## Conventions for Alert Messages

This manual uses alert messages to prevent users and bystanders from being injured or from suffering damage to their property. An alert message consists of an alert signal and alert statements. The alert signals and their meanings are as follows.

### **WARNING**

WARNING indicates that personal injury like pinching of fingers or hands may result if you do not follow a procedure correctly.

### **CAUTION**

CAUTION indicates that damage to the scanner may result if you do not follow a procedure correctly.

### **NOTE**

A NOTE provides “how-to” tips or suggestions to help you perform a procedure correctly.

# Preface

This manual explains how to clean and maintain the M4097D image scanner.

The M4097D is a highly functional image scanner developed for volume filing, using charge-coupled device (CCD) image sensors. This scanner features duplex scanning and high quality image processing with an automatic document feeder (ADF).

Refer to the Operator's Guide for basic information about the M4097D.

# DESCRIPTION

---

*This chapter describes units, assemblies, indicators and LED functions.*

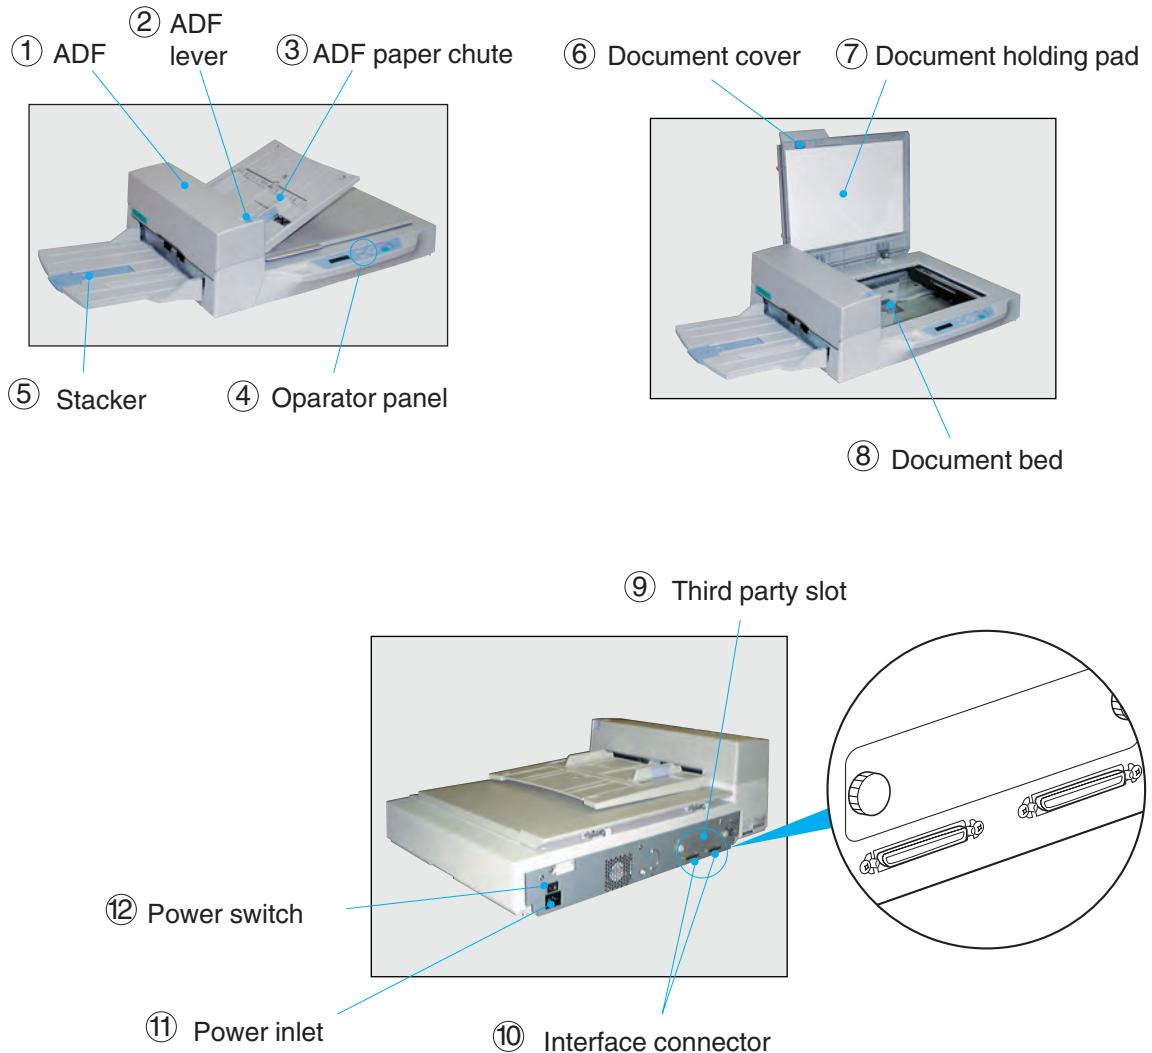

**Units**

**Assemblies**

**Operator Panel**

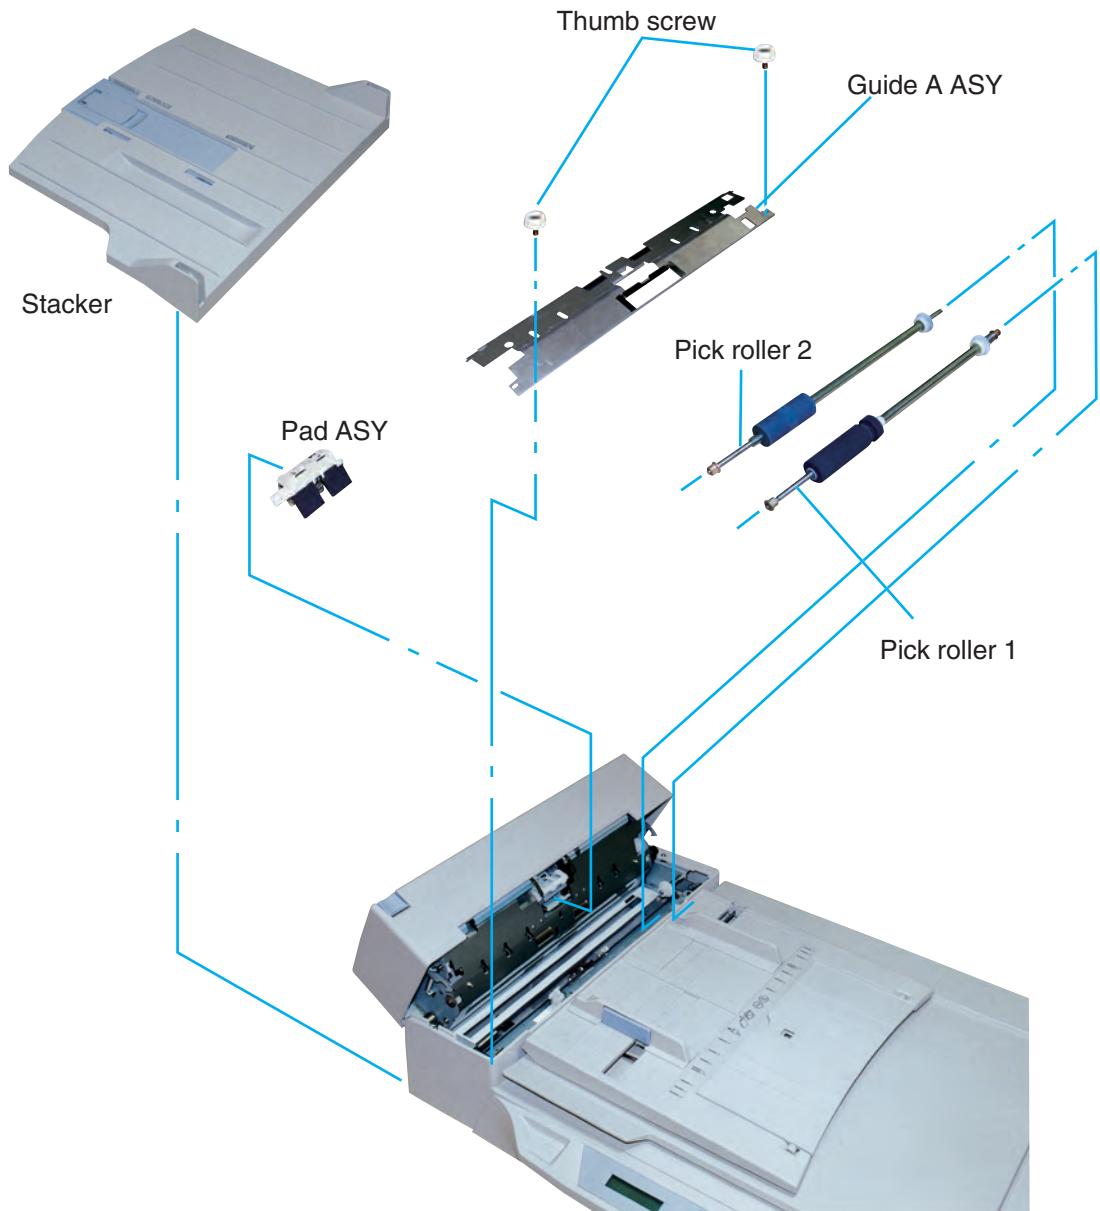

**Panel Display**

## Units

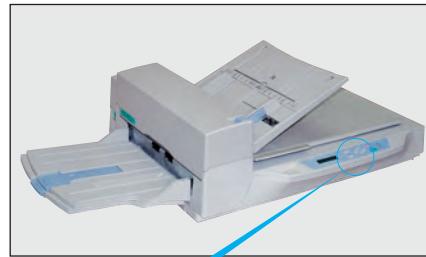

Nº	Function
①	Automatically feeds documents to the reading position.
②	Opens/closes the ADF to enable the removal of documents jammed in the feeder.
③	Holds the documents to be fed by the automatic document feeder (ADF).
④	Contains indicator panel that indicates scanner status.
⑤	Stacks the read documents.
⑥	Closes over and keeps in place the document to be read.
⑦	Presses document to the Document bed.
⑧	Holds document to be read. Also called Flatbed (FB).
⑨	A Fujitsu Video Interface Option Board is installed.
⑩	Connects to the host system with interface cables.
⑪	Connects to an AC power outlet with the power cable.
⑫	Turns the power On or Off.

## Assemblies

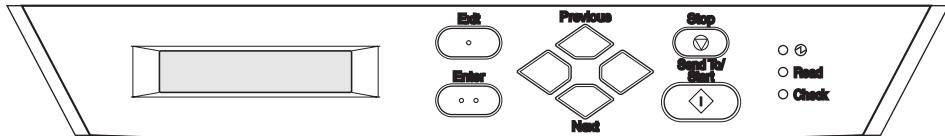

## Operator Panel

The Operator panel is located on the upper right hand side of the scanner. The panel consists of an LCD (16 characters x 2 lines), LEDs, and buttons.

Operator panel

### ■ Arrangement

# Panel Display

## ■ Button/LED Function

Name of the button and LED		Function
Button	Next 	Displays the next LCD screen.
	Previous 	Displays the previous LCD screen.
		Moves the cursor to the left.
		Moves the cursor to the right.
	Exit	When you are entering settings on the Operator panel, pressing this button returns you immediately to the "Scanner Ready" screen.
	Enter	Enters the parameter currently selected by the cursor.
	Send To/ Start	Operational only when Manual start mode is set or the "Read" lamp lights; Starts the reading when video interface option is used. Some application software packages make use of this button.
	Stop	When the "Check" LED lights, pressing this button releases the error status (turns off "Check" and returns to the "Scanner Ready" screen). Operational only during the reading operation; stops the reading when the video interface option is used. Also turns off the "Check" lamp.
LED		Indicates that the scanner is On.
	Read	Indicates the scanner is reading or ready to read.
	Check	<ul style="list-style-type: none"><li>• If lit, this indicates that an alarm occurred. Pressing the "Stop" button turns the "Check" lamp Off.</li><li>• If it blinks at one second intervals, this means that a jam or double feed has been detected. If the problem is jammed paper, removing the jammed paper turns off the "Check" lamp. If the problem is double feed, pressing the "Stop" button turns off the "Check" lamp.</li><li>• If it blinks at four seconds intervals, this means that cleaning the ADF is necessary.</li></ul>

## Counter Display

Batch counter and Abrasion counters are shown bellow:

Simultaneously press the both  $\diamond$  (Left) and  $\diamond$  (Right) button for at least one second, to switch to the Life counter panel display as shown bellow:

To return from “Fig.2” to “Fig.1”, press the both  $\diamond$  (Left) and  $\diamond$  (Right) button for at least one second.

Counter	Function	
Paper counter	When the  button is pressed	The paper counter counts the number of scanned sheets from the start of reading until Paper Empty or an error is detected. The counter is automatically reset at the start of reading. The counter is used for checking the number of the sheets scanned in one batch.
	When the  button is pressed	This counter increments each time a document is scanned. It is not initialized until the power is turned off. The counter can be used, for example, for checking the number of sheets that have been scanned in one day.
Abrasion counter	The abrasion counter counts the accumulated number of scanned sheets. This counter increments every 10 sheets. It is useful to check the cleaning cycle or the parts replacement cycle. How to reset it is described in Chapter 6.	
Life counter	keeps a cumulative count of the number of scans made after shipping. This counter is increased by one per sheet and may be used to estimate of the device's remaining scan life. This counter cannot be reset.	

