1996 AIAA Journal Index

How to Use the Index

In the Subject Index, pages 2651–2662, each technical paper is listed under a maximum of three appropriate headings. Note the number in boldface type following each paper title, and use that number to locate the paper in the Chronological Index. The Author Index, pages 2662-2665, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 2666–2680, lists all papers by their unique code numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based, as well as the "CP" or conference volume number if the paper was published in a bound collection of meetings papers. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 1996, that paper also will appear in the Chronological Index. Authors of Comments also are listed in the Author Index. The Book Review Index, page 2680, lists the books reviewed during 1996, the author, publisher, reviewer, and the issue, number, and page on which the review appeared.

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Reynolds Number Effects on the Prediction of VelocityProfile in Compressible Flows

Comment on "Rise of Total Pressure in Frictional J95-119

Reply by the Author to B. W. van Oudheusden J95-119

Flap-Lag-Torsion Stability in Hover and Forward Flight with Three-Dimensional Wake

196-002 Improving Curved Subsonic Diffuser Performance with Vortex Generators J96-008

Boundary-Layer-Tripping Studies of Compressible Dynamic Stall Flow J96-013

Use of a Wake-Integral Method for Computational Drag Analysis Calibration of Preston Tubes J96-034
