Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Vortex-Fitted Potential and Vortex-Captured Euler Solution for Leading-Edge Vortex Flow J85-370
Experimental Study of the Interaction of Multiple Jets with a Cross Flow J85-305
The Pitching Delta Wing J85-301
Airfoil Dynamic Stall Performance with Large-Amplitude Motions J85-300
Inviscid and Viscous Flows in Cascades with an Explicit Multiple-Grid Algorithm J85-277
A Color Video Display Technique for Flowfield Surveys J85-245
Transonic Panel Method for the Full Potential Equation Applied to Multicomponent Airfoils J85-237
High Angle-of-Attack Calculations of the Subsonic Vortex Flow on Slender Bodies J85-205
An Experimental Investigation of an Airfoil Undergoing Large-Amplitude Pitching Motions J85-203
Interception of Two Equal Turbulent Jets J85-173
The Discrete Vortices from a Delta Wing J85-158
The Position of Laminar Separation Lines on Smooth Inclined Bodies J85-156
An Aerodynamic Theory Based on Time-Domain Aeroacoustics J85-143
Knudsen Layer Characteristics for a Highly Cooled Blunt Body in Hypersonic Rarefied Flow J85-135
Calcualation of Nonlinear Subsonic Characteristics of Wings with Thickness and Camber at High Incidence J85-134
Experimental Investigation of a Simulated Compressor Airfoil Trailing-Edge Flowfield J85-121
Computation of Three-Dimensional Turbulent Shear Flows in Corners J85-110
Unsteady Flow About a Joukowski Airfoil in the Presence of Moving Vortices J85-106
Relative Effects of Reynolds Number and Freestream Turbulence in Transonic Flow J85-088
Measurements of a Zero-Pressure-Gradient Boundary Layer Blown by an Asymmetric Jet J85-080
Viscid/Inviscid Interaction Analysis of Separated Trailing-Edge Flows J85-079
Implicit Upwind Methods for the Compressible Navier-Stokes Equations J85-060
Near-Field Pressure Fluctuations of an Elliptic Jet J85-057
A Perspective of Theoretical and Applied Computational Fluid Dynamics J85-054
Application of a Two-Dimensional Grid Solver for Three-Dimensional Problems J85-053
Leading-Edge Separations and Cross-Flow Shocks on Delta Wings J85-052
Evaluation of Simple Subgrid-Scale Models for the Numerical Simulation of Homogeneous Turbulence J85-035
The Circular Cylinder in Subsonic and Transonic Flow J84-339
Separation Model for Two-Dimensional Airfoils in Transonic Flow J84-232

Aeroelasticity

The Role of Damping on the Stability of Short Beck's Columns J85-375
The Role of Damping on Supersonic Panel Flutter J85-295
Optimization of Cascade Blade Mistuning, Part II: Global Optimum and Numerical Optimization J85-248
Optimization of Cascade Blade Mistuning, Part I: Equations of Motion and Basic Inherent Properties J85-217
Flutter Analysis of Thin Cracked Panels Using the Finite Element Method J85-125
Effects of Friction Dampers on Aerodynamically Unstable Rotor Stages J85-041
Generic Approach to Determine Optimum Aeroelastic Characteristics for Composite Forward-Swept-Wing Aircraft J84-017

Flight Displays

Computation of Choked and Supersonic Turbomachinery Flows by a Modified Potential Method J85-034
Boundary-Layer Blowing J85-024
Emmons Spot Forcing for Turbulent Drag Reduction J85-023

Fuels and Fuel Systems

Transverse Jet Breakup and Atomization with Rapid Vaporization Along the Trajectory J85-095

Noise

Discrete Tones Generated by an Impinging Underexpanded Rectangular Jet J85-359
A Mapped, Factored-Implicit Scheme for the Computation of Duct and Far-Field Acoustics J85-100
Near-Field Frequency-Domain Theory for Propeller Noise J85-082
Experimental Investigation of Modal Power Distribution in a Duct at High Frequency J85-028

Propeller and Rotor Systems

Optimization of Cascade Blade Mistuning, Part II: Global Optimum and Numerical Optimization J85-248
Optimization of Cascade Blade Mistuning, Part I: Equations of Motion and Basic Inherent Properties J85-217
An Aerodynamic Theory Based on Time-Domain Aeroacoustics J85-143
Near-Field Frequency-Domain Theory for Propeller Noise J85-082
Shock-Free Turbomachinery Blade Design J85-039

Structural Design (including Loads)

Structural Optimization by Multilevel Decomposition J85-319
Optimization of Bonded Joints J85-280
Compatiblity Conditions from Deformation Displacement Relationship J85-230
An Efficient Simplified Approach for the Nonlinear Buckling Analysis of Frames J85-222
Minimum Weight Design of Truss Structures with Geometric Nonlinear Behavior J85-019

Structural Materials

Use of Shear Lag for Composite Microstress Analysis--Linear Array J85-315
Optimization of Superplastically Formed Sandwich Cores J85-296
Use of Shear Lag for Composite Microstress Analysis--Rectangular Array J85-150

Subsystem Design

Optimization of Bonded Joints J85-280

Testing, Flight and Ground

Reduction of Background Noise Induced by Wind Tunnel Jet Exit Vanes J85-290
Wind Tunnel Wall Corrections Deduced by Iterating from Measured Wall Static Pressure J83-310

Vibration

Coupled Vibration Analysis of Blades with Angular Pretwist of Cubic Distribution J85-251
Thermal Effect on Frequencies of Coupled Vibrations of Pretwisted Rotating Beams J85-231
Method of Multiple Scales and Identification of Nonlinear Structural Dynamic Systems J85-126
A More General Method of Substructure Mode Synthesis for Dynamic Analysis J85-098
Effects of Friction Dampers on Aerodynamically Unstable Rotor Stages J85-041
Generalized Dynamic Reduction in Finite Element Dynamic Optimization J84-323
Dynamic Condensation J84-145
Generic Approach to Determine Optimum Aeroelastic Characteristics for Composite Forward-Swept-Wing Aircraft J84-017

Energy

Combustion

Unsteady Transport Effects on Diffusion Flame Stability J85-374
Flame Structures in the Near Wake of Circular Cylinders J85-354
Structure of Nonevaporating Sprays, Part II: Drop and Turbulence Properties J85-311
Transient Catalytic Ignition on a Flat Plate with External Energy Flux J85-310
Laser-Induced Fluorescence Measurements of Mixed Fluid Concentration in a Liquid Plane Shear Layer J85-308
Speed Measurement of Flat Flame in a Tube Using Ion Probes J85-291
Structure of Nonevaporating Sprays, Part I: Initial Conditions and Mean Properties J85-276
Effects of Electric Fields on the Blowoff Limits of a Methane-Air Flame J85-257
The Shock Wave Ignition of Dusts J85-244
Statistical Processing of Multiplexed Data from Turbulent Flames J85-229
Modeling End-Gas Knock in a Rapid-Compression Machine J85-218
A 'Flip' Experiment in a Chemically Reacting Turbulent Mixing Layer J85-211
Simultaneous Measurements of Velocity and Density in a Turbulent Nonpremixed Flame J85-185

Transient Ignition of a Combustible by a Hot Body J85-145
Mixed Convective Burning of a Horizontal Flat Plate J85-097
Nonadiabatic Propagation of a Planar Premixed Flame: Constant-Volume Enclosure J85-067
Recirculation in Swirling Flow: A Manifestation of Vortex Breakdown J85-015
Velocity Field Characteristics of a Swirling Flow Combuster J85-013
Stability Analysis of a Class of Diffusion Flames J85-012

Lasers

Fluid Dynamics in Closed-Cycle Pulsed Lasers J85-361
Aero-optical Foundations and Applications J85-274
Pulsed DF Laser/Metal Interaction in Direct Absorption Regime J85-256
Saturation Effects in a Continuous-Wave HF Chemical Laser J85-247
Pressure-Geometry Scaling for Chemical Laser Performance J85-199
Theoretical Gain Optimization Studies in 16-μm CO_2-N_2-H_2 Gasdynamic Lasers J85-144

Magnetohydrodynamics

Influence of Magnetic Reynolds Number of Power Generated by an Ideal MHD Device J85-325
Experimental Investigation of the Physical Processes Applicable to a Magnetohydrodynamic Laser J85-116

Power Conditioning

Experimental and Theoretical Study of a Direct-Current Arc in an Orifice Nozzle Flow J85-175

Rotating Machinery

Freestream Turbulence Effects on Turbulent Boundary Layers in an Adverse Pressure Gradient J85-326
Thermal Effect on Frequencies of Coupled Vibrations of Pretwisted Rotating Beams J85-231