 **NOTE**

When the counter value is 0, no number is displayed.

## ■ Operation status

The operation status is indicated by the following messages:

<Not Ready>

W a r m i n g - u p N o w ! !

<Reading>

N o w R e a d i n g !

<Waiting for Start>

S t a r t S W O N !

The scanner displays the following screen when waiting for the Start button to be pressed:

(Only When the Video Interface Option is installed.)

<Reading>  
(Cleaning request)

When the Pick roller cleaning is necessary, the scanner displays the following on the upper line:

C l e a n A D F G l a s s  
N o w R e a d i n g !

When the ADF glass cleaning is necessary, the scanner displays the following on the LCD:

C l e a n P i c k r o l l e r  
N o w R e a d i n g !

Clean the Pick roller or the ADF glass in accordance with the manual, "Cleaning and Maintenance".

<Power-on>  
(Preparing the print cartridge)

P l e a s e   p r e p a r e  
a   n e w   I n k

<Waiting>

When the messages of LCD on the Operation panel disappears and the Power LED lamp lights, the scanner is in Low power mode.

<Reading>  
(Preparing the print cartridge)

P l e a s e   a   n e w   I n k  
N o w   R e a d i n g !

<Waiting>  
(Pick roller cleaning request)

C l e a n   P i c k r o l l e r  
R e a d y   x x x x x 0

<Waiting>  
(ADF glass cleaning request)

C l e a n   A D F   G l a s s  
R e a d y   x x x x x 0

<Waiting>  
(Pick roller and ADF glass cleaning request)

C l e a n   P i c k r o l l e r  
C l e a n   A D F   G l a s s

## ■ Temporary error

<Hopper empty>

P a p e r   E m p t y

This message is displayed if there is no more paper on the ADF paper chute during a read operation in ADF mode. Fill the ADF paper chute with paper. To enable the read operation, press the stop button.

<Jam>

P a p e r   J a m

This message is displayed if a document is jammed in the ADF. See the “Cleaning and Maintenance” manual for removing jammed documents.

<ADF cover open>

A D F - C o v e r   O p e n

This message is displayed when the ADF detects the Double feed error. Check the document and re-scan the document.

<Double feed error>

D o u b l e   F e e d

This message is displayed if the ADF is not closed completely. Close the ADF completely, and enable the read operation.

<Waiting>

(When double feed occurs)

D o u b l e   F e e d   x x x x  
R e a d y   x x x x x 0

<Reading>

(When double feed occurs)

D o u b l e   F e e d  
N o w   r e a d i n g !

<Hopper empty error>  
(When the double feed error is  
displayed)

D o u b l e   F e e d  
P a p e r   E m p t y

<Ink cartridge empty error>

N o   I n k   C a r t r i d g e

<Print disposition/document  
error>  
(Paper empty)

P r i n t   A l a r m

## ■ Alarm

One of the following messages is displayed if an error occurs in the scanner. If one of the following error messages is displayed, turn the power Off and then On again. If the same message is displayed, contact your service representative.

<Optical alarm front>

Front Side  
Optical Alarm

<Optical alarm back>

Back Side  
Optical Alarm

<FB mechanism alarm>

Flatbed  
Mechanical Alarm

### NOTICE

When the total number of sheets scanned by the ADF is less than 100, the message above and the message below are displayed alternately. Remove the bracket (Shipping Lock) that holds the carrier in place.

Check Shipping  
Lock

<Motor fuse alarm>

Motor fuse Alarm

<Lamp fuse alarm>

Lamp fuse Alarm

<Image transfer alarm>

I m g   T r a n s   A l a r m

<Memory alarm>

M e m o r y   A l a r m

<EEPROM alarm>

# CLEANING

---

*This chapter describes cleaning supplies, areas that require cleaning, and procedures for cleaning the ADF and the flatbed.*

## Cleaning Supplies and Areas Requiring Cleaning

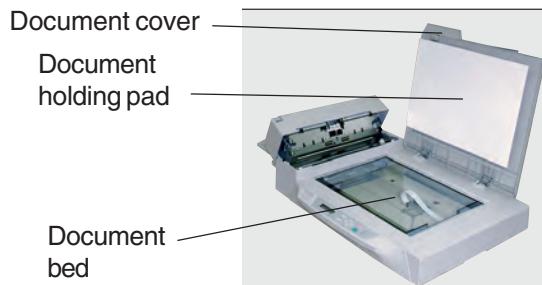

### Supplies

### Areas Requiring Cleaning

### Cleaning the ADF

### Cleaning the Flatbed

# Cleaning Supplies and Areas Requiring Cleaning

## Supplies

Cleaning Supplies	Type No.	Frequencies (*1)(*3)	Remarks
Cleaning sheet		Contact your dealer or distributor	Every 5,000 sheets
Cleaner F2		• Plastic rollers (*2)	1 bottle Apply Cleaner F2 to cotton swab.
Cleaner F1 or Isopropyl alcohol		• PAD assembly Every 5,000 sheets • Pick roller/Feed rollers/ Glass/Sheet guide Every 5,000 sheets	1 bottle. Apply Cleaner F1 to cloth.
Cotton swab			
Dry cloth			

\*1 If the display on the operator panel shows "Please clean Pick-roller", then clean it regardless of the frequencies recommended here.

### CAUTION

\*2 Do not clean the rubber rollers with cleaner F2.

### NOTE

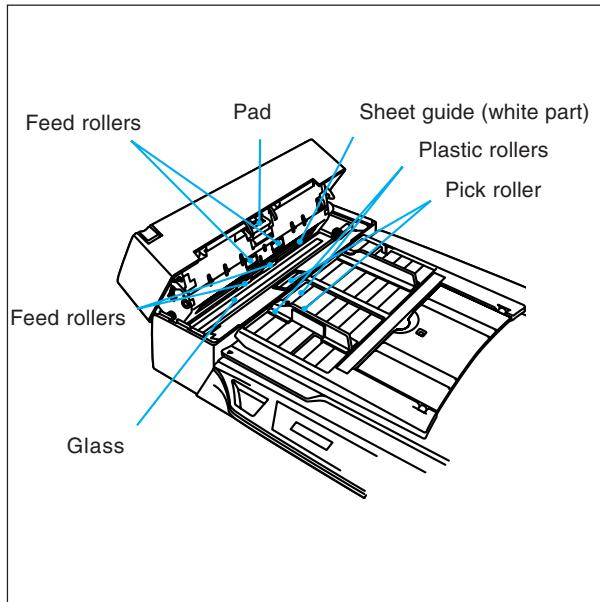

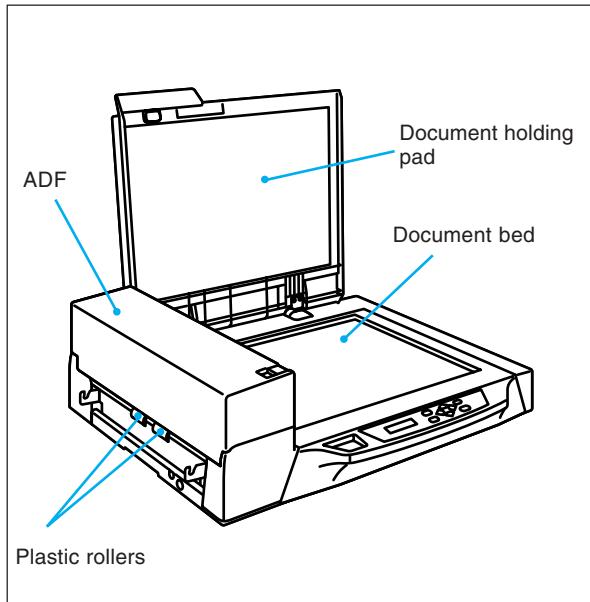

When the following paper types are used, it may be necessary to clean more frequently:

- Paper with a smooth surface, such as coated paper.
- Paper almost entirely covered with printing.
- Paper with special chemical coatings, such as carbonless paper.

\*3 Refer to the Abrasion counter on the Operator panel to estimate when the next cleaning is necessary.

## Areas Requiring Cleaning

Area	Name	Cleaning paper with Cleaner F1	Dry cloth with Cleaner F1	Cotton swab with Cleaner F1 or F2
Flatbed	Document holding pad		<input type="radio"/>	
	Document bed		<input type="radio"/>	
ADF	Pad	<input type="radio"/>	<input type="radio"/>	
	Glass/Sheet guide	<input type="radio"/>	<input type="radio"/>	
	Pick roller	<input type="radio"/>	<input type="radio"/>	
	Plastic rollers	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
	Feed rollers	<input type="radio"/>	<input type="radio"/>	
	Pick Arm Rollers		<input type="radio"/>	<input type="radio"/>

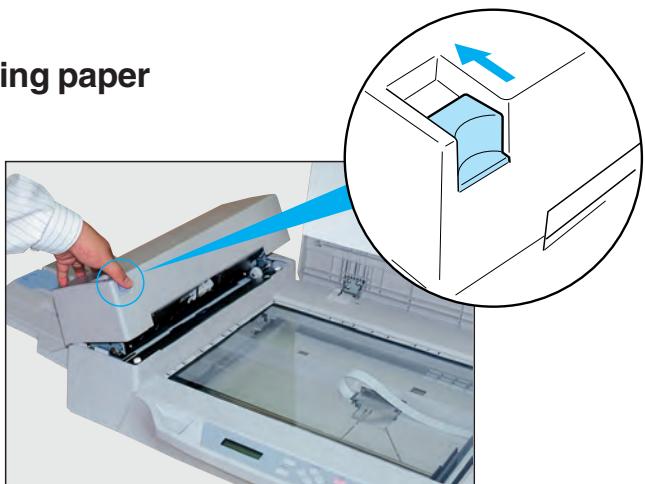

## Cleaning the ADF

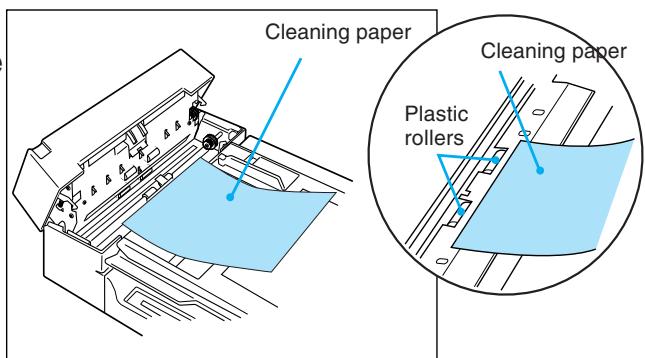

### Cleaning the ADF with cleaning paper

**1** Pull the ADF lever to open the ADF.

**2** Apply cleaner F1 to a new piece of cleaning paper.

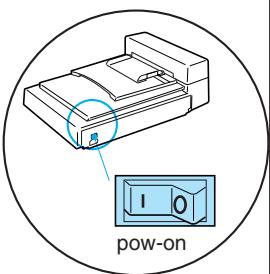

**3** Place the cleaning paper on the ADF so that the edge of the short side touches the Plastic roller.

**4** Close the ADF and turn the power on to start the cleaning.

**5** Turn the power off.

**6** Repeat steps 1 through 5.

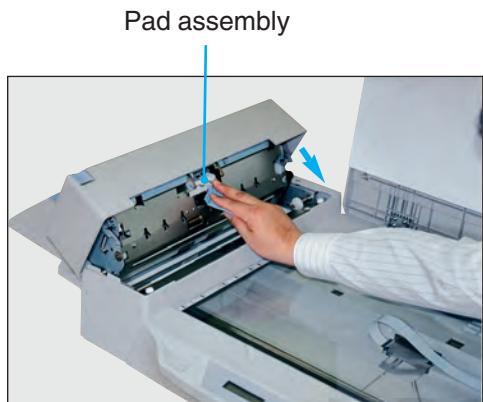

## Cleaning the ADF with a Dry cloth or a Cloth with Cleaner F1

- 1 Pull the ADF lever to open the ADF.
- 2 Use a dry cloth or a cloth moistened with Cleaner F1 to softly remove dirt and dust as follows.

### *Pad assembly :*

Wipe the pad in a downward direction (as indicated by the arrow). Be careful not to catch the Pick spring when wiping.

### *Glass:*

Wipe the glass lightly.

#### **NOTE**

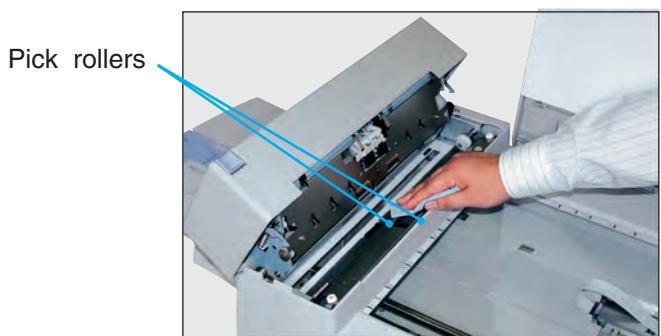

If the glass is dirty, the image may include black vertical stripes.

*Pick roller:*

Wipe the roller.

