For MAC users

(Mac OS: 9.x and 10.1 above)

By connecting your camera to a MAC computer (referring to
**"Connecting to PC"** on Page 14), it will automatically detect Mass
Storage drive. You can easily manipulate your files the way you do
in MAC user interface.

Removing the camera from Mac

1. Select the camera icon (shown as 'NO_NAME'or 'untitled'
   drive) on the desktop.
2. Drag and drop the drive to the Trash.

Using MAX Console (Not available for MAC)

By connecting your camera to a computer, MAX Console opens. You may choose either to transfer the camera data through MAX console or through Mass Storage.
