Index of Papers Published in AIAA Journal

Volume 3—January through December 1965

Issue	Pages	Issue	Pages
January	1–192	July	1217–1376
February	193–384	August	1377–1568
March	385–576	September	1569–1792
April	577–800	October	1793–1984
May	801–992	November	1985–2176
June	993–1216	December	2177–2368

TN, TC, and SA indicate Technical Note, Technical Comment, and Survey Article, respectively.

AUTHORS

Abbett, Michael J. (see DeGroat, James J.)

Abramson, H. Norman (see Dodge, Franklin T.)

Achenbach, J. D. Dynamic response of a long case-bonded viscoelastic cylinder 673

——Dynamic response of an encased elastic cylinder with ablating inner surface (TN) 1142

——Forced vibrations of a burning rocket (TN) 1333

Albini, Frank A. Approximate computation of underexpanded jet structure (TN) 1535

Album, H. Harvey. Hypersonic flow visualization using tufts of pure carbon yarn (TN) 1520

Allen, Donald R. and Byrne, William M., Jr. Specific impulse calculations for air-breathing propulsion (TN) 984

Allendorf, H. Donald (see Rosner, Daniel E.)

Alpinieri, L. J. Reply by author to G. L. Mellor (TC) 799

Amsden, Anthony A. and Harlow, Francis H. Numerical calculation of supersonic wake flow 2081

Anderson, G. F. and Sutera, S. P. Drag reduction on bodies of revolution by use of area suction (TN) 1970

Anderson, W. A. (see Kentzer, C. P.)

——(see Xerikos, J.)

Anderson, W. H. (see Salzman, P. K.)

Anthony, Maurice L. and Sasaki, Frank T. Rendezvous problem for nearly circular orbits 1666

Arams, Frank P. (see Peyton, Bernard J.)

Archer, R. Douglas and Hermann, Rudolf. Supersonic and hypersonic flow of an ideal gas around an elliptic nose (TN) 987

Archer, Robert R. and Lange, Charles G. Nonlinear dynamic behavior of shallow spherical shells 2313

Archer, John S. Consistent matrix formulations for structural analysis using finite-element techniques 1910

Archer, R. R. (see Famili, J.)

Argyris, J. H. Matrix analysis of three-dimensional elastic media small and large displacements 54

Arne, Claude L. Comments on "Effect of gas composition on the ablation behavior of a charring material" (TC) 187

Arnold, James O., Reis, Victor H., and Woodward, Henry T. Studies of shock-layer radiation of bodies entering planetary atmospheres. 2019

Aroesty, J. (see Cole, J. D.)

Ashby, D. E. T. F. Energy loss in pulsed coaxial plasma guns 1045

——, **Gooding, T. J., Hayworth, B. R., and Larson, A. V.** Exhaust measurements on the plasma from a pulsed coaxial gun (TN) 1140

——(see Larson, A. V.)

Ashley, Holt, Windall, Sheila, and Landahl, Marten T. New directions in lifting surface theory 3

Auelmann, Richard R. Angle of attack envelope for a spinning reentry body 465

Autio, G. W. and Scala, E. Normal spectral emissivity of isotropic and anisotropic materials (TN) 738

Back, L. H., Massier, P. F., and Gier, H. L. Comparison of measured and predicted flows through conical supersonic nozzles, with emphasis on the transonic region 1606

Baer, A. D. and Ryan, N. W. Ignition of composite propellants by low radiant fluxes 884

Bahar, Leon Y. An extension of Hetenyi's method through the use of Macaulay brackets (TN) 369

Baird, Francis E. Integrated solar pressure for a transparent balloon satellite (TN) 531

Baker, M. B. Geomagnetically trapped radiation (SA) 1569

Ball, W. H. (see Wazzan, Ahmed R.)

Barber, John B. (see Sterrett, James R.)

Batchelder, Richard A. Shock shape generalization for inverse blunt body methods (TN) 353

Batterman, S. C. Plastic buckling of axially compressed cylindrical shells 316

——Errata: "Plastic buckling of axially compressed cylindrical shells" (TC) 1792

Bauer, Andrew B. Normal shock location of underexpanded gas-particle jets (TN) 1187

——Direct measurement of velocity by hot-wire anemometry (TN) .. 1189

Baum, Eric, King, Hartley H., and Denison, M. Richard. Reply by authors to A. N. Tifford (TC) 1212

Beal, T. R. Dynamic stability of a flexible missile under constant and pulsating thrusts 486

Beans, E. W. A definition of the time duration of the pressure phase resulting from intersecting shock waves (TN) 2344

Beecher, Norman and Rosensweig, Ronald E. Erratum: "Ablation mechanisms in plastics with inorganic reinforcement" (TC) 1567

——(see Rosensweig, Ronald E.)

