

# Notes for Windows Server 2003 Users

---

This supplement provides information for users of Microsoft® Windows Server™ 2003 Standard Edition or Microsoft® Windows Server™ 2003 Enterprise Edition (Windows Server 2003) who are installing any of the following applications:

- DeskTopBinder V2 Professional
- ScanRouter DocumentServer
- ScanRouter V2 Professional
- ScanRouter Enterprise
- Web Document Viewer

---

## To install DeskTopBinder V2 Professional or ScanRouter DocumentServer

---

You must install RICOH FileWriter beforehand.

1. On the [Start] menu, click [Run...].
2. In the [Run] dialog box, enter "gpedit.msc" in the [Open:] box, and then click [OK]. Group Policy Object Editor starts.
3. Double-click [Computer Configuration], double-click [Administrative Templates], and then double-click [Printers].
4. In the [Printers] folder, double-click [Disallow installation of printers using kernel-mode drivers].
5. In the [Disallow installation of printers using kernel-mode drivers Pro...] dialog box, click [Disabled] on the [Setting] tab, and then click [OK].
6. Follow the installation procedure given in *Setup Guide*.
7. After installation, open the [Disallow installation of printers using kernel-mode drivers Pro...] dialog box, and then restore the settings.

---

## To Install ScanRouter V2 Professional or ScanRouter Enterprise

---

You must install SQL Server 2000 Desktop Engine (MSDE2000 SP3a) beforehand. MSDE2000 SP3a is included on the CD-ROM provided.

The CD-ROM includes English and Chinese (simplified and traditional) language versions. Versions in other European languages can be downloaded from the Microsoft Web site.

1. On the [Start] menu, click [All Programs], point to [Accessories], and then click [Command Prompt].
2. In the [Command Prompt] dialog box, change the current drive to the CD-ROM drive, and then enter the desired language version:  
English: cd \sql2ksp3\EN  
Chinese (simplified): cd \sql2ksp3\CN  
Chinese (traditional): cd \sql2ksp3\TW

The current directory is moved to the folder where MSDE 2000 SP3a setup utilities are included.

3. In the [Command Prompt] dialog box, enter the following:  
setup SAPWD="*SAPassWord*" SECURITYMODE=SQL  
Here, the *SAPassWord* is the optional SA logon password.  
At this time, "a default instance configured to use Mixed Mode" becomes the authentication method and instance name.  
MSDE2000 SP3a is installed.
4. Follow the installation procedure given in *Setup Guide*.  
ScanRouter V2 Professional and ScanRouter Enterprise must be installed using a password-protected account.

---

## To install Web Document Viewer

---

You must install Internet Information Services (IIS) beforehand.

- To install IIS:
  1. On the [Start] menu, click [Control Panel].
  2. Click [Add or Remove Programs].
  3. In the [Add or Remove Programs] dialog box, click [Add/Remove Windows Components].  
The Windows Components Wizard appears.
  4. In the [Components:] list, double-click [Application Server].
  5. Click [Internet Information Services (IIS)], and then click [Details...].
  6. Click [World Wide Web Service], and then click [Details...].
  7. Select the [Active Server Pages] check box, and then click [OK].
  8. When a completion message appears, click [Finish].  
IIS is installed.
- If IIS is already installed:
  1. On the [Start] menu, click [Control Panel].
  2. Point to [Administrative Tools], and then start IIS Manager.
  3. In the left pane, expand the local computer, and then click [Web Service Extension].
  4. In the right pane, click [Active Server Pages], and then click [Allow].

Whenever IIS is set, follow the installation procedure given in *Setup Guide*.
