Arlink Cleanroom Workstations have been certified under controlled laboratory conditions so you know they will perform as required.

Series 8000 modular workstations can be configured as stand alone units or connected to create any layout needed.

Our cleanroom workstations feature:

- All painted surfaces coated with a non-shedding; Polyester Epoxy Hybrid powder coat finish.
- Worksurfaces sealed on all six sides with laminate. Rolled front edge prevents chaffing of clean room garments. Non-shedding and easy to clean.
- Fill strips seal unused portions of worksurface support beams.
- Acrylic lens light diffuser reduces the collection area for contaminants.
- Clean Room Trim covers unused Micro and Macro slots preventing the collection of contaminants.
- Drawers supplied with solid fronts and loop pulls to shed dust.
- Welded and ground outrigger has a smooth, radius top offering minimal surface area for the collection of contaminants.

Adaptable Workstation Systems

NPA001 Jul 2002

All Series 7000 workstation sizes available in 10k versions. Combine with a Vertical Space Integrator for increased versatility!

Arlink Series 7000 Workbench Systems have been the choice of lab operators and production professionals for over 25 years.

Combine our basic bench with our Vertical Space Integrator (VSI) to create a high efficiency workstation. Arlink's VSI's are also Class 10k certified!

Series 7000 Cleanroom Benches feature:

- All painted surfaces coated with a non-shedding; Polyester Epoxy Hybrid powder coat finish.
- Worksurfaces sealed on all six sides with laminate. Rolled front edge prevents chaffing of clean room garments. Non-shedding and easy to clean.
- Workbench legs and supports are smooth and are easily accessed for cleaning.
- Plugs provided to close all open threaded holes.
- Covers for all exposed connecting hardware.
