

Technical Literature Digest

M. H. Smith, Associate Editor

The James Forrestal Research Center, Princeton University

Propulsion and Power (Combustion Systems)

Flow Separation in a Contour Nozzle, E. J. Roschke and P. F. Massier. Calif. Inst. Tech., Jet Propulsion Lab. TR 32-317, Oct. 1962, 2 pp.; reprinted from ARS J. 32, 1612-1613 (1962).

Materials Science and Technology for Advanced Applications (Golden Gate Metals Conference, San Francisco, 1962), edited by D. R. Mash (Prentice Hall Inc., Englewood Cliffs, N. J., 1962), 767 pp.

Problems in Chemical Propulsion Systems and Limiting Factors, I. Silver, pp. 1-18.

Advanced Air-Breathing Engines, R. R. Jamison, J. Roy. Aeronaut. Soc. 66, 683-689 (1962).

The Problem of Rockets Gas Deflectors, L. Longchambon. Rech. Astronaut., no. 20, 15-16 (1962). In French.

Propulsion for Space Vehicles: A Survey, H. S. Seifert. Space Sci. Rev. 1, 331-364 (1962).

Propulsion and Power (Noncombustion)

An Electron-Bombardment Ion Rocket Operated with Alternating-Current Supplies, P. D. Reader and R. C. Finke. NASA TN D-1457, Dec. 1962, 33 pp.

Space-Charge-Flow Theory and Electrode Design for Electrostatic Rocket Engines, D. L. Lockwood and V. Hamza. NASA TN D-1461, Dec. 1962, 99 pp.

Potentialities of Electron Bombardment Ion Engines for Electric Propulsion, D. J. Kerrisk. Calif. Inst. Tech., Jet Propulsion Lab. TR 32-301, June 1962, 16 pp.; reprinted from IRE Trans. Space Electron. Telemetry SET-8, 188-193 (1962).

Materials Science and Technology for Advanced Applications (Golden Gate Metals Conference, San Francisco, 1962), edited by D. R. Mash (Prentice Hall Inc., Englewood Cliffs, N. J., 1962), 767 pp.

Introduction to Space Propulsion Problems, J. E. Hove, pp. 85-93.

History and Recent Developments in Direct Energy Conversion Systems, P. H. Egli, pp. 371-407.

Solar Energy Converters, B. Ross, pp. 431-452.

Corrosion and Mass Transfer in Alkali Liquid Metal Systems, J. R. Weeks, pp. 709-727.

A Nuclear Fuel Element for Space Application, C. C. Woolsey, pp. 747-767.

Manned-Space-Flight Meeting, St. Louis, 1962, Proceedings (Inst. Aerospace Sci., New York, 1962), 318 pp.

The Potential for Nuclear Propulsion for Manned Spaceflights, M. W. Hunter, Jr., 276-287.

Rift, W. S. Fellows. Astronautics 7, 38-47 (Dec. 1962).

Nuclear-Engine Design Goals, C. H. Trent. Astronautics 7, 54-57 (Dec. 1962).

Kiwi Developmental Testing, K. Boyer. Astronautics 7, 58-62 (Dec. 1962).

Safety and Operations with Nuclear Vehicles, R. S. Decker. Astronautics 7, 63-65 (Dec. 1962).

Propellants and Combustion

Mechanism for the Chloride-Catalyzed Thermal Decomposition of Ammonium Nitrate, A. G. Keenan and B. Dimitriades. J. Chem. Phys. 37, 1583-1586 (1962).

Preparation of Low Freezing Jet Fuels by Ice-Cracking, R. H. Koziowski, H. F. Mason, and J. W. Scott. Ind. Eng. Chem. Process Design Develop. 1, 276-280 (1962).

Reaction Rate Studies of the Catalytic Oxidation of Ethylene, L. G. Nault, D. W. Bolme, and L. N. Johanson. Ind. Eng. Chem. Process Design Develop. 1, 285-291 (1962).

Determining Shock Sensitivity of Liquid Organic Peroxides, J. E. Guillet and M. F. Meyer. Ind. Eng. Chem. Product Research Develop. 1, 226-230 (1962).

On the Stability of Laminar Flame, N. T. Chu and J. Y. Parlange. J. Mécan. 1, 294-302 (1962). In English.

Kinetics and Mechanisms of the Thermal Decomposition of Propane, I: The Uninhibited Reaction, K. J. Laidler, N. H. Sagert, and B. W. Wojciechowski. Proc. Roy. Soc. (London) 270A, 242-253 (1962).

Kinetics and Mechanisms of the Thermal Decomposition of Propane, II: The Reaction Inhibited by Nitric Oxide, K. J. Laidler, N. H. Sagert, and B. W. Wojciechowski. Proc. Roy. Soc. (London) 270A, 254-266 (1962).

Effect of Composition on Combustion of Solid Propellants During a Rapid Pressure Decrease, C. C. Ciepluch. NASA TN D-1559, Dec. 1962, 13 pp.

Thermodynamic Calculations of Carbon Monoxide-Air Detonation Parameters for Initial Pressures from 1 to 100 Atmospheres, L. E. Bollinger and R. Edse. NASA TN D-1667, Dec. 1962, 29 pp.