Fluid Dynamics

Aeroacoustics

Discrete Tones Generated by an Impinging Underexpanded Rectangular Jet J85-359
A Linearized Theory for Swirling Supersonic Jets and Its Application to Shock-Cell Noise J85-358
Freestream Turbulence Effects on Wake Properties of a Flat Plate at an Incidence J85-353
The Decay of the Shock Wave from a Supersonic Projectile J85-331
Cylindrical Sound Wave Generated by Shock-Vortex Interaction J85-309
Reduction of Background Noise Induced by Wind Tunnel Jet Exit Vanes J85-290
Experimental Results on Edge-Tone Oscillations in High-Speed Subsonic Jets J85-265
Effect of Initial Condition on Subsonic Jet Noise J85-243
Turbulent Static Pressure Fluctuations Away from Flow Boundaries J85-236
Boundary Condition for Rocket Motor Stability J85-186
Controlled Suppression or Amplification of Turbulent Jet Noise J85-136
Noise-Related Shear-Layer Dynamics in Annular Jets J85-114
Noise Reduction Mechanisms in Supersonic Jets with Porous Centerbodies J85-109
Analysis of Turbulent Underexpanded Jets, Part II: Shock Noise Features Using SCIPVIS J85-108
A Mapped, Factored-Implicit Scheme for the Computation of Duct and Far-Field Acoustics J85-100
Analysis of Turbulent Underexpanded Jets, Part I: Parabolized Navier-Stokes Model, SCIPVIS J85-083
Near-Field Frequency-Domain Theory for Propeller Noise J85-082
Scaling of Airfoil Self-Noise Using Measured Flow Parameters J85-033
Experimental Investigation of Modal Power Distribution in a Duct at High Frequency J85-028
Emmons Spot Forcing for Turbulent Drag Reduction J85-023
Sound Generation by Turbulence in Simulated Rocket Motor Cavities J85-010
The Response of Normal Shocks in Diffusers J83-256

Boundary Layers and Convective Heat Transfer-Laminar

A Noniterative Finite Difference Method for the Compressible Unsteady Laminar Boundary Layer J85-332
Transient Catalytic Ignition on a Flat Plate with External Energy Flux J85-310
Analysis of Laminar Flow and Heat Transfer Between a Stationary and a Rotating Disk J85-302
Improved Free Convective Heat-Transfer Correlations in the Near-Critical Region J85-298
Radiative Effect on the Conjugated Forced Convection-Conduction Analysis of Heat Transfer in a Plate Fin J85-297
Simultaneous Heat and Mass Transfer in Free Convection from a Horizontal Cylinder J85-284
The Influence of Acceleration on Laminar Similar Boundary Layers J85-266
Analysis of Active Control by Surface Heating J85-181
Embedded Cavity Drag in Steady Laminar Flow J85-180
Improved Series Solutions of Falkner-Skan Equation J85-162
Refinement of an 'Alternate' Method for Measuring Heating Rates in Hypersonic Wind Tunnels J85-128
Analysis of Aerothermal Loads on Spherical Dome Protuberances J85-105
Unsteady Laminar Boundary-Layer Separation on Oscillating Configurations J85-092
Development of a Floating Element for the Measurement of Surface Shear Stress J85-065
Three-Dimensional Asymptotic Suction of Compressible Flow J85-049
Semisimilar Solutions of the Unsteady Compressible Laminar Boundary-Layer Equations J85-036
Mathematical Characteristics of Flows with Nonlinear and Nonequilibrium Transport J85-021
Boundary Layers and Separation on a Spheroid at Incidence J85-008
Laminar Stagnation-Point Heat Transfer for a Two-Temperature Argon Plasma J84-234
The Two-Dimensional Laminar Wake with Initial Asymmetry J83-249
Improved Solutions to the Falkner-Skan Boundary-Layer Equation J82-233

Boundary Layers and Convective Heat Transfer-Turbulent

Measurements of Fluctuating Temperatures in a Supersonic Turbulent Flow Using Laser-Induced Fluorescence J85-362
Calculation of Two-Dimensional Turbulent Boundary Layers Using athe Baldwin-Lomax Model J85-349
Stagnation Point Flows with Freestream Turbulence--The Matching Condition J85-330
Freestream Turbulence Effects on Turbulent Boundary Layers in an Adverse Pressure Gradient J85-326
A Mathematically Simple Turbulence Closure Model for Attached and Separated Turbulent Boundary Layers J85-306
Turbulent Prandlt Number Within a Near-Wall Flow J85-303
Improved Free Convective Heat-Transfer Correlations in the Near-Critical Region J85-298
A Turbulent Transport Model for Free-Shear Flows J85-289
Aero-optical Foundations and Applications J85-274
Multiple Transonic Shock-Wave/Turbulent Boundary-Layer Interaction in a Circular Duct J85-271
Theoretical and Experimental Study of Nonadiabatic Transonic Shock/Boundary-Layer Interaction J85-267
A Computational Study of Complex Three-Dimensional Compressible Turbulent Flowfields J85-264
Turbulent Boundary Layer Perturbed by a Screen J85-238
Turbulent Static Pressure Fluctuations Away from Flow Boundaries J85-236
Turbulence Models for Near-Wall and Low Reynolds Number Flows: A Review J85-235
A Miniature, Directional Surface-Fence Gage J85-212
Computation of the Tip Vortex Off a Low-Aspect-Ratio Wing J85-204
Conical Similarity of Shock/Boundary-Layer Interactions Generated by Swept and Unswept Fins J85-179
Time-Dependent Solution of Three-Dimensional Compressible Turbulent Integral Boundary-Layer Equations J85-177
Upstream Influence in Conically Symmetric Flow J85-161
Asymptotic Analysis of Thick Axisymmetric Turbulent Boundary Layers J85-159
Experimental and Numerical Investigation of a Shock Wave Impingement on a Cylinder J85-138
Transonic Shock-Wave/Turbulent Boundary-Layer Interactions in a Circular Duct J85-113
Computation of Three-Dimensional Turbulent Shear Flows in Corners J85-110
Relative Effects of Reynolds Number and Freestream Turbulence in Transonic Flow J85-088
Calculation of Two-Dimensional Turbulent Boundary Layers over Rigid and Moving Wavy Surfaces J85-086
Development of a Floating Element for the Measurement of Surface Shear Stress J85-065
Ablation of Galileo Probe Heat-Shield Models in a Ballistic Range J85-047
Spectral Methods for the Euler Equations:

Part II - Chebyshev Methods and Shock Fitting J85-037
Scaling of Airfoil Self-Noise Using Measured Flow Parameters J85-033
Flowfield Scaling in Sharp Fin-Induced Shock Wave/Turbulent Boundary-Layer Interaction J85-032
Numerical Analysis of Attached Turbulent Boundary Layers Along Strongly Curved Surfaces J85-029
Features of a Reattaching Turbulent Shear Layer in Divergent Channel Flow J85-027
The Universal Nature of Zero-Crossing Time and Velocity Scales in Turbulent Shear Flows J85-026
Mathematical Characteristics of Flows with Nonlinear and Nonequilibrium Transport J85-021
Spectral Methods for the Euler Equations: Part I-Fourier Methods and Shock Capturing J85-009
Boundary Layers and Separation on a Spheroid at Incidence J85-008
Viscous/Inviscid Analysis of Curved Sub- or Supersonic Wall Jets J85-002

Boundary-Layer Stability and Transition

The Second Mode of the Görtler Instability of Boundary Layers J85-333
Flow Structures Formed by Axisymmetric Spinning Bodies J85-254
Effect of Curvature on Three-Dimensional Boundary-Layer Stability J85-242
Turbulent Boundary Layer Perturbed by a Screen J85-238
Effects of Blowing on the Gortler Instability of Boundary Layers J85-228
Numerical Simulations of Compliant Material Response to Turbulent Flow J85-182
Analysis of Active Control by Surface Heating J85-181
Stability Experiments in the Flow over a Rotating Disk J85-094
Scaling of Airfoil Self-Noise Using Measured Flow Parameters J85-033
Emmons Spot Forcing for Turbulent Drag Reduction J85-023
Further Experiments on Shock Tube Wall Boundary-Layer Transition J83-196

