

SUBJECTS

PROPULSION AND POWER
(Combustion Systems)

Acoustic attenuation in a solid propellant. B. H. Nall.....	76
Effect of sonic and ultrasonic radiation on safety factors of rockets and missiles. B. Langenecker.....	80
Secondary gas injection in a conical rocket nozzle. R. E. Walker, A. R. Stone, and M. Shandor.....	334
Liquid sloshing in spherical tanks. H. Norman Abramson, Wen-Hwa Chu, and Luis R. Garza.....	384
Amplification and attenuation of sound by burning propellants. R. W. Hart and R. H. Cantrell.....	398
Experimental investigation of heat transfer rates in rocket thrust chambers. Arvel B. Witte and Edward Y. Harper.....	443
Liquid injection thrust vector control. C. J. Green and Foy McCullough Jr.....	573
Shock-induced boundary layer separation in overexpanded conical exhaust nozzles. M. Arens and E. Spiegler.....	578
Interaction between sound and flow: stability of T-burners. F. T. McClure, R. W. Hart, and R. H. Cantrell.....	586
Analysis of the fluid mechanics of secondary injection for thrust vector control. James E. Broadwell.....	1067
Free-molecule flow and convective-radiative energy transport in a tapered tube or conical nozzle. E. M. Sparrow and V. K. Jonsson.....	1081
Stability of high-frequency pressure oscillations in rocket combustion chambers. F. E. C. Culick.....	1097
Particulate damping of oscillatory combustion. M. D. Horton and M. R. McGie.....	1319
Stability boundaries of liquid-propelled space vehicles with sloshing. Helmut F. Bauer.....	1583
Theory of liquid sloshing in compartmented cylindrical tanks due to bending excitation. Helmut F. Bauer.....	1590
Effects of exhaust nozzle recombination on hypersonic ramjet performance: I. Experimental measurements. Erwin A. Lezberg and Leo C. Franciscus.....	2071
Effects of exhaust nozzle recombination on hypersonic ramjet performance: II. Analytical investigation. Leo C. Franciscus and Erwin A. Lezberg.....	2077
Prediction of interstage pressure in multistage solid-propellant rocket systems. L. D. Smoot.....	2361
Conductivity probe measurements in flames. R. A. Olson and E. C. Lary.....	2513
Digital capacitance system for mass, volume, and level measurements of liquid propellants. Robert L. Blanchard and Arthur E. Sherburne.....	2590
Liquid sloshing in a cylindrical quarter tank. Helmut F. Bauer.....	2601
Nozzle contours for minimum particle-lag loss. Frank E. Marble.....	2793
Stability of liquid fuel rocket engine operation. K. I. Artamanov (RS).....	263
Evaporation and combustion of a single-component fuel in a chamber of a liquid rocket engine. I. R. E. S. M. Il'yashenko (RS).....	267
Heat loss and reaction order effects on heat release of two-stage combustion chambers. E. C. Woodward Jr. and I. Henricks (TN).....	471
Flexural stress distribution near a sharp crack. G. C. Sih (TN).....	492
Criterion for vibrational freezing in a nozzle expansion. R. Phinney (TN).....	496
Solid propellant exhaust simulation. Walter H. Jones (TN).....	721
Results of solid rocket motor extinguishing experiments. Richard W. Slocum Jr. (TN).....	1419
Cryogenic propellant stratification analysis and test data correlation. T. Bailey, R. VandeKoppel, G. Skartvedt, and T. Jefferson (TN).....	1657
Graphical evaluation of the trade-off between specific impulse and density. Morton A. Klotz (TN).....	1660
Impulse bit measurement for small pulsed rocket motors. P. S. Starrett and P. F. Halfpenny (TN).....	1679
Vortices in solid propellant rocket motors. J. Swithenbank and G. Sotter (TN).....	1682
Correlation of rocket nozzle gas injection data. James E. Broadwell (TN).....	1911
Effect of additives on formation of spherical detonation waves in hydrogen-oxygen mixtures. Andrej Maček (TN).....	1915
Reaction of hydrazine and nitrogen tetroxide in a low-pressure environment. Robert A. Wasko (TN).....	1919
Prediction of chamber pressure decay transients during termination of solid propellant rocket motors. L. D. Smoot and L. K. Isaacson (TN).....	1934
Approximate analysis of propellant stratification. Daniel M. Tellep and Edward Y. Harper (TN).....	1954
Particle damping of a plane acoustic wave in solid propellant combustion gases. David W. Blair (TN).....	2625
Low-frequency acoustic oscillatory combustion. M. D. Horton, J. L. Eisel, and E. W. Price (TN).....	2652
Low pressure rocket extinction. Floyd A. Anderson, Roger A. Strehlow, and Leon D. Strand (TN).....	2669
Simulation of solid propellant exhaust products with a hybrid rocket motor. John F. Brown (TN).....	2671
Comment on "Stresses and strains in solid propellants during storage." R. B. Kruse and R. J. Murray (TC).....	246
Comments on structures considerations in design for space boosters. Ernst D. Geissler (TC).....	501
Reply by author to Ernst D. Geissler. Paul E. Sandorff (TC).....	502
Comment on "Stability of pressure waves in a combustion field." Warren C. Strahle and William A. Sirignano (TC).....	978
Reply by author to W. C. Strahle and W. A. Sirignano. Gerald Rosen (TC).....	978
Spontaneous ignitability of nonhypergolic propellants under suitable conditions. N. L. Munjal (TC).....	1963