Flame Stabilization by a Bluff-Body Flame Holder with Gas Ejection, H. Tsuji and T. Okano. Tokyo Univ., Aeronaut. Research Inst. Rept. 369, Vol. 28, no. 1, June 1962, 19 pp.

Some Studies on Solid Propellants, Part II: Burning Rate of the Perchlorate-Polyester (Castable) Propellants, K. Kuratani. Tokyo Univ., Aeronaut. Research Inst. Rept. 373, Vol. 28, no. 5, Sept. 1962, pp. 103-113.

Some Studies on Solid Propellants, Part III: Analytical Results of the Combustion Gases, K. Kuratani. Tokyo Univ., Aeronaut. Research Inst., Rept. 374, Vol. 28, no. 6, Sept. 1962, pp. 115-127.

Safety Considerations with Explosive Devices, R. E. Betts. Army

Missile Command, Directorate of Research and Dev., RK-TR-62-10, Nov. 1962, 15 pp.

Measurements of Detonation Pressure, M. A. Cook, R. T. Keyes, and W. O. Urmenbach. J. Appl. Phys. 33, 1413-1420 (1962).

Heat of Formation of Nitronium Perchlorate, A. A. Gilliland. J. Research Natl. Bur. Standards 66A, 447-450 (1962).

Preliminary Report on the Thermodynamic Properties of Selected Light-Element and Some Related Compounds (Supplement to Natl. Bur. Standards Repts. 6297, 6484, 6645, 6928, 7093, 7192, 7437). Natl. Bur. Standards Rept. 7587, July 1, 1962, 172 pp.

Recent Additions to the Literature Related to the Heats of Formation of Compounds of Selected Elements, M. C. Bracken and G. T. Armstrong, pp. 76-89.

Literature Survey and Analysis of Heat-Capacity Data of Some Selected Compounds Containing Li, Mg, Al, Si, Ti, W, and Po, G. Furukawa and M. L. Reilly, pp. 90-113.

Graphs Showing the Stability of Gaseous BeF, AlF, AlCl and AlCl₂ at Various Temperatures and Pressures, T. B. Douglas, J. E. Neuffer, and G. Goodson, pp. 114-124.

Appendix A, Thermodynamic Functions of Difluoramine (Tables), D. E. Mann and D. R. Lide Jr., pp. 125-131.

Appendix B, Thermodynamic Functions for Solids and Liquids (Tables), pp. 139-172.

Materials and Structures

On the Aeroelastic Stability of Orthotropic Panels in Supersonic Flow, A. A. Perlmutter. J. Aerospace Sci. 29, 1332-1338 (1962).

A Study of Creep Collapse of a Long Circular Cylindrical Shell Under Various Distributed Force Systems, J. C. Serpico. J. Aerospace Sci. 29, 1316-1323 (1962).

The Effects of Irradiation on Metals, F. Seitz. Rev. Mod. Phys. 3, 656-666 (1962).

Linear Thermal Expansion Coefficient of Materials Measured with Strain Gages, W. T. Bean. Strain Gage Readings 5, 15-19 (Dec. 1962-Jan. 1963).

The Ablation of Graphite in Dissociated Air, Part I: Theory, S. M. Scala. Inst. Aerospace Sci. Paper 62-154 (June 1962).

The Ablation of Graphite in Dissociated Air, Part II: Experiment, N. S. Diaconis, P. D. Gorsuch, and R. A. Sheridan. Inst. Aerospace Sci. Paper 62-155 (June 1962).

Radiation Effects: State of the Art, 1961-1962. Radiation Effects Info. Center, Battelle Memorial Inst., Columbus, Ohio, REIC Rept. 24, June 30, 1962.

Thermal Expansion in Air of Ceramic Oxides to 2200°C, T. H. Nielsen and M. H. Leopold. Calif. Inst. Tech., Jet Propulsion Lab. TR 32-297, Oct. 30, 1962, 25 pp.

EDITOR'S NOTE: Contributions from Professors E. R. G. Eckert, E. M. Sparrow, and W. E. Ibele of the Heat Transfer Laboratory, University of Minnesota, are gratefully acknowledged.

The Ablation of Graphite in Dissociated Air—Experimental Investigation, N. S. Diaconis, P. D. Gorsuch, and R. A. Sheridan. General Electric Co., Missile and Space Div. Rept. R62SD86, Sept. 1962, 32 pp.

Initial Weight Loss of Plastics in a Vacuum at Temperatures from 80° to 500°F, H. R. Gloria, W. J. Stewart, and R. C. Savin. NASA TN D-1329, Dec. 1962, 19 pp.

Particle-Solid Impact Phenomena, C. D. Liles and E. H. Goodman. Arnold Eng. Dev. Center Rept. AEDC-TDR-62-202, Nov. 1962, 35 pp., 6 refs.

Irreversible Thermodynamics and Variational Principles with Applications to Viscoelasticity, R. A. Schapery. Air Force Aeronaut. Research Labs. ARL 62-418, Aug. 1962, 174 pp.

Thermostructural Analysis Manual, M. J. Forray, M. Newman, and H. Switzky. Air Force Aeronaut. Systems Div. WADD-TR-60-517, Oct. 1962, 200 pp.

