PHILIPS

32" Real Flat Technical Design Line

This Designline widescreen combines the latest Hi Tech design with the most complete feature package on the market. The styling integrates metal finishing with moving LCD control panel and backlight top controls. The featuring is top of the range with Pixel Plus, Dolby Digital surround sound with on board dvd/cdplayer and RDS FM radio. You will still have to pour your own drinks, but everything else is taken care of. Matching stand is available.

Miscellaneous

- Mains: AC 220-240V +/- 10%
- Power Consumption: tbc W Normal Operation
<1 W Stand by
- Set Weight: 62 kg
- Weight Incl. Packaging: 73 kg
- Set Dimension (WxHxD): 869x559x538 mm
- Box Dimension (WxHxD): tbc
- TV Colour: Artic Silver (11024)

Product highlights

Real Flat Black Line S

Philips TV picture tube provides non-distorted picture quality, while offering a wider viewing angle without light reflections. Thanks to the highly pigmented phosphors, the brightness and contrast performance are considerably improved compared to conventional picture tubes.

Pixel Plus

Uses the power of the Pixel Plus processor to create 33 % more lines and double the number of Pixels on each line. The result is razor sharp pictures with incredible detail and depth, every time from any source.

Digital Natural Motion

Building upon 100 Hz technology Philips invented Digital Natural Motion to eliminate juddering effects that are visible with moving picture content. Digital Natural Motion estimates motion in the picture and corrects juddering movements in both broadcast and movie material (DVD). Smooth motion reproduction and excellent sharpness are the result.

Digital Crystal Clear

A unique package of picture innovations including Combfilter, Scavem, Dynamic Contrast, Color Enhancement and Luminance Transient Processing. Digital Crystal Clear, using 10 bit processing, offers 30% more contrast, natural colors and a high level of detail.

Full Active Control

Active Control automatically analyses, 50 times per second, the incoming signal and adjusts the key picture settings on Sharpness, Digital Noise Reduction, Color, Contrast and Picture Format. The ambient light sensor adjusts the settings according to the viewing conditions in the room. Active Control thus offers the best possible picture settings any time, any source.

Dolby Digital with cordless surround speakers

The multi-channel Dolby Digital audio system offers state of the art cinema ambiance with digital precision and quality. 5 separate channels and a subwoofer (5.1) offer digital quality sound with pin-point accuracy in an enlarged listening area. Naturally the system also perfectly reproduces Dolby Pro-logic and Stereo materials. Philips Dolby Digital comes with unique FM wireless technology with Quartz PLL tuning offering a bandwidth of 20Hz-20kHz.

On Board CD/DVD Player

Integrated DVD mechanism which can be used to show DVD films without the need for any other equipment or cables. The DVD player will also play CD's enabling one to listen to music.

1200 Page HyperText & Wordsearch

Advanced Teletext featuring based upon the new Compass GUI with navigation functions Wordsearch and HyperText. In HyperText select any word within the teletext magazine and this system will find all other mentions of this word within teletext for that channel. Wordsearch is similar but you have the freedom to type in, using the remote control, a word of your choosing.