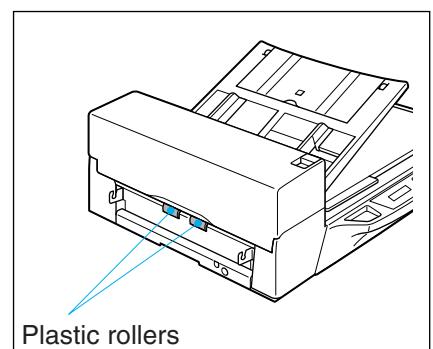

Be careful not to damage the surface of the roller and the mylar strip above the Pick roller.

*Feed rollers and Plastic rollers:*

Wipe the rollers.

Be careful not to damage the surface of the rollers.

*Sheet guide (white part):*  
Wipe the sheet guide.

 **NOTE**

If the Sheet guide is dirty, the front image may show vertical stripes.

*Sheet guide (white part)*

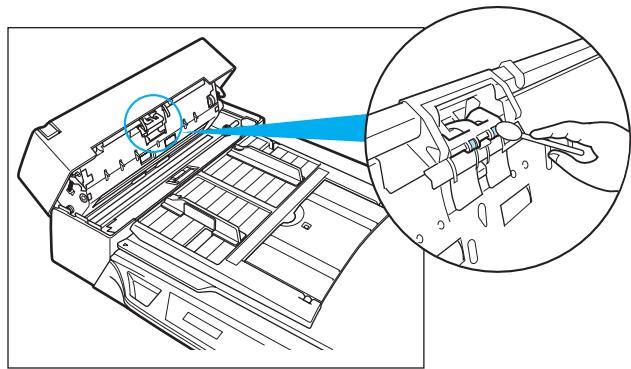

**3** Close the ADF to lock the ADF lever.

## Cleaning the Pick Arm Rollers

- 1 Pull the ADF lever to open the ADF.
- 2 Moisten a cotton swab or Dry cloth with F1 or F2 Cleaner.
- 3 Wipe the small Plastic rollers at the tip of the Pick Arm.
- 4 Wipe the small Plastic rollers and the Pick Arm with a clean, dry cloth to dry them.

### NOTE

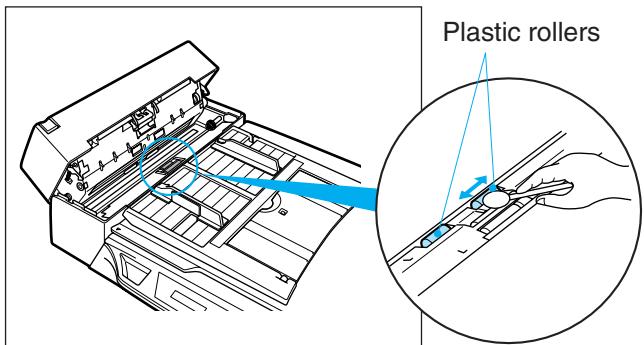

When non-carbon paper is used, the Pick Arm rollers may become dirty with a black substance. Use Cleaner F2 to remove the contamination.

### CAUTION

1. Don't wipe the pad rubbers with the F2 cleaner.
2. Don't apply the F2 cleaner to the pad rubber.

## Cleaning the Plastic rollers with Cleaner F2

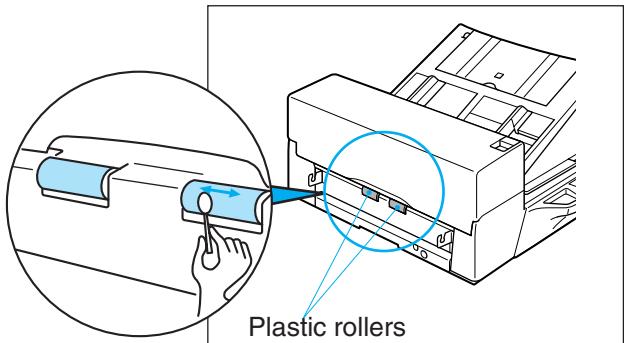

- 1 Pull the ADF lever to open the ADF.
- 2 Moisten a cotton swab with Cleaner F2.
- 3 Wipe the Plastic roller surfaces.

### CAUTION

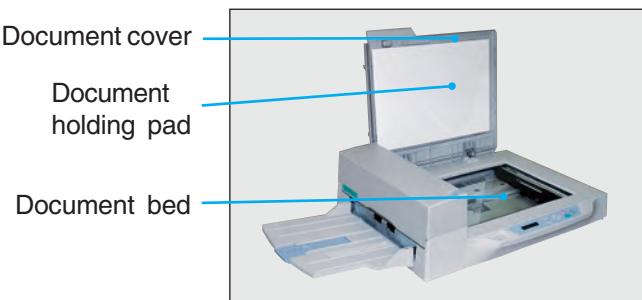

Don't wipe the Pick Rollers with a cotton swab using cleaner F2.

- 4 Wipe the Plastic roller surface with a clean, dry cloth. Allow it to dry.

# Cleaning the Flatbed

## Cleaning the Flatbed with a Cloth and Cleaner F1

**NOTE**  
Window or glass cleaner can be used instead of cleaner F1. However, do not use organic solvents.

- 1** Open the Document cover.
- 2** Apply Cleaner F1 to a clean cloth.
- 3** Wipe the Document holding pad and the Document bed.
- 4** Allow them to dry.

**NOTE**  
Be sure to prevent liquid from seeping through the opening between the Document bed and the plastic cover.

# REPLACEMENT OF PARTS

---

*This chapter describes how to replace the pad assembly and the pick roller.*

## Pad Assembly

## Pick Roller

## Pad Assembly

ADF lever  
Pad ASY (PA03951-0151)

### NOTE

The life span of the pad assembly is about 100,000 sheets or one year. Use the Abrasion counter on the Operator panel to estimate when the Pad assembly needs replacement. The life span may be decreased by as much as half when carbonless paper is read frequently.

### CAUTION

Turn off the power before replacing the Pad Assembly.

- 1 Pull the ADF lever to open the ADF.
- 2 Push the Pick Arm carefully.

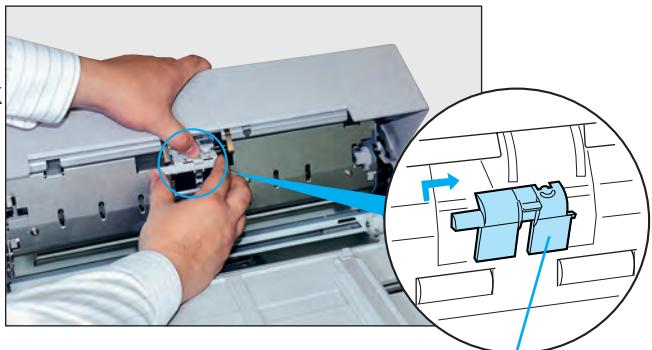

Pick Arm

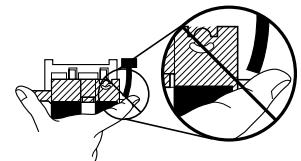

**3** Slide the Pad Assembly to the left and pull it towards you. Then, being careful not to hook the Pad spring, remove the Pad Assembly.

**NOTE**

Hold both ends of the Pad assembly as shown in the left photo.

**CAUTION**

Don't hold the sensor arm with the Pad assembly.

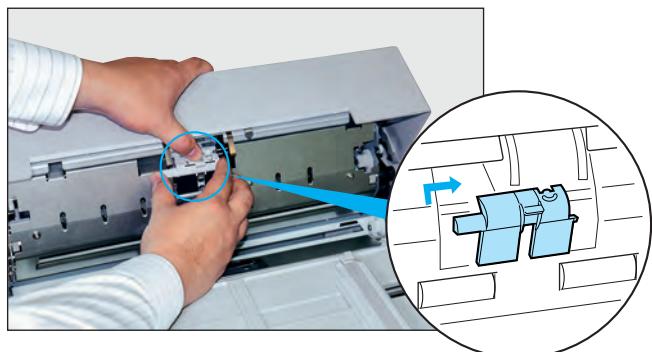

Pad assembly

**4** Attach the Pad Assembly to the ADF in the reverse sequence of step 3.

**NOTE**

Fit the Pad assembly pin into the larger hole, then slide it to the right until it stops.

**5** Close the ADF.

# Pick Roller

Pick rollers (PA03951-0153)  
(Two rollers are included)

## NOTE

The life span of the Pick roller is about 200, 000 sheets or one year.

Use the Abrasion counter on the operator panel to estimate when the Pick roller needs replacement. The life span may be decreased by as much as half when carbonless sheets are frequently read.

## **WARNING**

Turn off the power before replacing the Pick Rollers.

.....

**1** Pull the ADF lever to open the ADF.

**2** Remove the two Thumb screws.

## NOTE

Use a Phillips screwdriver if they are tight.

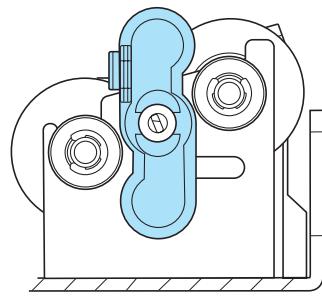

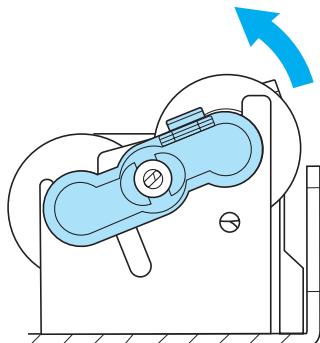

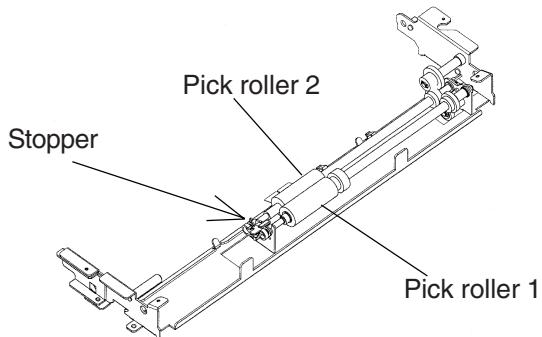

Thumb screws

**3** With both hands, lift up Guide A and disengage its tip from the right hole. Then lift the right side of the cover and remove it.

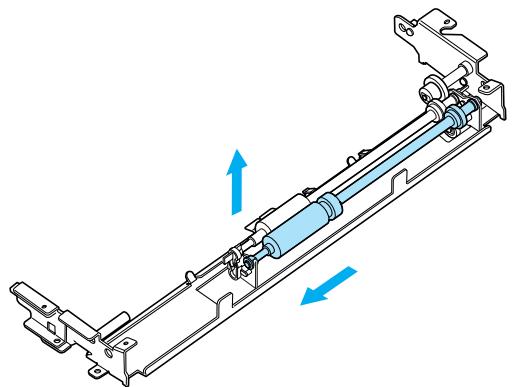

**4** To remove the Pick rollers, turn the stopper counter-clockwise.

Position for Replacement

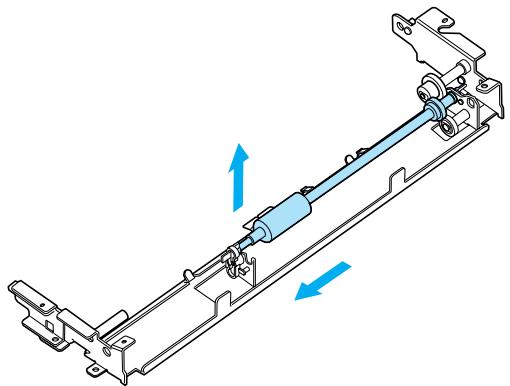

---

**5** To remove the Pick roller 1, move it to the left and then lift it.

---

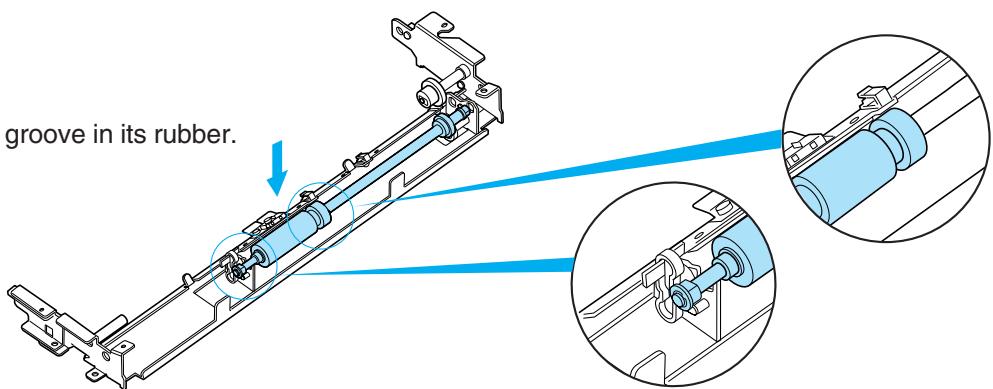

**6** Immediately after removing the Pick roller 1, remove the Pick roller 2 in the same way.

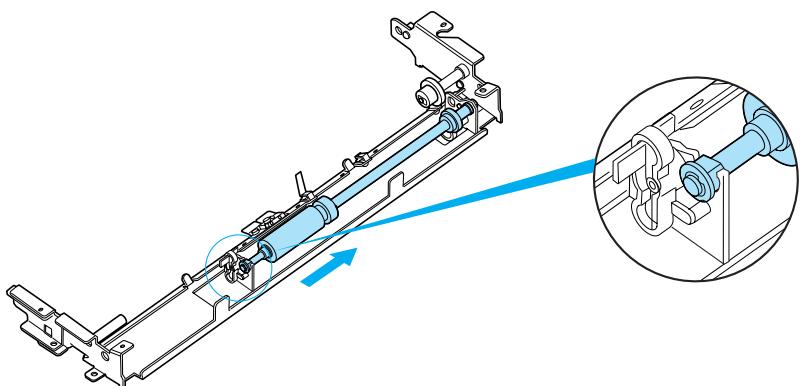

**7** To attach the new Pick rollers,  
place Pick roller 1 from the  
right side above the bearing for  
Pick roller 1.

 **NOTE**

Pick roller 1 has a groove in its rubber.

