

Panasonic

**Dual AES/EBU Output Card
Instructions**

Model No. WZ-AESAD

RAMSA

Before attempting to connect or operate this product,
please read these instructions carefully and save this manual for future use.

Introduction

The WZ-AESAD is an option card to be installed in the AD Converter WZ-AD96 and WZ-AD96M.

This card supplies an 8-channel, 24 bit, 96 kHz signal to the connected MTRs.

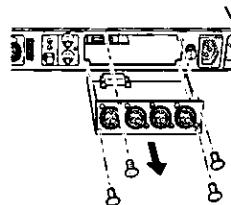

Warning!

The installation shown below should be made by qualified service personnel or system installers.

Installation

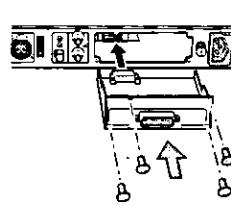

1. Plug off the power cord of the converter from an AC outlet.

2. Losen four screws as illustrated, then remove the standard AES/EBU output block from the rear panel of the AD Converter.

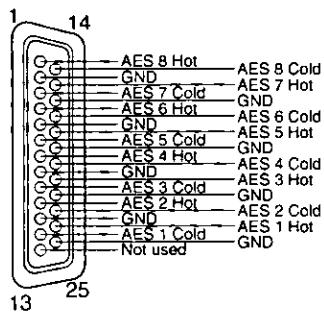

3. Place the option card into the opening, then push it to the end.

4. Fasten the four screws to fix the option card.

Pin Assignment

Recommended Cable

Panasonic part # **DA/DB-XLRM** (DB-25 to 8 Male XLR, Length 3m), AD Output cable is recommended.

Specifications
