

Application Note APNT-0012

Secure Telephone Audio Link/Remote Control

OPERATION

- UAD connects to phone line after prescribed number of rings.
- Remote operator enters correct code to capture audio path.
- Remote control is accessible for the duration of the call.
- Bi-directional audio may be switched through an output on the 6003 if desired.
- System disconnects from phone line per selection (time, loop current interrupt or both) or optional use of Model 90417 Dial Tone Detector.

NOTE: * Local RESET (override) control is provided by optional switch.