Put the shaft of Pick roller 1  
into the bearing. Then, slide  
Pick roller 1 toward the right  
side.

 **NOTE**

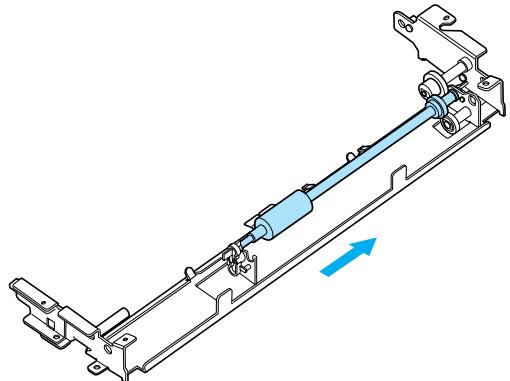

Make sure that the shaft is securely fixed to the bearings.

8

Attach Pick roller 2, in the same way as Pick roller 1 as shown in step 7.

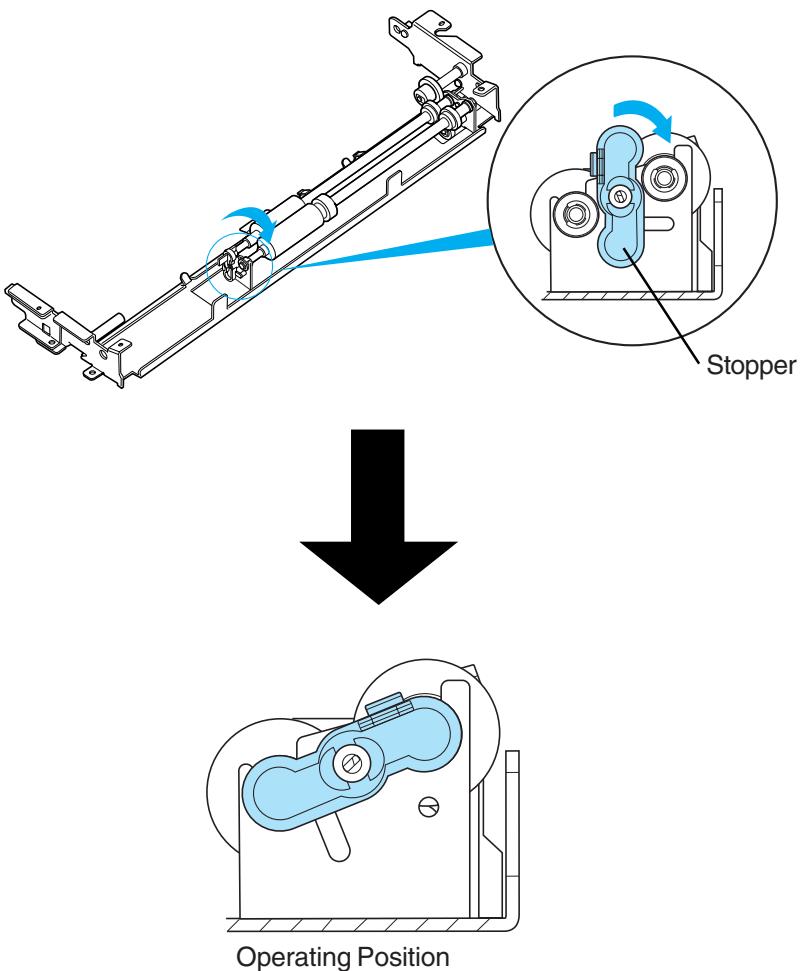

Then slide the Pick roller 2 toward right side.

 **NOTE**

Make sure that the shaft is securely fixed to the bearings.

9 Turn the stopper clockwise to secure the Pick rollers.

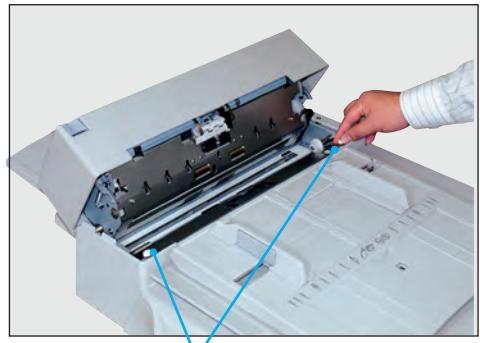

**10** Attach Guide A in the reverse sequence of step 3 and align the screw hole. See the graphic on page 1-4.

.....

**11** Tighten the thumb screws.

**12** Close the ADF unit.

# TROUBLESHOOTING

---

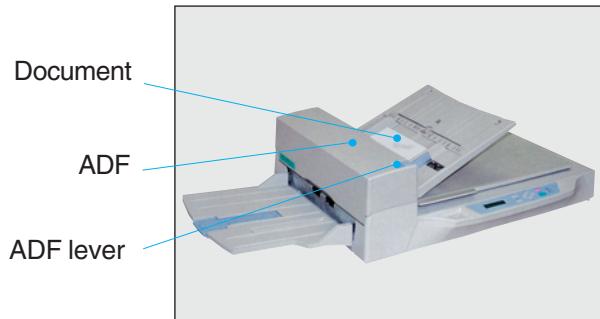

*This chapter describes how to clear paper jams and run initial checks. It also contains a Problem Checklist that should be completed before you call a service representative.*

## Clearing Paper Jams

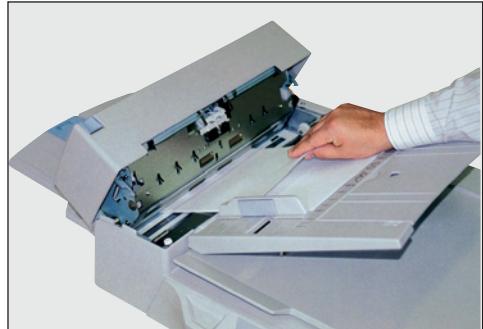

## Initial Checks

## Problem Checklist

# Clearing Paper Jams

- 1** Remove all the documents from the ADF paper chute.
- 2** Pull the ADF lever to open the ADF.
- 3** Remove the jammed document(s).

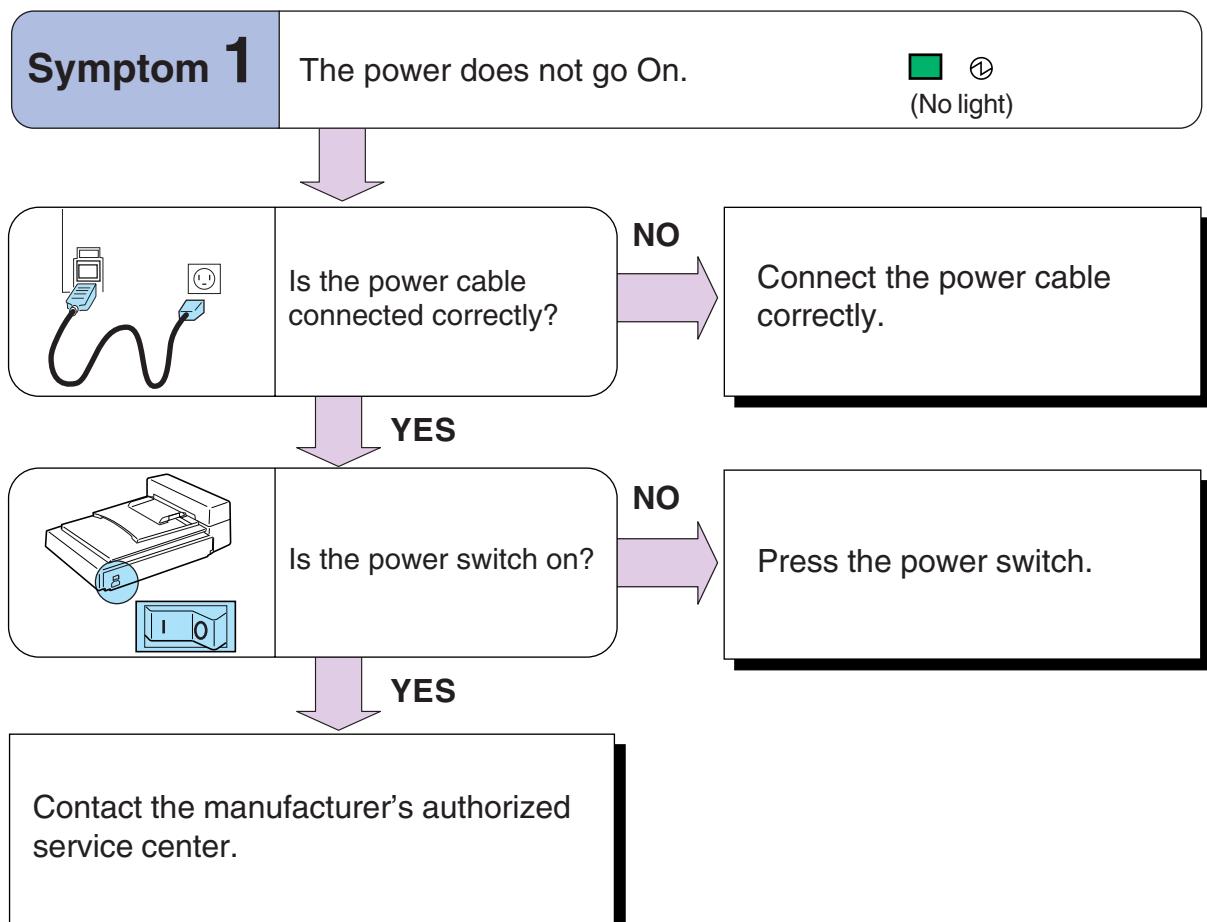

## NOTES

- Inspect the paper and the paper path. Make sure no staples, paper clips or other materials caused the jam. All staples and paper clips should be removed from all documents before scanning.
- Be careful not to pull the pad spring while removing a jammed document.

- 4** Close the ADF so that the ADF lever locks.

