General Section

The regulations and safety instructions shall be valid as provided by the "Safety" Service Manual, part number 72010-800.00, as well as the respective national deviations.

Safety Advice

The X-radiation developing in the sets conforms to the X-radiation Regulations (January 8, 1987), issued by the Physikalisch-Technische Bundesanstalt (federal physiotechncal institution).

The high tension for the picture tube and thus the developing X-radiation depends on the precise adjustment of the +A power supply. After every repair of the power supply unit or the horizontal deflection stage it is imperative that the EHT for the picture tube is checked and re-adjusted if necessary.

To avoid consequential damages to the chassis or the picture tube the integrated protective circuits are allowed to be put out of operation only for a short time.

When replacing the picture tube use only the types specified in the spare parts lists.

Operating Instructions CUC 400

Note:

This chapter contains excerpts from the operating instructions. For further particulars please refer to the appropriate user instructions.

LOCAL CONTROL OPERATION

1. Mains On/Off Switch.

Press the power switch 1 on the TV set. The indicator will light up. Program number is automatically appears on upper left corner of the screen for approximately 5 seconds.

Press the power switch once again to switch off the set.

2. Indicator - Operating (*green*/red*), Standby (*red*).

3. Remote Sensor.

4. (◀ -), (+ ▶) for setting the sound volume.

5. (P-), (P+) Program selection button.

6. Aerial input 75 Ohms.

7. Video Output.

8. Audio Output.

9. Video Input.

10. Audio Input.

* For particular models

PICTURE ADJUSTMENT MODE

Press (◀ -) and (+ ▶) simultaneously into picture adjustment mode. With button (P+), the symbol and scale will be selected sequentially as follows :

Brightness → Contrast → Colour → Tint (in case of NTSC) → Brightness.

Adjust to required analog level with (◀ -) and (+ ▶) buttons.

Press (◀ -) and (+ ▶) simultaneously or no other local key is pressed for approximately 5 seconds will go back to normal.

REMOTE CONTROL UNIT

The Remote Control Unit is the Primary Control Unit of your TV receiver. It allows you to operate all functions and setting.

1...9 (0/AV) Direct select program position (also AV).

 Standby On/Off.

 - / + Brightness, Contrast.

 - / + Colour, Tint.

PC/AUX Shift key for Contrast, Tint. Hold down for 3 seconds to call up the tuning system and program setting data.

TXT Teletext On/Off.

P+ / P- Select program position.

i Display program position. Display sleep timer. Teletext overview. Hold down for 3 seconds to call up the multifunction menu.

OK To confirm and store selected values. Press and hold for 3 seconds to call up optimum analogue parameters.

 - + ► Volume.

 Sound On/Off (muting).

TUNING AND PROGRAMMING

Press the **(PC/AUX)** button for approx. 3 seconds. The programming menu appears, active parameter will become *red*, and the other remain *cyan*. To terminate press **(PC/AUX)** button for approx. 3 seconds to leave the menu at any position.

Press **(0...9)** or **(P+ P-)** buttons to select program number.

Press **(PC/AUX)** button to move to the next parameter.

Press **(P+)** button to select frequency band sequentially as follows:

VHF L → VHF H → UHF → VHF L

Press **(PC/AUX)** button to move to the next parameter.

Press **(P+)** button to select '**AUTO**' (automatic tuning) or '**MANUAL**' (manual tuning).

Press **(PC/AUX)** button to move to the next parameter.

Start tuning with **◀ - + ►** buttons.

◀ - + ► buttons are for manual tuning (positive and negative direction).

To start auto tuning with **+ ►** button and stop with **◀ -**, during this time you can press and hold **◀ -** button to reverse tuning for overjumped station.

Press **+ ►** button again to continuous auto tuning.

Press **(PC/AUX)** button to move to the next parameter.