Effect of Compressive Loads on Structural Fatigue at Elevated Temperature. Air Force Aeronaut. Systems Div. ASD-TDR-62-448, Oct. 1962, 159 pp.

Preliminary Report on the Thermodynamic Properties of Selected Light-Element and Some Related Compounds (Supplement to Natl. Bur. Standards Repts. 6297, 6484, 6645, 6928, 7093, 7192, 7437). Natl. Bur. Standards Rept. 7587, July 1, 1962, 172 pp.

The Heat of Formation of Aluminum Fluoride by Fluorine Bomb Calorimetry, E. S. Domalski, pp. 13-38.

Be₃N₂ and BeO·Al₂O₃: High-Temperature Thermodynamic Functions Based on Recent Measurements of Heat Capacity at the National Bureau of Standards, T. B. Douglas and W. H. Payne, pp. 44-54.

Experimental Investigation of the Vaporization of Selected Substances, J. Efimenko, J. J. Diamond, R. F. Walker, A. L. Drago, and N. J. Carrera, pp. 55-72.

American Vacuum Society, Transactions of the 8th National Vacuum Symposium, Combined with the 2nd International Congress on Vacuum Science and Technology, 1961 (Macmillan Co., New York, 1962), Vol. 2, pp. 670-1371.

Materials Evaluation Under High Vacuum and Other Satellite Environmental Conditions, P. H. Blackmon, F. J. Clauss, C. E. Ledger, and R. E. Mauri, pp. 1244-1259.

The Minimum Weight Design of Structures Operating in an Aerospace Environment, H. Switzky. Air Force Aeronaut. Systems Div. ASD-TDR-62-763, Oct. 1962, 134 pp., 22 refs.

Deformation and Buckling of Cylindrical Shells Subjected to Heating, M. Sunakawa. Tokyo Univ., Aeronaut. Research Inst. Rept. 370, Vol. 28, no. 2, July 1962, 52 pp.

The Radiative Properties of Carbon Dioxide Cryodeposits at 77°K, T. M. Cunningham Jr. and R. L. Young. Arnold Eng. Dev. Center, Rept. AEDC-TDR-62-165, Dec. 1962, 32 pp., 15 refs.

Statistical Methods in the Nonlinear Theory of Elastic Shells, V. V. Bolotin. NASA Tech. Transl. F-85, Dec. 1962, 16 pp.

Nonlinear Flexural Vibrations of Sandwich Plates, Y. Y. Yu. Brooklyn Polytech. Inst. TN 12, Feb. 1962, 19 pp. (AFOSR TN 1310).

Application of Variational Equation of

Motion to the Nonlinear Vibration Analysis of Homogeneous and Layered Plates and Shells, Y. Y. Yu. Brooklyn Polytech. Inst. TN 14, Feb. 1962, 28 pp. (AFOSR TN 2256).

Preliminary Investigation of Effect of Hydrogen on Stress-Rupture and Fatigue Properties of an Iron, a Nickel, and a Cobalt-Base Alloy, S. J. Klima, A. J. Nachtigall, and C. A. Hoffman. NASA TN D-1458, Dec. 1962, 35 pp.

An Approximate Form for the Free-Surface Shape of a Static Fluid in a Cylindrical Tank of Large Radius, H. E. Williams. Calif. Inst. Tech., Jet Propulsion Lab. TR 32-344, Sept. 28, 1962, 7 pp.

Materials Science and Technology for Advanced Applications (Golden Gate Metals Conference, San Francisco, 1962), edited by D. R. Mash (Prentice Hall Inc., Englewood Cliffs, N. J., 1962), 767 pp.

Materials Requirements for Storable Liquid Propellant Rocket Motors, C. J. Thelen, pp. 19-37.

Materials Requirements for Solid Propellant Rocket Motors, pp. 38-44.

Materials Requirements for Cryogenic Temperature Applications, A. Hurlich, pp. 45-84.

Materials Requirements for Ion Propulsion, H. Todd, F. Barcatta, D. Clark, and R. Worlock, pp. 94-122.

Materials Requirements for Plasma Propulsion, D. W. Gates, pp. 123-135.

Materials Requirements for Nuclear Ramjets, H. L. Reynolds, pp. 136-150.

Material Requirements for Nuclear Rockets, D. P. MacMillan, pp. 151-163.

Sliding Contacts and Friction Phenomena in Space, F. J. Clauss, C. F. O'Hara, S. P. Drake, and S. B. Cooke, pp. 164-198.

Problems of Thermal Control Surfaces in the Space Environment, R. E. Gaumer, pp. 199-215.

Re-Entry Environment, J. R. Stalder, pp. 215-235.

Prolytic Materials for Re-entry Applications, D. Schiff, pp. 236-266.

Materials for Thermionic Converters, C. Kaplan, pp. 453-466.

Some Recent Studies of the High-Temperature Mechanical Properties, R. Change, G. G. Bentle, and F. E. Ekstrom, pp. 533-558.

Fiber-Reinforced Structural Materials, D. W. Levinson, pp. 559-575.

Welding and Brazing of Space Age Materials, H. C. Emerson, pp. 606-631.

High Energy Rate Forming of Space Age Materials, W. G. Mang, pp. 632-655.

Plasma-Arc Spraying of Space Age Materials, D. R. Mash, pp. 656-681.