Computational Methods

Block-Implicit Calculations of Three-Dimensional Laminar Flow in Strongly Curved Ducts J85-373
Three-Dimensional Solutions to the Euler Equations with One Million Grid Points J85-371
Vortex-Fitted Potential and Vortex-Captured Euler Solution for Leading-Edge Vortex Flow J85-370
A New Approach to Flow Problems past a Porous Plate J85-360
Calculation of Three-Dimensional Shock/Turbulent Boundary-Layer Interaction Generated by Sharp Fin J85-356
A Transonic Wing-Body Flowfield Calculation with Improved Grid Topology J85-355
A Theoretical Basis for Extending Surface-Paneling Methods to Transonic Flow J85-352
Numerical Outflow Boundary Condition for Navier-Stokes Flow Calculations by a Line Iterative Method J85-348
A Noniterative Finite Difference Method for the Compressible Unsteady Laminar Boundary Layer J85-332
Finite Difference Solutions of the Euler Equations in the Vicinity of Sharp Edges J85-329
Conservation Form of the Equations of Fluid Dynamics in General Nonsteady Coordinates J85-328
Second-Order-Accurate Spatial Differencing for the Transonic Small-Disturbance Equation J85-307
Three-Dimensional Calculation of Transonic Viscous Flows by an Implicit Method J85-304
Analysis of Laminar Flow and Heat Transfer Between a Stationary and a Rotating Disk J85-302
Inviscid and Viscous Flows in Cascades with an Explicit Multiple-Grid Algorithm J85-277
Application of Time-Iterative Schemes to Incompressible Flow J85-273
Calculation of Three-Dimensional Flowfields by the Unsteady Method of Characteristics J85-270
A Three-Dimensional, Block-Structured Finite Element Grid Generation Scheme J85-268
Modeling of Turbulent Flowfields Through a Cascade of Airfoils at Stall Conditions J85-249
Effect of Curvature on Three-Dimensional Boundary-Layer Stability J85-242
Implicit Lambda Methods for Three-Dimensional Compressible Flow J85-239
Transonic Panel Method for the Full Potential Equation Applied to Multicomponent Airfoils J85-237
Turbulence Models for Near-Wall and Low Reynolds Number Flows: A Review J85-235
Comparison of Supercritical Airfoil Flow Calculations with Wind Tunnel Results J85-234
Analysis of Large Vortical Structures in Shear Layers J85-207
High Angle-of-Attack Calculations of the Subsonic Vortex Flow on Slender Bodies J85-205
Computation of the Tip Vortex Off a Low-Aspect-Ratio Wing J85-204
Simplified Implicit Block-Bidiagonal Finite Difference Method for Solving the Navier-Stokes Equations J85-198
Numerical Solution of Two- and Three-Dimensional Rotor Tip Leakage Models J85-184
A Two-Dimensional Analysis of Laser Heat Addition in a Constant Absorptivity Gas J85-183
Numerical Simulations of Compliant Material Response to Turbulent Flow J85-182
Embedded Cavity Drag in Steady Laminar Flow J85-180
Time-Dependent Solution of Three-Dimensional Compressible Turbulent Integral Boundary-Layer Equations J85-177
Computations of Projectile Magnus Effect at Transonic Velocities J85-176
The Nonequilibrium Region of a Mixing Layer J85-174
Prediction of Secondary Vortex Flowfields Generated by an Interacting Multiple Free-Jet Configuration J85-172
Perturbations of a Transonic Flow with Vanishing Shock Waves J85-160
Calculation of the Volume of a General Hexahedron for Flow Predictions J85-155
An Aerodynamic Theory Based on Time-Domain Aeroacoustics J85-143
Navier-Stokes Calculations for Unsteady Three-Dimensional Vortical Flows in Unbounded Domains J85-142
A Generalized Discrete-Vortex Method for Sharp-Edged Cylinders J85-140
The Effect of Strong Heat Addition on the Covergence of Implicit Schemes J85-139
Experimental and Numerical Investigation of a Shock Wave Impingement on a Cylinder J85-138
Comparison of Inviscid and Viscous Computations with an Interferometrically Measured Transonic Flow J85-137
Calcualation of Nonlinear Subsonic Characteristics of Wings with Thickness and Camber at High Incidence J85-134
Some Iterative Schemes for Transonic Potential Flows J85-127
A New Stream Function Formulation for the Steady Euler Equations J85-112
Computation of Three-Dimensional Turbulent Shear Flows in Corners J85-110
Analysis of Turbulent Underexpanded Jets, Part II: Shock Noise Features Using SCIPVIS J85-108
A Finite Difference Method for Solving Unsteady Viscous Flow Problems J85-107
A Mapped, Factored-Implicit Scheme for the Computation of Duct and Far-Field Acoustics J85-100
Numerical Study of a Ramjet Dump Combuster Flowfield J85-096
Euler and Navier-Stokes Solutions for Supersonic Shear Flow past a Circular Cylinder J85-093
Unsteady Laminar Boundary-Layer Separation on Oscillating Configurations J85-092
Transonic Flow Calculations Using Triangular Finite Elements J85-091
Automatic Adaptive Grid Refinement for the Euler Equations J85-090
Alternating Direction Adaptive Grid Generation J85-089
A Field Panel/Finite Difference Method for Potential Unsteady Transonic Flow J85-087
Calculation of Two-Dimensional Turbulent Boundary Layers over Rigid and Moving Wavy Surfaces J85-086
Newton-Like Minimal Residual Methods Applied to Transonic Flow Calculations J85-084
Analysis of Turbulent Underexpanded Jets, Part I: Parabolized Navier-Stokes Model, SCIPVIS J85-083
Monotone Switches in Implicit Algorithms for Potential Equations Applied to Transonic Flows J85-081
Implicit Upwind Methods for the Compressible Navier-Stokes Equations J85-060
Vortex Simulation of a Turbulent Mixing Layer J85-059
Numerical Prediction of Turbulent Flow over Surface-Mounted Ribs J85-058
A Perspective of Theoretical and Applied Computational Fluid Dynamics J85-054
Application of a Two-Dimensional Grid Solver for Three-Dimensional Problems J85-053
A New Self-Adaptive Grid Method J85-051
Nonreflecting Boundary Conditions for the Complete Unsteady Transonic Small-Disturbance Equation J85-050
Swirling Flow in a Research Combustor J85-038
Computation of Choked and Supersonic Turbomachinery Flows by a Modified Potential Method J85-034

Shock-Fitting Solution of the Supersonic Flowfield in a Rounded Internal Corner J85-031
Numerical Analysis of Attached Turbulent Boundary Layers Along Strongly Curved Surfaces J85-029
Noniterative Cross-Flow Integration for the Pressure-Split Analysis of Subsonic Mixing-Layer Problems J85-022
Finite Difference Calculations of Unsteady Premixed Flame-Flow Interactions J85-014
Boundary Layers and Separation on a Spheroid at Incidence J85-008
Treatment of Supersonic Flows with Embedded Subsonic Regions J85-006
Implicit Methods of Second-Order Accuracy for the Euler Equations J85-005
Efficient Solution of the Euler and Navier-Stokes Equations with a Vectorized Multiple-Grid Algorithm J85-004
Approximate Factorization Schemes for Three-Dimensional Nonlinear Supersonic Potential Flow J85-003
Viscous/Inviscid Analysis of Curved Sub- or Supersonic Wall Jets J85-002
A Class of Bidiagonal Schemes for Solving the Euler Equations J84-315
Second-Order Accurate Boundary Conditions for Compressible Flows J84-261

Hydrodynamics

Laser-Induced Fluorescence Measurements of Mixed Fluid Concentration in a Liquid Plane Shear Layer J85-308
Diameter and Velocity Effects for Cross-Flow Boiling J85-286
Flow Structures Formed by Axisymmetric Spinning Bodies J85-254
Nonintegrability and Chaos in Unsteady Ideal Fluid Flow J85-227
A 'Flip' Experiment in a Chemically Reacting Turbulent Mixing Layer J85-211
Numerical Study of the Critical Layer in a Rotating Fluid J85-209
Experiments on the Generation of Internal Waves in a Stratified Fluid J85-111
Recirculation in Swirling Flow: A Manifestation of Vortex Breakdown J85-015

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Boundary-Layer Thickness and Base Pressure J85-372
The Effects of Highly Exothermic Chemical Reaction on a Two-Dimensional Mixing Layer J85-363
A New Approach to Flow Problems past a Porous Plate J85-360
A Linearized Theory for Swirling Supersonic Jets and Its Application to Shock-Cell Noise J85-358
Distributions Across the Plume of Transverse Liquid and Slurry Jets in Supersonic Airflow J85-357
Calculation of Three-Dimensional Shock/Turbulent Boundary-Layer Interaction Generated by Sharp Fin J85-356
Freestream Turbulence Effects on Wake Properties of a Flat Plate at an Incidence J85-353
Experimental Study of the Behavior of Plane Turbulent Jets at Low Reynolds Numbers J85-347
Freestream Turbulence Effects on Turbulent Boundary Layers in an Adverse Pressure Gradient J85-326
Structure of Nonevaporating Sprays, Part II: Drop and Turbulence Properties J85-311
Cylindrical Sound Wave Generated by Shock-Vortex Interaction J85-309
A Mathematically Simple Turbulence Closure Model for Attached and Separated Turbulent Boundary Layers J85-306
Experimental Study of the Interaction of Multiple Jets with a Cross Flow J85-305
Airfoil Dynamic Stall Performance with Large-Amplitude Motions J85-300
A Turbulent Transport Model for Free-Shear Flows J85-289
Structure of Nonevaporating Sprays, Part I: Initial Conditions and Mean Properties J85-276
The Subsonic Near-Wake of an Axisymmetric Semielliptical Afterbody J85-272
Theoretical and Experimental Study of Nonadiabatic Transonic Shock/Boundary-Layer Interaction J85-267
Experimental Results on Edge-Tone Oscillations in High-Speed Subsonic Jets J85-265
Flow Structures Formed by Axisymmetric Spinning Bodies J85-254
Effect of Initial Condition on Subsonic Jet Noise J85-243
Flow Structures of a Basic Annular Jet J85-210
Turbulence Measurements in Shock-Induced Flows J85-208
Analysis of Large Vortical Structures in Shear Layers J85-207
Instantaneous Velocity Measurements in a Vane-Excited Plane Jet J85-206
On the Vortex Stretching Modification of the k-ϵ Turbulence Model: Radial Jets J85-197
Structure of Ducted Particle-Laden Turbulent Jets J85-194
Stability of the Thin-Jet Model of the Unsteady Jet Flap J85-192
Simultaneous Measurements of Velocity and Density in a Turbulent Nonpremixed Flame J85-185
Conical Similarity of Shock/Boundary-Layer Interactions Generated by Swept and Unswept Fins J85-179
Time-Dependent Solution of Three-Dimensional Compressible Turbulent Integral Boundary-Layer Equations J85-177
The Nonequilibrium Region of a Mixing Layer J85-174
Interception of Two Equal Turbulent Jets J85-173
Prediction of Secondary Vortex Flowfields Generated by an Interacting Multiple Free-Jet Configuration J85-172
Mean Velocity and Static Pressure Distributions in a Three-Dimensional Turbulent Free Jet J85-163
Upstream Influence in Conically Symmetric Flow J85-161
The Discrete Vortices from a Delta Wing J85-158
The Position of Laminar Separation Lines on Smooth Inclined Bodies J85-156
Navier-Stokes Calculations for Unsteady Three-Dimensional Vortical Flows in Unbounded Domains J85-142
A Generalized Discrete-Vortex Method for Sharp-Edged Cylinders J85-140
Controlled Suppression or Amplification of Turbulent Jet Noise J85-136
Experimental Investigation of a Simulated Compressor Airfoil Trailing-Edge Flowfield J85-121
The High Reynolds Number Finite Flat-Plate Cascade J85-119
Noise-Related Shear-Layer Dynamics in Annular Jets J85-114
Experiments on the Generation of Internal Waves in a Stratified Fluid J85-111
Noise Reduction Mechanisms in Supersonic Jets with Porous Centerbodies J85-109
Numerical Simulation of Cold Flow in an Axisymmetric Centerbody Combustor J85-104
Flow from Sharp-Edged Rectangular Orifices -- The Effect of Corner Rounding J85-101
Analysis of Turbulent Underexpanded Jets, Part I: Parabolized Navier-Stokes Model, SCIPVIS J85-083
Measurements of a Zero-Pressure-Gradient Boundary Layer Blown by an Asymmetric Jet J85-080
Viscid/Inviscid Interaction Analysis of Separated Trailing-Edge Flows J85-079
A Lower Bound for Three-Dimensional Turbulent Separation in Supersonic Flow J85-075
Vorticity Growth and Decay in the Jet in Cross Flow J85-074
Breakup and Droplet Formation of Slurry Jets J85-068
Structure of Particle-Laden Jets: Measurements and Predictions J85-063
Base Pressure of a Projectile Within the Transonic Flight Regime J85-062
Vortex Simulation of a Turbulent Mixing Layer J85-059
Near-Field Pressure Fluctuations of an Elliptic Jet J85-057
Development of Confined Stokes-Flow Wakes J85-056
Features of a Reattaching Turbulent Shear Layer in Divergent Channel Flow J85-027
The Universal Nature of Zero-Crossing Time and Velocity Scales in Turbulent Shear Flows J85-026
Noniterative Cross-Flow Integration for the Pressure-Split Analysis of Subsonic Mixing-Layer Problems J85-022
Asymmetrical Wake Generated by a Spinning Cylinder J85-007
Viscous/Inviscid Analysis of Curved Sub- or Supersonic Wall Jets J85-002
Separation Model for Two-Dimensional Airfoils in Transonic Flow J84-232
The Two-Dimensional Laminar Wake with Initial Asymmetry J83-249

