Extended Five-Year Pro-Rated Warranty and Computer/Load Protection Guarantee

**Applies *only* to original purchasers for end use in the United States and Canada who file the
Warranty Registration Card within 30 days of purchase.**

In addition to its standard Two-Year Limited Warranty and \$25,000 Computer/Load Protection Guarantee below, Powerware Corporation further warrants its UPS will have a service life of five years from the date of shipment from Powerware Corporation's factory when used in accordance with the storage, handling, installation, operation, and maintenance procedures prescribed in the following section of this warranty and in the Operator's Manual. "Service life" means the UPS' ability to deliver at least 80% of its original rated backup time.

If Powerware Corporation finds that any UPS has not provided the five-year warranted service life, Powerware Corporation will, as its sole obligation and the user's sole remedy for breach of this warranty, repair or replace the unit, at its option, F.O.B. Powerware Corporation's factory, for a charge pro-rated on the following basis. The user will be allowed a credit against the list price of equivalent equipment at the time of return to Powerware Corporation, in proportion to the percentage of the warranted service life remaining at the time of return to Powerware Corporation. (In calculating the available credit, the remaining warranted service life will be rounded up or down to the nearest whole year.) The user will be responsible to pay the balance of the list price of equivalent equipment; and Powerware Corporation reserves the right to require payment prior to delivery of the repaired or replacement equipment.

Powerware Corporation's complete warranty responsibilities are therefore summarized as follows:

Years 1-2 - Unit Repaired or Replaced Free of Charge

Years 3-5 - Credit (\$) = Current List Price X $\frac{\text{Years of Unexpired Life}}{5 \text{ Years of Warranted Life}}$

Required Operating Conditions and Extended Five-Year Pro-Rated Warranty Exclusions

1. If you plan to store the UPS or battery cabinets prior to use, store them in a cool, dry environment. Storage temperature should not exceed 95°F (35°C) in order to preserve battery life. For longer term storage, energize the UPS and battery cabinet for approximately 8 hours every 90 days in order to maintain battery charge. Whenever the units are not energized, verify that the circuit breaker on all battery cabinets is returned to the OFF (O) position.
2. Average annual temperature at equipment site shall not exceed 77°F (25°C).
3. The above warranty does not apply to units with broken or damaged enclosures, input cables or output receptacles, or to units that have been frozen or damaged due to neglect, accident, or abuse such as fire, flooding, explosives, or exposure to weather conditions.
4. The above warranty also does not apply to units that have been improperly installed, altered, or tampered with in any way, or if the equipment was not used under normal operating conditions and in accordance with labels and instructions.

All defective UPS units and parts, when returned and replaced, become the property of Powerware Corporation.

This warranty applies only to the original end user of the equipment and is nontransferable.
