Handling Precautions for Traverse Deck

The laser diode in the traverse deck (optical pickup) may break down due to potential difference caused by static electricity of clothes or human body.

So, be careful of electrostatic breakdown during repair of the traverse deck (optical pickup).

• Handling of traverse deck (optical pickup)

1. Do not subject the traverse deck (optical pickup) to static electricity as it is extremely sensitive to electrical shock.
2. To prevent the breakdown of the laser diode, an anti-static shorting pin is inserted into the flexible board (FPC board).
When removing or connecting the short pin, finish the job in as short time as possible.
3. Take care not to apply excessive stress to the flexible board (FPC board).
4. Do not turn the variable resistor (laser power adjustment). It has already been adjusted.

• Grounding for electrostatic breakdown prevention

1. Human body grounding
Use the anti-static wrist strap to discharge the static electricity from your body.
2. Work table grounding
Put a conductive material (sheet) or steel sheet on the area where the traverse deck (optical pickup) is placed, and ground the sheet.

Caution:

The static electricity of your clothes will not be grounded through the wrist strap. So, take care not to let your clothes touch the traverse deck (optical pickup).

Precaution of Laser Diode

CAUTION: This product utilizes a laser diode with the unit turned "on", invisible laser radiation is emitted from the pick up lens.
Wave length: 780 nm
Maximum output radiation power from pick up: 100 μ W/VDE

Laser radiation from the pick up unit is safety level, but be sure the followings:

1. Do not disassemble the pick up unit, since radiation from exposed laser diode is dangerous.
2. Do not adjust the variable resistor on the pick up unit. It was already adjusted.
3. Do not look at the focus lens using optical instruments.
4. Recommend not to look at pick up lens for a long time.

ACHTUNG: Dieses produkt enthält eine laserdioden. Im eingeschalteten zustand wird unsichtbare laserstrahlung von der lasereinheit adgestrahlt.
Wellenlänge: 780 nm
Maximale strahlungsleistung der lasereinheit: 100 μ W/VDE

Die strahlung an der lasereinheit ist ungefährlich, wenn folgende punkte beachtet werden:

1. Die lasereinheit nicht zerlegen, da die strahlung an der freigelegten laserdioden gefährlich ist.
2. Den werksseitig justierten einstellregler der lasereinheit nicht verstellen.
3. Nicht mit optischen instrumenten in die fokussierlinse blicken.
4. Nicht über längere zeit in die fokussierlinse blicken.

LUOKAN 1 LASERLAITE
KLASS 1 LASER APPARAT

VARO! Avattaessa ja suojakäsiä ohitettaessa olet alttiina näkymätön lasersäteilylle. Älä katso säteeseen.

VARNING! Osynlig laserstråling når denna del är öppnad och spårren är urkopplad. Beträkta ej strålen.

VORSICHT- Unsichtbare Laserstrahlung, wenn Abdeckung geöffnet. Nicht dem Strahl aussetzen. NCL50021

DANGER- Invisible laser radiation when open. AVOID DIRECT EXPOSURE TO BEAM.

ADVERSE! Usynlig laserstråling når deksel åpnes og sikkerhedsålls brytes. Unngå eksponering for strålen.

Location of Controls

- ① Repeat button
- ② Display section
- ③ Play button and indicator
- ④ Stop button
- ⑤ Pause button
- ⑥ Random play button
- ⑦ Disc tray
- ⑧ Disc tray open/close button
- ⑨ CD edit button
- ⑩ Skip/search buttons

■ Listening to Compact Discs

Sequential play

- 1 Switch on the power.**
"no DISC" indicates that a CD has not been installed.
- 2 Press ▲ OPEN/CLOSE to open the tray.**
Insert the CD with label facing upward.
Do not put your finger through the hole in the middle of the tray. It could get caught when the tray closes.
An adaptor for CD single is not required.
- 3 Press ▲ OPEN/CLOSE to close the tray.**
When there are 13 or more tracks on the CD, "▶" will appear.
- 4 Press ▶.**
Press the button on the "▶" indicator to start play correctly.
Play will start from the first track on the CD.
Play will stop automatically when the last track on the CD finishes playing.
- 5 Adjust the volume level as you like.**

To stop the disc play:

Press □.

To temporarily stop the disc play:

Press □. ▶ flashes up green.
To play again, press ▶.

For your reference:

If you press ▶ instead of ▲ OPEN/CLOSE after inserting a CD, the tray will close and play will start directly from the track 1.

About ▶ indicator:

While halted: Lights up orange.
While playing: Lights up green.

About the total playing time:

The total playing time displayed includes the silent sections between tracks. Hence, there will be a difference between the total playing time and the liner notes.

■ Operation Check and Main Component Replacement Procedures

NOTE

1. This section describes procedures for checking the operation of the major printed circuit boards and replacing the main components.
2. For reassembly after operation checks or replacement, reverse the respective procedures. Special reassembly procedures are described only when required.
3. Select items from the following index when checks or replacement are required.
4. Illustrated screws are equivalent to actual size.
5. Refer the parts No. on the page of "Main Component Replacement Procedures", if necessary.

● Contents

	Page
• Checking Procedure for each P.C.B.	
1. Checking for the main P.C.B.	5.
2. Checking for the operation P.C.B. and servo P.C.B.	6.
• Main Component Replacement Procedures	
1. Replacement for the traverse deck ass'y	6~8.
2. Replacement for the loading belt and loading motor	8.

■ Checking Procedure for each P.C.B.

1. Checking for the main P.C.B.

2. Checking for the operation P.C.B. and the servo P.C.B.

- a [RHD30007] (Black)
- b, c [XTBS3+8JFZ1] (Black)
- d [XTB3+8FFZ] (Black)

■ Main Component Replacement Procedures

1. Replacement for the traverse deck ass'y

● Follow the item 2 in checking procedure for each P.C.B. on this page.

- a [XTN26+6G]
- b [XTB3+25GFZ] (Black)
- c [XTN3+8JFZ] (Black)
- d [RHD20010] (Black)
- e [XTV2+6G]

Caution:
Insert a short pin into the traverse unit FPC board.
(Refer to "Handling Precautions for Traverse Deck" on page 2.)

Step 11

Step 12 Traverse unit ass'y [RAE0113Z]

NOTE

Be careful not to lose the 3 springs because those will also be removed on removal of the traverse unit ass'y.