## Initial Checks

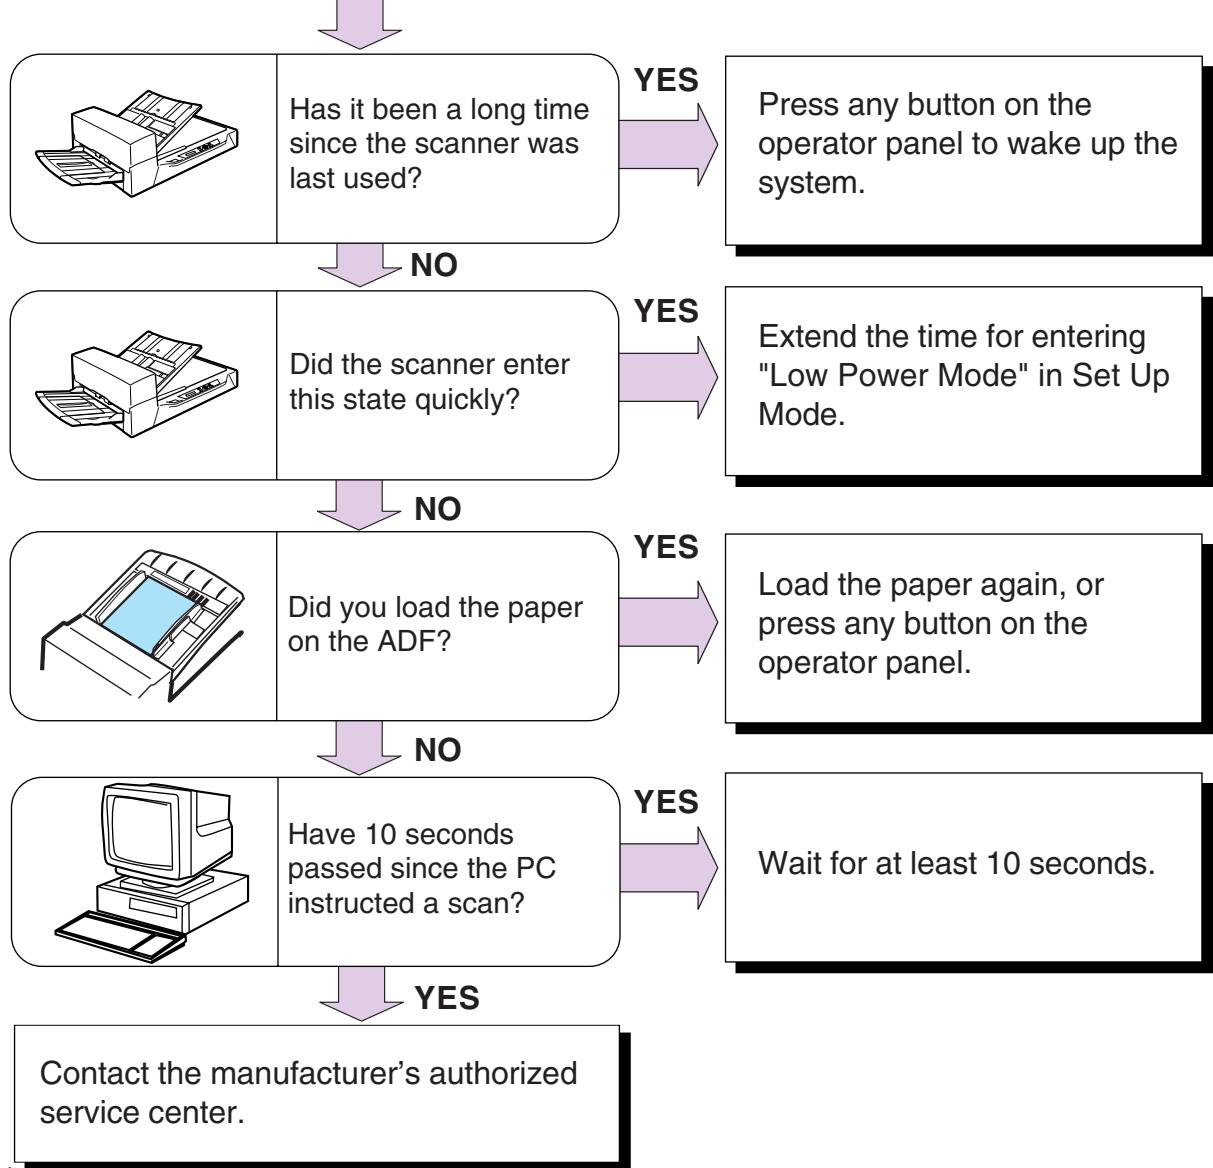

If a problem occurs, check the following items before contacting the manufacturer's authorized service center.

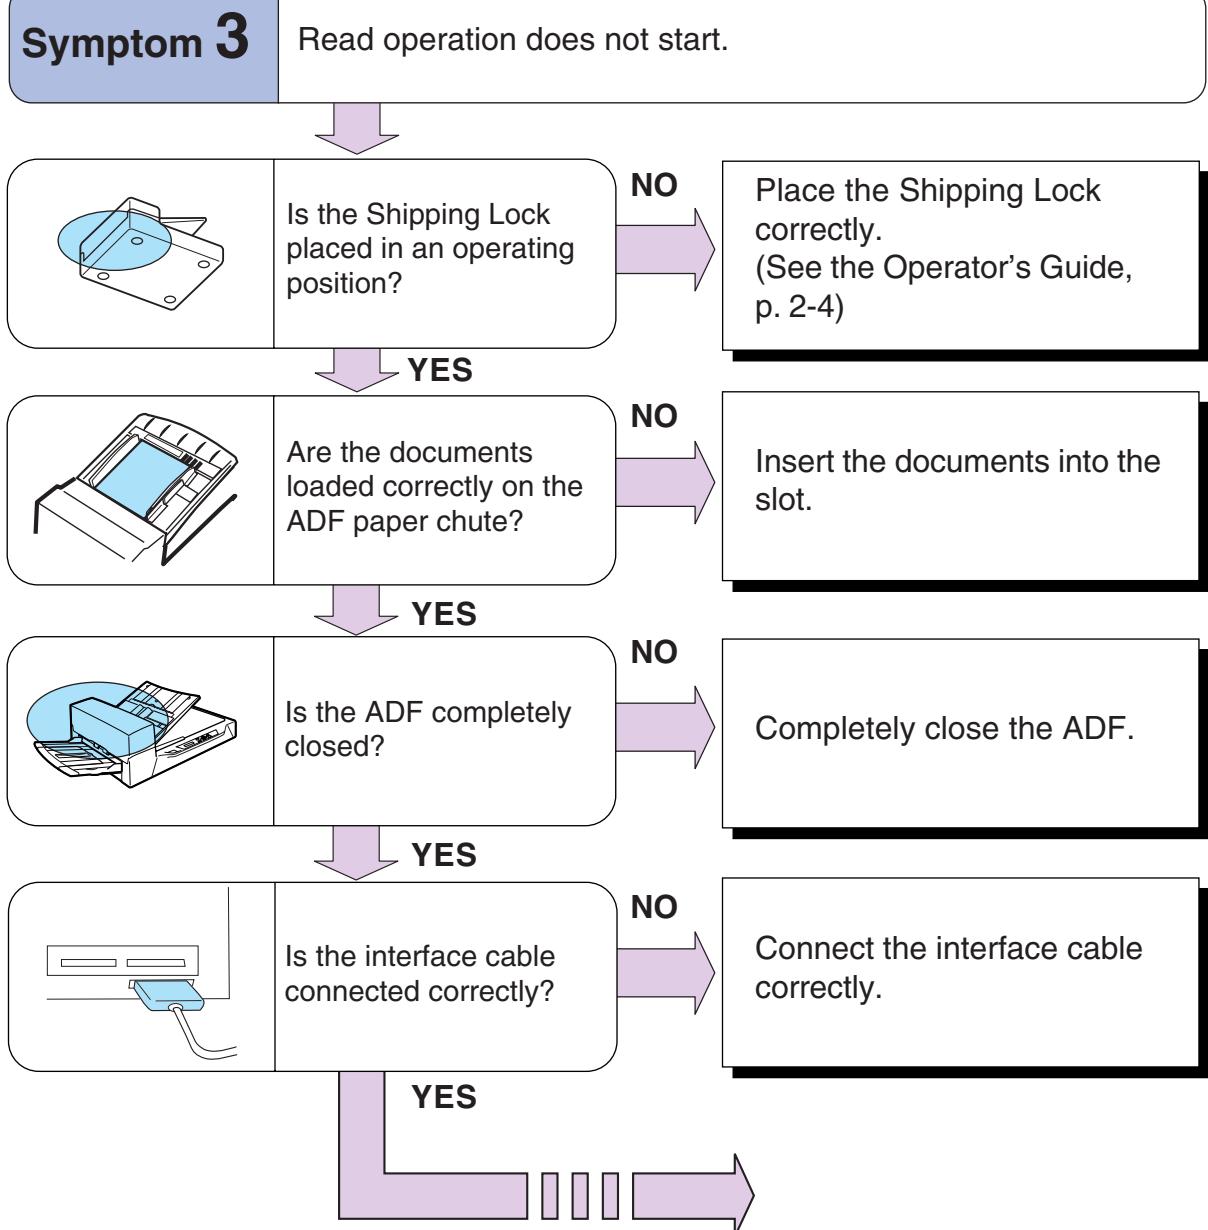

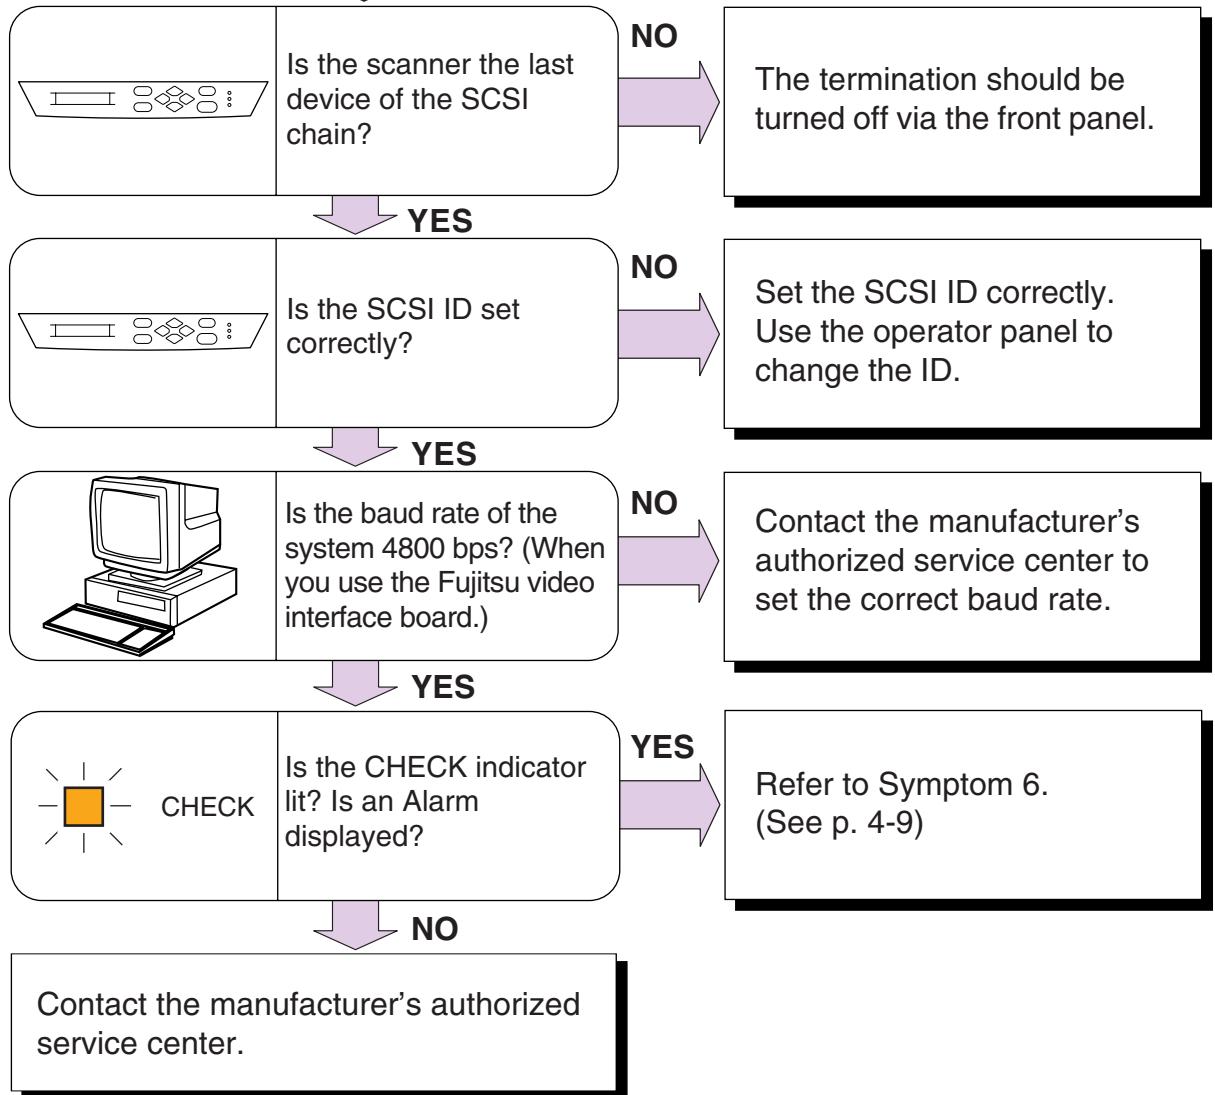

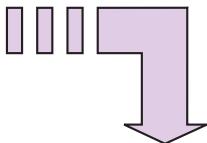

## Symptom 2

The operator panel turns "Off".

