

New INDUSTREX Chemicals Launched

KODAK INDUSTREX Single Part Developer Replenisher, KODAK INDUSTREX Single Part Developer Starter and KODAK INDUSTREX LO Fixer and Replenisher were specifically designed for use with KODAK INDUSTREX Film, with T-Grain® emulsions, and approved by Pratt & Whitney (PMC 1739, PMC 1804, and PMC 1805). They will become available at the end of October 2004.

Features of KODAK INDUSTREX Single Part Developer Replenisher and Developer Starter include:

- High chemical stability which provides improved resistance to aerial oxidation and low sludge formation
- Strengthened "activation power" which allows for fast processing and high productivity
- Outstanding, consistent image quality — neutral image "tone" and low granularity
- Reduced environmental impact with less packaging waste
- Concentrated (single part) liquid developer provides ease of use
- Compatible with automatic mixer systems
- Can be transported by air

Features of KODAK INDUSTREX LO Fixer and Replenisher include:

- Low odor
- Single part concentrate which is compatible with automatic mixer systems
- Reduced packaging waste

NOTE: *DO NOT intermix these new INDUSTREX chemicals with your current INDUSTREX chemicals.*
