

Table of Contents reprinted from

Journal of Aircraft

VOLUME 1 NUMBER 4

JULY-AUGUST 1964

SURVEY PAPER

- Lessons from Five Years of Hovercraft Operations.....D. J. Hardy 161**

CONTRIBUTED PAPERS

- Application of Flight Simulators to the Development of the A-5A Vigilante....J. D. Richardson and R. C. A'Harrah 171**
- An Analytical and Flight-Test Approach to the Reduction of Pilot-Induced Oscillation Susceptibility.....O. A. Levi and W. E. Nelson 178**
- An Advanced Method for Airborne Simulation.....H. A. Rediess and D. A. Deets 185**
- Prediction of Flutter Onset Speed Based on Flight Testing at Subcritical Speeds.....N. H. Zimmerman and J. T. Weissenburger 190**
- Theoretical Stability Derivatives for a Ducted Propeller.....A. R. Kriebel 203**
- Aerodynamic Matrix Procedure for Low Aspect Ratio Wings.....G. W. Martin Sr. 211**

ENGINEERING NOTES

- Sample Estimates of B-66B Low-Level, Clear-Air Gust Field Parameters.....K. D. Saunders 218**
- Optimum Spacing of Shell Frames.....B. Saelman 219**
- Buckling of Shell-Supported Rings.....J. A. Cheney 220**

TECHNICAL COMMENTS

- Comment on "Low-Altitude, High-Speed Handling and Riding Qualities".....I. L. Ashkenas 222**
- Reply by Author to I. L. Ashkenas.....R. C. A'Harrah 223**