Beer, Ferdinand P. and Sarubbi, Robert G. Extrapolation in time of fields with stationary increments as applied to the impact point prediction of free rockets 495

Behrens, Wilhelm and Lees, Lester. Reply by authors to A. Goldburg (TC) 991

Beltran, M. R. and Frankel, N. A. Prediction of instability zones in liquid rocket engines (TN) 516

Bender, David F. (see McCue, Gary A.)

Bendor, Edgar. One-dimensional flow in MHD generators (TN) ... 167

Bennette, Carol J., Strayer, R. W., Cooper, E. C., and Swanson, L. W. Investigation of the prebreakdown gap currents between clean and cesium-coated tungsten electrodes 284

Berger, Stanley A. and Viviand, Henri. Effect of base bleeding on the near wake for very low Reynolds numbers (TN) 2154

——(see Viviand, Henri)

Berkowitz, Harvey M. Comments on "Strain-displacement relations in large displacement theory of shells" (TC) 2176

Berman, Julian H. and Sklerov, Jerome. Calculation of natural modes of vibration for free-free structures in three-dimensional space (TN) 158

Berman, Richard J. Bow shock shape about a spherical nose (TN) .. 778

Berry, J. M. (see Gebhardt, J. J.)

Bevans, J. T. (see Edwards, D. K.)

Bieniek, M. P. Creep under random loading (TN) 1559

Bingham, Gene J. and Davidson, Theodore E. Simulation of the interaction of a hypersonic body and a blast wave (TN) 564

Bird, J. F., Hart, R. W., and McClure, F. T. Finite acoustic oscillations and erosive burning in solid fuel rockets 2248

Black, Neville A. and Jahn, Robert G. Dynamic efficiency of pulsed plasma accelerators (TN) 1209

Blackburn, P. R. (see Louis, J. F.)

Blackman, A. W. (see Sarli, V. J.)

Blick, E. F. (see Peter, R. A.)

Bloom, A. M. (see Yuan, S. W.)

Bloom, Martin H. (see Steiger, Martin H.)

Blore, William E. and Musal, Henry M., Jr. Radar absorption effect in hypersonic ballistic ranges (TN) 1171

Bloxsom, D. E., Jr. Transition of air laminar boundary layers (TN). 982

Bogdonoff, Seymour M. (see Vas, Irwin E.)

Bond, Charles E. Magnetic confinement of an electric arc in transverse supersonic flow (TN) 142

Boobar, M. G. and McElhoe, B. A. Indirect speed measurement for planetary entry (TN) 1527

Boresi, A. P. (see Langhaar, H. L.)

Bornhorst, Walter J. Magnetohydrodynamic effect on open-channel flow (TN) 1180

Bose, S. C. Torsion of an aeolotropic cylinder having a spheroidal inclusion on its axis (TN) 1352

Botch, W. D. (see Mullaney, G. J.)

Bowen, M. D. and Gorton, C. W. An analysis of a compressible, turbulent boundary layer on a chemically-reacting pyrolytic boron nitride surface (TN) 1354

Bowman, C. T., Glassman, I., and Crocco, L. Combustion instability in gas rockets (TC) 1981

Bowman, Gary H. and Coon, Grant W. Static pressure measurements in a hypervelocity shock tunnel (TN) 751

Bowyer, J. M., Jr. and Carter, W. V. Separated flow behind a rearward-facing step with and without combustion (TN) 181

Boylan, David E. (see Deskins, H. Eugene)

——(see Sims, William H.)

SUBJECTS

AERODYNAMICS OF BODIES, COMBINATIONS, AND INTERNAL FLOW

Magnus characteristics of finned and nonfinned projectiles. Anders S. Platou..... 83
Angle of attack envelope for a spinning re-entry body. Richard R. Auelmann..... 465
Hypersonic stability derivatives of blunted slender cones. Otto Walchner and James T. Clay (TN)..... 752
Shock predictions in conical nozzles. D. Migdal and R. Kosson (TN)..... 1554
Unsteady flow phenomena in nozzles. Benjamin E. Nevis (TN).... 1556

AERODYNAMICS OF WINGS, ROTORS, AND CONTROL SURFACES

New directions in lifting surface theory. Holt Ashley, Sheila Windall, and Marten T. Landahl..... 3
Wing sweep and blunting effects on delta planforms at $M = 20$. Robert D. Witcofski and Don C. Marcum Jr. (TN)..... 547

ASTRONOMY AND ASTROPHYSICS

An approximation of the integrated infrared starlight at 2.2 and 3.6 μ over the sky. James N. Hanson..... 395
Libration damping and lunar mass. Irving Michelson (TN)..... 172
Matrizant of Keplerian motion. J. M. A. Danby (TN)..... 769

