Cascade with Subsonic Leading-Edge Locus

M.E. Goldstein

NASA Lewis Research Center, Cleveland, Ohio

[AIAA J. 13, 1117-1119 (1975)]

EQUATION (8) should read

Received December 22, 1975.

Index categories: Nonsteady Aerodynamics; Supersonic and Hypersonic Flow; Airbreathing Propulsion, Subsonic and Supersonic.

$$V = \frac{1}{2i} \exp(iMkx) \frac{\partial}{\partial y} \int_{-\infty + i\delta}^{\infty + i\delta} \frac{M}{M\alpha - k} \sum_{n=-\infty}^{\infty} (\operatorname{sgn} y_n) f_n(\alpha) \times \exp[-i(\alpha x_n - \gamma\beta |y_n|)] d\alpha \quad (8)$$

The equation preceding Eq. (21) should read

$$\begin{aligned} \lim_{y \rightarrow 0} \frac{\partial}{\partial y} \sum_{n=-\infty}^{\infty} \frac{1}{\Gamma_n} \exp\left[-i \frac{\Gamma_n}{s^\dagger \mp \beta s} (x \mp \beta y)\right] \\ = \pm \frac{i\beta}{s^\dagger \mp \beta s} \exp\left\{i \left[\frac{\sigma - Mks^\dagger}{s^\dagger \mp \beta s}\right] x\right\} \sum_{n=-\infty}^{\infty} \exp\left[-\frac{2in\pi x}{s^\dagger \mp \beta s}\right] \\ = \pm i\beta \sum_{n=-\infty}^{\infty} \exp[in(\sigma - Mks^\dagger)] \delta(x_n \pm \beta sn) \end{aligned}$$
