

## CONTACT CLEANERS

These high purity special formulations remove environmental contaminants and protect electrical contacts from corrosion and frictional wear. Contact cleaners restore electrical continuity to all electronic and electrical contacts by penetrating and removing insulating oils & greases, conductive carbon soils, and oxides from contact surfaces. By restoring full circuit continuity, Chemtronics contact cleaners improve the performance of electronic equipment that rely on electrical contacts.

Recommended for every phase of electronics and electrical contact maintenance including:

- Metal contacts
- Plastic embedded contacts
- Potentiometers
- Relays & Switches
- Circuit breakers
- Fuse blocks
- Electronic controls
- Electrical panels
- Motors and armatures
- Plugs and sockets
- Solenoids