①  
Power "On"

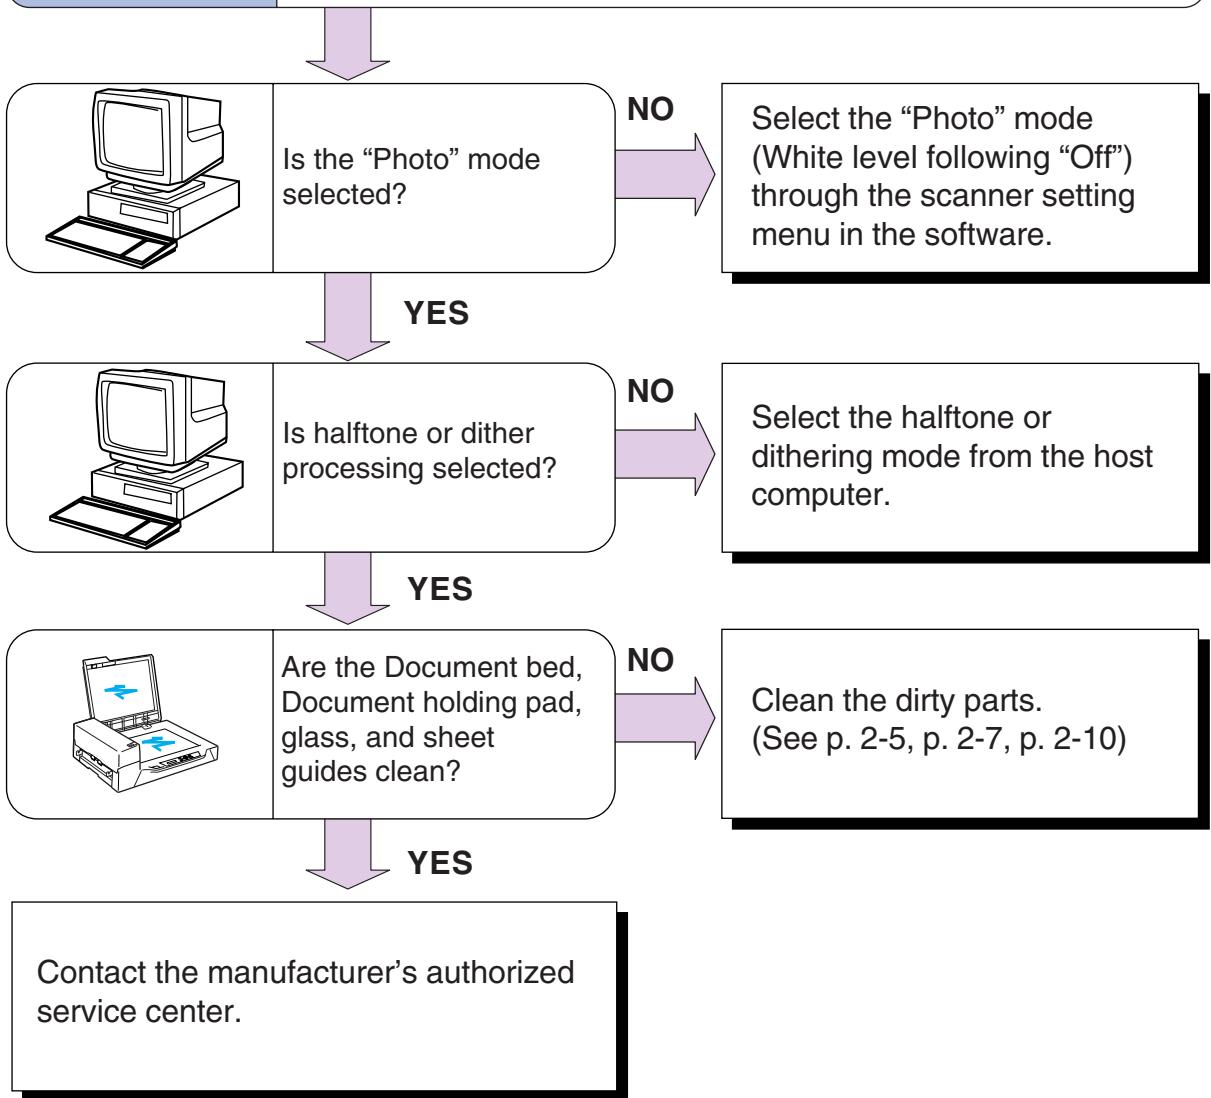

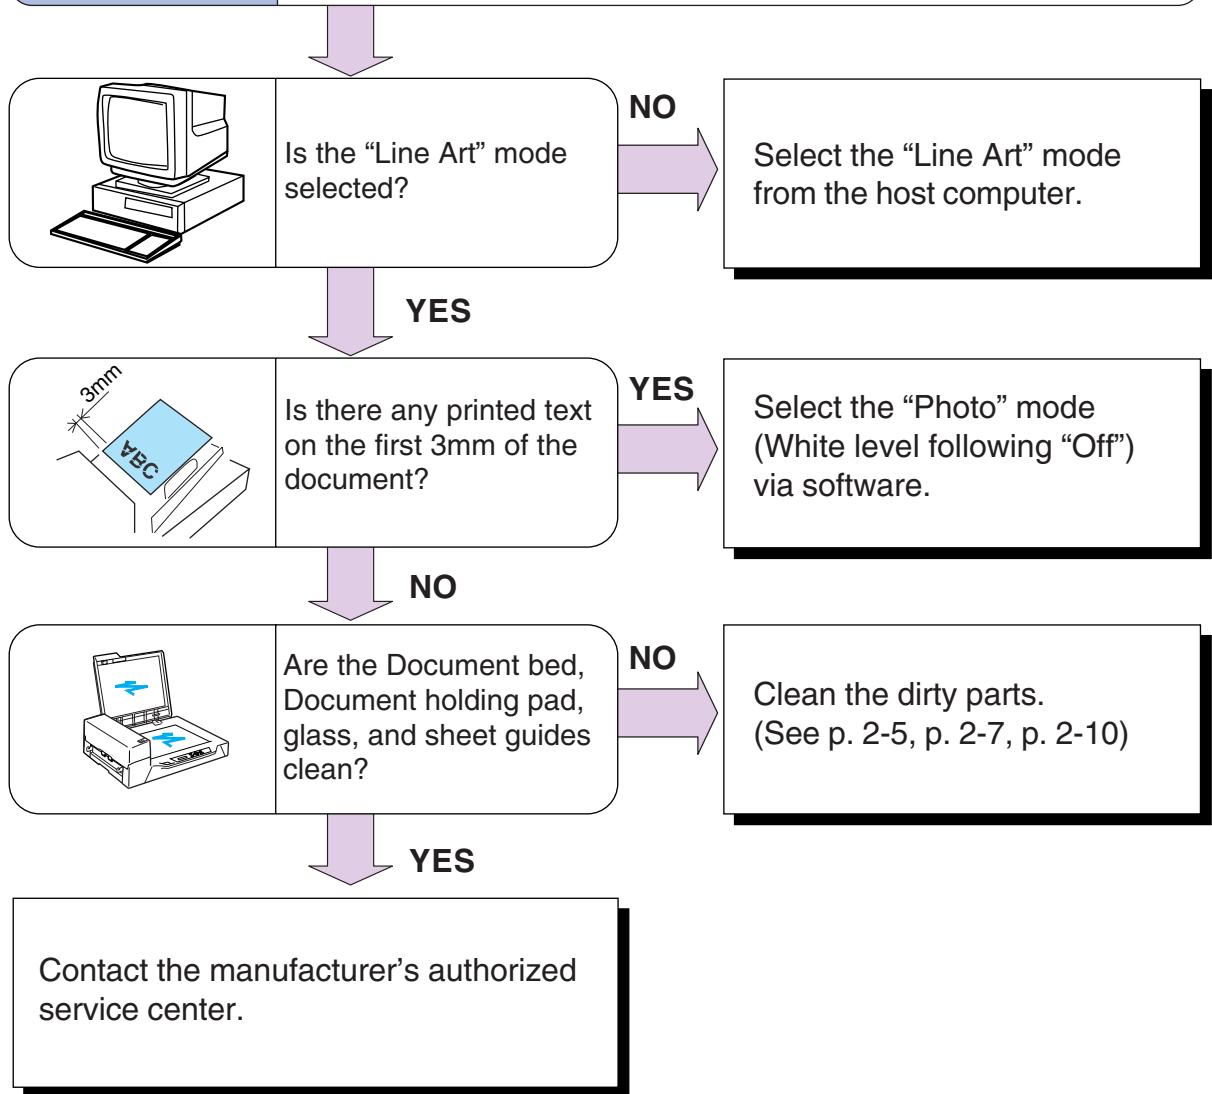

## Symptom 4

Pictures and photographs are not read correctly.

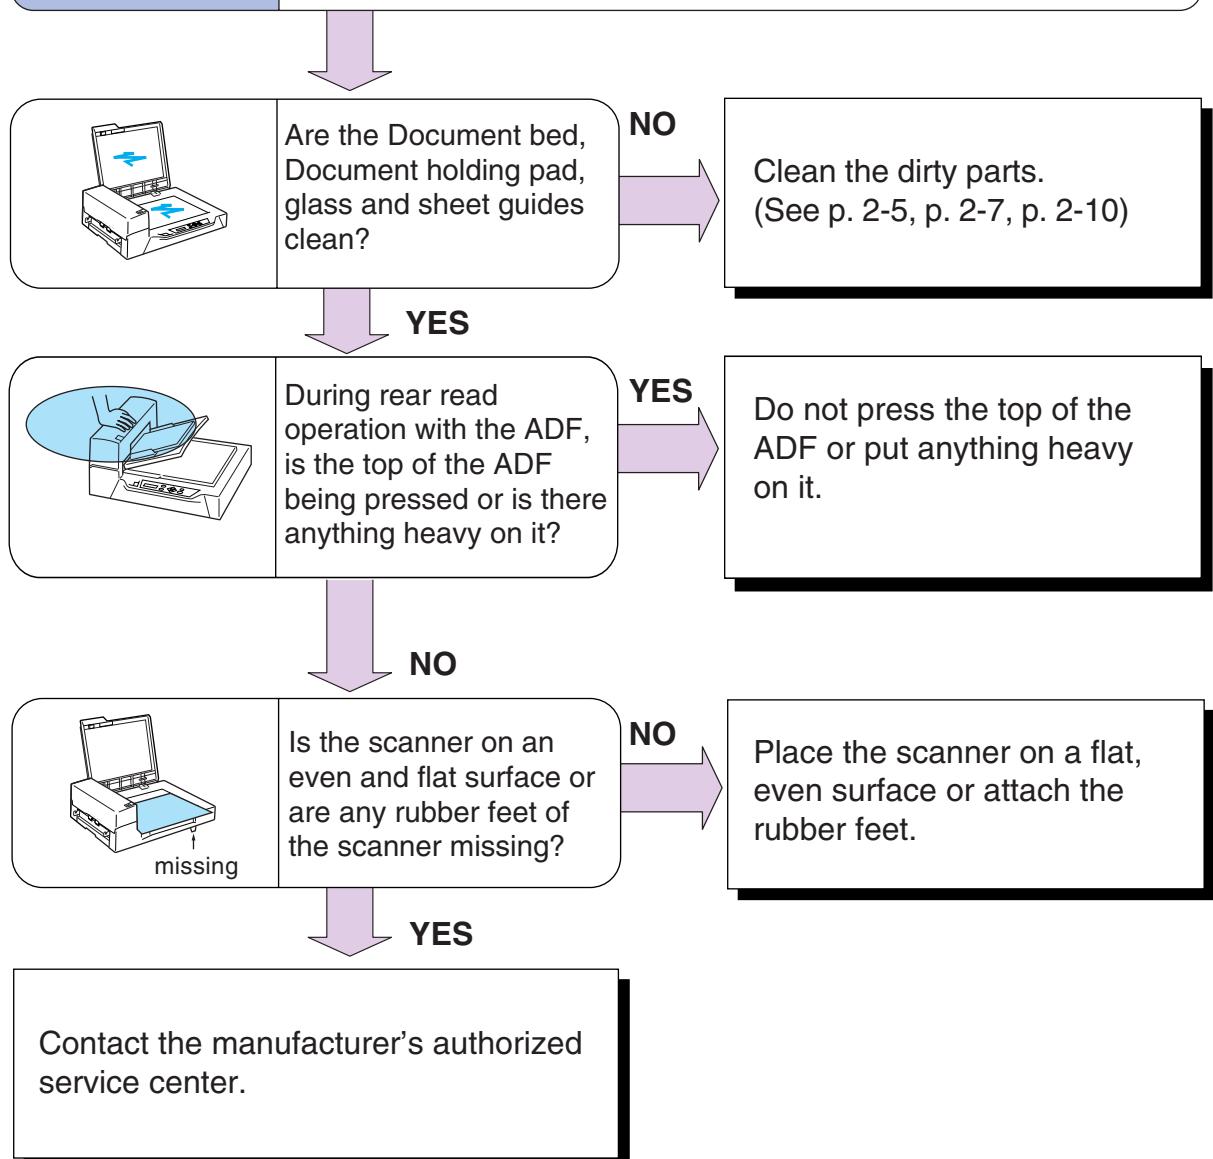

## Symptom 5

Characters and lines are not read correctly.

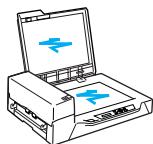

## Symptom 6

Images are distorted or unclear.

## Symptom 7

Images have vertical lines.

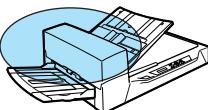

Did you scan the document using the Flatbed?  
Are the lines white?

YES

Contact the manufacturer's authorized service center.

NO

Are the lines black?

YES

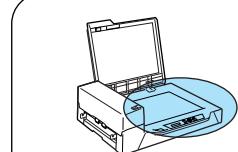

Clean the ADF Glass.

NO

Contact the manufacturer's authorized service center.

## Symptom 8

The Check indicator is on.

Is the Shipping Lock placed in operating position?

NO

Place the Shipping Lock correctly.  
(See Operator's Guide.)