PROPULSION AND POWER
(Noncombustion)

Measurement of stream velocity in an arc. I. Kimura and A. Kan-zawa.....	310
Electrical propulsion capabilities for lunar exploration. Harold Brown and Harry E. Nicoll Jr.....	314
Research and development of a 1-kw plasmajet thruster. Robert V. Greco and Willis A. Stoner.....	320
Starting and control characteristics of nuclear rocket engines. Willem Jansen and John K. Buckner.....	563
Annular-beam ion engines. J. R. Anderson, J. E. Etter, and H. E. Gallagher.....	582
Performance evaluation of a magnetically spun d.c. arc operating in nitrogen. D. R. Boldman.....	802
Propulsion application of the modified Penning arc plasma ejector. W. D. Kilpatrick, J. H. Mullins, and J. M. Teem.....	806
Optimization of a radiation-cooled thermionic converter. Edwin Blue and John H. Ingold.....	1155
Nuclear rocket thrust optimization using dynamic programming. Robley E. George.....	1159
Instabilities in a coaxial plasma gun. T. J. Gooding, B. R. Hayworth, and R. H. Lovberg.....	1289
Evaluation of a cesium-ion rocket employing a large porous tungsten ionizer. R. J. Cybulski and J. T. Kotnik.....	1293
Dualelectric-nuclear engine. Myron Levey.....	1298
Comparison of solar-thermal and solar-electrical-thermal propulsion methods. Hans D. Linhardt.....	1568
Experimental performance of a crossed-field plasma accelerator. V. H. Blackman and R. J. Sunderland.....	2047
Thermogalvanic energy conversion. R. Zito Jr.....	2133
Design and performance of propellers and pumpjets for underwater propulsion. B. W. McCormick and J. J. Eisenbuth.....	2348
SNAP 8 reactor and shield. C. E. Johnson and C. A. Goetz.....	2355
Analysis of helicopter aeroelastic characteristics in high-speed flight. Walter Gerstenberger and Edward R. Wood.....	2366
Colloidal electrohydrodynamic energy converter. A. Lucile Cox.....	2491
Arjet engine performance: experiment and theory. Richard R. John, Stewart Bennett, and John F. Connors.....	2517
Computer simulation of the electron mixing mechanism in ion propulsion. O. Buneman and G. Kooyers.....	2525
Re-examination of gas-cycle nuclear-electric space powerplants. Jerry Grey and Peter M. Williams.....	2801
Solar cell performance in the artificial radiation belt. Robert E. Fischell (TN).....	242
Fabrication of porous tungsten ionizers by means of vapor plating. E. Mark Gold (TN).....	695
Beam current measuring device for ion engine research. Stanley Domitz and Eugene V. Pawlik (TN).....	712
Instability of arc columns. J. K. Harvey, P. G. Simkins, and B. D. Adcock (TN).....	714
Electromagnetic torques operating on satellites using Snap reactor power systems. J. H. Bick (TN).....	963
Power source for a 1-kw arc engine test capsule. R. J. Boehme and E. H. Cagle (TN).....	1168
Turbulence effects in chemical reaction kinetics measurements. Irvin Glassman and Igor J. Eberstein (TN).....	1424
Magnetic induction parameter for Lorentz accelerators. Herbert Beckmann (TN).....	1434
Minimum structural mass for a magnetic radiation shield. S. W. Kash (TN).....	1439
Graphical method for optimization of cesium-surface ionizer materials. G. Kuskevics (TN).....	1455
Experimental plasmajet thruster results. Paul S. Masser (TN).....	1651
Debye-Huckel plasma corrections. Malcolm McChesney (TN).....	1666
Specific impulse of a liquid-core nuclear rocket. W. Louis Barrett Jr. (TN).....	2649
Lewis type bombardment ion engine: d.c. and pulsed operation. H. J. King and B. S. Quintal (TN).....	2661
Comment on "Characteristics of the arc in a Gerdien-type plasma generator." M. T. Dooley, W. K. McGregor, and L. E. Brewer (TC).....	723
Comments on "Treatment of partial equilibrium in chemically reacting flow." R. E. Mates (TC).....	723
Author's reply to comment by R. E. Mates. Paul A. Libby (TC).....	724
Addendum: Dualelectric-nuclear engine. Myron Levey (TC).....	2676