Heat Treatment of Space Age Materials, C. C. Lacy, pp. 682-708.

Joining of Refractory Metals for Space Power Applications, G. M. Slaughter, C. W. Fox, E. A. Franco-Ferreira, and R. G. Gilliland, pp. 728-746.

Manned Space-Flight Meeting, St. Louis, 1962, Proceedings (Inst. Aerospace Sci., New York, 1962), 318 pp.

Progress Report on the Development of Protected Construction for Hypersonic Vehicles, W. H. Dukes, pp. 150-157.

Re-entry Materials, D. L. Kummer and H. J. Siegel, pp. 157-166.

Meteoroid Effects on Space Exploration, M. Dubin, pp. 310-318.

A Digital Computer Program for the General Axially Symmetric Thin-Shell Problem, W. K. Sepetoski, C. E. Pearson,

I. W. Dingwell, and A. W. Adkins. J. Appl. Mech. (Trans. ASME) 29E, 655-661 (1962).

Buckling of a Cylindrical Shell Subjected to Nonuniform External Pressure, B. O. Almroth. J. Appl. Mech. (Trans. ASME) 29E, 675-682 (1962).

On the Initial Response of a Spherical Shell to a Concentrated Force, M. A. Medrek. J. Appl. Mech. (Trans. ASME) 29E, 689-695 (1962).

Shells of Revolution with Edge Leads of Rapid Circumferential Variation, C. R. Steel. J. Appl. Mech. (Trans. ASME) 29E, 701-707 (1962).

Large-Deflection Analysis of Buckling of a Cylinder Under Bending, J. C. Yao. J. Appl. Mech. (Trans. ASME) 29E, 708-714 (1962).

The Deformation Mechanism in Linear Compression of Plexiglass, C. H. Johansson. Arkiv Fysik 22, 219-224 (1962).

On a Contact Problem Connected with the Torsion of a Hollow Hemisphere, B. L. Abramian and A. A. Babloian. Appl. Math. Mech. 26, 703-716 (1962).

Fluid Dynamics, Heat Transfer, and MHD

Radiating Effectiveness of Annular-Finned Space Radiators, Including Mutual Irradiation Between Radiator Elements, E. M. Sparrow, G. B. Miller, and V. K. Jonsson. J. Aerospace Sci. 29, 1291-1299 (1962).

Transition in the Viscous Wakes of Blunt Bodies at Hypersonic Speeds, H. Hidalgo, R. L. Taylor, and J. C. Keck. J. Aerospace Sci. 29, 1306-1315 (1962).

Structure of a Plane Shock Layer, H. W. Liepmann, R. Narashimha, and M. T. Chahine. Phys. Fluids 5, 1313-1324 (1962).

Some Aspects of Shock Structure According to the Bimodal Model, C. Muckenfuss. Phys. Fluids 5, 1325-1336 (1962).

Shock-Tube Investigation of the Ionization of Cesium Vapor, A. F. Haight. Phys. Fluids 5, 1337-1346 (1962).

Radiation-Resisted Shock Waves, J. F. Clark. Phys. Fluids 5, 1347-1361 (1962).

Turbulent Thermal Convection at Arbitrary Prandtl Number, R. H. Kraichnan. Phys. Fluids 5, 1374-1389 (1962).

Application of the Monte Carlo Method to Heat Transfer in a Rarefied Gas, J. K. Haviland and M. L. Lavin. Phys. Fluids 5, 1399-1405 (1962).

Measurement of the Properties of Plasma Eddies Produced by Shear in Velocity in a Magnetic Field, W. H. Bostick. Phys. Fluids 5, 1406-1409 (1962).

Some General Characteristics of Two-Dimensional Incompressible Magnetohydrodynamic Flows, C. H. T. Pan. Phys. Fluids 5, 1410-1415 (1962).

Exact Solutions to a Class of Linearized Magnetohydrodynamic Flow Problems, R. H. Levy. Phys. Fluids 5, 1416-1423 (1962).

The Propagation of Non Uniform Magnetohydrodynamic Shocks with Special Reference to Cylindrical and Spherical Shock Waves, R. M. Gundersen. Arch. Ratl. Mech. Anal. 11, 1-15 (1962).

Evaluation of the Net Radiant Heat Transfer Between Specially Reflecting Plates, V. E. Holt, R. J. Grosh, and R. Geynet. Bell System Tech. J. 41, 1865-1874 (1962).

Heat Flow in Composite Slab, Cylinder and Sphere, W. P. Reid. J. Franklin Inst. 274, 352-357 (1962).

Stability of a Heterogeneous Shear Layer in a Magnetic Field, J. Menkes. *Phys. Fluids* 5, 1424-1427 (1962).

Transverse Magnetohydrodynamic Flow Past a Semi-Infinite Plate, J. Radlow and W. B. Ericson. *Phys. Fluids* 5, 1428-1434 (1962).

Modification for Magnetohydrodynamic Shock Structure Without Collisions, C. S. Morawetz. *Phys. Fluids* 5, 1447-1450 (1962).

Structure of Collision-Free Magnetohydrodynamic Waves, T. A. Wilson. *Phys. Fluids* 5, 1451-1455 (1962).

Simple Waves and Shocks in Magnetohydrodynamics, I. O. Bohachevsky. *Phys. Fluids* 5, 1456-1467 (1962).