SOUND SYSTEM

Press **(P+)** button to select system sequentially as follows:

BG → DK → I → M → BG

Press **(PC/AUX)** button to move to the next parameter.

STATION LABEL (particular model only)

Press **(+ ►)** buttons to select one of four digits and **(P+)**, **(P-)** buttons to select characters.

Press **(OK)** button to call up the **STORE** mode.

STORE P_ _ appears to request for the displayed number or a possibly new program number (copy function is also possible).

You can activate this function by pressing (**OK**) button at any position.

Press **OK**, storage and display of the current programming menu.

Press (**PC/AUX**) button for approx. 3 seconds to leave the menu.

SOUND MUTE

By pressing the button () the sound can be cut off and press the same button once to get the sound back.

SLEEP TIMER

You can set the timer so that the TV is automatically switched off to Stand By mode after a period of 5 to 120 minutes in steps of 5 minutes.

For example, if you wish to set the timer to switch off after 60 minutes, press the button (i) for approximately 3 seconds till multifunction display is on the screen. Press the button (i) to select symbol () change from *cyan* to *red*, then repeatedly press (**P+**) to change the time from OFF to 60 minutes. The TV automatically switches to stand by after 60 minutes. If you have made a wrong entry and want to cancel the entry set the timer to (OFF).

During the timer is activated, you can recall the remaining time by pressing (i) button once.

SECRET CODE

With a four digit secret code you can protect your TV against unauthorised use.

Press the button (i) for approx. 3 sec. till multifunction display is on the screen. Press the button (i) to move to the 'key' symbol change from *cyan* to *red*. Enter a four digits secret code via 0...9, confirm by **OK** button and leave the menu with storage by pressing the button (i) for approx. 3 seconds. The 'XXXX' show that the set will be locked after having been switched off once by mains button.

Erasing the secret code by entering the last code again.

NOTE

If you ever forget your secret code number, the key on the last page will help you. Pressing the button combinations as shown will cancel the secret code and restore the unit back into operation. Please cut and keep this portion of cover in the safe custody immediately on purchase.

PICTURE & SOUND ADJUSTMENTS

PROGRAM NUMBER POSITION

Select with **(P+)** or **(P-)** buttons to the required program number. For direct access press the required program number on the key board. For two digit program number (from 10 to 99) press the first digit and the second digit. The second digit should be pressed immediately after the first, before the first digit with a '-' disappears from the screen. AV programming can be accessed directly by pressing button **(0/AV)**.

Press **(i)** button once. The program number position will be displayed on the left corner of the TV screen. The display will disappear after 5 seconds.

SOUND/VOLUME

Adjust to required level with **(+ ►)** and **(◄ -)** buttons. The scale and symbol will be indicated on the screen.

BRIGHTNESS

Press **(+ ☼ -)**. The scale and brightness symbol will be displayed. Make suitable adjustment by pressing **(+)** for increase and **(-)** for decrease before the scale disappears.

CONTRAST

Press **(PC/AUX)** button once then press **(+ ☼ -)**. The scale and contrast symbol will be displayed. Make suitable adjustment by pressing **(+)** for increase and **(-)** for decrease before the scale disappears.

COLOUR

Press **(+ 🌈 -)**. The scale and colour symbol will be displayed. Make suitable adjustment by pressing **(+)** for increase or **(-)** for decrease before the scale disappears.

TINT

Press **(PC/AUX)** button once then press **(+ 🌈 -)**. The scale and tint symbol will be displayed. Make suitable adjustment by pressing **(+)** for increase or **(-)** for decrease before the scale disappears.

AV RECORDING & PLAYBACK

VIDEO RECORDING

At the rear of the TV receiver are 2 sets of cinch sockets for video/audio in/out, see page 6.

Similarly in Video Cassette Recorders, sockets are provided for 'Video in' and 'Audio in'.

Interconnecting Cables between VCR & TV set are commercially available as accessories. VCR manual should be referred to ensure that appropriate connectors are used.

