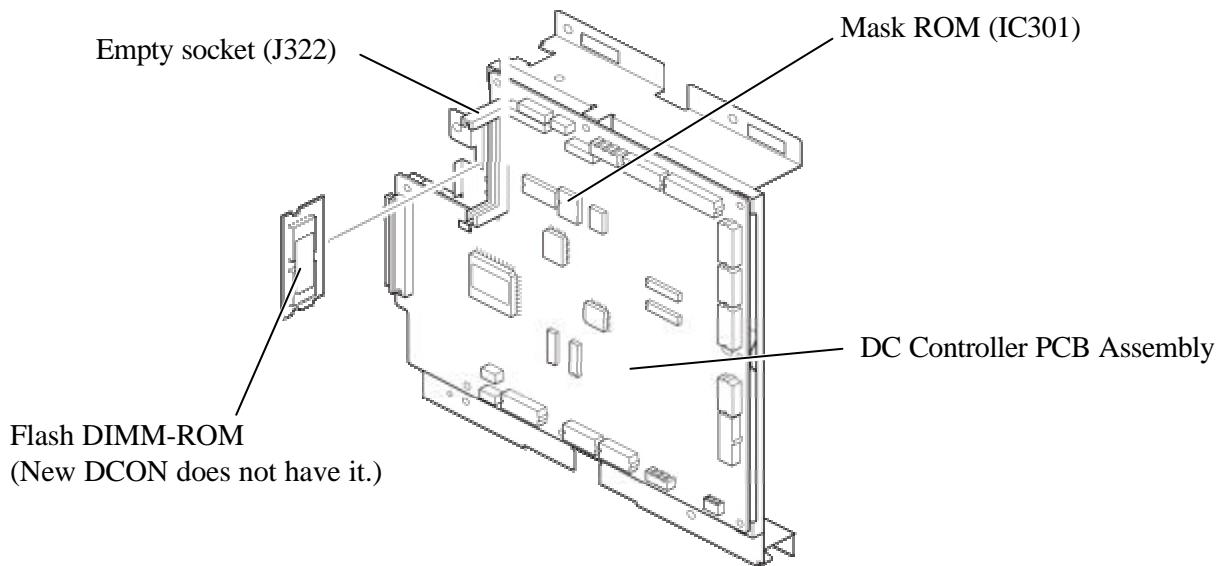

© Canon (UK) Limited

Location: DC Controller PCB Assembly

Subject: Masking Flash DIMM-ROM of DC Controller PCB Assembly

Reason: For manufacturing reasons, masking Flash DIMM-ROM of DC Controller PCB was carried out.

Detail: The contents of Flash DIMM-ROM will be masked and masked ROM (IC301) will be attached directly to DC Controller PCB. Therefore, Flash DIMM-ROM of DC Controller will be abolished. Former Socket (J322) of Flash DIMM-ROM is empty. With the deletion of the flash DIMM-ROM, the part number of the DC controller PCB remains unchanged.

Points to Note About Service Work:

Leave former Flash DIMM-ROM as a service parts and they will be supplied continuously.

Affected Machines:

| Model | Destination | Serial No. |
|---------|-------------|--------------------|
