

- Upgrading firmware of NPS-10

1. Connect NPS-10 to computer using USB.
2. Place downloaded firmware file(NPS10.BIN) to the root directory of NPS-10 as shown in the following figure.

3. Remove NPS-10 from the computer.
4. If removed, NPS-10 automatically power off itself. Power on NPS-10 again.
5. Short press the control button to select 'Menu' function. Then move the cursor down to select 'Setup' menu. At the Setup menu, you can select 'Firmware Update' function

6. Select 'In HDD'. The firmware file(NPS10.BIN) is saved on the hard drive during step 2. Then select 'OK' to initiate firmware update.

7. If the firmware update completed without error, then NPS-10 shows following message and power off itself.