Multiphase Flows

Distributions Across the Plume of Transverse Liquid and Slurry Jets in Supersonic Airflow J85-357
Dispersed Shock Waves in a Gas-Particle Mixture J85-327
Structure of Nonevaporating Sprays, Part II: Drop and Turbulence Properties J85-311
A Prediction of Particle Behavior via the Basset-Boussinesq-Oseen Equation J85-288
Diameter and Velocity Effects for Cross-Flow Boiling J85-286
Structure of Nonevaporating Sprays, Part I: Initial Conditions and Mean Properties J85-276
The Shock Wave Ignition of Dusts J85-244
Structure of Ducted Particle-Laden Turbulent Jets J85-194
Transonic Small-Disturbance Theory for Dusty Gases J85-157

Transverse Jet Breakup and Atomization with Rapid Vaporization Along the Trajectory J85-095
Breakup and Droplet Formation of Slurry Jets J85-068
Structure of Particle-Laden Jets: Measurements and Predictions J85-063
Computational and Experimental Study of the Effect of Mass Transfer on Liquid-Jet Breakup J85-040

Nonsteady Aerodynamics

Fluid Dynamics in Closed-Cycle Pulsed Lasers J85-361
Discrete Tones Generated by an Impinging Underexpanded Rectangular Jet J85-359
Multiple Ducted Streams with a Periodic or a Steady Supersonic Driver Flow J85-350
A Noniterative Finite Difference Method for the Compressible Unsteady Laminar Boundary Layer J85-332
Second-Order-Accurate Spatial Differencing for the Transonic Small-Disturbance Equation J85-307
The Pitching Delta Wing J85-301
Airfoil Dynamic Stall Performance with Large-Amplitude Motions J85-300
Flow Instabilities in Transonic Small-Disturbance Theory J85-269
Enhancement in Laser-Induced Impulse Imparted to a Surface in Supersonic Flow J85-255
Nonintegrability and Chaos in Unsteady Ideal Fluid Flow J85-227
Instantaneous Velocity Measurements in a Vane-Excited Plane Jet J85-206
An Experimental Investigation of an Airfoil Undergoing Large-Amplitude Pitching Motions J85-203
Stability of the Thin-Jet Model of the Unsteady Jet Flap J85-192
The Discrete Vortices from a Delta Wing J85-158
Navier-Stokes Calculations for Unsteady Three-Dimensional Vortical Flows in Unbounded Domains J85-142
A Generalized Discrete-Vortex Method for Sharp-Edged Cylinders J85-140
A Finite Difference Method for Solving Unsteady Viscous Flow Problems J85-107
Unsteady Flow About a Joukowski Airfoil in the Presence of Moving Vortices J85-106
Numerical Simulation of Cold Flow in an Axisymmetric Centerbody Combustor J85-104
Unsteady Laminar Boundary-Layer Separation on Oscillating Configurations J85-092
Alternating Direction Adaptive Grid Generation J85-089
A Field Panel/Finite Difference Method for Potential Unsteady Transonic Flow J85-087
Monotone Switches in Implicit Algorithms for Potential Equations Applied to Transonic Flows J85-081
Nonreflecting Boundary Conditions for the Complete Unsteady Transonic Small-Disturbance Equation J85-050
Semisimilar Solutions of the Unsteady Compressible Laminar Boundary-Layer Equations J85-036
Evaluation of Simple Subgrid-Scale Models for the Numerical Simulation of Homogeneous Turbulence J85-035
Modes of Shock-Wave Oscillations on Spike-Tipped Bodies J85-030
Doublet-Point Method for Supersonic Unsteady Lifting Surfaces J84-034

Nozzle and Channel Flow

Block-Implicit Calculations of Three-Dimensional Laminar Flow in Strongly Curved Ducts J85-373
Multiple Ducted Streams with a Periodic or a Steady Supersonic Driver Flow J85-350
Application of Time-Iterative Schemes to Incompressible Flow J85-273
Calculation of Three-Dimensional Flowfields by the Unsteady Method of Characteristics J85-270
Instantaneous Velocity Measurements in a Vane-Excited Plane Jet J85-206
Transonic Flow in the Throat Region of Radial or Nearly Radial Supersonic Nozzles J85-196
Structure of Ducted Particle-Laden Turbulent Jets J85-194
Interaction of Rarefaction Waves with Area Enlargements in Ducts J85-178
Experimental and Theoretical Study of a Direct-Current Arc in an Orifice Nozzle Flow J85-175
Effect of Ambient Pressure on Nozzle Centerline Flow Properties J85-154
Theoretical Gain Optimization Studies in 16-μm CO_2-N_2-H_2 Gasdynamic Lasers J85-144
The Effect of Strong Heat Addition on the Covergence of Implicit Schemes J85-139
Wave-Generated Disturbance Downstream of a Nozzle Array J85-118
Measurements of a Zero-Pressure-Gradient Boundary Layer Blown by an Asymmetric Jet J85-080
Near-Field Pressure Fluctuations of an Elliptic Jet J85-057
Analysis of Steady, Two-Dimensional, Chemically Reacting, Nonequilibrium, Inviscid Flow in Nozzles J85-055
Efficient Solution of the Euler and Navier-Stokes Equations with a Vectorized Multiple-Grid Algorithm J85-004
The Response of Normal Shocks in Diffusers J83-256

Plasmadynamics and MHD

A Re-examination of the Laser-Supported Combustion Wave J85-216
Laser Determination of Anisotropic Plasma Electron Density Profiles J85-195
Experimental and Theoretical Study of a Direct-Current Arc in an Orifice Nozzle Flow J85-175
Experimental Investigation of the Physical Processes Applicable to a Magnetohydrodynamic Laser J85-116
Technology of Closed-Drift Thrusters J85-011
Laminar Stagnation-Point Heat Transfer for a Two-Temperature Argon Plasma J84-234

Radiatively Coupled Flows and Heat Transfer

Radiative Effect on the Conjugated Forced Convection-Conduction Analysis of Heat Transfer in a Plate Fin J85-297
Pulsed DF Laser/Metal Interaction in Direct Absorption Regime J85-256
A Two-Dimensional Analysis of Laser Heat Addition in a Constant Absorptivity Gas J85-183

Rarefied Flows

Effect of Ambient Pressure on Nozzle Centerline Flow Properties J85-154
Knudsen Layer Characteristics for a Highly Cooled Blunt Body in Hypersonic Rarefied Flow J85-135

Reactive Flows

Flame Structures in the Near Wake of Circular Cylinders J85-354
Transient Catalytic Ignition on a Flat Plate with External Energy Flux J85-310
Reynolds Number Effects on Mixing and Combustion in a Reacting Shear Layer J85-250
Modeling End-Gas Knock in a Rapid-Compression Machine J85-218
A 'Flip' Experiment in a Chemically Reacting Turbulent Mixing Layer J85-211
Pressure-Geometry Scaling for Chemical Laser Performance J85-199
Simultaneous Measurements of Velocity and Density in a Turbulent Nonpremixed Flame J85-185
An Atomic Hydrogen Propulsion System J85-171
Mixed Convective Burning of a Horizontal Flat Plate J85-097
Numerical Study of a Ramjet Dump Combuster Flowfield J85-096
Nonadiabatic Propagation of a Planar Premixed Flame: Constant-Volume Enclosure J85-067
Analysis of Steady, Two-Dimensional, Chemically Reacting, Nonequilibrium, Inviscid Flow in Nozzles J85-055
Finite Difference Calculations of Unsteady Premixed Flame-Flow Interactions J85-014

