

## Introducing KODAK TRI-X Reversal Control Strips

Kodak is pleased to introduce *new* KODAK TRI-X Reversal Control Strips, CAT No. 137 8595, which replaces KODAK Control Strips (for B/W Reversal Processing), CAT No. 165 3443, found on page 74 of the price catalog. The new control strips are made on KODAK TRI-X Reversal Film 7266 and are designed for use with *new* KODAK B&W Reversal First Developer Replenisher and KODAK B&W Reversal Bleach and Replenisher which were previously announced in an October 2003 KODAK News.

The KODAK TRI-X Reversal Control Strips come in 100 foot rolls in 16 mm width only. Each sensitometric strip has 11 gray-scale steps at 0.30 log H increments. In addition, the new control strips will include a reference strip and instructions with a correction factor. The new control strips are now available.