Experimental Study of Temperature Distribution in Laminar Tube Flow of a Fluid with Internal Heat Generation, R. M. Inman. *Internatl. J. Heat Mass Transfer* 5, 1053-1058 (1962).

Laminar Free Convection from a Non-isothermal Cone, R. G. Hering and R. J. Grosh. *Internatl. J. Heat Mass Transfer* 5, 1059-1068 (1962).

New Similarity Integrals in Heat and Mass Transfer Processes, A. M. Fainzil'ber. *Internatl. J. Heat Mass Transfer* 5, 1069-1080 (1962).

Heat Transfer Bibliography—Russian Works, A. V. Luikov. *Internatl. J. Heat Mass Transfer* 5, 1121-1128 (1962).

Heat Transfer Bibliography—Polish Works, T. Hobler. *Internatl. J. Heat Mass Transfer* 5, 1129-1130 (1962).

Heating-Rate Measurements as Applied to Airborne Vehicles, R. C. Stempel. *ISA Trans.* 1, 397-401 (1962).

Stability of a Hard-Core Fluid Jet of Small Electrical Conductivity, S. F. Talwar and J. N. Tandon. *J. Fluid Mech.* 14, 178-186 (1962).

Similarity in Swirling Wakes and Jets, A. J. Reynolds. *J. Fluid Mech.* 14, 241-243 (1962).

The Motion of Rigid Particles in a Shear Flow at Low Reynolds Number, F. P. Bretneron. *J. Fluid Mech.* 14, 284-304 (1962).

The Effect of Radioactive Losses on the Attenuation of Electromagnetically Driven Shock Waves, J. A. Thornton and A. B. Cambel. *J. Quant. Spectr. Radiative Transfer* 2, 249-262 (1962).

Radiant Emission from High Temperature Equilibrium Air, R. G. Breene Jr. and M. C. Nardone. *J. Quant. Spectr. Radiative Transfer* 2, 273-292 (1962).

The Spectroscopic Measurement of Temperature in Transparent Argon Plasmas, C. F. Knopp, C. F. Gottschlich, and A. B. Cambel. *J. Quant. Spectr. Radiative Transfer* 2, 297-300 (1962).

The Influence of the Townsend-Ramsauer Effect on the Electron Transport Coefficients of Molecular Gases, A. E. D. Heylen. *Proc. Phys. Soc. (London)* 80, 1109-1116 (1962).

Recombination Between Electrons and Atomic Ions, II: Optically Thick Plasmas, D. R. Bates, F. R. S. A. E. Kingston, and R. W. P. McWhirter. *Proc. Roy. Soc. (London)* 270A, 155-167 (1962).

Magnetohydrodynamic Description of a Plasma, R. V. Polovin and K. P. Cherkasova. *Soviet Phys.—Tech. Phys.* 7, 475-479 (1962).

Viscous Boundary Layer in Magnetohydrodynamics with Finite $\omega \tau$, A. I. Gubanov and O. E. Pushkarev. *Soviet Phys.—Tech. Phys.* 7, 480-483 (1962).

Interaction of a Charged-Particle Beam with a Plasma, A. A. Rukhadze. *Soviet Phys.—Tech. Phys.* 7, 488-491 (1962).

Production of a Pure Hydrogen Plasma, B. G. Safronov, V. S. Voitsenya, and I. I. Kononov. *Soviet Phys.—Tech. Phys.* 7, 495-497 (1962).

The Drag of Spheres in Rarefied Hypervelocity Flow, M. Kinslow and J. L. Potter. *Arnold Eng. Dev. Center Rept. AEDC-TDR-62-205*, Dec. 1962, 58 pp., 36 refs.

On the Base Flow Characteristics of Blunt and Slender Bodies, K. S. Wan. *General Electric Co., Missile and Space Div. TIS R62SD96*, Nov. 1962, 32 pp.

Heat Transfer to a Sphere with a Retro-Rocket Exhausting Into a Free Stream; Mach 2.0 and 0.8, R. A. Wasko. *NASA TN D-1535*, Nov. 1962, 19 pp.

Heat and Momentum Transfer in Smooth and Rough Tubes at Various Prandtl Numbers, D. F. Dipprey and R. H. Sabersky. *Calif. Inst. Tech., Jet Propulsion Lab. TR 32-269*, June 6, 1962, 33 pp.

Similarity Parameters in Radiation Gas-Dynamics, R. Goulard. *Purdue Univ., School of Aeronaut. and Eng. Sci. A&ES 62-8*, Sept. 1962, 41 pp., 75 refs.

Dissipation in High Temperature Plasmas, H. E. Petschek. *Avco-Everett Research Lab. AMP 93*, Sept. 1962, 5 pp.

Linearized Diffusion in a Relaxing Convecting Gas with Prandtl and Lewis Number Effects, P. M. Storza. *Brooklyn Polytech. Inst. Rept. 725*, Sept. 1962, 16 pp.

Aerodynamic Sound from Fluid Dilatations—A Theory of the Sound from Jets and Other Flows. *Toronto Inst. Aerophys. UTIA Rept. 86*, July 1962, 101 pp.