Shock Waves and Detonations

The Inverse Mach Reflection J85-351
The Decay of the Shock Wave from a Supersonic Projectile J85-331
Dispersed Shock Waves in a Gas-Particle Mixture J85-327
Cylindrical Sound Wave Generated by Shock-Vortex Interaction J85-309
The Mach Reflection Phenomenon: A Suggestion for an International Nomenclature J85-299
Multiple Transonic Shock-Wave/Turbulent Boundary-Layer Interaction in a Circular Duct J85-271
Enhancement in Laser-Induced Impulse Imparted to a Surface in Supersonic Flow J85-255
Turbulence Measurements in Shock-Induced Flows J85-208
Interaction of Rarefaction Waves with Area Enlargements in Ducts J85-178
Wave-Generated Disturbance Downstream of a Nozzle Array J85-118
Transonic Shock-Wave/Turbulent Boundary-Layer Interactions in a Circular Duct J85-113
Mach Reflection Flowfields Associated with Strong Shocks J85-085
Spectral Methods for the Euler Equations: Part II - Chebyshev Methods and Shock Fitting J85-037
Modes of Shock-Wave Oscillations on Spike-Tipped Bodies J85-030
Spectral Methods for the Euler Equations: Part I-Fourier Methods and Shock Capturing J85-009

Subsonic Flow

Block-Implicit Calculations of Three-Dimensional Laminar Flow in Strongly Curved Ducts J85-373

Numerical Outflow Boundary Condition for Navier-Stokes Flow Calculations by a Line Iterative Method J85-348
Extension of the Blasius Force Theorem to Subsonic Speeds J85-324
A Turbulent Transport Model for Free-Shear Flows J85-289
Application of Time-Iterative Schemes to Incompressible Flow J85-273
The Subsonic Near-Wake of an Axisymmetric Semielliptical Afterbody J85-272
Experimental Results on Edge-Tone Oscillations in High-Speed Subsonic Jets J85-265
Reynolds Number Effects on Mixing and Combustion in a Reacting Shear Layer J85-250
Modeling of Turbulent Flowfields Through a Cascade of Airfoils at Stall Conditions J85-249
A Color Video Display Technique for Flowfield Surveys J85-245
Effect of Initial Condition on Subsonic Jet Noise J85-243
Computations of Turbulent Flow Beyond Backward-Facing Steps Using Reynolds-Stress Closure J85-241
Implicit Lambda Methods for Three-Dimensional Compressible Flow J85-239
Turbulent Boundary Layer Perturbed by a Screen J85-238
Turbulent Static Pressure Fluctuations Away from Flow Boundaries J85-236
Embedded Cavity Drag in Steady Laminar Flow J85-180
The Nonequilibrium Region of a Mixing Layer J85-174
The Reduction of Pressure Drop Across a Vortex Chamber J85-165
Calcualation of Nonlinear Subsonic Characteristics of Wings with Thickness and Camber at High Incidence J85-134
Viscid/Inviscid Interaction Analysis of Separated Trailing-Edge Flows J85-079
Predicting Rime Ice Accretion on Airfoils J85-061
Swirling Flow in a Research Combustor J85-038
Noniterative Cross-Flow Integration for the Pressure-Split Analysis of Subsonic Mixing-Layer Problems J85-022
The Circular Cylinder in Subsonic and Transonic Flow J84-339

Supersonic and Hypersonic Flow

A Linearized Theory for Swirling Supersonic Jets and Its Application to Shock-Cell Noise J85-358
Calculation of Three-Dimensional Shock/Turbulent Boundary-Layer Interaction Generated by Sharp Fin J85-356
The Inverse Mach Reflection J85-351
Multiple Ducted Streams with a Periodic or a Steady Supersonic Driver Flow J85-350
A Computational Study of Complex Three-Dimensional Compressible Turbulent Flowfields J85-264
Three-Dimensional Effects in Shock Detachment from a Wedge J85-193
Conical Similarity of Shock/Boundary-Layer Interactions Generated by Swept and Unswept Fins J85-179
Prediction of Secondary Vortex Flowfields Generated by an Interacting Multiple Free-Jet Configuration J85-172
Experimental and Numerical Investigation of a Shock Wave Impingement on a Cylinder J85-138
Knudsen Layer Characteristics for a Highly Cooled Blunt Body in Hypersonic Rarefied Flow J85-135
Refinement of an 'Alternate' Method for Measuring Heating Rates in Hypersonic Wind Tunnels J85-128
Viscous Shock-Layer Flowfield Analysis by an Explicit-Implicit Method J85-115
Noise Reduction Mechanisms in Supersonic Jets with Porous Centerbodies J85-109
Analysis of Turbulent Underexpanded Jets, Part II: Shock Noise Features Using SCIPVIS J85-108
Analysis of Aerothermal Loads on Spherical Dome Protuberances J85-105
Euler and Navier-Stokes Solutions for Supersonic Shear Flow past a Circular Cylinder J85-093
Mach Reflection Flowfields Associated with Strong Shocks J85-085
A Lower Bound for Three-Dimensional Turbulent Separation in Supersonic Flow J85-075
Leading-Edge Separations and Cross-Flow Shocks on Delta Wings J85-052
Shock-Fitting Solution of the Supersonic Flowfield in a Rounded Internal Corner J85-031
Modes of Shock-Wave Oscillations on Spike-Tipped Bodies J85-030
Treatment of Supersonic Flows with Embedded Subsonic Regions J85-006
Approximate Factorization Schemes for Three-Dimensional Nonlinear Supersonic Potential Flow J85-003
Conical Flow near External Axial Corners as a Bifurcation Problem J85-001
The Two-Dimensional Laminar Wake with Initial Asymmetry J83-249

Transonic Flow

Three-Dimensional Solutions to the Euler Equations with One Million Grid Points J85-371
A Transonic Wing-Body Flowfield Calculation with Improved Grid Topology J85-355
A Theoretical Basis for Extending Surface-Paneling Methods to Transonic Flow J85-352
Second-Order-Accurate Spatial Differencing for the Transonic Small-Disturbance Equation J85-307
A Mathematically Simple Turbulence Closure Model for Attached and Separated Turbulent Boundary Layers J85-306
Multiple Transonic Shock-Wave/Turbulent Boundary-Layer Interaction in a Circular Duct J85-271
Flow Instabilities in Transonic Small-Disturbance Theory J85-269
A Three-Dimensional, Block-Structured Finite Element Grid Generation Scheme J85-268
Theoretical and Experimental Study of Nonadiabatic Transonic Shock/Boundary-Layer Interaction J85-267
Navier-Stokes Computations of Projectile Base Flow with and without Mass Injection J85-240
Implicit Lambda Methods for Three-Dimensional Compressible Flow J85-239
Transonic Panel Method for the Full Potential Equation Applied to Multicomponent Airfoils J85-237
Comparison of Supercritical Airfoil Flow Calculations with Wind Tunnel Results J85-234
Computation of the Tip Vortex Off a Low-Aspect-Ratio Wing J85-204
Simplified Implicit Block-Bidiagonal Finite Difference Method for Solving the Navier-Stokes Equations J85-198
Transonic Flow in the Throat Region of Radial or Nearly Radial Supersonic Nozzles J85-196
Computations of Projectile Magnus Effect at Transonic Velocities J85-176
Perturbations of a Transonic Flow with Vanishing Shock Waves J85-160
Transonic Small-Disturbance Theory for Dusty Gases J85-157
Comparison of Inviscid and Viscous Computations with an Interferometrically Measured Transonic Flow J85-137
Some Iterative Schemes for Transonic Potential Flows J85-127
Transonic Shock-Wave/Turbulent Boundary-Layer Interactions in a Circular Duct J85-113
A New Stream Function Formulation for the Steady Euler Equations J85-112
Transonic Flow Calculations Using Triangular Finite Elements J85-091
Automatic Adaptive Grid Refinement for the Euler Equations J85-090
Alternating Direction Adaptive Grid Generation J85-089
Relative Effects of Reynolds Number and Freestream Turbulence in Transonic Flow J85-088
A Field Panel/Finite Difference Method for Potential Unsteady Transonic Flow J85-087
Newton-Like Minimal Residual Methods Applied to Transonic Flow Calculations J85-084
Monotone Switches in Implicit Algorithms for Potential Equations Applied to Transonic Flows J85-081
Base Pressure of a Projectile Within the Transonic Flight Regime J85-062
Implicit Upwind Methods for the Compressible Navier-Stokes Equations J85-060
Nonreflecting Boundary Conditions for the Complete Unsteady Transonic Small-Disturbance Equation J85-050
Shock-Free Turbomachinery Blade Design J85-039
Computation of Choked and Supersonic Turbomachinery Flows by a Modified Potential Method J85-034
Treatment of Supersonic Flows with Embedded Subsonic Regions J85-006
Implicit Methods of Second-Order Accuracy for the Euler Equations J85-005
Efficient Solution of the Euler and Navier-Stokes Equations with a Vectorized Multiple-Grid Algorithm J85-004
Conical Flow near External Axial Corners as a Bifurcation Problem J85-001
The Circular Cylinder in Subsonic and Transonic Flow J84-339
A Class of Bidiagonal Schemes for Solving the Euler Equations J84-315
Separation Model for Two-Dimensional Airfoils in Transonic Flow J84-232

Viscous Nonboundary-Layer Flows

A Prediction of Particle Behavior via the Basset-Boussinesq-Oseen Equation J85-288
Turbulence Measurements in Shock-Induced Flows J85-208
An Experimental Investigation of an Airfoil Undergoing Large-Amplitude Pitching Motions J85-203

