GEDORE workster smartline - the manoeuvrable, easy-to-steer workshop aid which can be fitted out in so many ways.

- > A sound construction design, extreme manoeuvrability and various ways of stowing away tools and small parts ready-to-be-accessed turn the new workster into an indispensable aid.
- > Seven broad fully extendable drawers and small trays on the working platform provide ample room.
- > The intelligent workster also comes over well thanks to its sturdy, scratch-free coated structure and a drive/steer handle for easy and flexible manoeuvring even under a full load.

NEW

WSL-L7 TOOL TROLLEY WORKSTER SMARTLINE with 7 drawers

- > Dimensions: H 1045 x W 785 x D 510 mm
- > Welded sheet steel construction, torsionally rigid, to take high loadings
- > Sheet steel, corrosion resistant and scratch-proof powder-coated
- > **Individual blocking** only one drawer can be open at a time, single-hand operation
- > Central locking with cylinder lock
- > 7 wide drawers (W 640 x D 400 mm) fully extendable
- > Load capacity per drawer 20 kg
- > Total load capacity 400 kg
- > 4 smooth running wheels on ball bearings (swivel castors Ø 125 mm), one with total brake

Mobile, safe and rapidly
deployable anywhere.

- › Mobile-deployed tradesmen and service technicians need a flexible, high-quality workshop and transfer solution which adjusts to the requirements of their working day.
- › GEDORE WorkMo system is the perfectly organized and non-complex intelligent solution.
- › The GEDORE WorkMo is based on SORTIMO®'s multifunctional transfer, organisation and working system which meets all the legal requirements on load restraints in connection with the vehicle interior fittings of SORTIMO®.
- › The system is made up of various, combinable-at-will modules connected by coupler levers.
- › The modules can be rapidly transformed on-site into a workshop trolley, workbench or an integral work station.
- › In this way the organisation and transfer system is turned into a functional workplace at the drop of a hat.

POWER VOLUMEN

- › The sturdy XL mobile workbench, which has proved its worth on innumerable occasions, is fitted out with a large-sized worktop; the 1050 mm wide top drawer has room enough for either an extremely long tool or six 1/3 modules of the GEDORE module system.
- › All drawers can take weights of up to 40 kgs – even 60 kgs is the limit for the bottom drawer.
- › The proven single-hand operation coupled with safety locking stops the drawers from unintentionally opening when the workbench is pushed.
- › The heavy-duty chassis is mounted on roller bearings. Its two Ø 125 mm flexible castors and two Ø 200 mm fixed castors ensure easy manoeuvrability.
- › And finally its 700 kg static load capacity and capacity to take up to 500 kg under mobile deployment conditions make it a sturdy aid in any workshop.

1504 XL MOBILE WORKBENCH EXTRA WIDTH

- › Single-hand operation with safety locking which prevents the drawers from opening when in motion
- › Load capacity per drawer 40 kg, bottom heavy-duty drawer 60 kg
- › Central locking for cylinder lock
- › Static load capacity 700 kg, 500 kg when mobile
- › Dimensions: H 985 x W 1250 x D 550 mm

GEDORE Ratchet 1/4" 2093 U-20			

Suitable for all screw fitting instances

- › This 35-piece 1/4" set is suited for all conventional screwed connections in mechanical and hand-operated use. As such, the sockets can be driven via an adapter with electric machines or directly via the 2093 U-20 ratchet.
- › The 1/4" sockets are specially thin-walled and thus admirably suited for work in confined spaces.
- › The tried-and-tested premium ratchet comes with the set. This set is delivered in a small, compact plastic box with inspection window for that easy completeness check.

GEDORE 1/2" and 3/8" extension with holding magnet – a real problem solver

- › Deep-seated screws is a recurrent problem in many workshops.
- › A confined space makes it impossible to grasp the screw with one's hand after slackening. This, in turn prevents the screw being held in the socket and pulled out.
- › There is the risk of the screw dropping out of the socket and remaining in the engine compartment.
- › The outlay needed to get it out takes time.
- › The holding magnet equipped GEDORE extension keeps the screw securely in place in the socket.
- › The advantage of the GEDORE extension is that it can be used with all sockets in 1/2" and 3/8" and, as such, is universally deployable.
- › The spring-mounted pin makes it easy to centrally insert the screw into the thread.
- › The powerful, permanent holding magnet even fixes large screws in the socket and the screw can be directly screwed in with one hand.
- › The 1990 M / 3090 M can also be extended to the required length with other extensions.
- › The product carries the Made in Germany label and won the 2014 Innovation Prize.

3090 M EXTENSION 3/8"

NEW

with magnet

- › The holding magnet securely fixes the screws in the socket
- › One-hand operation - using the socket the screw can be immediately screwed in
- › Thanks to a spring mechanism the holding magnet is always in direct contact with the screw head. It ensures that the screw is centrally guided
- › A strong permanent magnet keeps hold of even large screws

TORCOFLEX: Complete check for assured screwed connections in the workshop

- › Greater safety and checking with controlled screw tightening:
- › The TORCOFLEX 3549 UK and 3550 UK torque wrenches (robust workshop series) are calibrated to a permitted variation of +/- 3 % and less. They thus clearly surpass the customary +/- 4 % standard.
- › They also have a release system providing a clearly tactile and audible signal when the set torque is obtained.
- › The adjustable torque wrenches cover the entire 1 to 550 N-m range. They are additionally fitted with an integrated lever/change ratchet function (anticlockwise, clockwise and 0-position) and a magnified inspection window – the ideal workshop wrench, in fact.

