

FX made in sweden *airguns*

AIR TO A GREAT TRADITION

I've been shooting since I was four years old. I'm 50 now, and I can shoot pretty much any type of rifle, shotgun, or pistol I want to, in a wide variety of situations. While I enjoy all types of shooting, my true passion is for airguns; it's where I began my shooting career and it's provided me with everything I need throughout my shooting life.

As I grew and improved my range of shooting skills, my airguns grew with me and I became ever more fascinated by how they worked, how they could be improved and how I could improve the way I used them. My shooting became a passion, and airguns were the focus of that passion.

From those early times, all the way to the present, I've shared my sport with some remarkable people, who also shared my passion. Inventors, engineers, world-class marksmen, hunters of all descriptions and a whole range of experts and enthusiasts have inspired me and increased my enjoyment of shooting. Among these remarkable people was a young man from Sweden, who was introduced to me by John Ford, the founder of Sportsmatch UK. As I exchanged pleasantries with Fredrik Axelsson that day, I couldn't have known that I was shaking hands with someone who would go on to change the face of modern airgunning.

After our first meeting, Fredrik and I went our separate ways, but I would receive regular updates from John Ford about the discoveries made by Fredrik and how much the young man's industry and inventiveness had not only impressed John, but had inspired new directions in his own developments. John Ford once told me that he considered Fredrik Axelsson to be the most talented airgun engineer he'd ever met. Praise indeed, from a man respected throughout the airgun industry, not just for his achievements, but for his honesty and integrity. John Ford spotted something special in Fredrik Axelsson and that faith was well founded. The potential of Fredrik's early years has now come to full fruition via FX Airguns.

Like John Ford, Fredrik Axelsson and every airgun hunting expert I've had the pleasure to meet throughout my years of shooting, I use air rifles because I appreciate their quiet, efficient, precision. Modern air rifles, and especially those produced by companies with the worldwide reputation of FX Airguns, are capable of total accuracy, extraordinary consistency, and a variety of power outputs to suit an even wider variety of hunting and pest-control situations. The modern air rifle is a precision hunting machine that will translate

the skills of its owner into success in the field. But there's more to hunting with airguns than their pure efficiency.

Air-powered hunting rifles from FX Airguns can be used where no other rifle would be suitable. The ability to adjust the power of these rifles renders them safe, silent and extremely efficient when clearing rats and pigeons from buildings and other short-range situations, after which the rifles can be instantly adjusted to cope with small game at greater ranges. Few, if any, hunting rifles offer the versatility of an FX Airguns sporter.

These virtually recoilless rifles can easily place their shots inside a 20mm circle at 50 metres range, and the auto-reload capability of an FX air rifle can have the next shot ready in less than a second, with the semi-automatic models even faster. Fit a silencer to the ready-threaded barrel and you instantly add stealth to your hunting armoury. The modern air rifle opens a vast new world of sporting potential.

On several occasions, I have personally taken over 100 rabbits in a single night, using an FX Airguns hunting rifle. I have also used the very same rifles to clear infestations of feral pigeon from premises where only the precision culling capabilities of my FX rifles made the job viable. With near-silent shooting at my disposal, and the ability to take shot after shot without the disturbance of loud muzzle-blasts, my air rifles equip me like no other piece of shooting hardware possibly could. Air-power is one of the most practical and versatile systems of them all, and FX Airguns takes that system to a new level.

Having enjoyed the use of FX Airguns over the years, I wanted to find out more about them and to see how they were made. In June of 2006 I visited the FX Airguns factory and saw for myself what Fredrik Axelsson had built from his

ideas and inventions. No shooting man could fail to be impressed by the degree of research, pre-production testing and quality control involved in the production of FX airguns. Like the airguns themselves, the emphasis is on quiet precision and performance to the highest standards.

For me, it was gratifying to see the drive and passion that so impressed those that met Fredrik Axelsson when he began his career, had not only been maintained, but increased. Experience and the encouragement of success have added even greater direction to the quest for ultimate performance, and, at FX Airguns, innovation is now part of the process. This is a company that makes fine airguns, and then strives to make them finer still. There is a genuine commitment to excellence, here, and it's certainly reflected in the products.