The Reduction of Pressure Drop Across a Vortex Chamber J85-165
Comparison of Inviscid and Viscous Computations with an Interferometrically Measured Transonic Flow J85-137
Viscous Shock-Layer Flowfield Analysis by an Explicit-Implicit Method J85-115
A Finite Difference Method for Solving Unsteady Viscous Flow Problems J85-107
Euler and Navier-Stokes Solutions for Supersonic Shear Flow past a Circular Cylinder J85-093
Numerical Prediction of Turbulent Flow over Surface-Mounted Ribs J85-058
Development of Confined Stokes-Flow Wakes J85-056
Features of a Reattaching Turbulent Shear Layer in Divergent Channel Flow J85-027
The Universal Nature of Zero-Crossing Time and Velocity Scales in Turbulent Shear Flows J85-026
Boundary-Layer Blowing J85-024
Mathematical Characteristics of Flows with Nonlinear and Nonequilibrium Transport J85-021

Wave Motion and Sloshing

Numerical Study of the Critical Layer in a Rotating Fluid J85-209

Interdisciplinary Topics

Analytical and Numerical Methods

Dynamic Condensation for Structural Redesign J85-334
Structural Optimization by Multilevel Decomposition J85-319
Efficient Repetitive Solution of Linear Equations with Varying Coefficients J85-294
An Approximation of the Lowest Eigenfrequencies and Buckling Loads of Cylindrical and Conical Shell Panels Under Initial Stress J85-292
A Prediction of Particle Behavior via the Basset-Boussinesq-Oseen Equation J85-288
Nonlinear Structural Dynamic Analysis Using a Modified Modal Method J85-283
Equivalent Continuum Representation of Structures Composed of Repeated Elements J85-278
An Efficient Method for Dynamic Response Optimization J85-258
An Efficient Simplified Approach for the Nonlinear Buckling Analysis of Frames J85-222
Identification of Linear Systems by Poisson Moment Functionals in the Presence of Noise J85-219
Numerical Evaluation of Line Integrals with a Logarithmic Singularity J85-200
A Finite Element Method for Nonlinear Forced Vibrations of Rectangular Plates J85-190
Use of Shear Lag for Composite Microstress Analysis--Rectangular Array J85-150
Predicting Rime Ice Accretion on Airfoils J85-061
Application of a Two-Dimensional Grid Solver for Three-Dimensional Problems J85-053
A Mindlin Shell Element That Satisfies Rigid-Body Requirements J85-045
Derivation and Significance of Second-Order Modal Design Sensitivities J84-144

Atmospheric and Space Sciences

Reaction of Atomic Oxygen with Polymide Films J85-287
Infrared Limb-Darkening Effects for the Earth-Atmosphere System J85-064
Predicting Rime Ice Accretion on Airfoils J85-061
Airborne Measurements of Space Shuttle Exhaust Constituents J85-044

Computer Software

Three-Dimensional Solutions to the Euler Equations with One Million Grid Points J85-371
Efficient Calculation of Optimum Design Sensitivity J85-322
A Perspective of Theoretical and Applied Computational Fluid Dynamics J85-054

Lasers and Laser Applications

Measurements of Fluctuating Temperatures in a Supersonic Turbulent Flow Using Laser-Induced Fluorescence J85-362
Fluid Dynamics in Closed-Cycle Pulsed Lasers J85-361
Laser-Induced Fluorescence Measurements of Mixed Fluid Concentration in a Liquid Plane Shear Layer J85-308
Aero-optical Foundations and Applications J85-274
Pulsed DF Laser/Metal Interaction in Direct Absorption Regime J85-256
Enhancement in Laser-Induced Impulse Imparted to a Surface in Supersonic Flow J85-255
Saturation Effects in a Continuous-Wave HF Chemical Laser J85-247
A Correction Lens for Laser Doppler Velocimeter Measurements in a Cylindrical Tube J85-246
A Re-examination of the Laser-Supported Combustion Wave J85-216
CO/d2-Laser-Metal Coupling in Vacuum J85-213
Pressure-Geometry Scaling for Chemical Laser Performance J85-199
Velocity Biasing of Two-Componenet LDV Data in Low-Turbulence Flows J85-164
Theoretical Gain Optimization Studies in 16-μm CO_2-N_2-H_2 Gasdynamic Lasers J85-144
Wave-Generated Disturbance Downstream of a Nozzle Array J85-118
Multiline Model for the e-Beam Pumped XeF(B-X) Laser J85-117
Experimental Investigation of the Physical Processes Applicable to a Magnetohydrodynamic Laser J85-116

Numerical Analysis

Vortex-Fitted Potential and Vortex-Captured Euler Solution for Leading-Edge Vortex Flow J85-370
Damping Synthesis Using Complex Substructure Modes and a Hermitian System Representation J85-365
Numerical Outflow Boundary Condition for Navier-Stokes Flow Calculations by a Line Iterative Method J85-348
Conservation Form of the Equations of Fluid Dynamics in General Nonsteady Coordinates J85-328
Efficient Calculation of Optimum Design Sensitivity J85-322
Efficient Repetitive Solution of Linear Equations with Varying Coefficients J85-294
Statistical Processing of Multiplexed Data from Turbulent Flames J85-229
Bearing/Contact for Anisotropic Materials J85-225
Numerical Evaluation of Line Integrals with a Logarithmic Singularity J85-200
Some Iterative Schemes for Transonic Potential Flows J85-127
Newton-Like Minimal Residual Methods Applied to Transonic Flow Calculations J85-084
Numerical Prediction of Turbulent Flow over Surface-Mounted Ribs J85-058
A Mindlin Shell Element That Satisfies Rigid-Body Requirements J85-045
Evaluation of Simple Subgrid-Scale Models for the Numerical Simulation of Homogeneous Turbulence J85-035
Boundary-Layer Blowing J85-024
Dynamic Condensation J84-145
Derivation and Significance of Second-Order Modal Design Sensitivities J84-144

Research Facilities and Instrumentation

A Correction Lens for Laser Doppler Velocimeter Measurements in a Cylindrical Tube J85-246
A Color Video Display Technique for Flowfield Surveys J85-245
Statistical Processing of Multiplexed Data from Turbulent Flames J85-229
Wind Tunnel Wall Corrections Deduced by Iterating from Measured Wall Static Pressure J83-310

Sensor Systems

Infrared Limb-Darkening Effects for the Earth-Atmosphere System J85-064

System Identification

Damping Synthesis Using Complex Substructure Modes and a Hermitian System Representation J85-365
Identification of Linear Systems by Poisson Moment Functionals in the Presence of Noise J85-219
A Generalized Multiple-Input, Multiple-Output Modal Parameter Estimation Algorithm J85-151

Launch Vehicle and Missile (LV/M) Technology

Aerodynamic Heating and Ablation

Stagnation Point Flows with Freestream Turbulence--The Matching Condition J85-330

Aerodynamics

Numerical Study of the Critical Layer in a Rotating Fluid J85-209
High Angle-of-Attack Calculations of the Subsonic Vortex Flow on Slender Bodies J85-205
Computations of Projectile Magnus Effect at Transonic Velocities J85-176
The Position of Laminar Separation Lines on Smooth Inclined Bodies J85-156
The Lateral Surface Drag Coefficient of Cylindrical Spacecraft in a Rarefied Finite Temperature Atmosphere J85-141

Propulsion and Propellant Systems

Stability Analysis of a Class of Diffusion Flames J85-012

Structural Design (including Loads)

Compatiblity Conditions from Deformation Displacement Relationship J85-230
Flutter Analysis of Thin Cracked Panels Using the Finite Element Method J85-125
Structural Optimization of Laminated Conical Shells J85-123

Vibration

An Approximation of the Lowest Eigenfrequencies and Buckling Loads of Cylindrical and Conical Shell Panels Under Initial Stress J85-292

Marine Technology

Hydrodynamics, Vessel and Control Surface

Vorticity Growth and Decay in the Jet in Cross Flow J85-074

Propulsion

Experiments on the Generation of Internal Waves in a Stratified Fluid J85-111

Propulsion

Airbreathing Propulsion

Distributions Across the Plume of Transverse Liquid and Slurry Jets in Supersonic Airflow J85-357
Freestream Turbulence Effects on Wake Properties of a Flat Plate at an Incidence J85-353
Inviscid and Viscous Flows in Cascades with an Explicit Multiple-Grid Algorithm J85-277
Calculation of Three-Dimensional Flowfields by the Unsteady Method of Characteristics J85-270
Modeling of Turbulent Flowfields Through a Cascade of Airfoils at Stall Conditions J85-249
Combustion of Boron Powders Through Bunsen Flame J85-214
Numerical Solution of Two- and Three-Dimensional Rotor Tip Leakage Models J85-184
Experimental Investigation of a Simulated Compressor Airfoil Trailing-Edge Flowfield J85-121
Transverse Jet Breakup and Atomization with Rapid Vaporization Along the Trajectory J85-095
Breakup and Droplet Formation of Slurry Jets J85-068
Analysis of Steady, Two-Dimensional, Chemically Reacting, Nonequilibrium, Inviscid Flow in Nozzles J85-055
Computational and Experimental Study of the Effect of Mass Transfer on Liquid-Jet Breakup J85-040
Shock-Free Turbomachinery Blade Design J85-039
Swirling Flow in a Research Combustor J85-038
The Response of Normal Shocks in Diffusers J83-256