NEW

3549 UK - 3550 UK TORQUE WRENCH TORCOFLEX UK

- Adjustable, releasing and sturdy tubular torque wrench with integrated lever ratchet and with square drive for industry and the trades
- Classified to DIN EN ISO 6789:2003 Type II Class A, with a factory certificate.
Working accuracy: $\pm 3\%$ tolerance of scale set torque.
- For controlled directional tightening

Distinguished: GEDORE 3C-Screwdriver with striking cap

- › In the field of product design, the "made by GEDORE" screwdrivers more than appealed thanks to their excellent design and independent design language:
- › The 3K screwdrivers for slotted head screws consist of the ergonomic 3-component Power Grip with striking head for precise, fatigue-free use.
- › The positive connection fit between handle and blade ensures an optimum transfer of power and makes it easier to tighten and loosen very stiff screws.

Ergonomic and resilient

- › The 6-piece GEDORE cranked screwdriver has the new T handles in a 2-component design and with optimized ergonomics for a better transfer of force.
- › The DT 2142 type has a double blade with the longer one provided with a ball end.
- › The blades are of GEDORE 61CrSiV5 vanadium steel and guarantee maximum torques.
- › The set includes the 6 most popular cranked screwdrivers of sizes 2.5 to 8 mm and is a MUST-HAVE for each and every workshop.

Power pack for maximum performances in pulling work

- > A feature of the 1.04/HP "High Power" puller made by GEDORE is its extreme strength and fail-safeness.
- > The two-arm universal puller for centred and force-optimized work is now also available with a practical stand as a set of three.
- > The included pullers can withstand 5 t, 10 t and 15 t loads and cover a total spread range of 0 to 420 mm – **100 mm more** than comparable puller sets.
- > Thanks to their forged, reinforced bending moment cross-beam, strong force arms and additional thermal finish, GEDORE 1.04/HP pullers are **up to 76 % stronger** than comparable products.
- > This predestines them for maximum performances even when subject to multi-ton loads as arise, for instance, when pinions, cog wheels, ball bearings and bushes are changed in industry, with utility vehicles and in agriculture.

1.04/ST-HP-B PULLER SET

with stand

HIGHLIGHT

€398,00

excl. VAT

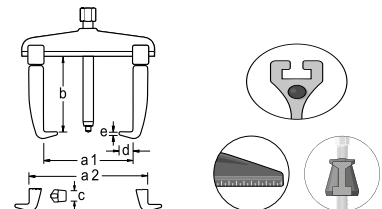

- > Cross-beam especially hardened and tempered allows safe application of extremely high pulling forces and doubles the tensile force capability
- > Strong drop forged pattern
- > Rigid legs forged from one piece
- > Leg brake - prevents unintentional leg slipping. The leg can be slid along the cross-beam at the push of a button
- > Scale for uniform adjustment of the puller legs. Allows centred pulling, with optimised application of force, even when extremely high pulling forces are required

136 K CHAIN GRIP WRENCH

- › Particularly suited for clamping geometrically problematical cross-sections
- › With No. 136 K-105 the legs of various pullers - following locking - can be spanned with the chain at the component to be extracted and tightened. This stops the legs bending outwards and slipping. Pulling is still possible even if the legs have a very restricted contact surface

ROTBAND-PLUS - a secure connection / The original one

- › The connection of hammer head and shaft ranks amongst the best points of ROTBAND-PLUS.
- › Wood screw, ring wedge and fixing plate ensure that permanent secure hold.
- › The hammer shaft is pressed into the hammer head.
- › The ring wedge is pressed in for securing the shaft in the hammer head eye.
- › The round, conical form ensures an all-round, uniform pressure.
- › Tightening the wood screw ensures the fixing plate is positively fitted to the shaft.
- › The steel shaft protective sleeve is hardened and thus especially impact-resistant.
- › It protects the shaft from damage when striking is not always true and provides the hammer head with an additional hold.

600 H ENGINEERS' HAMMER ROTBAND-PLUS

- › Forged hammer head DIN 1041 made from special steel
- › Contoured hickory handle DIN 5111
- › With a long hardened handle protective steel sleeve and fixing plate
- › ROTBAND-PLUS steel fixing, high safety, long service life

OCHSENKOPF
BY GEDORE

GERMANY'S OLDEST AXE FORGE

OCHSENKOPF stands for perfection and safety in forestry and carpentry tools.

Since the Fahlefeld Bros. established the firm in 1781, the best steel with the best cut has been forged to a maximum quality in the Remscheid factory. An OCHSENKOPF axe stands for top-grade craftsmanship. It is still the pride of the traditional tool industry in "Bergisches Land".

A brand like a myth.

OX 244 E-1251 AXE SPALT-FIX®

- › Optimum splitting results, less force required due to wedge-shaped blade
- › Long service life, little weight
- › With high-quality ash handle. End of handle rounded for extra comfort.
