Inserting/Removing a CF Card

To Insert:

1. Open the Card door.
2. Insert a card in the slot and press firmly until you feel the card seat. (When using a single card, you can use either slot.)
3. Insert a second card, if needed. (The first card inserted is the active card.)
4. Close the Card door.

To Remove:

1. Open the Card door.
   CAUTION: Do not remove the card when the Card Busy LED is flashing. Doing so could destroy all the image files on the card.
2. Press the Eject button next to the card to be ejected.