For recording, connect

- 'Video out' from TV Receiver to 'Video in' of VCR/VCP.
- 'Audio out' from TV Receiver to 'Audio in' of VCR/VCP.

Select the program you wish to record with **(P+)** or **(P-)** button.

Start the VCR/VCP and operate in the recording mode as described in the operating manual for your VCR/VCP.

PLAYBACK IN AV MODE

For VCR and VCP

For play back interconnect as follows :

- 'Video in' socket 9 from Receiver to 'Video out' of VCR/VCP.
- 'Audio in' socket 10 from Receiver to 'Audio out' of VCR/VCP.

Press and hold button **(P+)** or **(P-)** or **(AV)** directly till display of '**AV**' appears on the upper left hand corner of the TV screen. Start the VCR and operate it in the play back mode as described in the operating manual for VCR.

PLAYBACK IN RF MODE

Connection - Connect "RF out" of VCR to "Aerial input" of TV.

Allocate the channel of VCR Output (Refer to your VCR Manual) to any program position by channel search procedure as already explained.

Alignments

All alignment controls not mentioned in this description are preset at the factory and must not be re-aligned in the case of repairs.

Measuring instruments: Oscilloscope with 10:1 test probe, high-resistance voltmeter, colour bar test pattern.

Cecks and alignments after replacement or repair of :

Power Supply: Power voltages must be checked after every repair and before every alignment. See alignment 1.1

Tuner, IF Amplifier: alignment 1.8

Vertical Deflection: alignment 1.4...1.6

Horizontal Deflection: alignment 1.2, 1.3, 1.7

IC201: alignment 1.2, 1.8, 1.9

F202: alignment 1.10

CRT Panel: alignment 1.2, 1.11

Alignment	Preparations	Alignment Procedure
1.1 +A voltage	Brightness: minimum Contrast: minimum Volume: minimum Voltmeter: D910 Cathode	Set control VR901 to 124V ± 0.2V
1.2 Screen grid voltage U_{SG}	Feed in a test pattern with grey scale Align the screen brightness with the remote control handset so that the grey areas just become dark (Switch the TV receiver to AV mode) Oscilloscope: collector TR602/604/606 choose test point with the highest voltage level	With the control SG on DS-transformer set the voltage to 110V (14") or 150V (20"/21") 
1.3 Focus	Feed in a convergence test pattern Contrast: maximum Brightness: medium	With the focus control FOC on DS-transformer align the horizontal lines for maximum sharpness
1.4 Line width	Feed in a test pattern	Align picture-overscan to 2-3mm with L801
1.5 Vertical shift	Feed in a test pattern	Align picture to vertical middle position with VR703
1.6 Vertical geometry	Feed in a test pattern	Align linearity with VR701 and amplitude to 2-3mm overscan with VR702
1.7 Horizontal shift	Feed in a test pattern	Align test pattern to middle position with VR202
1.8 Tuner AGC	Feed in a standard test pattern UHF band channel 60; the RF must be $\geq 1.5\text{mV}$ (64dB μV , noise-free picture)	With VR201 align voltage at IC201-(47) to maximum, approx. 4.5V , and then reduce it by approx. 0.5V
1.9 Demodulator filter	Disconnect contact 1 from tuner Feed in 38.9MHz from test generator to pin 1 from F201 Voltmeter : IC201-(9)	With L203 align voltage to 2V Re-connect contact 1 to tuner after alignment
1.10 Sound trap	Feed in a NTSC picture (4.5MHz sound) without colour carrier Oscilloscope: emitter TR202	With L202 align to minimum
1.11 White balance	Feed in a colour test pattern Colour contrast (☉): minimum Contrast (☉): maximum Align the screen brightness (☉) so that the gradation from the darkest grey scale value to black is just still visible	Set the controls VG (VR601) and VB (VR602) so that no discolouration is visible in the grey scale