PROPELLANTS AND COMBUSTION

Combustion of metals. George H. Markstein (SA).....	550
Effect of cyclic loading on solid propellant grain structures. J. F. Tormey and S. C. Britton (SA).....	1763
Recent progress in detonation research. A. K. Oppenheim, N. Manson, and H. Gg. Wagner (SA).....	2243
New device for evaluating reactivity of materials with propellants. Raymond C. Kopituk.....	73
Acoustic attenuation in a solid propellant. B. H. Nall.....	76
Experiments on recombination effects in rocket nozzles. R. Hoglund, D. Carlson, and S. Byron.....	324
Safety information from propellant sensitivity studies. Donna Price and Irving Jaffe.....	389
Physical and chemical properties of hexanitroethane. P. Noble Jr., W. L. Reed, C. J. Hoffman, J. A. Gallagher, and F. G. Borgardt.....	395
Amplification and attenuation of sound by burning propellants. R. W. Hart and R. H. Cantrell.....	398
Interaction between sound and flow: stability of T-burners. F. T. McClure, R. W. Hart, and R. H. Cantrell.....	586
One-dimensional detonation initiation. Roger A. Strehlow and Harry B. Dyner.....	591

- Combustion of fuel droplets. Bernard J. Wood, Willis A. Rosser Jr., and Henry Wise. 1076
- Stability of high-frequency pressure oscillations in rocket combustion chambers. F. E. C. Culick. 1097
- Particulate damping of oscillatory combustion. M. D. Horton and M. R. McGie. 1319
- Measurement of mean particle sizes of sprays from diffractively scattered light. R. A. Dobbins, L. Crocco, and I. Glassman. 1882
- Compression-ignition studies of a liquid monopropellant. A. H. Mitchell and H. A. Kirshner. 2083
- Ignition time delay of hydrogen-oxygen-diluent mixtures at high temperatures. J. A. Nicholls, T. C. Adamson Jr., and R. B. Morrison. 2253
- Shock-induced combustion with oblique shocks: comparison of experiment and kinetic calculations. P. M. Rubins and R. P. Rhodes. 2778
- Evaporation and combustion of a single-component fuel in a chamber of a liquid rocket engine, LRE. S. M. Il'yashenko (RS). 267
- Methods of estimating the quality of jet fuels. V. N. Zrellov (RS). 2002
- Transition of burning into detonation in gases. R. I. Soloukhin (RS). 2006
- Reaction of producing hydrogen peroxide in liquid ammonia. K. E. Mironov, B. S. Dzyatkevich, and T. I. Rogozhnikova (RS). 2915
- Criterion for vibrational freezing in a nozzle expansion. R. Phinney (TN). 496
- Photoelastic design data for pressure stresses in slotted rocket grains. M. E. Fournay and R. R. Parmeter (TN). 697
- Isothermal compressibilities of two liquid monopropellants. James F. Kowalik (TN). 700
- Sealing of jet flameholders. John R. O'Loughlin (TN). 707
- Solid propellant exhaust simulation. Walter H. Jones (TN). 721
- Large-scale gap test: comparison of tetryl and pentolite donors. John Toscano, Irving Jaffe, and George Roberson (TN). 964
- Mechanism of the accelerated burning of ammonium perchlorate at high pressures. O. R. Irwin, P. K. Salzman, and W. H. Andersen (TN). 1178
- Particle size analysis of ammonium perchlorate by liquid sedimentation. E. K. Bastress, K. P. Hall, and M. Summerfield (TN). 1182
- Computation of kinetic constants from single-pulse shock tube data. Howard B. Palmer, Bruce E. Knox, and Edward T. McHale (TN). 1195
