# Kodak
DP900/1100 Digital Projectors
Connecting the Projector

You can connect your projector to a laptop computer, desktop computer, or video player. All connections are made with the aid of icons on the cables.

Caution: Make sure your projector, computer and video player are turned off before you connect them.

Connecting to a Laptop Computer

Audio cable

Mouse cable

Cable hub connector

Connecting to a Desktop Computer

Audio cable

Mouse cable

Hub connector

Monitor cable

### Connecting to a Video Player

If your video player uses a round, four-prong S-video connector, you need an S-video cable in addition to the A/V cable.

Note: The S-video cable is sold separately.
Connecting with an AV Cable

Starting the Projector

1. Remove the lens cap.
2. Plug the power cord into the side of the projector, then plug it into your electrical outlet.
3. Press the "I" side of the power switch to turn on the projector.
4. Turn on your video source - a video player or a computer.
5. Position the projector and adjust the zoom setting for the image size you want.
    • Adjust the zoom ring
    • Focus by rotating focus lens.
    • Be sure the projector is at a 90-degree angle to the screen.
    • Adjust the height of the projector. Press and hold the elevator button. Raise the projector to the height you want, then release the button.

Quick Start Guide

Kodak
DP900/1100 Digital Projectors

Using the Remote Control

For best results, point the remote directly at the projector.

Standby – turns off the image without turning off the projector

Computer – selects the computer as the source

Disk Mouse – use to select menus and menu items

Simulates the left mouse button – use to adjust settings

Menu – displays the menu

Video – selects the video player as the active source

Simulates the right mouse button – use to adjust settings

Using the Keypad

While the menu is displayed, the volume, source, and standby buttons act as navigation buttons. Use them to select menu items and move to different menus.

Turning Off the Projector

To turn off the projector for a short period of time, press the button on the keypad or remote control.

To completely turn off the projector, press the "0" side of the power switch on the side of the projector.

Always unplug the projector from the wall outlet before unplugging the cord at the projector.

Menu button – displays the menu

Source button – toggles back and forth between video and computer sources

Volume – increases volume

Volume – decreases volume

Standby – turns off the image without turning off the projector

Simulates left and right mouse buttons – use to adjust settings

Safety Instructions

Safety Definitions
- **Warning:** Statements identify conditions or practices that could result in permanent personal injury.
- **Caution:** Statements identify conditions or practices that could result in damage to your equipment.
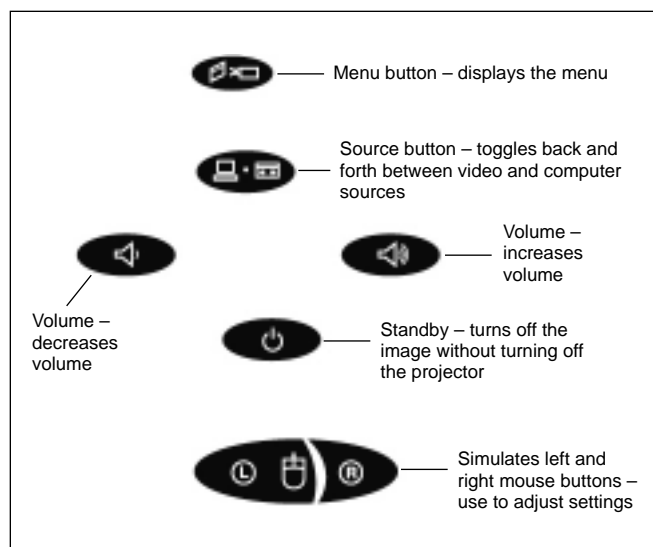

Safety Symbols

Attention: For information about use of a feature, please refer to the *Reference Manual*.

Warning: Hot surface. Do not touch.

An arrow pointing to the lamp door on the projector.

Safety Terms:
- **Warning:** Don't look directly into the lens when the projector is turned on.
- **Warning:** Don't block ventilation openings.
- **Warning:** To replace the lamp, turn the power off and unplug the power cord. To avoid burns, wait 30 minutes before opening the lamp door.
- **Warning:** Please use the power cord provided. Connect the power cord to a receptacle with a protective safety (earth) ground terminal.
- **Warning:** Refer all service to qualified service personnel. Servicing your own projector will void the warranty.
- **Caution:** Don't set liquids on the projector. Spilled liquids may damage your projector.
- **Caution:** Don't place the projector on a hot surface or in direct sunlight.
- **Caution:** Do not drop the projector. Transport the projector in a Kodak-approved case.
