NOTE	Ripple & noise are measure     Tolerance : includes set up     The power supply is consided EMC directives.     In parallel connection, mayb.	All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature.  Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf & 47uf parallel capacitor.  Tolerance: includes set up tolerance, line regulation and load regulation.  The power supply is considered a component which will be installed into a final equipment. The final equipment must be re-confirmed that it still meets