- Thermal conductivity of gaseous unsymmetrical dimethylhydrazine. Robert D. Allen (TN). 1689
- Stress field and fracturing of solid propellant during rocket firing. C. C. Hsiao and S. R. Moghe (TN). 1931
- Recombination losses in rocket nozzles with storable propellants. D. J. Simkin and R. R. Koppang (TN). 2150
- Initial evaluation of perforated ion engine emitters. J. J. Krauss and E. N. Petrick (TN). 2393
- Comment on "Stresses and strains in solid propellants during storage." R. B. Kruse and R. J. Murray (TC). 246
- Comment on "Stability of pressure waves in a combustion field." Warren C. Strahle and William A. Sirignano (TC). 978
- Reply by author to W. C. Strahle and W. A. Sirignano. Gerald Rosen (TC). 978
- Effects of water on hydrogen flames. Arthur Levy (TC). 1239
- Effects of nitrogen, excess hydrogen, and water additions on hydrogen-air flames. G. Dixon-Lewis and Alan Williams (TC). 2416

MATERIALS, STRUCTURES, AND STRUCTURAL DYNAMICS

- Vibrations of infinitely long cylindrical shells under initial stress. A. E. Armenakás and G. Herrmann. 100
- Shrinkage stresses in a thick-walled viscoelastic cylinder bonded to a rigid case. A. M. Freudenthal and M. Shinozuka. 107
- Bending of a square plate with two adjacent edges free and the others clamped or simply supported. A. W. Leissa and F. W. Nienhuys. 116
- Eigenfrequencies of nonuniform beams. F. Buckens. 121
- Elastic stability of orthotropic conical and cylindrical shells subjected to axisymmetric loading conditions. Joseph C. Serpico. 128
- Matrix structural analysis of substructures. J. S. Przemieniecki. 138
- Unsteady aerodynamic forces on slender supersonic aircraft with flexible wings and bodies. John E. Yates and Edmond F. E. Zeydel. 350
- Dynamic response of an elastic plate strip to a moving line load. Herbert Reismann. 354
- Prediction and measurement of natural vibrations of multistage launch vehicles. Vernon L. Alley Jr. and Sumner A. Leadbetter. 374
- Analysis of vibrations of clustered boosters. G. Lianis and L. L. Fontenot. 607
- Nonlinear transverse vibrations of orthotropic cylindrical shells. J. L. Nowinski. 617
- Flutter of thin plates under combined shear and normal edge forces. J. G. Easley and G. Luessen. 620
- Comparison of elasticity and shell-theory solutions. J. M. Klosner and J. Kempner. 627
- Postbuckling behavior of axially compressed circular cylinders. B. O. Almroth. 630
- Dynamic penetration studies in crushed rock under atmospheric and vacuum conditions. David J. Roddy, John B. Rittenhouse, and Ronald F. Scott. 868
- Analysis of foldability in expandable structures. H. U. Schuerch and G. M. Schindler. 873
- Minimum weight potentials for stiffened plates and shells. R. F. Crawford and A. B. Burns. 879
- Conical segment method for analyzing open crown shells of revolution for edge loading. Robert R. Meyer and Marilyn B. Harmon. 886
- Stability of heterogeneous anisotropic cylindrical shells under combined loading. S. Cheng and B. P. C. Ho. 892
- Some recent contributions to panel flutter research. Y. C. Fung. 898
- Investigation of maximum stresses in long, pressurized, cylindrical shells. Walter B. Grossman. 1129

