## Before Installation (steps 1-8)

### 1.0 Machines Affected

3745 Models 210/21A/310/31A/410/41A/610/61A and 3746 Models A11/A12.

### 2.0 Related BMs and ECs

None.

### 3.0 B/M(s) to be Installed

- 57G7489 - Installation Instructions
- 66X0031 - Low speed scanner installation (TSS).

#### As required FFB/M(s)

- 66X0037 - Line adapter power supply (if you install an adapter in an ODD position).
- 80G5106 - CSP Card Exchange.

### 4.0 Preparation

- \_\_\_ 1. Familiarize yourself with the purpose and details of these installation instructions before negotiating machine time with the customer.
- \_\_\_ 2. Check all the items and count parts listed on the BM(s) to be installed to determine whether all parts were received.

#### Notes:

- a. The 01G-A1 board in base frame can be TSSB or TSST.
  - A TSST board (used only in the 3745) can have TRSS, TSS and/or HPTSS/ELA adapters installed.
  - A TSSB board can have TSS and HPTSS/ELA adapters installed.
- b. TSSB and TSST boards are shared between 2 IOC buses.
  - IOC bus group 1 drives adapter positions 1 through 4.
  - IOC bus group 2 drives adapter positions 5 through 8 of each board.
- \_\_\_ 3. Using the *HONE configurator sheet* and the following tables determine the adapter cards and power (if required) positions to be installed.

4. The installation of a TSS can be performed either online (concurrent mode with NCP running, MOSS online) or offline (complete machine power OFF).

**Important note**

1. The online installation of a TSS in 3745-X1A is disruptive for 3746-900 operations.
2. Ask the customer to deactivate all resources of the 3746-900 900 before installing the adapter.

Select the procedure according to machine availability.

5. If you install a TSS in a 3745/3746 housing an ALC feature (RPQ 7L1092), the first ALC feature on the IOC bus must be moved, and plugged in last position of adapters.  
TSS feature will be plugged in place of the ALC feature.
6. **For 3745-X1A and 3746-900:**  
Configuration modification in a line adapter chain, in 3745-X1A with 3746-900 connected, requires the relocation of ACTIVE/PASSIVE bypass cards in IOC/DMA bus for proper signals propagation. This will be done in section 11.0. Parts to be used for relocation are part of the 3746-900 shipping group (holders, BPC1, ABP, cables...).

### 10.2.6 Power OFF the PSTY4

#### Warning US ONLY

If there is a mix of PSTY4 vendors in the frame, and normal power removal procedures are used to power down more than one supply, a false NOREPLY indication may occur. To avoid this condition, remove power from one PSTY4, install the associated adapter(s) (Step 10.3, “TSS Installation” on page 14) and restore power to that PSTY4 (UXX from POS screen). This sequence can be repeated for the remaining PSTY4(s).

If you install an adapter in an EVEN position, you must power OFF the PSTY4 driving the adjacent ODD LA (see table in Step 4.0, “Preparation” on page 3).

- \_\_\_ 1. Enter **POS**, press **Send/Enter**.
- \_\_\_ 2. Enter **1** (frame power services), press **Send/Enter**.

On the displayed screen, check that the status of the identified PSTY4 is UP, then, enter DXX (XX being the PSTY4 ID). Verify that the power supply goes to the **DOWN** state.

### 10.3.1 Card Installation

**Warning:** Follow existing ESD procedures when handling logic parts.

- 1. Open the corresponding system cover and the shields A over the adapter enclosure.
- 2. Remove dummy cards or IOC bypass card (BPC1) from position where feature will be installed according to the *HONE configurator sheet* and tables in Step 4.0, "Preparation" on page 3.

- 3. Slide the door marked 'A' up.
- 4. Write the adapter position on label (PN 811825) and affix a label on both ends of MUX cable (PN 6495717 or PN 03F7712).

--------------	------------------------	----------------------	----------------------	--	--	--

**Note:** MUX cable (PN 03F7712) is longer than PN 6495717, and must be used when connecting a Line Adapter in the 3746-A12 to a DMUX/SMUX card located in the front or rear bottom position of 3746-L15.

- \_\_\_ 5. Verify that holders (PN 1953244 (2)) are installed on TSS cards.
- \_\_\_ 6. Plug TSS cards in position determined in Step 4.0, "Preparation" on page 3.

**Note:** Before locking the FESL card, plug the MUX cable in connector J2 of the card.

TSSB BOARD WITH TSS ONLY

TSST WITH TRSS AND TSS

- \_\_\_ 7. Plug the three crossovers on top card connectors W,X,Y of TSS cards.

### 10.3.2 MUX Cable Installation

- \_\_\_ 1. Secure MUX cable with clamp (PN 804867) and screw (PN 2665527) on 01G gate.
- \_\_\_ 2. Using the *HONE configurator sheet*, locate the line unit and the DMUX/SMUX card associated to the TSS.

**Notes:**

- a. A DMUX card is plugged in position B0 of each LIB1 board. If only one MUX cable is connected on socket Z of DMUX card, the associated scanner will handle the full board (8 LICs). If a second MUX cable is connected on socket W, the two associated scanners will drive 4 LICs each.
- b. A SMUX card is plugged in position B0 of each LIB2 board. SMUXA is plugged in bottom board of LIC Unit and SMUXB in top board. The scanner connected in SMUXA can drive the 2 LIC boards. If a second scanner is connected in SMUXB, each scanner will drive a LIC board.

--------------	------------------------	----------------------	----------------------	--	--	--

Depending on the position of LIC unit, you may have to remove several shields or covers over raceways for a proper cable routing.

- \_\_\_ 3. Route the MUX cable from TSS enclosure to DMUX/SMUX card and plug the cable end in socket W of DMUX/SMUXB card or Z of DMUX/SMUXA card (see the *HONE configurator sheet*).
- \_\_\_ 4. Secure cable in clamps in stacking cable area.

## 10.4 Power Supply Installation (if required)

- If you have installed an adapter in an ODD position (1 or 5) in 3745, you must install a line adapter power block (PSTY4).
- If you do not install a PSTY4, go to Step 10.5, "Covers" on page 20.

**Note:** A PSTY4 feeds 2 Line adapters.

### Warning

1. Verify that all PSTY4 packing material is removed.
2. The two power screws are very easily cross threaded. If cross threading occurs, correct voltage levels may not be achieved. The following procedure is suggested to prevent cross threading. While applying a small amount of pressure, turn the screws counter clockwise, one full turn before beginning clockwise rotation and thread engagement.

### 10.4.1 PSTY4 Installation

1. Locate the position of the PSTY4 to be installed (see table in Step 4.0, "Preparation" on page 3).
2. Remove the dummy PSTY bracket on that position (one screw).
3. Slide the PSTY4 (PN 6495672) into the enclosure.

4. Tighten the two front screws then the captive screw on the bottom front of PSTY4.
5. Plug the power plug P1 into the appropriate plug position of the auxiliary power box (J1, J2, J3, or J4).
6. Be sure that the CP1 on PSTY4 is in the **ON** position.

## 10.5 Covers

- \_\_\_ 1. Slide down door 'A' on the left side of the adapter enclosure. See the second figure in Step 10.3, "TSS Installation" on page 14.
- \_\_\_ 2. Reinstall covers and shields opened in previous Steps.

- After an adapter installation with 3745 POWER ON, go to Step 11.2, "Test Procedure After an Adapter Installation Power ON" on page 23.
- Otherwise, continue.

## 10.6 Power ON
