

## S E R V I C E N O T E

SUPERSEDES: None

**3070 Board Test System****Series I STC Power Supply Replacement Kit**

The original Series I STC power supply (0950-2318) is no longer available. It has been replaced by a new STC supply from Power One (E4000-66252). This STC supply is only used in Telecom systems with Serieal Test Cards. While electronically identical to the old one, the new supply has different mounting and connection requirements.

A replacement kit, E1029-66201, has been set up and is available from SMO. In addition to the power supply, this kit contains new sheet-metal and an adapter cable.

The equivalent power supplies in Series II systems were replaced in January, 1995.

DATE: October 1995