- Probability distributions of stress peaks in linear and nonlinear structures. Y. K. Lin. 1133
- Subsonic flutter of panels on continuous elastic foundations. John Dugundji, Earl Dowell, and Brian Perkin. 1146
- Hexagonal cell structures under post-buckling axial load. R. K. McFarland Jr. 1380
- Stretching of a polar-orthotropic disk of varying thickness under arbitrary body forces. Charles W. Bert and Francis W. Nienhuys. 1385
- Dynamic stability of cylindrical shells under static and periodic axial and radial loads. John C. Yao. 1391
- Some problems in stability of heterogeneous anisotropic cylindrical shells under combined loading. B. P. C. Ho and S. Cheng. 1603
- Plastic instability of cylindrical pressure vessels of finite length. P. Mann-Nachbar, O. Hoffman, and W. E. Jahsman. 1607
- Experiments on axial compressive general instability of monolithic ring-stiffened cylinders. Herbert Becker, George Gerard, and Robert Winter. 1614
- Nonlinear analysis of heated, cambered wings by the matrix force method. Warner Lansing, Irving W. Jones, and Paul Ratner. 1619
- Optimum design of truss-core sandwich cylinders under axial compression. Gerald A. Cohen. 1626
- Basis for derivation of matrices for the direct stiffness method. Robert J. Melosh. 1631
- Vibration of a 45° right triangular cantilever plate by a gridwork method. R. M. Christensen. 1790
- Flutter analysis of flat rectangular panels based on three-dimensional supersonic potential flow. H. J. Cunningham. 1795
- Concentrated loads on inflated structures. Lloyd H. Donnell. 1823
- Case-bonded elastic-plastic and nonlinear elastic hollow cylinders. M. Bieniek, M. Shinozuka, and A. M. Freudenthal. 1828
- Numerical analysis of unsymmetrical bending of shells of revolution. Bernard Budiansky and Peter P. Radkowski. 1833
- Structural analysis of orthotropic shells. George G. Love. 1843
- Large dynamic deformations of beams, rings, plates, and shells. Emmett A. Witmer, Hans A. Balmer, John W. Leech, and Theodore H. H. Piau. 1848
- Approximate burst strength of thin-walled cylinders with hemispherical caps. N. A. Weil, M. A. Salmon, and C. J. Costantino. 2088
- Bending vibrations of a circular cylindrical shell with an internal liquid having a free surface. Ulric S. Lindholm, Wen-Hwa Chu, Daniel D. Kana, and H. Norman Abramson. 2092
- Response of elastic columns to axial pulse loading. Norris J. Huffington Jr. 2099
- Toroidal membrane under internal pressure. J. Lyell Sanders Jr. and Atis A. Liepins. 2105
- Large deflection analysis of uniformly loaded annular membranes. Martin A. Goldberg and Allan B. Pifko. 2111
- Relation of mechanical properties to solid rocket motor failure. Kenneth W. Bills Jr. and James H. Wiegand. 2116
- Impact phenomena. Otto P. Fuchs. 2124
- Creep buckling of plates: experiments on aluminum alloy at 500°F. Ralph Papirno and George Gerard. 2127
- Buckling of a truncated hemisphere under axial tension. John C. Yao. 2316
- Correlation of viscoelastic behavior with model thermal testing. R. B. Kruse and W. R. Mahaffey. 2320
- Nonuniform shrinkage of a hollow viscoelastic cylinder. A. S. Cakmak. 2324
- Minimum weight design of cylindrical structures. Harold Switzky and John W. Cary. 2330
- Postbuckling behavior of pressure- or core-stabilized cylinders under axial compression. B. O. Almroth and D. O. Brush. 2338
- Analysis of axisymmetrical shells by the direct stiffness method. Peter E. Grafton and Donald R. Strome. 2342
- Residual analysis for circular cylindrical shells under segmental line-load. James Sheng and Joseph Kempner. 2558
- Analysis of slightly anisotropic shells. Richard G. Dong and Stanley B. Dong. 2565
- A transient axisymmetric thermoelastic problem for the hollow sphere. William E. Warren. 2569
- Buckling of cylindrical shells under dynamic loads. J. D. Wood and L. R. Koval. 2576
- Analysis of elastic-plastic shells of revolution containing discontinuities. David A. Spera. 2583
- A comparison of the contact ionization of cesium on tungsten with that of molybdenum, tantalum, and rhenium surfaces. O. K. Husmann. 2607
- Structural synthesis capability for integrally stiffened waffle plates. Lucien A. Schmit Jr., Thomas P. Kieher, and William M. Morrow. 2820
- Determination of the probability of loss of stability by a shell. V. M. Goncharenko (RS). 1268
- Influence of cantilever vibration on the reading of a two-axis gyrocompass. P. A. Il'in and M. A. Sergeyev (RS). 1741
- Method of superposition under conditions of elasticity and destructive stress. V. D. Kluishnikov (RS). 1744
- Linear theory of three-layered shells with a stiff core. E. I. Grigolyuk and Yu. P. Kiryukhin (RS). 2438
- Determination of supersonic panel flutter of cylindrical shells with in-plane stresses. Herbert Saunders (TN). 209
- Euler load of a stepped column—an exact formula. G. Sri Ram (TN). 211
- A formula for certain types of stiffness matrices of structural elements. G. Best (TN). 212
- Thermal stresses in an elastic half-space with a moving boundary. I. G. Tadjbakhsh (TN). 214
- Deflections of inelastic beams with nonuniform temperature distribution. B. E. Gatewood and R. W. Gehring (TN). 217
- Pure bending, twisting, and stretching of skewed, heterogeneous, anisotropic plates. Yehuda Stavsky (TN). 221
- A supplementary note on the optimum design of box beams for combined strength and stiffness. B. Saelman (TN). 224
- A matrix formulation of the transverse structural influence coefficients of an axially loaded Timoshenko beam. William P. Rodden, John P. Jones, and Pravin G. Bhuta (TN). 225