Installation of the disc tray after replacement

Install the guide shaft and guide shaft holder.

Install the disc tray.

Hold the disc tray and slide the drive gear (2).

a

b

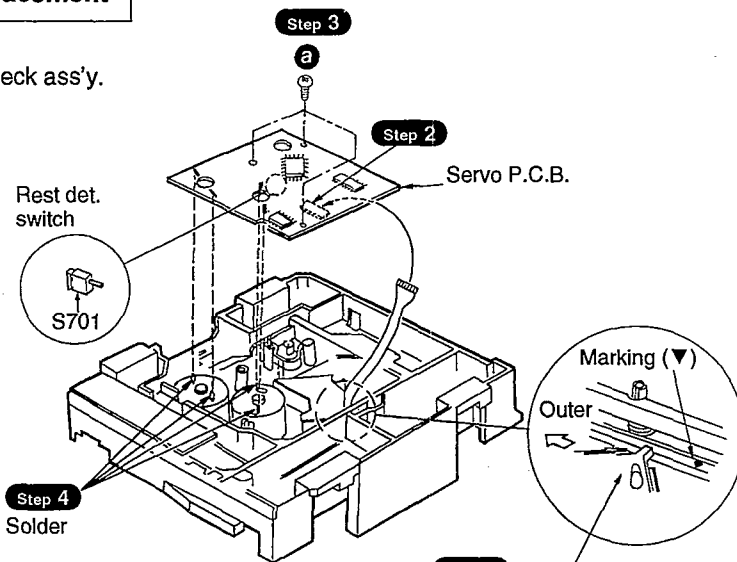

[RHD20010] (Black)

[XTN3+8JFZ] (Black)

Installation of the servo P.C.B. after replacement

Step 1 Install the servo P.C.B. in the traverse deck ass'y.

Before installing the servo P.C.B., move the optical pickup toward the outer edge from the mark "▼".
 [Otherwise, the rest detect switch (S701) mounted on the servo P.C.B. may be damaged.]

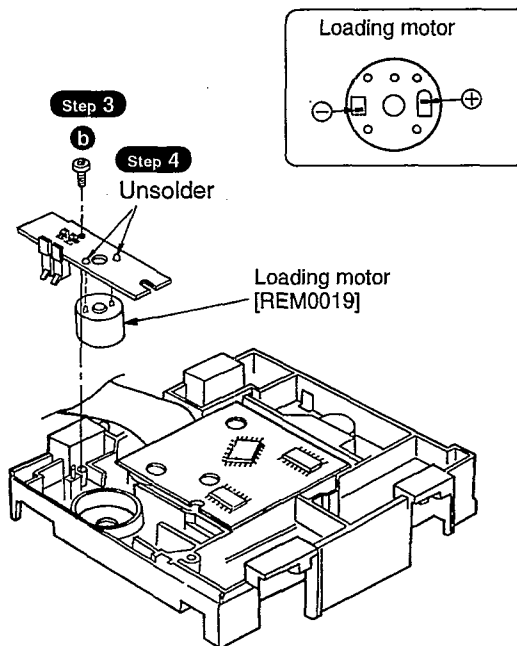

Step 1 Install the optical pickup toward the outer edge from the mark "▼".

2. Replace for the loading belt and loading motor

- Follow the item 2 in checking procedure for each P.C.B. on page 6.
- Follow the **Step 1** ~ **Step 7** of item 1 in main component replacement procedures on page 6.

Measurements and Adjustments

Cautions:

- It is very dangerous to look at or touch the laser beam. (Laser radiation is invisible.)
With the unit turned "on", laser radiation is emitted from the pickup lens.
- Avoid exposure to the laser beam, especially when performing adjustments.

This unit SL-CH510 is designed to operate on power supplied from the Amplifier SE-CH510 through the Tuner/Sound Processor ST-CH510.

When connecting the unit to other system components, do not connect to the Amplifier SE-CH510 directly. Be sure to connect this unit through the Tuner/Sound Processor ST-CH510.

When operating the unit SL-CH510 alone for testing and servicing, without having power supplied from the Amplifier SE-CH510 and the Tuner/Sound Processor ST-CH510, use the following method.

Power Supply to This Unit alone

Apply 11V AC power to the section between **AC11V (AC)** of the coil (L1) and the jumper J1 (**GND**) as well as the section between **AC11V (AC)** of the coil (L2) and the jumper J1 (**GND**). (10V AC power can be also applied when using power supply tool.) (Shown in Fig. 1)

To Check Signals

Connect the oscilloscope or the speaker with built-in amplifier to the section between LINE OUT (Lch) of the resistor R815 and the GND point of the jumper J1 as well as the section between LINE OUT (Rch) of the resistor R816 and the GND point of the jumper J1 and check if the signals are outputting from this unit. (Shown in Fig. 1)

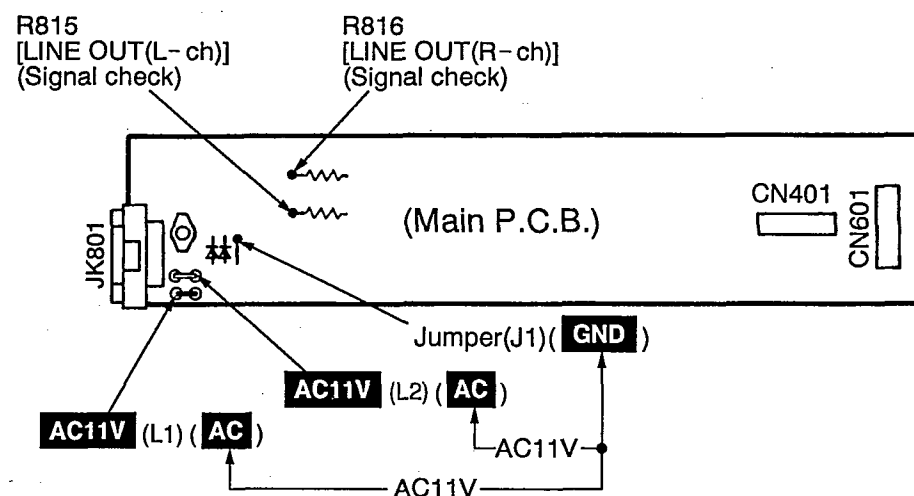

Fig. 1

(Apply 10 V AC power when using power supply tool.)

