Specific Area Message Encoding

Why our S.A.M.E. is different (than any other Weather Alert) Theirs is not the S.A.M.E.

S.A.M.E. allows you to enter a single county for the alerts, eliminating unnecessary alerts for nearby counties

S.A.M.E. will also broadcast other non-weather related (NWR) emergencies such as an Amber Alert or Evacuation Alert

- S.A.M.E. DATA contains information about the geographic region affected by the Alert, the type of alert, and it's effective time
- S.A.M.E. is activated by programming a 6-digit FIPS Code
 - Available by calling the National Weather Service toll free
 - Visiting their website
- Program up to Seven different geographical Area Codes
 - Select one or more area codes that you might frequent

S.A.M.E. TECHNOLOGY AVAILABLE ON JHD3620 AND JHD1620

The JHD3620 and JHD1620 also have a Full 7-Channel NOAA Weatherband Tuner which is a nationwide network of radio stations broadcasting continuous weather information directly from the nearest National Weather Service office.

ONLY ON JENSEN HEAVY DUTY RADIOS
