

Discontinued Listings

The National Institute for Occupational Safety and Health, NIOSH, which is responsible for recommending health and safety standards nationally, has suggested that an acceptable weight to lift would approach a 33-pound limit. In our continued effort to always meet or exceed governmental recommendations, Kodak has taken the stance that they would prefer a goal of 29 pounds be reached to exceed this recommended limitation.

Due to this change, the previously omitted items shown below have been discontinued and removed from the KODAK *INDUSTREX* Film, Chemicals and Equipment Price Catalog.

<i>Description</i>	<i>CAT No.</i>