CHECK

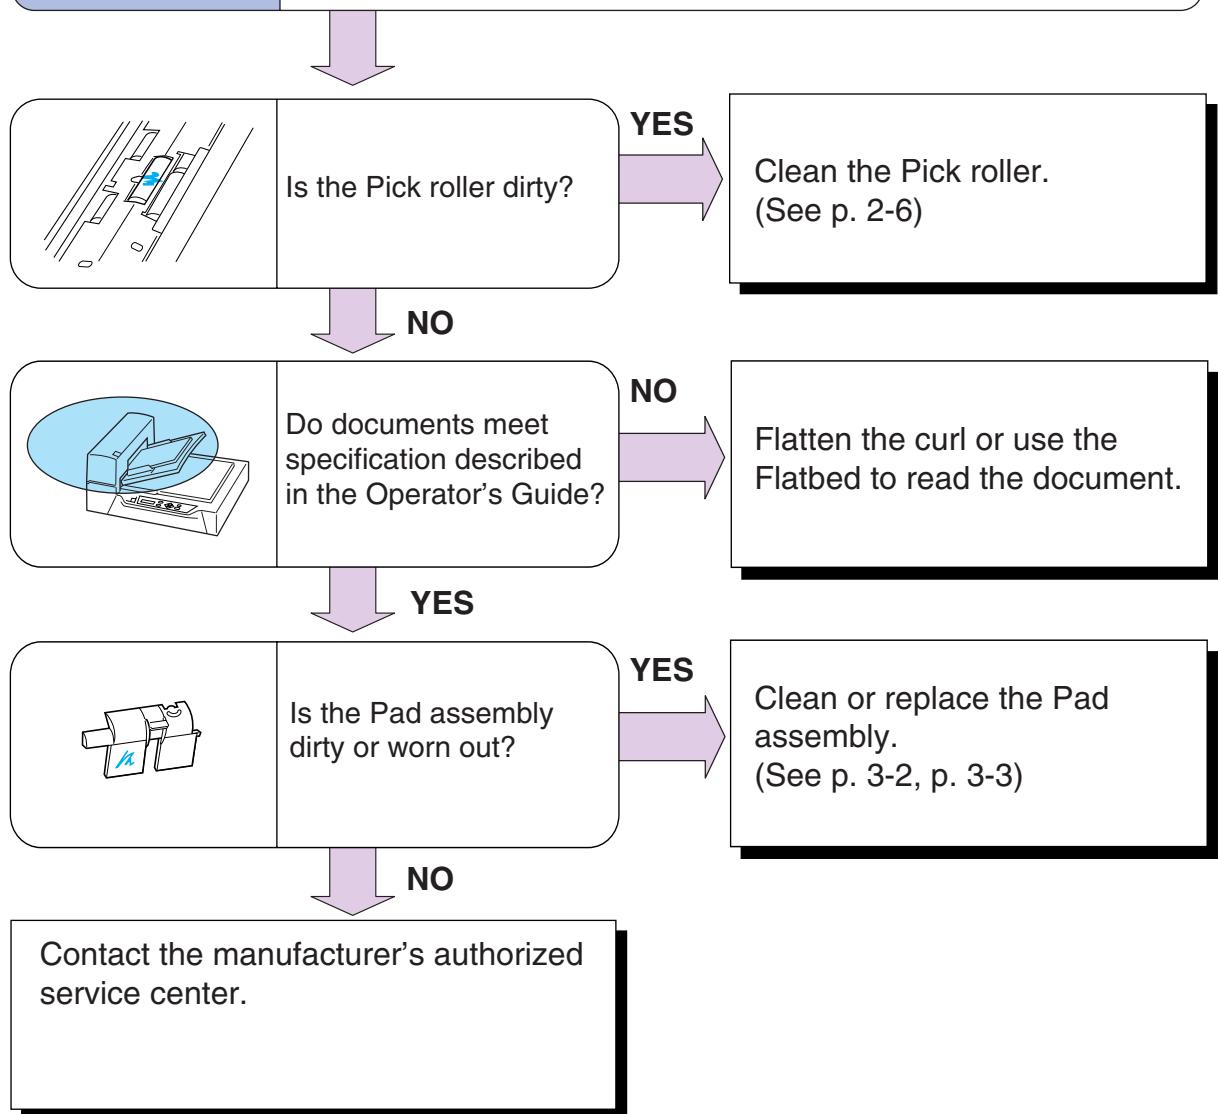

Turn off the power once and then try to turn on the power again. Is the CHECK lamp still on? Or is an Alarm displayed?

YES

Contact the manufacturer's authorized service center.

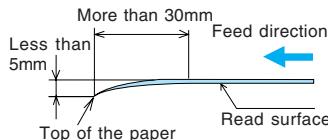

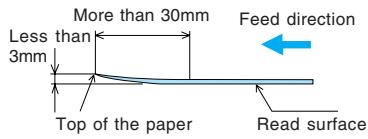

## Symptom 9

“Please clean Pick-roller” is displayed.

## NOTES

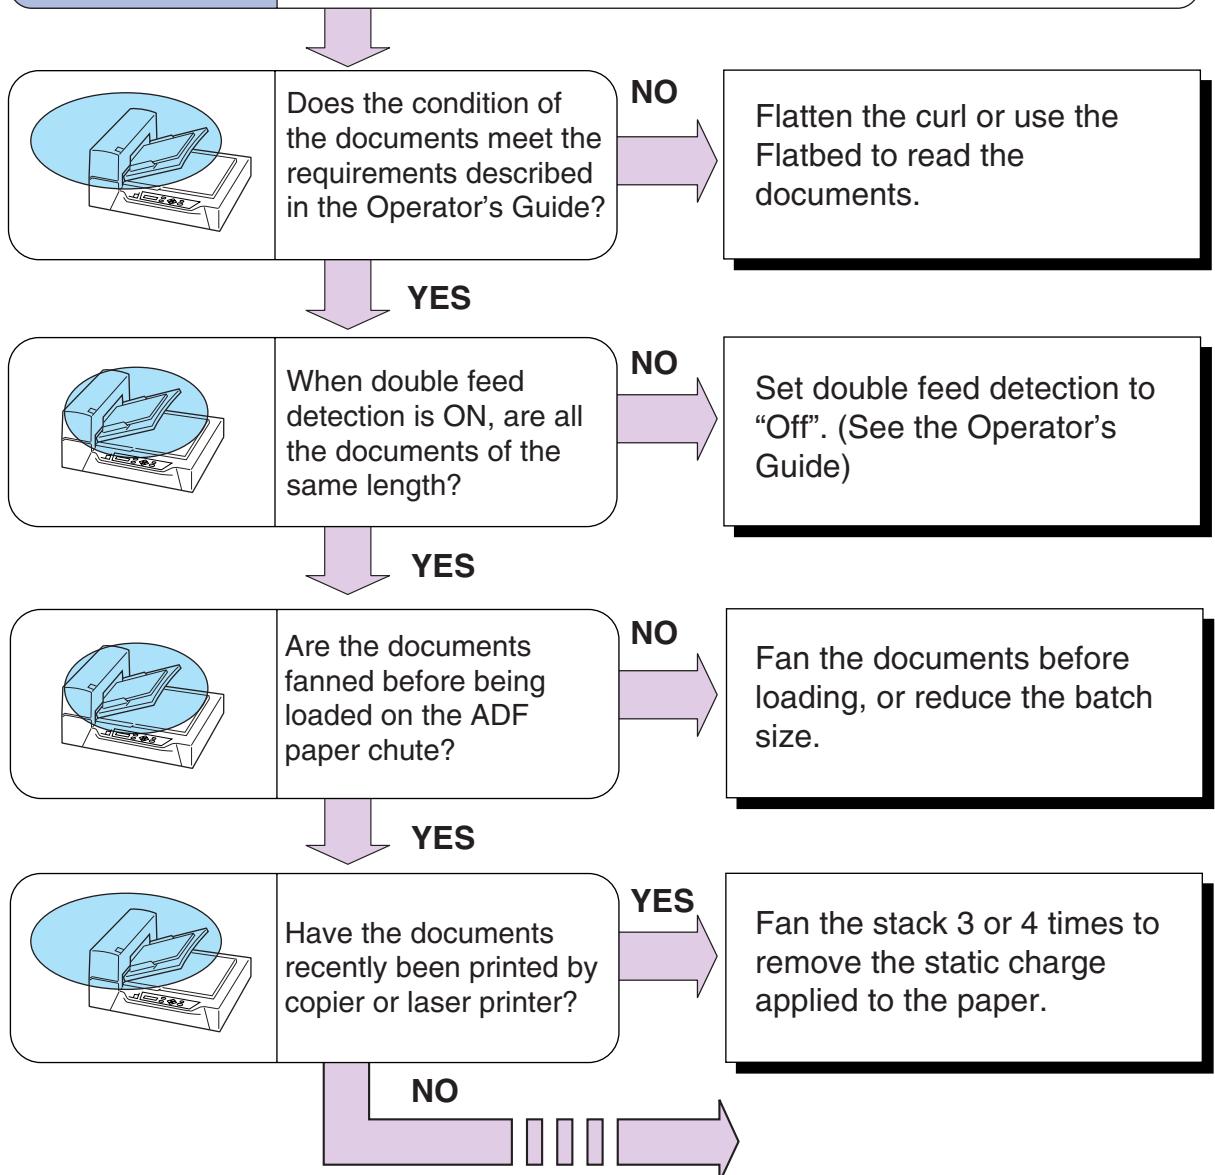

- Remove paper clips and staples. Flatten the staple holes.
- A preliminary document feed test may be necessary to avoid unexpected errors.
  - Paper with clips or staples.
  - Paper with wet ink.
  - Paper of uneven thickness (for example, envelopes).
  - Paper with large ripples or curls.
  - Paper with folds or tears.
  - Tracing paper.
  - Coated paper.
  - Carbon paper.
  - Paper smaller than A6 size or wider than A3.
  - Materials other than paper (for example, cloth, sheet metal, or OHP film).
  - Photographic paper.
  - Paper with perforations on its sides.
  - Non-rectangular paper.
  - Very thin paper.
- The leading edge of all documents fed by the ADF should be straightened so the curl of the paper meets the specifications below:

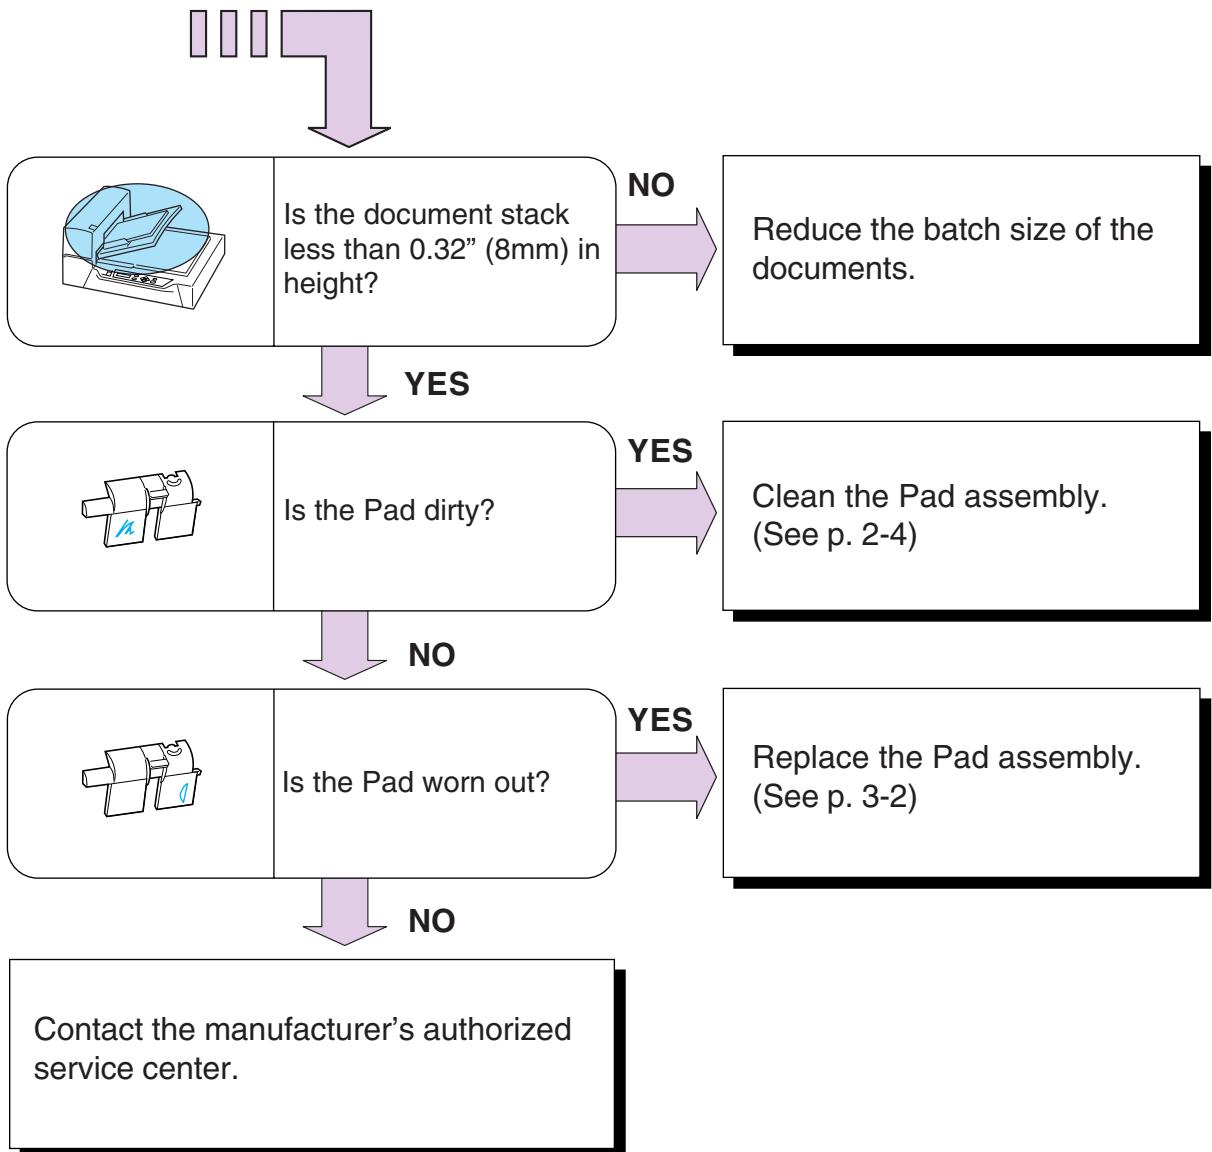

- Do not mix documents of different widths.

