Scope of AIAA Journal

This Journal is devoted to the advancement of astronautics and aeronautics through the dissemination of original papers disclosing new scientific knowledge and basic applications of such knowledge. The sciences of astronautics and aeronautics are understood here to embrace selected aspects of jet and rocket propulsion, flight mechanics, astrodynamics, aerodynamics, flight guidance, space communications, atmospheric and outer space physics, materials and structures, human engineering, over-all system analysis, and possibly certain other scientific areas. The selection of papers to be printed will be governed by the pertinence of the topic to the field of astronautics and aeronautics, by the current or probable future significance of the research, and by the importance of distributing the information to the members of the Society and to the profession at large.

Submission of Manuscripts

Submit manuscripts in triplicate (original plus two carbons) with three sets of illustrations and covering letter to the Managing Editor, AIAA Journal, 1290 Avenue of the Americas, New York, N. Y. 10019. See July 1963 issue for detailed instructions.

Publication Charges

Author's institutions will be requested to pay a publication charge of \$40 per page, with a minimum of \$40 per Note or Comment which, if honored, entitles them to 100 free reprints. Instructions will be sent with galley proofs.

Acknowledgments

Publication of AIAA Journal is being accomplished with the cooperation and financial assistance of the National Science Foundation and National Aeronautics and Space Administration.