Flow in the Mixing Region of a Jet, M. A. Kolpin. *Mass. Inst. Tech., Aeroelastic and Structures Research Lab. ASRL TR 92-3*, June 1962, 183 pp., 63 refs.

Theoretical Studies in Basic Radiation Chemistry, M. Vestal, A. L. Wahrhaftig, and W. H. Johnson. *Air Force Aeronaut. Research Labs. ARL 62-426*, Sept. 1962, 180 pp.

A Tabulation of the Thermodynamic Properties of Normal Hydrogen From Low Temperatures to 540°R and from 10 to 1500 PSIA, Supplement A (British Units), J. W. Dean. *Natl. Bur. Standards TN 120A*, June 1962, 75 pp.

Estimation of the Heat Transfer from the Rear of an Immersed Body to the Region of Separated Flow, P. D. Richardson. *Air Force Aeronaut. Research Labs. ARL 62-423*, Sept. 1962, 24 pp.

Heat Transfer and Pressure Distributions on a Hemisphere-Cylinder and a Bluff-Afterbody Model in Methane-Air Combustion Products and in Air, I. Weinstein. *NASA TN D-1503*, Dec. 1962, 31 pp.

Chemically Frozen Boundary Layer with Surface Reactions Behind a Strong Moving Shock, P. M. Chung. *Aerospace Corp. TDR-169 (3230-12) TN-3*, Nov. 1962, 35 pp.

Dissociated Laminar Boundary Layer Flows Over Surfaces with Arbitrary Continuous Distributions of Catalyticity, G. R. Inger. *Aerospace Corp. Rept. ATN-63(9206)-2*, Nov. 20, 1962, 44 pp.

Shock Tubes for High Temperature Gas Kinetics, A. Kantrowitz. *Avco-Everett Research Lab. Rept. 141*, Oct. 1962, 51 pp.

Shock Tube Study of the Recombination of O-Atoms by Ar Catalysts at High Temperatures, K. L. Wray. *Avco-Everett Research Lab. Rept. 142*, Sept. 1962, 24 pp.

Rate of Ionization Behind Shock Waves in Air, II: Theoretical Interpretation,

S. C. Lin and J. D. Teare. *Avco-Everett Research Lab. Rept. 115*, Sept. 1962, 67 pp.

The Magnetohydrodynamically Supported Hypersonic Shock Layer, R. H. Levy and H. E. Petschek. *Avco-Everett Research Lab. Rept. 140 (BSD-TDR-62-337)*, Sept. 1962, 43 pp.

The Thermodynamic Properties of Helium from 3 to 300°K Between 0.5 and 100 Atmospheres, D. B. Mann. *Natl. Bur. Standards TN 154*, Jan. 1962, 95 pp.

Tables of Collision Integrals for Gases Obeying the Morse Potential, S. E. Lovell and J. O. Hirschfelder. *Air Force Aeronaut. Research Labs. ARL 62-421*, Sept. 1962, 60 pp.

Some Aerothermodynamic Considerations for Martian Entry and Heat Shield Design, M. G. Boobar and R. M. Foster. *Inst. Aerospace Sci. Paper 62-162* (June 1962).

CAREER APPOINTMENTS

NASA

ELEVEN PH.D.'s FOR New Key Positions

The Astrionics Division, NASA Marshall Space Flight Center, is expanding rapidly and seeks eleven scientists and engineers with Ph.D. degrees in physics, mathematics, electronics, and aeronautical engineering.

GUIDANCE & CONTROL

Five positions are available in the following areas:

1. Consultant, advisor and special assistant to the Director, Astrionics Division, with responsibility for research and development requiring the adaptation and application of engineering and scientific methods, concepts and theories in connection with the electrical, magnetic, thermal mechanical and other physical properties of materials used in guidance and control.
2. Studies of various types of guidance schemes and recommendations as to which to apply to different missions based on accuracy, reliability, cost, etc.; detailed studies of other NASA space vehicle guidance systems to provide support and cross-coupling of technical information.
3. Investigation of forces and torques for control of future space and launch vehicles and analysis of proposed methods and hardware; flight control studies to determine vehicle maneuvering power and impulse requirements.
4. Technical advice on extremely complex problems relating to mathematical-physical relationship of vehicle dynamics on large space boosters; studies to obtain empirical data for use in solving flight dynamics problems; recommendation of new techniques and theories for consideration in design and development of components.
5. Formulation of equations of motion which describe the flight and guidance performance of space vehicle systems. Formulations will include derivation of steering functions and their mechanization as well as derivation involving theory of inertial, radio, and navigational principles. Mathematical analysis of orbital and interplanetary guidance schemes will also be performed.

FRICTION & LUBRICATION

Analysis of gas bearing characteristics and application of resulting theories to advanced gas lubricated bearing designs;

special studies on aerodynamic problems encountered in gas bearing research; comparison of analytical approaches with the characteristics of air bearing hardware as a basis for theory refinement.

ELECTRONIC FLIGHT & SUPPORT EQUIPMENT

Application of display systems to the launch site computer complex; discern what should be displayed within a check-out and monitoring sequence and propose methods of display which present an operator with the status and operational quality of a system.