Combustion and Combustor Designs

Unsteady Transport Effects on Diffusion Flame Stability J85-374
The Effects of Highly Exothermic Chemical Reaction on a Two-Dimensional Mixing Layer J85-363
Mechanisms and Models of Solid-Propellant Burn Rate Temperature Sensitivity: A Review J85-275
Reynolds Number Effects on Mixing and Combustion in a Reacting Shear Layer J85-250
Effect of Reactive Intermediates on the Propagation of Turbulent Premixed Flames J85-215
Combustion of Boron Powders Through Bunsen Flame J85-214
Numerical Simulation of Cold Flow in an Axisymmetric Centerbody Combustor J85-104
Mixed Convective Burning of a Horizontal Flat Plate J85-097
Numerical Study of a Ramjet Dump Combuster Flowfield J85-096
Computational and Experimental Study of the Effect of Mass Transfer on Liquid-Jet Breakup J85-040
Recirculation in Swirling Flow: A Manifestation of Vortex Breakdown J85-015
Velocity Field Characteristics of a Swirling Flow Combuster J85-013

Combustion Stability, Ignition, and Detonation

Unsteady Transport Effects on Diffusion Flame Stability J85-374
The Effects of Highly Exothermic Chemical Reaction on a Two-Dimensional Mixing Layer J85-363
Effects of Electric Fields on the Blowoff Limits of a Methane-Air Flame J85-257
Modeling End-Gas Knock in a Rapid-Compression Machine J85-218
Combustion of Boron Powders Through Bunsen Flame J85-214
Boundary Condition for Rocket Motor Stability J85-186
Transient Ignition of a Combustible by a Hot Body J85-145
Effects of AP Particle Size on Combustion Response to Cross Flow J85-122
Combustion Response to Compositional Fluctuations J85-120
Nonadiabatic Propagation of a Planar Premixed Flame: Constant-Volume Enclosure J85-067
Development of a Floating Element for the Measurement of Surface Shear Stress J85-065
Finite Difference Calculations of Unsteady Premixed Flame-Flow Interactions J85-014
Stability Analysis of a Class of Diffusion Flames J85-012

Electric and Advanced Space Propulsion

Simple Performance Model for Ring and Line Cusp Ion Thrusters J85-312
A Re-examination of the Laser-Supported Combustion Wave J85-216
A Two-Dimensional Analysis of Laser Heat Addition in a Constant Absorptivity Gas J85-183
An Atomic Hydrogen Propulsion System J85-171
The Effect of Strong Heat Addition on the Covergence of Implicit Schemes J85-139
Technology of Closed-Drift Thrusters J85-011

Engine Performance

Effect of Ambient Pressure on Nozzle Centerline Flow Properties J85-154

Environmental Effects

Resin Selection Criteria for 'Tough' Composite Structures J85-147
Airborne Measurements of Space Shuttle Exhaust Constituents J85-044

Fuels and Propellants, Properties of

Mechanisms and Models of Solid-Propellant Burn Rate Temperature Sensitivity: A Review J85-275
Effects of AP Particle Size on Combustion Response to Cross Flow J85-122
Combustion Response to Compositional Fluctuations J85-120
Model and Chemistry of HMX Combustion J85-043
The Effect of Liquid Phase Decomposition on the Fuel Droplet Distribution Function J85-042

Solid and Hybrid Rocket Engines

Mechanisms and Models of Solid-Propellant Burn Rate Temperature Sensitivity: A Review J85-275
Effects of AP Particle Size on Combustion Response to Cross Flow J85-122
Combustion Response to Compositional Fluctuations J85-120
Ejecta Pulsing of Subscale Solid Propellant Rocket Motors J85-066

Spacecraft Technology

Configurational and Structural Design (including Loads)

Equivalent Continuum Representation of Structures Composed of Repeated Elements J85-278
An Analytical Investigation of Shape Control of Large Space Structures by Applied Temperatures J85-071
Optimum Placement of Controls for Static Deformations of Space Structures J84-272

Dynamics and Control

Thermoelastic and Electromagnetic Damping Analysis J85-320
Frequency Control and Its Effect on the Dynamic Response of Flexible Structures J85-318
Stiffness Matrix Adjustment Using Mode Data J85-252
Enhanced Vibration Controllability by Minor Structural Modifications J85-223
A Generalized Multiple-Input, Multiple-Output Modal Parameter Estimation Algorithm J85-151
An Analytical Investigation of Shape Control of Large Space Structures by Applied Temperatures J85-071
Experimental Measurements of Material Damping in Free Fall with Tunable Excitation J85-017
Optimum Placement of Controls for Static Deformations of Space Structures J84-272

Earth-Orbital Trajectories

The Lateral Surface Drag Coefficient of Cylindrical Spacecraft in a Rarefied Finite Temperature Atmosphere J85-141

Entry Vehicle Aerodynamic Heating

Viscous Shock-Layer Flowfield Analysis by an Explicit-Implicit Method J85-115
Analysis of Aerothermal Loads on Spherical Dome Protuberances J85-105

Simulation

Reaction of Atomic Oxygen with Vitreous Carbon: Laboratory and STS-5 Data Comparisons J85-166

Structural Mechanics and Materials

Aeroelasticity and Hydroelasticity

Numerical Simulations of Compliant Material Response to Turbulent Flow J85-182
Generic Approach to Determine Optimum Aeroelastic Characteristics for Composite Forward-Swept-Wing Aircraft J84-017

Materials, Properties of

Use of Shear Lag for Composite Microstress Analysis--Linear Array J85-315
Strength Criteria for Anisotropic Brittle Materials J85-282
Nonlinear Stress-Strain Behavior of Graphite/Epoxy Laminates J85-281
Fractional Calculus in the Transient Analysis of Viscoelastically Damped Structures J85-149
Experimental Measurements of Material Damping in Free Fall with Tunable Excitation J85-017

Structural Composite Materials

Low-Velocity Impact Response of Laminated Beams Subjected to Initial Stresses J85-367
The Fundamental Constants of Orthotropic Affine Slab/Plate Equations J85-366
Buckling of Glass-Reinforced Plastic Cylindrical Shells Under Combined Axial Compression and External Pressure J85-364
Dynamic Response of Othotropic, Homogeneous, and Laminated Cylindrical Shells J85-336
Strength Prediction of a Mechanically Fastened Joint in Laminated Composites J85-335
The Role of Ply Buckling in the Compressive Failure of Graphite/Epoxy Tubes J85-321
Discrete Analysis of Stiffened Composite Cylindrical Shells J85-316
Use of Shear Lag for Composite Microstress Analysis--Linear Array J85-315
Effect of Stitching on the Strength of Bonded Composite Single Lap Joints J85-314
Optimization of Superplastically Formed Sandwich Cores J85-296
Nonlinear Stress-Strain Behavior of Graphite/Epoxy Laminates J85-281
Damage Development in Bolt Bearing of Composite Laminates J85-279
Effect of Delamination of Axially Loaded Homogenous Laminated Plates J85-253
Nonlinear Mechanics of Two-Dimensional Carbon-Carbon Composite Structures and Materials J85-226
Bearing/Contact for Anisotropic Materials J85-225
Postbuckling of Long Orthotropic Plates Under Combined Loading J85-224
Postbuckling Behavior of Selected Flat Stiffened Graphite-Epoxy Panels Loaded in Compression J85-220
A Theory for Stress Analysis of Composite Laminates J85-191
Optimal Laminate Configurations of Cylindrical Shells for Axial Buckling J85-188
Stability of Imperfect Laminate Cylinders: A Comparison Between Theory and Experiment J85-187
Hybrid Analytical Technique for Nonlinear Analysis of Structures J85-152
Use of Shear Lag for Composite Microstress Analysis--Rectangular Array J85-150
Low Cycle Fatigue Behavior of Aluminum/Stainless Steel Composites J85-148
Resin Selection Criteria for 'Tough' Composite Structures J85-147
Stress Intensity Factor Calculation for Designing with Fiber-Reinforced Composite Materials J85-146
Postbuckling of Long Orthotropic Plates in Combined Shear and Compression J85-124
Structural Optimization of Laminated Conical Shells J85-123
Prediction of Low-Velocity Impact Damage in Thin Circular Laminates J85-070
Nonlinear Analysis of Laminated Shells Including Transverse Shear Strains J85-069
Vibrations of Circular Orthotropic Plates in Affine Space J85-046

Structural Design

Strength Prediction of a Mechanically Fastened Joint in Laminated Composites J85-335
Dynamic Condensation for Structural Redesign J85-334
Shape Optimization of Three-Dimensional Folded-Plate Structures J85-323
Efficient Calculation of Optimum Design Sensitivity J85-322
Structural Optimization by Multilevel Decomposition J85-319
Frequency Control and Its Effect on the Dynamic Response of Flexible Structures J85-318
Effect of Stitching on the Strength of Bonded Composite Single Lap Joints J85-314
Natural Modes of Modified Structures J85-313
Optimization of Superplastically Formed Sandwich Cores J85-296
Damage Development in Bolt Bearing of Composite Laminates J85-279
An Efficient Method for Dynamic Response Optimization J85-258
Bearing/Contact for Anisotropic Materials J85-225
Simultaneous Analysis and Design J85-189
Optimal Laminate Configurations of Cylindrical Shells for Axial Buckling J85-188
Stability of Imperfect Laminate Cylinders: A Comparison Between Theory and Experiment J85-187
Stress Intensity Factor Calculation for Designing with Fiber-Reinforced Composite Materials J85-146
Postbuckling of Long Orthotropic Plates in Combined Shear and Compression J85-124
Structural Optimization of Laminated Conical Shells J85-123
A More General Method of Substructure Mode Synthesis for Dynamic Analysis J85-098
Structural Shape Optimization with Geometric Description and Adaptive Mesh Refinement J85-072
An Analytical Investigation of Shape Control of Large Space Structures by Applied Temperatures J85-071
A Mindlin Shell Element That Satisfies Rigid-Body Requirements J85-045
Minimum Weight Design of Truss Structures with Geometric Nonlinear Behavior J85-019
Structural Optimization with Dynamic Behavior Constraints J85-018
Generalized Dynamic Reduction in Finite Element Dynamic Optimization J84-323
Optimum Placement of Controls for Static Deformations of Space Structures J84-272