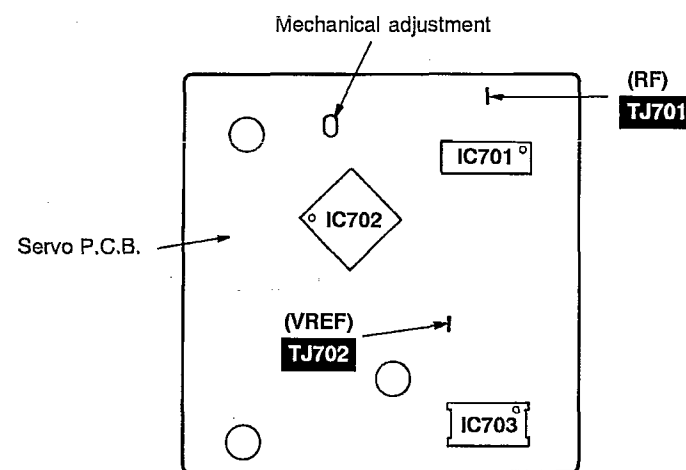

Fig. 2

Fig. 3

Preparation of Adjustment

1. Insert test disc into the unit.
2. Turn the power of this unit off and then turn it on. (The CD unit is adjusted automatically with it stood.)

Measuring Instruments and Special Tools

- Test disc
 1. Playability test disc (SZZP1054C)
 2. Uneven test disc (SZZP1056C)
- Allen wrench (M2.0) (SZZP1101C)
- Oscilloscope

(1) MECHANICAL ADJUSTMENT

- When the traverse deck is replaced, making adjustments is not necessary. (The traverse deck ass'y is already adjusted.)
- Make adjustments to improve playability when the traverse deck has not been replaced. Make the electrical adjustments first.

1. Connect the oscilloscope's CH. 1 probe across **TJ701 (+)** and **TJ702 (VREF)** on the Servo P.C.B. (Shown in Fig. 2)

Oscilloscope setting:

VOLT 200 mV
SWEEP 0.5 μ sec
Input coupling AC

2. Switch the player power ON, and play track 19 on the test disc (SZZP1056C).
3. Leave the player in Play mode and place it as shown in the figure on the right.
4. Alternately adjust the two mechanical adjusting screws with the 2.0 mm allen wrench (SZZP1101C) unit the RF signal amplitude on the oscilloscope is maximize. (Shown in Fig. 3)
5. After completing the adjustment, lock the mechanical adjustments with lock paint (RZZ0L01).

A Maximize the amplitude.