MEASUREMENT & INSTRUMENTATION SYSTEMS

Consultant, advisor, special assistant to Chief, Instrumentation Development Branch, with responsibility for research and development requiring application of engineering and scientific methods in studies of RF systems and aerospace communications; will receive special assignments relating to unprecedented projects on theory and development of vehicle instrumentation and aerospace communications systems.

HEAT & LIGHT MEASUREMENT

Design and development of complex electronic, electrical, and electromechanical components, apparatus, devices, materials and parts required for guidance and control systems of space vehicles; advisor and physical researcher in quantum electronics and quantum physics; investigation of possibility to construct optical frequency counterparts or new devices for performance of guidance and communication functions.

SENSORS & TRANSDUCERS

Seek solution to theoretical problems related to gyros and accelerometers; perform studies on gyro performance parameters and apply the results to gyro dynamic analysis; analyze gyro motor characteristics and application of results to new gyro designs.

AUTOMATED CONTROL SYSTEMS

Establish mathematical and analog simulation methods for analysis of gyro and gimbal axis suspensions; establish basic approaches for research and development of inertial sensing and measuring elements.

Send your resume to: Mr. William Vassil, Dept. DNB-1, NASA Marshall Space Flight Center, Professional Staffing Office, Huntsville, Alabama

NASA is an equal opportunity employer. Positions are filled in accordance with Aerospace Announcement 252-B.

1, 313-330 (1962). In French.

Vehicle Design, Testing, and Performance

On the Foundations of Dynamical Analyses of Boost Vehicles, I: The Homogeneous Problem, D. G. B. Edelen. Rand Corp., Santa Monica, Calif., RM-3198-NASA, Aug. 1962.

Handbook of Environmental Engineering, E. C. Theiss, H. Mileaf, and F. Egan. Aeronaut. Systems Div., Wright-Patterson Air Force Base Ohio, ASD TR 61-363, March 1962, 1 Vol.

American Vacuum Society, Transactions of the 8th National Vacuum Symposium, Combined with the 2nd International Congress on Vacuum Science and Technology, 1961 (Macmillan Co., New York), Vol. 2, pp. 670-1371.

Design and Operating Criteria for Environmental Vacuum Chambers, D. C. Spence, pp. 1228-1234.

Evacuating Large Space Chambers with Positive Displacement Blowers, D. L. Dowling, D. B. Herrick, and W. E. Rose, pp. 1235-1243.

A High-Vacuum Orbital Simulator, W. G. Camack and C. A. Ellis, pp. 1260-1269.

Space Thermal Environment Simulation Facilities, A. D. LeVantine, pp. 1270-1278.

Application of Liquid-Helium Cryopumping to Large Electric Rocket Vacuum Facilities, R. J. Cybulski, E. A. Richley, and T. A. Keiler, pp. 1279-1284.

Experimental Evaluation of High-Vacuum Condensers in Large Electric Rocket Vacuum Facilities, E. A. Richley, R. J. Cybulski, and T. A. Keiler, pp. 1285-1291.

Electromagnetic Shielding of Space Vehicles, R. F. Tooper and W. O. Davies. Inst. Aerospace Sci. Paper 62-156 (June 1962).

A Manned Space Support System, F. F. Rand. Inst. Aerospace Sci. Paper 62-177 (June 1962).

A Summary of the Temperature Control Problems of Interplanetary Spacecrafts, D. W. Lewis. Inst. Aerospace Sci. Paper 62-94 (June 1962).

Design Considerations for Boost Phase Abort of Manned Space Flights, E. S. Miller and H. L. Bloom. Inst. Aerospace Sci. Paper 62-133 (June 1962).

Analysis of the Combined Influences of the Micrometeoroid and Radiation En-

vironments on Spacecraft Design, E. M. Finkelman. Inst. Aerospace Sci. Paper 62-128 (June 1962).

Performance of Optimized Multistage Rockets, R. S. Cooper. J. Aerospace Sci. 29, 1339-1343 (1962).

Effects of Mars Atmospheric Uncertainties on Entry Vehicle Design, J. M. Spiegel. Aerospace Eng. 21, 62-63 (Dec. 1962).

Space Flight Projects Based on Blue Streak, G. K. C. Pardoe. J. Roy. Aeronaut. Soc. 66, 690-698 (1962).

Ascent Problems of Sounding Rockets, N. L. Crabill. NATO, AGARD Rept. 391, 1961, 13 pp., 10 refs.

A Reliability Model and Analysis for Project Mercury—3-Orbit Manned and Unmanned Mission, W. Woman and F. Okano. NASA TN D-1558, Dec. 1962, 24 pp.

The Prospects for Active Shielding, R. H. Levy. Avco-Everett Research Lab. AMP 94, Nov. 1962, 14 pp.

Manned Space-Flight Meeting St. Louis, 1962, Proceedings (Inst. Aerospace Sci., New York, 1962), 318 pp.

Design for Manned Space Flight, R. R. Gilruth, pp. 15-16.

Experience with Mercury Spacecraft Systems, J. F. Yardley, pp. 23-29.

Mercury Operational Experience, C. C. Kraft Jr., pp. 30-41.

Thermal Balance of a Manned Space Station, G. B. Patterson and A. J. Katz, pp. 86-94.

Design Comparison of Lunar Return Configurations, E. Offenhartz, C. F. Berninger, W. Zeh, and M. C. Adams, pp. 134-143.