- Analysis of stress at several junctions in pressurized shells. R. H. Johns, W. C. Morgan, and D. A. Spera (TN)..... 455
- Structural factors and optimization of space vehicles. Frederick W. Ross (TN)..... 460
- The use of Macauley's brackets in the analysis of laterally loaded struts and tie-bars. S. A. Urry (TN)..... 462
- A note on the classical buckling load of circular cylindrical shells under axial compression. R. C. Tennyson (TN)..... 475
- The effect of a cavity on panel vibration. E. H. Dowell and H. M. Voss (TN)..... 476
- A method of structural weight minimization suitable for high-speed digital computers. G. Best (TN)..... 478
- Thermoelastic differential equations for shells of arbitrary shape. John C. Yao (TN)..... 479
- Continued comments on the collapse of pressure-loaded spherical shells. Bertram Klein (TN)..... 482
- Radial vibrations of thick-walled orthotropic cylinders. I. Mirsky (TN)..... 487
- Fabrication of porous tungsten ionizers by means of vapor plating. E. Mark Gold (TN)..... 695
- Photoelastic design data for pressure stresses in slotted rocket grains. M. E. Fournier and R. R. Parmerter (TN)..... 697
- Compressibility effects of slender bodies entering vertically into water. Inge L. Ryming (TN)..... 702
- Linearized interaction curves for plastic beams under combined bending and twisting. Le-Wu Lu (TN)..... 706
- Direct solution of the "three-moments equation." T. Wolff (TN)..... 718
- Thermoelastic vibrations of heterogeneous membranes and inextensional plates. Yehuda Stavsky (TN)..... 722
- Twisted beam transducer: frequency shifts in vibrating modes of beams under twist. Alexander M. Voutsas (TN)..... 911
- Unification of matrix methods of structural analysis. Fernando Venancio Filho (TN)..... 916
- Measurements of thermal conductivity of porous anisotropic materials. O. E. Tewfik (TN)..... 919
- Structural damping. R. H. Scanlan and A. Mendelson (TN)..... 938
- Effects of mass addition of the stability of slender cones at hypersonic speeds. Clarence A. Syvertson and John B. McDevitt (TN)..... 939
- Unsymmetrical buckling of shallow spherical shells. Nai-Chien Huang (TN)..... 945
- Axial-symmetric boundary value problem with nonlinear elasticity. M. Bieniek and W. R. Spillers (TN)..... 948
- Matrix analysis of a nonuniform beam column on multi-supports. Herbert Saunders (TN)..... 951