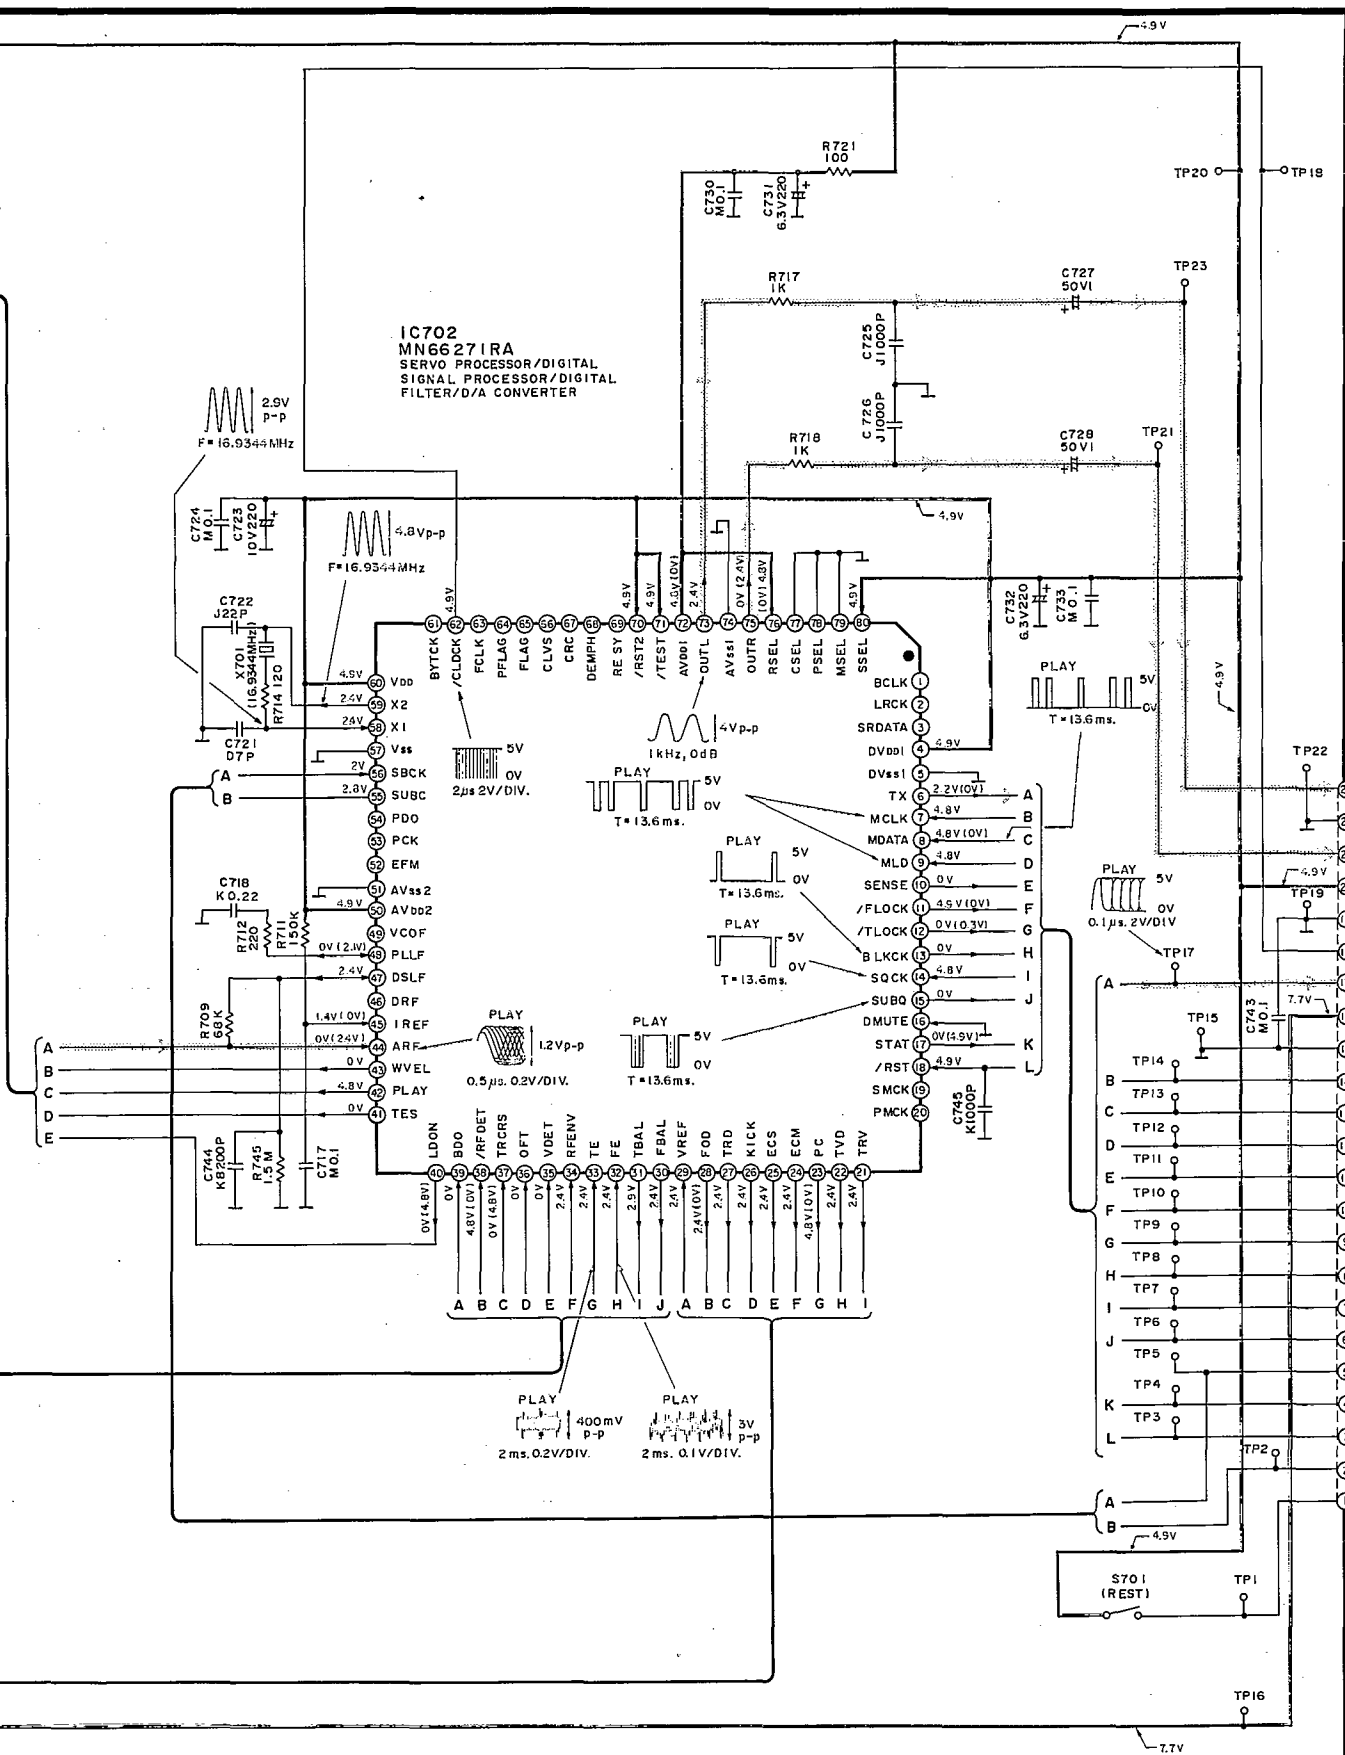

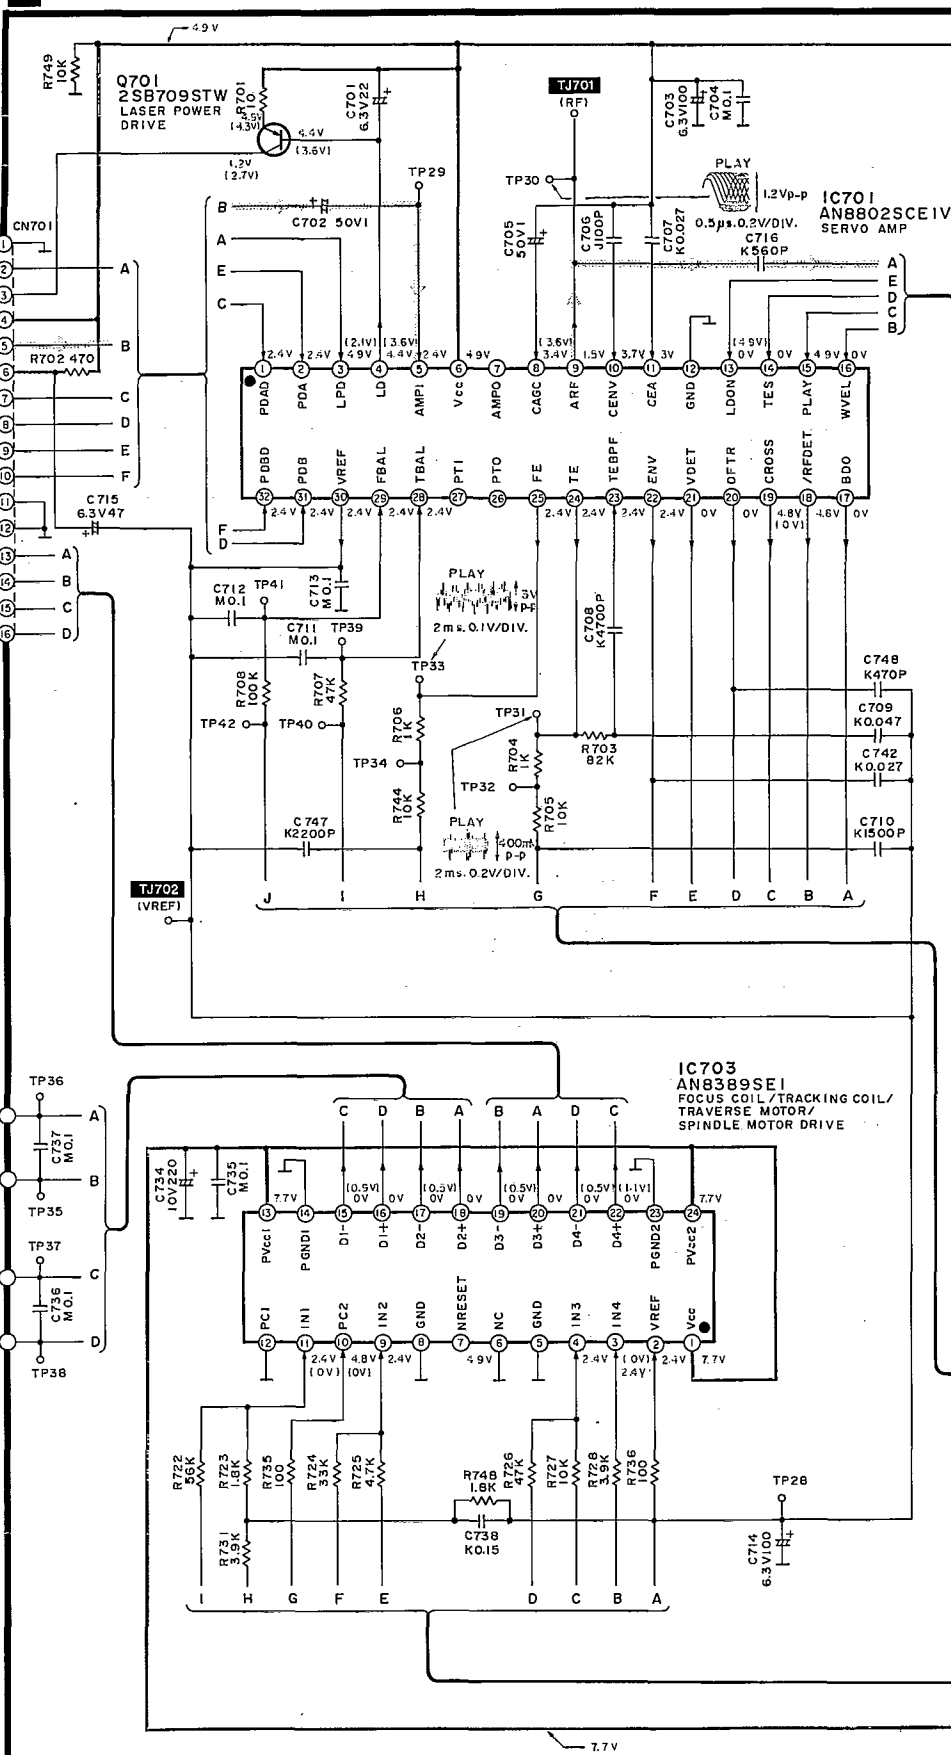

(2) CHECK OF PLAY OPERATION AFTER ADJUSTMENT

- Checking Skip Search
 1. Play an ordinary musical program disc.
 2. Press the skip button to check for normal skip search operation (in both the forward and reverse direction).
- Checking Manual Search
 1. Play an ordinary musical program disc.
 2. Press the manual search button to check for smooth manual search operations at either low or high speed (in both the forward and reverse directions).
- Checking playability
 1. Play the 0.7 mm black dot and the 0.7 mm wedge on the test disc (SZZP1054C) and verify that no sound skip or noise occurs.
 2. Play the middle tracks of the uneven test disc and verify that no sound skip or noise occurs.

● Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard. Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.

No mark : CD STOP
 () : CD PLAY [1kHz, L + R, 0 dB]

● Important safety notice:
 Components identified by Δ mark have special characteristics important for safety. Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

● Caution!
 IC and LSI are sensitive to static electricity. Secondary trouble can be prevented by taking care during repair. Cover the parts boxes made of plastics with aluminum foil. Ground the soldering iron. Put a conductive mat on the work table. Do not touch the legs of IC or LSI with the fingers directly.

About the Self-Diagnostic Mode

This unit is equipped with a self-diagnostic function which, in the event of a malfunction, automatically displays a code indicating the nature of the malfunction. Use this self-diagnostic function when servicing the unit.

SC-CH510 (SL-CH510, ST-CH510, SE-CH510, RS-CH510, SB-CH510A)

Display contents

Display code	Problem or condition	Correction procedure