Structural Durability (including Fatigue and Fracture)

The Role of Ply Buckling in the Compressive Failure of Graphite/Epoxy Tubes J85-321
Effect of Stitching on the Strength of Bonded Composite Single Lap Joints J85-314
Coupled Vibration Analysis of Blades with Angular Pretwist of Cubic Distribution J85-251
Low Cycle Fatigue Behavior of Aluminum/Stainless Steel Composites J85-148
Resin Selection Criteria for 'Tough' Composite Structures J85-147
Stress Intensity Factor Calculation for Designing with Fiber-Reinforced Composite Materials J85-146
A Stochastic Theory of Fatigue Crack Propagation J85-016

Structural Dynamics

Bending Eigenfrequencies of a Two-Bar Frame Including the Effect of Axial Inertia J85-378
Displacement Dependent Friction in Space Structural Joints J85-377
Influence of Mass Representation on the Equations of Motion for Rotating Structures J85-376
The Role of Damping on the Stability of Short Beck's Columns J85-375
Low-Velocity Impact Response of Laminated Beams Subjected to Initial Stresses J85-367
Damping Synthesis Using Complex Substructure Modes and a Hermitian System Representation J85-365
Dynamic Response of Othotropic, Homogeneous, and Laminated Cylindrical Shells J85-336
Dynamic Condensation for Structural Redesign J85-334
Thermoelastic and Electromagnetic Damping Analysis J85-320
Frequency Control and Its Effect on the Dynamic Response of Flexible Structures J85-318
Axisymmetric Static and Dynamic Buckling of Orthotropic Shallow Conical Caps J85-317
Natural Modes of Modified Structures J85-313
An Approximation of the Lowest Eigenfrequencies and Buckling Loads of Cylindrical and Conical Shell Panels Under Initial Stress J85-292
Nonlinear Structural Dynamic Analysis Using a Modified Modal Method J85-283
Stiffness Matrix Adjustment Using Mode Data J85-252
Coupled Vibration Analysis of Blades with Angular Pretwist of Cubic Distribution J85-251
Enhanced Vibration Controllability by Minor Structural Modifications J85-223
Identification of Linear Systems by Poisson Moment Functionals in the Presence of Noise J85-219
A Finite Element Method for Nonlinear Forced Vibrations of Rectangular Plates J85-190

A Generalized Multiple-Input, Multiple-Output Modal Parameter Estimation Algorithm J85-151
Fractional Calculus in the Transient Analysis of Viscoelastically Damped Structures J85-149
On the Theoretical Justification of Ibrahim's Method J85-130
Method of Multiple Scales and Identification of Nonlinear Structural Dynamic Systems J85-126
Harmonic Temperature Effect on Vibrations of an Orthotropic Plate of Varying Thickness J85-102
A More General Method of Substructure Mode Synthesis for Dynamic Analysis J85-098
Nonlinear Analysis of Laminated Shells Including Transverse Shear Strains J85-069
Vibrations of Circular Orthotropic Plates in Affine Space J85-046
Structural Optimization with Dynamic Behavior Constraints J85-018
Experimental Measurements of Material Damping in Free Fall with Tunable Excitation J85-017
Application of the Generalized Inverse in Structural System Identification J84-360
Generalized Dynamic Reduction in Finite Element Dynamic Optimization J84-323
Time Finite Element Discretization of Hamilton's Law of Varying Action J84-275
Dynamic Condensation J84-145
Derivation and Significance of Second-Order Modal Design Sensitivities J84-144

Structural Stability

The Role of Damping on the Stability of Short Beck's Columns J85-375
Buckling of Glass-Reinforced Plastic Cylindrical Shells Under Combined Axial Compression and External Pressure J85-364
The Role of Ply Buckling in the Compressive Failure of Graphite/Epoxy Tubes J85-321
Axisymmetric Static and Dynamic Buckling of Orthotropic Shallow Conical Caps J85-317
Static Instability of an Elastically Restrained Cantilever Under a Partial Follower Force J85-293
Effect of Delamination of Axially Loaded Homogenous Laminated Plates J85-253
Postbuckling of Long Orthotropic Plates Under Combined Loading J85-224
An Efficient Simplified Approach for the Nonlinear Buckling Analysis of Frames J85-222
Buckling Analysis of Anisotropic Sandwich Plates Faced with Fiber-Reinforced Plastics J85-221
Optimal Laminate Configurations of Cylindrical Shells for Axial Buckling J85-188
Stability of Imperfect Laminate Cylinders: A Comparison Between Theory and Experiment J85-187
Flutter Analysis of Thin Cracked Panels Using the Finite Element Method J85-125
Postbuckling of Long Orthotropic Plates in Combined Shear and Compression J85-124
Effects of Friction Dampers on Aerodynamically Unstable Rotor Stages J85-041
Minimum Weight Design of Truss Structures with Geometric Nonlinear Behavior J85-019

Structural Statics

Strength Prediction of a Mechanically Fastened Joint in Laminated Composites J85-335
Axisymmetric Static and Dynamic Buckling of Orthotropic Shallow Conical Caps J85-317
Discrete Analysis of Stiffened Composite Cylindrical Shells J85-316
Equivalent Continuum Representation of Structures Composed of Repeated Elements J85-278
Stiffness Matrix Adjustment Using Mode Data J85-252
Compatiblity Conditions from Deformation Displacement Relationship J85-230
Postbuckling of Long Orthotropic Plates Under Combined Loading J85-224
Buckling Analysis of Anisotropic Sandwich Plates Faced with Fiber-Reinforced Plastics J85-221
Postbuckling Behavior of Selected Flat Stiffened Graphite-Epoxy Panels Loaded in Compression J85-220
Hybrid Analytical Technique for Nonlinear Analysis of Structures J85-152
An Adaptive Finite Element Technique for Plate Structures J85-129
Nonlinear Analysis of Laminated Shells Including Transverse Shear Strains J85-069
Sensitivity Derivatives for Static Test Loading Boundary Conditions J85-025

Thermal Stresses

Thermoelastic and Electromagnetic Damping Analysis J85-320

Thermophysics and Thermochemistry

Ablation, Pyrolysis, Thermal Decomposition and Degradation (including Refractories)

Reaction of Atomic Oxygen with Polymide Films J85-287
Reaction of Atomic Oxygen with Vitreous Carbon: Laboratory and STS-5 Data Comparisons J85-166
Two-Dimensional Deforming Finite Element Methods for Surface Ablation J85-073
Ablation of Galileo Probe Heat-Shield Models in a Ballistic Range J85-047
Heat Transfer with Ablation in a Finite Slab Subjected to Time-Variant Heat Fluxes J85-020

Experimental Methods of Diagnostics

Biangular Reflectance for an Absorbing and Isotropically Scattering Medium J85-099

Heat Conduction

Influence Functions for the Unsteady Surface Element Method J85-369
Rectangular Thermal Doublers of Uniform Thickness J85-368
Stagnation Point Flows with Freestream Turbulence--The Matching Condition J85-330
Intrinsic Thermocouple Analysis Using Multinode Unsteady Surface Element Method J85-285
Heat Transfer with Ablation in a Finite Slab Subjected to Time-Variant Heat Fluxes J85-020

Heat Pipes

Evaporation from a Two-Dimensional Meniscus J85-048

Radiation and Radiative Heat Transfer

Radiation Exchange in Large Space Sructures and Frames J85-153
Biangular Reflectance for an Absorbing and Isotropically Scattering Medium J85-099

Radiatively Coupled Flows and Heat Transfer

Ablation of Galileo Probe Heat-Shield Models in a Ballistic Range J85-047

Thermal Control

Rectangular Thermal Doublers of Uniform Thickness J85-368
Radiation Exchange in Large Space Sructures and Frames J85-153
Evaporation from a Two-Dimensional Meniscus J85-048

Thermal Modeling and Analysis

Influence Functions for the Unsteady Surface Element Method J85-369
Rectangular Thermal Doublers of Uniform Thickness J85-368
Diameter and Velocity Effects for Cross-Flow Boiling J85-286
Simultaneous Heat and Mass Transfer in Free Convection from a Horizontal Cylinder J85-284
Radiation Exchange in Large Space Sructures and Frames J85-153
Laminar Stagnation-Point Heat Transfer for a Two-Temperature Argon Plasma J84-234

Thermal Surface Properties

Biangular Reflectance for an Absorbing and Isotropically Scattering Medium J85-099

Thermochemistry and Chemical Kinetics

Reaction of Atomic Oxygen with Polymide Films J85-287
An Atomic Hydrogen Propulsion System J85-171
Reaction of Atomic Oxygen with Vitreous Carbon: Laboratory and STS-5 Data Comparisons J85-166

Thermophysical Properties of Matter

Thermal Effect on Frequencies of Coupled Vibrations of Pretwisted Rotating Beams J85-231
A Simple and Accurate Expression for the Viscosity of Nonpolar Diatonic Gases up to 10,000 K J85-103
