

## PRODUCT INFORMATION

### MINOX DCC Leica M3

#### A touch of extravagance

The new digital Classic Camera comes in a really stylish format! On the outside it features the miniaturized shell of the legendary Leica M3, designed in great detail, and inside it is packed with innovative technology in the form of a powerful digital camera. A unique harmony of classic design and state-of-the-art features. This new edition of the wee camera is a logical and up to date further development of the previous DCC model, and features a color monitor and a memory card slot, making the miniature camera geared to continue a success story.

The MINOX DCC Leica M3 demonstrates in a most impressive way how a classic camera can be revived. It is a highlight in the segment of lifestyle digital cameras and is a milestone which has

already acquired cult status in the history of the Wetzlar-based company with its rich tradition. The concept on which this small classic camera is based relays the strong points of MINOX in a concise form: perfect, high-precision miniaturization of top technology combined with a touch of extravagance. Many details designed in metal enhance the form of the DCC Leica M3 most effectively making it a real gem. The State-of-the-art technology and optical systems behind the nostalgic look provide images of a brilliant quality. Functional controls have been discretely integrated in the body, including the 1.5 inch TFT color monitor.

As a supplement to the optical viewfinder the display can optionally help the user compose

the subject and provides information on the selected camera settings as well as on the number of images. At the same time the digital MINOX Leica M3 is extremely easy to use. Based on its innovative, striking appearance it's a real eye-catcher and guarantees unlimited photographic fun to people of all ages.