U-70 (displayed automatically)	A bus-line communications error has occurred as a result of the flat cables being inserted incorrectly, thus preventing the system from operating.	<p>1. If "U-70" is displayed on the tuner/sound processor, the tape deck cannot be operated by remote control.</p> <p>2. If "U-70" is displayed on the CD player, the CD player cannot be operated by remote control.</p> <p>1. To check for correct insertion of the flat cables ① Match each connector with the color (black/white) of the connection port and insert until you hear a click. ② Insert the flat cables at the back of the unit in the order indicated. Make sure the which side of the cable is on your right side.</p> <p>2. Breakage of flat cable (Check and replace as necessary.)</p> <p>3. If the problem is not corrected by items (1.) and (2.) above, this indicates a faulty IC. SL-CH510: IC601 (M38112M4102F) IC602 (LA5606M-TE-L) Check these IC's and replace as necessary.</p>
F-61	When the power switch is switched on, it automatically switches back off, making it impossible to switch power on.	<p>1. Faulty amplifier (SE-CH510) output IC (IC501).</p> <p>2. Fan motor is burnt out, locked, or stopped.</p> <p>3. Replace the output IC or fan motor as necessary.</p>

Automatic Adjustment Results Display Function

Self-Check Function

The SL-CH510 unit has a function that uses the FL display board to indicate the results of automatic adjustment of the servo-circuit (tracking, focus, offset, etc.) as error codes. The error code display indicates the location of failures from automatic adjustment circuit.

The following procedure displays the error codes from the self-diagnostic function.

Procedure for displaying automatic adjustment codes

- Set the unit in the servo P.C.B. checking mode (refer to page 6).
- Turn on the power supply switch (refer to page 9) while pressing the STOP (■) and REPEAT buttons at the same time.
- The "C-2" code is displayed 2 or 3 seconds later to indicate the automatic adjustment mode.