CHEMISTRY

Evaporation coefficients and recoil pressures for biphenyl and naphthalene. B. Paul and L. G. Lyon..... 1067
Spectroscopic constants for the N+ ion. M. S. Wecker (TC)..... 572

COMMUNICATIONS

Effect of azimuth on the accuracy of an interferometer radar. C. W. Pittman (TN)..... 170
Principle of blackout communications. S. N. Samaddar (TN)..... 349
Visibility of a lunar satellite from an earth ground station. P. R. Escobal (TN)..... 740

FACILITIES, RESEARCH, AND SUPPORT

Preliminary results with a free piston shock tunnel. R. J. Stalker (TN)..... 1170

FLUID DYNAMICS

A synthetic view of the mechanics of rarefied gases. Gordon N. Patterson (SA)..... 577
Continuum-source molecular beams. J. Barry French (SA)..... 993
Estimates for collision-induced dissociation rates. C. Frederick Hansen..... 61
Inviscid, nonadiabatic flow about blunt bodies. K. H. Wilson and H. Hoshizaki..... 67
Similar solutions for the hypersonic laminar boundary layer near a plane of symmetry. Massimo Trella and Paul A. Libby..... 75
Linearized vortex flows. W. S. Lewellen..... 91
A parametric study of gas-particle flows in conical nozzles. J. D. Hoffman and S. A. Lorenc..... 103
A one-dimensional treatment of inviscid jet or duct flow. Philip A. Thompson..... 212
Interaction of a starting vortex as well as a vortex street with a traveling shock wave. Darshan S. Dosanjh and Thomas M. Weeks..... 216
A new technique for the numerical analysis of nonequilibrium flows. Gino Moretti..... 223
Experimental study of nonequilibrium expanding flows. Robert E. Duffy..... 237
Investigation of the charge-to-mass ratio of electrically sprayed liquid particles. J. J. Hogan and C. D. Hendricks..... 296
Thickness effect on the force of slender delta wings in hypersonic flow. Kinzo Hida..... 427
Hypersonic flow over an oscillating wedge. S. C. McIntosh Jr..... 433
Second-order forces and pressure distributions on three-dimensional bodies by reverse-flow integral method. S. P. Sutera..... 441
An experimental investigation of the shock layer surrounding a sphere in supersonic flow. J. Xerikos and W. A. Anderson..... 451
Calculation of hypersonic flow over bodies of revolution at small angles of attack. John V. Rakich..... 458
A new model for mixing and fluctuations in a turbulent wake. Andrew P. Proudian and Saul Feldman..... 602
Unsteady three-dimensional laminar jet mixing of a compressible fluid. S. I. Pai..... 617
Influence of fluctuating circulations on the transport phenomena from cylinders including uniform suction or blowing. Wen-Jei Yang and Tomoaki Izumi..... 622
Machine calculation of compressible laminar boundary layers. A. M. O. Smith and Darwin W. Clutter..... 639
Satellite potential in an ionized atmosphere. Norman C. Jen..... 714
Small disturbance phenomena in rarefied gas fields. Joseph G. Logan (TN)..... 744
Calculations of the turbulent boundary layer. B. G. J. Thompson (TN)..... 746
An aerofoil probe for measuring the transverse component of turbulence. Thomas E. Siddon and Herbert S. Ribner (TN)..... 747
Static pressure measurements in a hypervelocity shock tunnel. Gary H. Bowman and Grant W. Coon (TN)..... 751
A simple approach to the multicomponent laminar boundary layer. A. Casaccio and S. Cousin (TN)..... 756
Stagnation-point velocity distribution for a compressible fluid. Robert A. Graff (TN)..... 762
Accurate values of the exponent governing potential flow about semi-infinite cones. John L. Hess and Sue Faulkner (TN)..... 767
Preliminary results on boundary-layer stability on a flexible plate. F. D. Hains (TN)..... 775
Bow shock shape about a spherical nose. Richard J. Berman (TN).. 778
A simple universal velocity profile equation. Ralph A. Burton (TN). 784
Velocity defect laws for transpired turbulent boundary layers. H. S. Mickley, K. A. Smith, and M. D. Fraser (TN)..... 787
Drag coefficients of particles in gas-particle flow. C. F. Chen (TN).. 788
Velocity profile in the half-jet mixing region of turbulent jets. Wing T. Chu (TN)..... 789
A miniature strain-gage balance for hypersonic force measurements. Bing H. Lieu and Eugene V. Horanoff (TN)..... 793
Sensitivity of flow visualization methods at low-density flow conditions. W. F. Merzkirch (TN)..... 794
Interaction of a shock wave and a wedge: an application of the hydraulic analogy. Enrique J. Klein..... 801
Asymptotic boundary layer over a slender body of revolution in axial compressible flow. Michael H. Wei..... 809
Turbulent diffusion of a reacting wake. Wilmot H. Webb and Leslie A. Hromas..... 826