Since meeting up with Fredrik Axelsson and spending time studying his methods and products, I now realise that the key to the success of FX Airguns is an extremely simple one. Fredrik is passionate about what he does and the airguns his company produces reflect that passion. Only the very best is good enough for Fredrik Axelsson, and he applies that standard to the needs of his customers. Therefore, whilst the products may be hi-tech and clinically efficient, the philosophy behind them is refreshingly traditional. I think that's just about the perfect combination, really.

There has never been a better time to own a high quality airgun. Thanks to pioneering inventors like Fredrik Axelsson, airguns and their related products have progressed as never before. These are genuine sporting arms, and fully capable of true hunting performance. I've enjoyed a lifetime of pleasure, challenge and satisfaction from my airguns and I know that FX Airguns can provide the same for you.

Happy airgunning

Terry Doe

Terry Doe is a former European, U.S. and U.K. Field Target shooting champion, a prolific author on airgun-related subjects and a consultant for many of the U.K.'s airgun companies.

FXtyphoon

A lightweight single shot rifle with few moving parts that settles for many years of trouble free shooting. Available in lightweight synthetic or walnut that fits both left and right hand shooters. Bolt action cocking with safety mode Recoil free.

Cocking system	Bolt action

Adjustable bottle cover

Removable 8-shot magazine

FXrevolution

The Revolution takes airguns to the next level with it's fast-fire semi automatic system. Wasted air is used to cycle the bolt and index the magazine and along with a new 12 - shot magazine it allows more shots while reducing the time between shots to zero! Due to the efficiency of the semi automatic system it's extremely quiet without the use of any additional components.

The manual bolt lever enables the rifle to be safely loaded and refilled without any risk of misfire. Along the right side of the Revolution is a cleverly designed safety that prevents the semi automatic rifle from firing. The Revolution is sure to supply rapid fire enjoyment along with single shot precision, and it stands alone with nothing in its class to compare with. Ambidextrous synthetic stock with adjustable bottle cover/check piece (length/angle). Recoil free pneumatic air rifle.

Cocking system	Semi automatic

240cc - 500 mm • 185 cc - 390 mm • 150cc - 320 mm

65cc - 140 mm • 45cc - 100 mm

Rear bottles:

500 cc and 400 cc

Maximum fill pressure 220 bar.

FX Hand pumps

The easiest most convenient and affordable way to charge your airguns. Patented three way system gives you 200 bar with ease. fill pressure 250 bar.

Features: Pressure gauge, moisture trap, particle filter (replaceable), and bleed valve.

Connections: DIN or Kevlar hose 0,5 m with 1/8" thread.

FX Pellets

High performance domed (round tip) air rifle pellets. Recommended for all FX products.

Calibre: 5,52 (.22)
weight 1,030 grams
(16 grains)

Calibre: 4,52 (.177)
weight 0,547 grams
(8,44 grains)

Charging kit

Complete charging device for your scuba tank.

Features: Pressure gauge, particle filter (replaceable), and bleed valve.

Connections: Kevlar hose 0,5 m with 1/8" thread / FX Fill probe and DIN in scuba end.

Pump accessories

Various adapters DIN to 1/8". External moisture trap, easy to service and clean, 1/8" connections.

Cleaning pellets

Recommended for all FX guns. Outstanding cleaning without damage to the barrel. Available in 4,5 (.177) and 5,5 (.22).

Tube clamp

Allows easy addition of a sling, strap, bipod or other accessory without any modification to the fore end of the stock. Suitable for all airtubes with a diameter of 33 mm.

Barrel support

Requires newer version air cylinder with raised section on end cap. Available for standard (14 mm). barrel and shrouded versions (16 mm). Replacement end cap is required if an older version of cylinder. Is to be used with barrel support.

Tube extension

Add this to your existing airtube for additional volume. Approximately 5 - 10 more shots at high power. 45cc - 100 mm.

Muzzle Flip

Suits all FX Rifles with 1/2" thread on the muzzle. Mounted as standard on the Verminator

FX Magazines

Spare magazines in calibre 4,5 (.177) and 5,5 (.22). State type of gun when ordering.