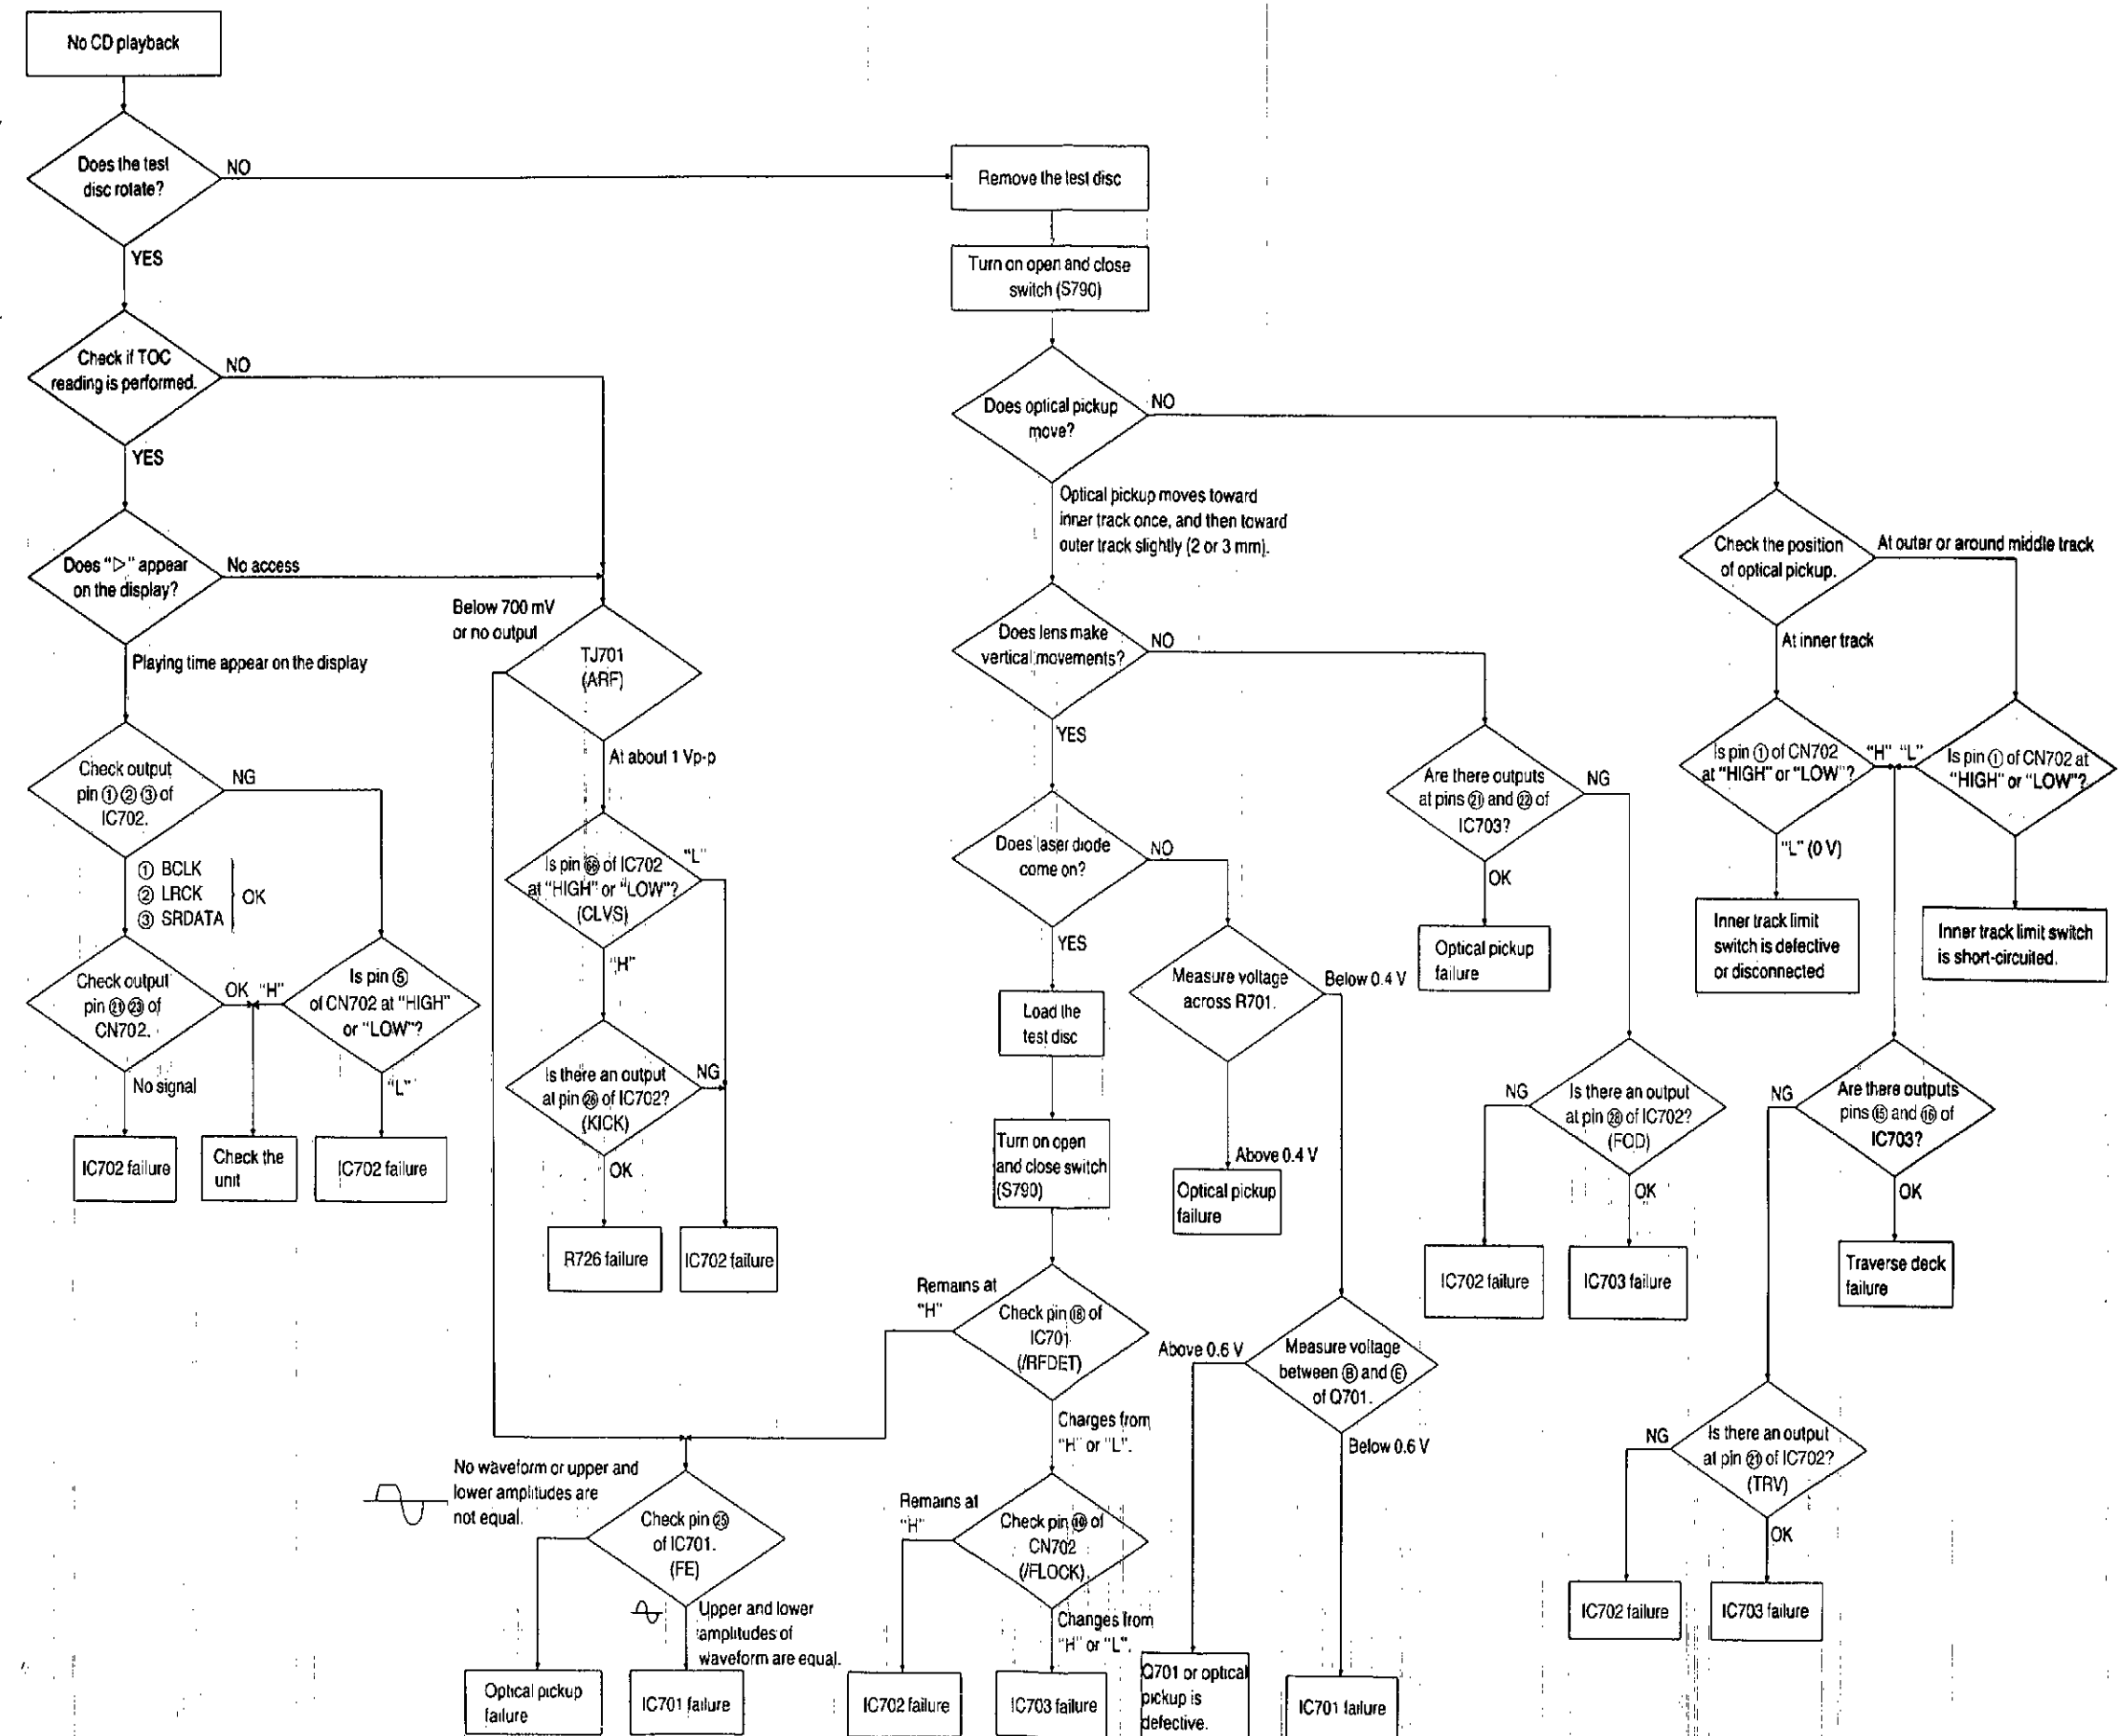

Note:
 When the SL-CH510 is removed from its set and then operated, "U-70" is displayed on the FL display as an error code. Even if the buttons are pushed continuously after this indication, the display will automatically change to "C-2".

Troubleshooting using the automatic adjustment code

- Notes:**
- If "E-00" is displayed as an error code, this means no error was found.
 - Check the disc and laser-detector lens for damage, contamination or stains.