- Development of a stable "white" coating system. R. Tanzilli (TN)..... 953

Electromagnetic torques operating on satellites using Snap reactor power systems. J. H. Bick (TN).....	963
Influence of constant disturbing torques on the motion of gravity-gradient stabilized satellites. T. B. Garber (TN).....	968
Water impact of the Mercury capsule: correlation of analysis with NASA tests. J. D. Rosenbaum and W. R. Jensen (TN).....	1190
Insulation requirements for long-time low-heat rate environments. Daniel M. Tellep and T. D. Sheppard (TN).....	1670
Results of Ranger 1 flight friction experiment. J. B. Rittenhouse, L. D. Jaffe, R. G. Nagler, and H. E. Martens (TN).....	1913
Supersonic transport climb path optimization including a constraint on sonic boom intensity. Michael Falco (TN).....	2859
Comments on structures considerations in design for space boosters. Ernst D. Geissler (TC).....	501
Reply by author to Ernest D. Geissler. Paul E. Sandorff (TC).....	502
Comments on "Prediction and measurement of natural vibrations of multistage launch vehicles." John Dugundji (TC).....	1711
Optimization of system reliability. David H. Silvern (TC).....	2872

INSTRUMENTATION AND COMMUNICATIONS

Investigation of a terminal guidance system for a satellite rendezvous. N. J. Niemi.....	405
Lunar radio beacon location by Doppler measurements. Taylor Gabbard and R. M. L. Baker Jr.....	864
A gyro momentum exchange device for space vehicle attitude control. H. B. Kennedy.....	1110
A new method for attitude stabilization. T. R. Kane and D. Sobala.....	1365
Equations of the precessional theory of gyroscopes. L. I. Kuznetsov (RS).....	271
Control of angular motion of a body by means of rotors. M. Z. Litvin-Sedoy (RS).....	275
Reliability computation of complex automated systems. A. M. Polovko (RS).....	1014
Theory of an inertial system. V. A. Karakashev (RS).....	1491
Design of tufts for flow visualization. Ascher H. Shapiro (TN).....	213
The free-molecule impact-pressure probe of arbitrary length. Dietmar E. Rothe and J. H. de Leeuw (TN).....	220
Performance of an electromagnetic actuation system. A. G. Buckingham (TN).....	457
On the calibration of calorimeter heat-transfer gages. Tudor Sprinks (TN).....	464
Resonance scattering photography of free molecular flow. Walter Vali and George M. Thomas (TN).....	469
An error analysis in the digital computation of the autocorrelation function. Henry L. Crowson (TN).....	488
Beam current measuring device for ion engine research. Stanley Domitz and Eugene V. Pawlik (TN).....	712
Twisted beam transducer: frequency shifts in vibrating modes of beams under twist. Alexander M. Voutsas (TN).....	911
Electromagnetic probe for the measurement of hypersonic flow velocity at a point. Paul L. Leath and Theodore Marshall (TN).....	948
Method for measuring damping about the input axis of a single-degree-of-freedom floated gyro. John Sputz (TN).....	1208
Impossibility of linearizing a hot-wire anemometer for measurements in turbulent flows. S. P. Parthasarathy and D. J. Tritton (TN).....	1210
Gyroscope unbalance torques resulting from static linear compliances. Janice Rossbach (TN).....	1409
Design of an attitude control system with magnetometer sensors. J. J. Rodden and L. D. Montague (TN).....	1422
Effect of temperature on pressure measurements. G. D. Arney Jr. and A. B. Bailey (TN).....	2863
Viscous interaction effects on a static pressure probe at $M = 6$. Wilhelm Behrens (TN).....	2864
Comment on "Equations of the precessional theory of gyroscopes." Norman E. French (RS).....	1498

