

Power Distribution Unit (PDU)

Designed for use with the Powerware **FERRUPS®** and **9170 UPS**

Features

- ▶ Powerware's softwired Power Distribution Unit (PDU) allows you to expand the number of output receptacles for the FERRUPS and 9170 uninterruptible power systems (UPS).
- ▶ Powerware's PDUs plug directly into one of the output receptacles on the UPS and contain multiple output receptacles.

General Specifications

Dimensions (HxWxD): 3 x 7.8 x 10 inches
Weight (approx.): 8lbs.
Safety Listings: UL 1778 and cUL
(to CSA C22.2-107.1)

INPUT/OUTPUT CONFIGURATIONS

PDU-007 120/240V

Input: 6' line cord with L14-30P plug for UPS output voltage of 120/240 VAC (not 208 VAC.)

Output: (2) 5-15R duplex receptacles with individual 15A circuit breakers for each duplex, and (4) 6-15R duplex receptacles with individual 15A circuit breakers for each duplex.

PDU-008 120/240V

Input: 6' line cord with L14-30P plug for UPS output voltage of 120/240 VAC (not 208 VAC.)

Output: (2) 5-15R duplex receptacles with individual 15A circuit breakers for each duplex, and (3) L6-30R simplex receptacles.

PDU-009 120/240V

Input: 6' line cord with L14-30P plug for UPS output voltage of 120/240 VAC.

Output: 120V (6) 5-15R duplex receptacles with individual 15A circuit breakers for each duplex.

INPUT/OUTPUT CONFIGURATIONS

PDU-010 208V or 240V

Input: 6' line cord with L6-30P plug for UPS output voltages of 208 or 240 VAC.

Output: (3) L6-20R simplex receptacles with individual 20A circuit breakers for each receptacle and (1) L6-30R simplex receptacle.

PDU-011 208V or 240V

Input: 6' line cord with L6-30P plug for UPS output voltages of 208 or 240 VAC.

Output: (4) L6-30R simplex receptacles.

PDU-012 120V

Input: 6' line cord with L5-30P plug for UPS output voltages of 120 VAC.

Output: (4) 5-15R duplex receptacles with individual 15A circuit breakers for each duplex.

Note: Designed for use with FERRUPS® and 9170 only — DO NOT plug directly into wall outlet.
