A3 MONOCHROME DEPARTMENTAL PRINTER

MAKE SURE YOUR WORK IS FINISHED FASTER.

Wonderfully fast and reliable, this printer also comes with a highly functional modular design for large departments needing to get the job done. And with a print speed of 51 pages per minute A4, the Kyocera FS-9530DN can handle large print volumes quickly and professionally.

- 51 pages per minute in A4, 26 pages per minute in A3
- 128 MB memory standard, upgradeable to 640 MB
- Duplex and network connectivity as standard
- 100 department codes to track and control printer use
- High volume paper options and versatile finishing features
- Long-life components and easy maintenance

Combine a paper cassette that can hold up to 3,000 sheets of paper and a finisher with space for an equal amount of output for smooth handling of even the largest print runs.

Efficient modular design, together with a full range of paper cassettes and finishing options, enables you to easily put together the perfect printing solution.

A3 MONOCHROME DEPARTMENTAL PRINTER

ECOSYS devices are designed to minimise both direct costs and indirect costs such as maintenance, administration and consumables. The cartridge-free system requires only the toner to be replaced. The modular design concept allows you to add workflow enhancing functions and a wide variety of paper handling capabilities as required. Integrated system software provides long-term cross-network compatibility. Kyocera's long-life components reduce both operating costs and environmental impact.

Your Kyocera Business Partner:

System platform:

The FS-9530DN offers USB, parallel and network connectivity as standard and delivers problem-free system administration. Kyocera's single platform technology means that the same driver can be used for every Kyocera PCL/PostScript print device on the network: from single-user desktop printers to high-end multifunctional systems. Only Kyocera offers this effortless combination of IT sophistication and high-performance paper handling expertise.

PRESCRIBE IIe:

With the Kyocera page design and control language PRESCRIBE IIe, even complex graphics, logos and forms (even multipart forms) can be created independently of the system and saved and updated in the printer. Consequently, integration into print files no longer applies. They are only accessed as required and therefore relieve the load on the network.

KM-NET for Client/KM-NET Viewer:

The settings of all printers on the network can be checked visually and amended from any Windows PC. KM-NET for Client enables easy setup and check of the printer status via parallel, USB and network connection. KM-Net Viewer is an advanced printer management software tool using the standardized protocol SNMP.

INTERFACE

Standard interface: Fast Ethernet 10/100Base-TX, High speed bi-directional parallel (IEEE 1284), USB 2.0 (Hi-Speed), USB Host Interface dedicated for USB Flash Memory device, KUIO-LV option interface slot
Multiple interface connection (MIC): Allows simultaneous data transfer via up to four interfaces, with each interface having its own virtual printer.