## Symptom 10

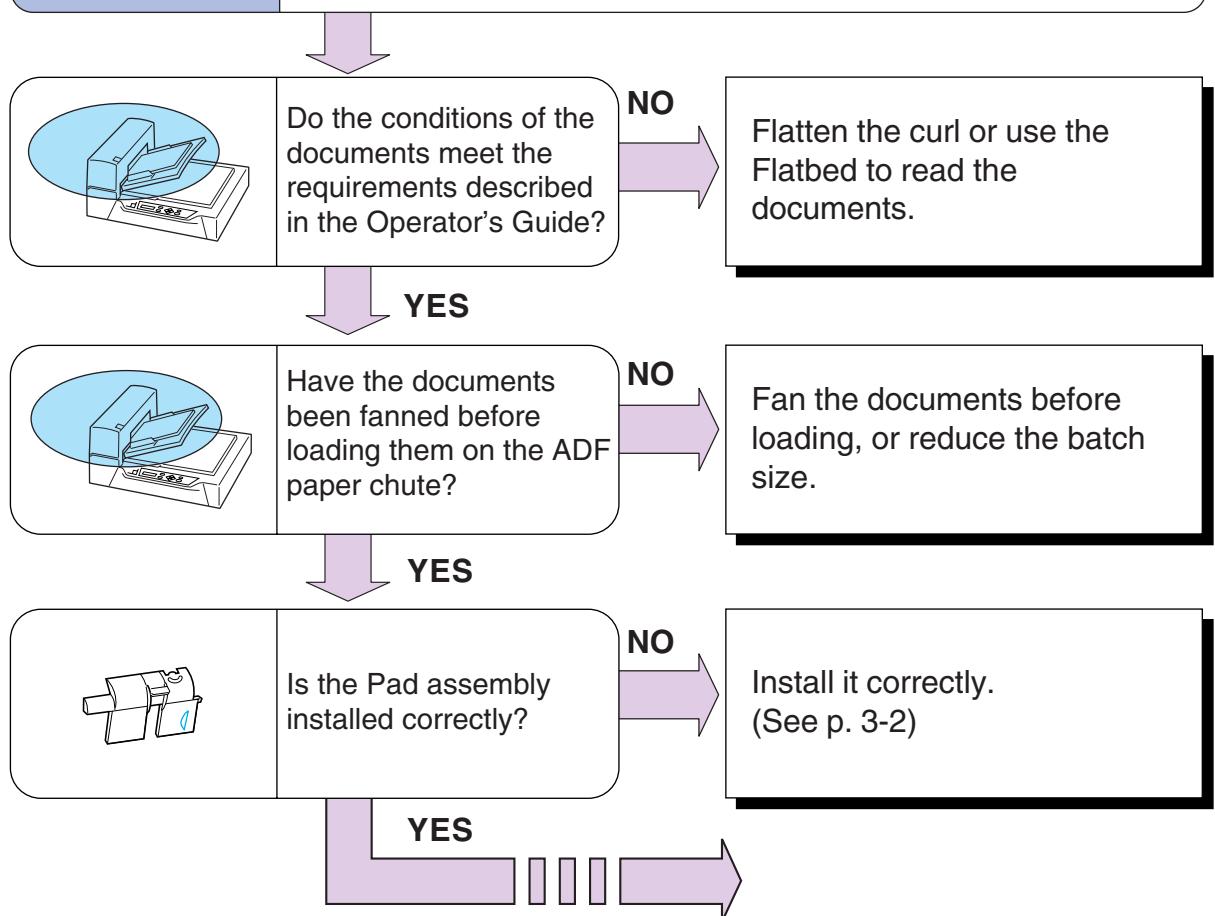

Paper double feed occurs frequently.

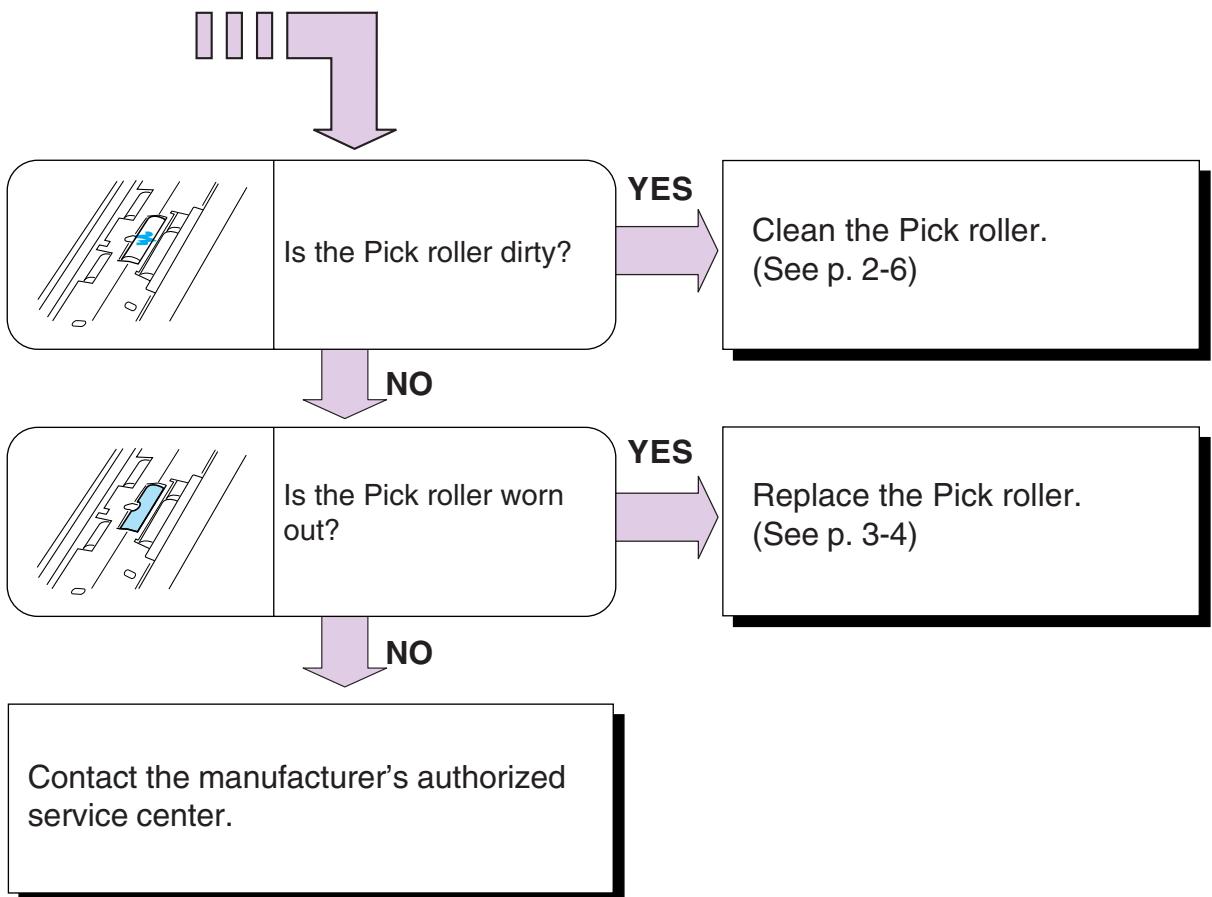

## Symptom 11

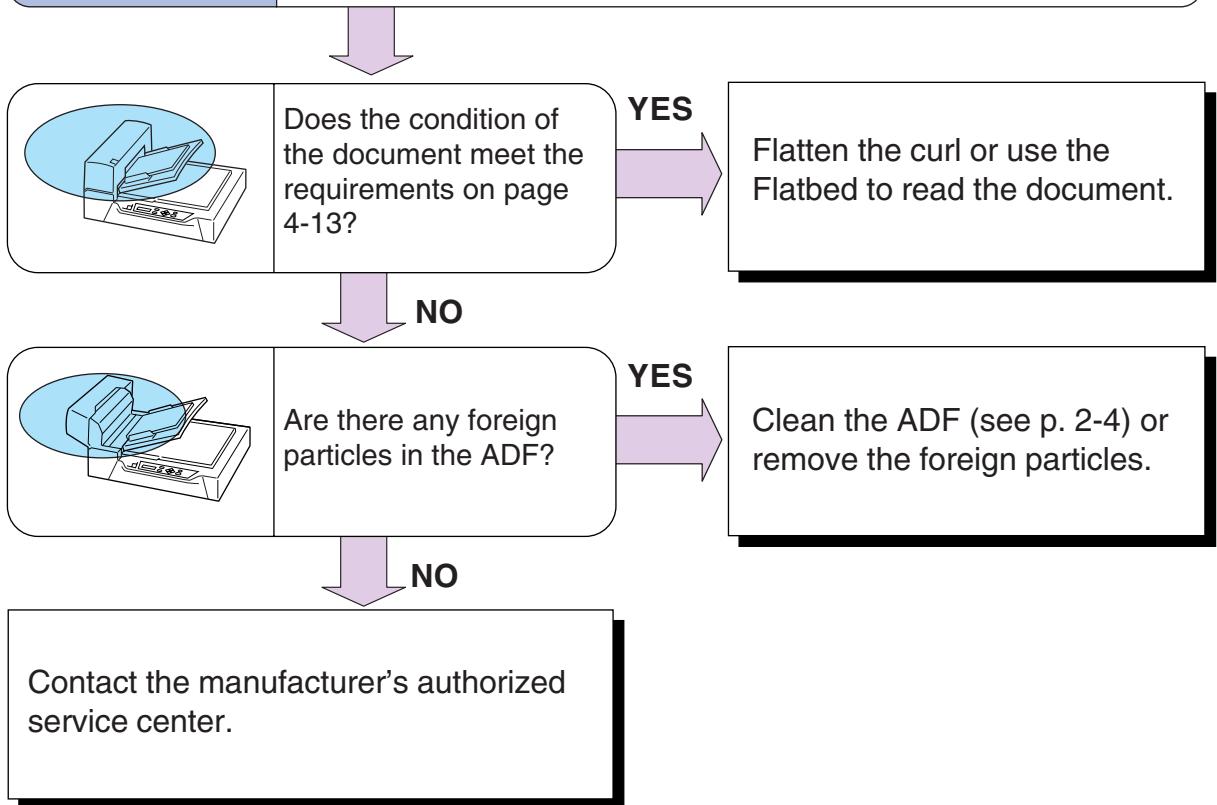

Mispick occurs frequently.

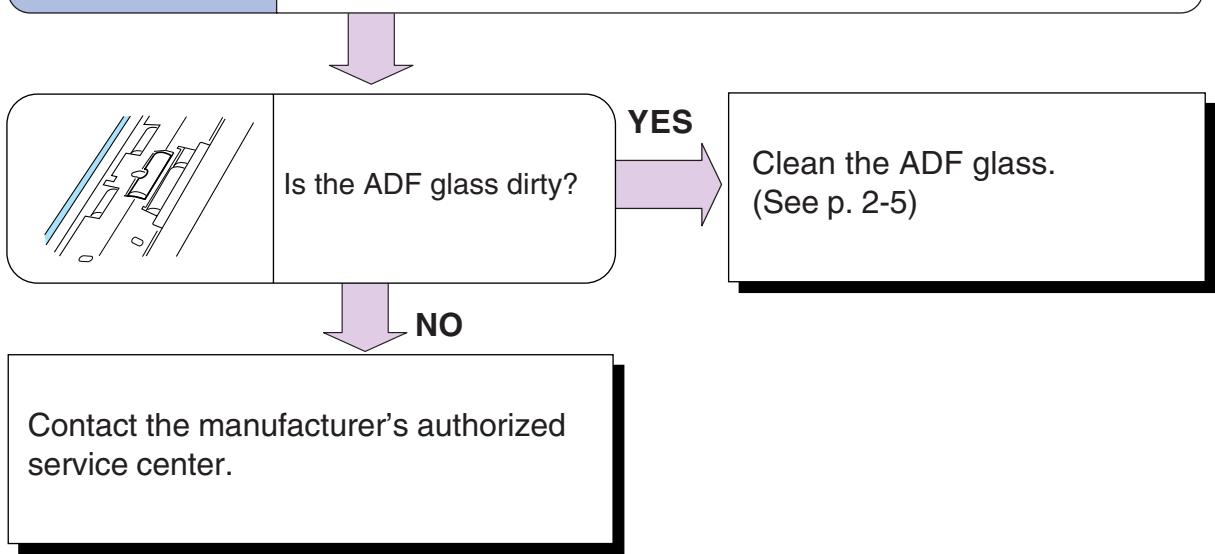

## Symptom 12

Paper jams occur frequently.

## Symptom 13

“Please clean ADF glass” is displayed.

# Problem Checklist

Before contacting the manufacturer's authorized service center, please fill in the following items.

<b>General</b>																																				
Model	(Example) M4097D																																			
Part number	(Example) CA02956-2300
