Mark Johnston, RCDD
Strategic Alliance and Planning Manager
Fluke Networks
10105 East Via Linda
#103 PMB 364
Scottsdale, AZ 85258

Dear Mr. Johnston,

NORDX/CDT has completed the evaluation of Fluke Networks' Personality Module PM25. We are pleased to announce the approval of the module for use in the performance verification of NORDX/CDT's IBDN GigaFlex 1200, 2400 and 4800LX cabling systems.

The evaluation was made in our laboratories using the associated *DSP-LIA101 Universal Permanent Link Interface Adapter* and the *DSP-4300 Digital Cable Analyzer* unit. The results obtained correlate with the high performance values of our IBDN GigaFlex cabling systems.

We look forward to continued cooperation in working hand-in-hand with Fluke Networks in the future.

Regards,

Julie Roy, RCDD/LAN
IBDN Technical Support and Certification Manager