Self Erecting Manned Space Laboratory, R. Berglund and E. A. Weber, pp. 144-149.

Some Abort Techniques and Procedures for Manned Spacecraft, J. M. Eggleston, pp. 167-175.

Paraglider Recovery Systems, F. M. Rogallo, pp. 237-240.

Impact Attenuation Methods for Manned Spacecraft, H. W. Bixby, pp. 241-248.

Effect of Sterilization in Spacecraft Design, A. M. Nowitzky, pp. 250-258.

Liquid Propellant Launch Vehicles for Manned Space Flight, W. B. Schramm, pp. 259-265.

Solid Propellant Boosters for Manned Space Flight, L. F. Ayres, pp. 266-275.

Pilot's Flight Report, J. H. Glenn Jr., pp. 296-309.

Guidance and Control

Analysis of Guidance Perturbations for a Low-Thrust Mars Orbiter Mission Using Snap-8, A. L. Friedlander. NASA TN D-1433, Dec. 1962, 82 pp.

Manned Space-Flight Meeting, St. Louis, 1962, Proceedings (Inst. Aerospace Sci., New York, 1962), 318 pp.

Lift Control During Atmosphere Entry from Super-Circular Velocity, R. C. Wingrove, and R. E. Coate, pp. 95-105.

Rendezvous Guidance Technology, R. S. Swanson and P. W. Soule, pp. 106-129.

The Mercury Capsule Attitude Control System, J. W. Twombly, pp. 228-232.

Manned Lunar Landing Via Rendezvous, F. Digesu, pp. 288-295.

Application of the Lateral Photo-Effect to a Tracking System, C. L. Patterson. Infrared Phys. 2, 75-84 (1962).

Gyroscopic Low Power Attitude Control for Space Vehicles, F. M. Courtney. Air Force Aeronaut. Systems Div. ASD-TDR-62-580, Sept. 1962, 111 pp.

Optimal Automatic Control for Nonlinear Processes, L. Markus. Calif. Univ., Dept. Math. TR 1, July 1961, 31 pp.

Progress Report No. 2 on Studies in the Fields of Space Flight and Guidance Theory: The Calculus of Variations Approach to Control Optimization, C. R. Cavoti. George C. Marshall Space Flight Center, Huntsville, Ala., June 26, 1962.

Elementary Derivation of General Equations for Terrestrial Inertial Navigation, O. T. Schultz. J. Aerospace Sci. 29, 1324-1331 (1962).

The Calculation of Distribution Functions for Random Processes From Experimental Results, V. M. Baburin, P. S. Matveev, Y. B. Rozhdestvenskii, and Y. I. Sorkin. Autom. Remote Control 23, 519-528 (1962).

Estimates of the Quality Factors for Processes in Closed-Loop Sampled-Data Automatic Control Systems, B. B. Ben'yaminov. Autom. Remote Control 23, 529-536 (1962).

Plotting the Equivalent Complex Amplification Factor of a Nonlinear Pulse Element, Y. M. Korshunov. Autom. Remote Control 23, 537-547 (1962).

Effect of an Extrapolating Device on the Characteristics of Linear Digital Automatic Systems, D. A. Fedorov. Autom. Remote Control 23, 548-555 (1962).

Adaptive Systems with Dynamic Characteristic Adjustment, R. S. Rutman. Autom. Remote Control 23, 602-625 (1962).

On Periodic Modes of Saturating Discrete Control Systems, H. C. Torny. J. Franklin Inst. 274, 358-368 (1962).

Blacklash Tolerances and Their Effects on a Guided Missile, J. M. Bailey and S. A. Kuca. Aerospace Eng. 21, 29-31 (Dec. 1962).

Gas Lubrication in Instruments and Control Devices, J. H. Laub. ISA Trans. 1, 305-314 (1962).

Mariner-2 Flight to Venus, F. L. Barnes, W. E. Bollman, D. W. Curkendall, and T. H. Thornton Jr. Astronautics 7, 66-72 (Dec. 1962).

Analysis of Parametrically Excited Systems, Y. H. Ku and T. T. Yang. J. Franklin Inst. 274, 452-474 (1962).

A Digital Orthogonal Model for Nonlinear Processes with Two Level Inputs, R. Y. Roy and P. M. DeRusso. IRE Trans. Autom. Control AC-7, 93-101 (1962).

Stability of a Class of Discrete Control Systems Containing a Nonlinear Gain Element, S. Kodama. IRE Trans. Autom. Control AC-7, 102-109 (1962).

Propagation-of-Error Equations for Airborne Doppler Navigation, N. Braverman and N. Marchand. IRE Trans. Aerospace Navigational Electron. ANE-9, 134-140 (1962).

Inertial Navigation Systems: Prelaunch Alignment, R. H. Parvin. IRE Trans. Aerospace Navigational Electron. ANE-9, 141-145 (1962).

A Mechanical Analog Simulator for Converting Hyperbolic Coordinates into Rectangular Coordinates, J. D. N. van Wyk and G. J. Kuhn. IRE Trans. Aerospace Navigational Electron. ANE-9, 145-150 (1962).

The Effects of Noise Through an Analog Integrator Which Integrates with Respect to an Arbitrary Variable, P. R. Westlake.