FL error code display	Symptom	Probable cause	Signal to check		Normal voltage and waveform values	
			Location	Signal name	PLAY	STOP

21	VDET	O	VDET output
22	ENV	O	ENV output
23	TEBPF	I	Vibration detection input
24	TE	O	Tracking error output
25	FE	O	Focus error output
26	PTO	O	Potentiometer output (no use, open)
27	PTI	I	Potentiometer inversion input (no use, open)
28	TBAL	I	Tracking balance input
29	FBAL	I	Focus balance input
30	VREF	O	VREF output
31	PDB	I	PD B channel signal input without delay
32	PDBD	I	PD B channel signal input with delay

●IC702 (MN66271RA)

Pin No.	Terminal Name	I/O	Function
1	BCLK	—	Bit clock output for serial data (no used, open)
2	LACK	—	L/R identification signal output (no use, open)
3	SRDATA	—	Serial data output (no used, open)
4	DV ₀₀₁	I	Power supply input (for digital circuit)
5	DV _{ss1}	—	GND (for digital circuit)
6	TX	O	Digital audio interface signal output
7	MCLK	I	Microprocessor command clock signal input (Latches data at first transition)
8	MDATA	I	Microprocessor command data signal input
9	MLD	I	Microprocessor command load signal input
10	SENSE	O	Sence signal output (OFT, FESL, MAGEND, NAJEND, POSAD, SFG)
11	/FLOCK	O	Focus servo feeding signal output ("L": Feed)
12	/TLOCK	O	Tracking servo feeding signal output ("L": Feed)
13	BLKCK	O	Sub-code block clock signal output (IBLKCK=75 Hz during normal playback)
14	SQCK	I	External clock signal input for sub-code Q register
15	SUBQ	O	Sub-code Q code output
16	DMUTE	I	Muting input ("H": Mute)
17	STAT	O	Status signal output (CRC, CUE, CLVS, TTSTVP, FCLV, SQCK)
18	/RST	I	Reset input
19	SMCK	—	1/2-divided clock signal of crystal oscillating at MSEL="H" (ISMCK=8.4672 MHz) 1/4-divided clock signal of crystal oscillating at MSEL="L" (ISMCK=4.2336 MHz)
20	PMCK	—	1/192-divided clock signal of crystal oscillating (IPMCK=88.2 KHz) (no use, open)
21	TRV	O	Traverse forced feed output
22	TVD	O	Traverse drive output
23	PC	O	Spindle motor ON signal output ("L": ON)
24	ECM	O	Spindle motor drive signal output (forced mode output)
25	ECS	O	Spindle motor drive signal output (servo error signal output)
26	KICK	O	Kick pulse output
27	TRD	O	Tracking drive output
28	FOD	O	Focus drive output

Pin No.	Terminal Name	I/O	Function
29	VREF	I	D/A (drive) output (TVD, ECS, TRD, FOD, FBAL, TBAL) Reference voltage input
30	FBAL	O	Focus balance adjustment output
31	TBAL	O	Tracking balance adjustment output
32	FE	I	Focus error signal input (analog input)
33	TE	I	Tracking error signal input (analog input)
34	RFENV	I	RF envelope signal input
35	VDET	I	Vibration detection signal input ("H": detection)
36	OFT	I	Off-track signal input ("H": off track)
37	TRCRS	I	Track cross signal input
38	/RFDET	I	RF detection signal input ("L": detection)
39	BDO	I	Dropout signal input ("H": Dropout)
40	LDON	O	Laser on signal output ("H": ON)
41	TES	O	Tracking error shunt signal output ("H": shunt)
42	PLAY	O	Play signal out ("H": PLAY)
43	WVEL	O	Double speed status signal output ("H": Double speed)
44	ARF	I	RF signal input
45	IREF	I	Reference current input
46	DRF	—	DSL bias (no use, open)
47	DSLIF	I/O	DSL loop filter
48	PLLIF	I/O	PLL loop filter
49	VCOF	—	VCO loop filter (no use, open)
50	AV ₀₀₂	I	Power supply input (for analog circuit)
51	AV _{ss2}	—	GND (for analog circuit)
52	EFM	—	EFM signal output (not use, open)
53	PCK	—	PLL extraction clock output (IPCK=4.321 MHz during normal playback) (no use, open)
54	PDO	—	Phase comparison signal of EFM and PCK signals (no use, open)
55	SUBC	O	Sub-code serial data output (no use, open)
56	SBCK	I	Clock input for sub-code serial data (no use, open)
57	Vss	—	GND
58	X1	I	Crystal oscillating circuit input (f=16.9344 MHz)
59	X2	O	Crystal oscillation circuit output (f=16.9344 MHz)
60	V ₀₀	I	Power supply input (for oscillating circuit)
61	BYTCK	—	Byte clock output (no use, open)

Pin No.	Terminal Name	I/O	Function
62	/CLDCK	O	Sub-code frame clock signal output (ICLDCK=7.35 kHz during normal playback)
63	FCLK	—	Crystal frame clock signal output (IFCLK=7.35 kHz, double=14.7 kHz)
64	PFLAG	O	Interpolation flag output ("H": Interpolation) (no use, open)
65	FLAG	O	Flag output (no use, open)
66	CLVS	O	Spindle servo phase synchronizing signal output ("H": CLV, "L": rough servo) (no use, open)
67	CRC	O	Sub-code CRC checked output ("H": OK, "L": NG) (no use, open)
68	DEMPH	O	De-emphasis ON signal output ("H": ON) (no use, open)
69	RESY	—	Frame resynchronizing signal output (no use, open)
70	/RST2	I	Reset input through MASH circuit ("L": Reset)
71	/TEST	I	Test input
72	AV ₀₀₁	I	Power supply input (for analog circuit)
73	OUTL	O	Left channel audio signal output
74	AV _{ss1}	—	GND
75	OUTR	O	Right channel audio signal output
76	RSEL	I	RF signal polarity assignment input (at "H" level, RSEL="H"; at "L" level, RSEL=L)
77	CSEL	—	Crystal oscillating frequency designation input ("L": 16.9344 MHz, "H": 33.8688 MHz)
78	PSEL	—	Test input (normally, "L") (no use, open)
79	MSEL	—	Output frequency switching for SMCK terminal "H": SMCK=8.4672 MHz "L": SMCK=4.2336 MHz (no use, open)
80	SSEL	I	Output mode switching of SUBQ terminal ("H": Q code buffer mode)

Replacement Parts List

Notes: *Important safety notice:

 Components identified by Δ mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

*The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area.)

Parts without these indications can be used for all areas.

*Warning: This product uses a diode. Refer to caution statements on page 2.

*The "(SF)" mark denotes the standard part.