HUMAN FACTORS AND BIOASTRONAUTICS

Genetic danger of small radiation doses for man and their effect on the heredity of monkeys and rodents. N. P. Dubinin, M. A. Arsen'eva, and Yu. Ya. Kerkis (RS).....	1256
Linear programming for life support optimization. Neil W. O'Rourke (TN).....	2852

PLASMA DYNAMICS

Research and development of a 1-kw plasmajet thruster. Robert V. Greco and Willis A. Stoner.....	320
Performance evaluation of a magnetically spun d.c. arc operating in nitrogen. D. R. Boldman.....	802
Propulsion application of the modified Penning arc plasma ejector. W. D. Kilpatrick, J. H. Mullins, and J. M. Teem.....	806
Steady magnetohydrodynamic flow past a nonconducting wedge. C. K. Chu and Y. M. Lynn.....	1062

Optimizing of a radiation-cooled thermionic converter. Edwin Blue and John H. Ingold.....	1155
Instabilities in a coaxial plasma gun. T. J. Gooding, B. R. Hayworth, and R. H. Lovberg.....	1289
Dual electric-nuclear engine. Myron Levoy.....	1298
Destructive effects of plasmas generated by exploding wires. Robert C. Good Jr.....	1397
Structure of a large-radius pinch discharge. Robert G. Jahn and Woldemar von Jaskowsky.....	1809
Probe measurements of the discharge in an operating electron bombardment engine. William B. Strickfaden and Kenneth L. Geiler.....	1815
Optimum isothermal acceleration of a plasma with constant magnetic field. J. H. Drake.....	2053
Magnetohydrodynamic flow past a wedge with a perpendicular magnetic field. Yoichi Mimura.....	2272
Electrical resistance and sheath potential associated with a cold electrode. Donald L. Turcotte and James Gillespie.....	2293
Plasma behavior in an oscillating-electron ion engine. J. W. Davis, A. W. Angelbeck, and E. A. Pinsley.....	2497
Diagnostic studies of a pinch plasma accelerator. Donald P. Duclos, Leonard Aronowitz, Frederic P. Fessenden, and Peter B. Carstensen.....	2505
Computer experiments on ion-beam neutralization with initially cold electrons. D. A. Dunn and I. T. Ho.....	2770
Perturbations produced in a plasma by a rapidly moving body. L. P. Pitaevskii (RS).....	994
Scattering of electromagnetic waves by inhomogeneities excited in a plasma by a rapidly moving body. Ya. L. Al'pert and L. P. Pitaevskii (RS).....	1001
Boundary layer and a stabilized gaseous discharge in the presence of diffuse radiation. E. A. Romishevskiy (RS).....	2449
Magnetohydrodynamic nozzle. F. N. Khabeta (RS).....	2699
The characteristic form of the equations of one-dimensional magnetohydrodynamic flow with oblique magnetic field. Roy M. Gundersen (TN).....	219
Slip flow of an ionized gas over a sphere carrying a magnetic dipole. Gerald W. Pneuman and Paul S. Lykoudis (TN).....	222
Electrical discharge across a supersonic jet of plasma in transverse magnetic field. Sterge T. Demetriades and Peter D. Lenn (TN).....	234
A class of linear magnetohydrodynamic flows. M. R. El-Saden (TN).....	236
