Chronological Index

G00-135 Improved Dispersion of a Fin-Stabilized Projectile Using a Passive Moveable Nose. Mark Costello and Raditya Agarwalla, *Oregon State University* (**23**, 5, p. 900) Engineering Note

Errata (**25**, 2, p. 414)

G02-001 von Kármán Lecture. Richard H. Battin, *Massachusetts Institute of Technology* (**25**, 1, p. 1) History/Lecture based on AIAA Paper 89-0861

G02-002 Apache Helicopter Stabilization Using Neural Dynamic Programming. Russell Enns and Jennie Si, *Arizona State University* (**25**, 1, p. 19) Article

G02-003 Aggressive Longitudinal Aircraft Trajectory Tracking Using Nonlinear Control. Saif A. Al-Hiddabi, *Sulatn Qaboos University, Oman*; and N. Harris McClamroch, *The University of Michigan* (**25**, 1, p. 26) Article

G02-004 Analysis of Rotorcraft Flight Dynamics in Autorotation. S. S. Houston, *University of Glasgow, Scotland* (**25**, 1, p. 33) Article

G02-005 Optimal, Low-Thrust Earth-Orbit Transfers Using Higher-Order Collocation Methods. Albert L. Herman, *Spectrum Astro, Inc.*; and David B. Spencer, *The Pennsylvania State University* (**25**, 1, p. 40) Article

G02-006 Relative Dynamics and Control of Spacecraft Formations in Eccentric Orbits. Gökhan Inalhan, *Stanford University*; Michael Tillerson and Jonathan P. How, *Massachusetts Institute of Technology* (**25**, 1, p. 48) Article

G02-007 New State Transition Matrix for Relative Motion on an Arbitrary Elliptical Orbit. Koji Yamanaka, *National Space Development Agency, Japan*; and Finn Ankersen, *European Space Research and Technology Center, The Netherlands* (**25**, 1, p. 60) Article

G02-008 Near-Geostationary Orbit Model Used in Satellite Catalog Maintenance. V. Boikov, A. Testov, and Z. Khutorovsky, *Vympel International Corporation, Russia* (**25**, 1, p. 67) Article

G02-009 Rendezvous Equations in a Central-Force Field with Linear Drag. Mayer Humi, *Worcester Polytechnic Institute*; and Thomas Carter, *Eastern Connecticut State University* (**25**, 1, p. 74) Article

G02-010 Explicit Guidance of Aeroassisted Orbital Transfer Using Matched Asymptotic Expansions. Zeal-Sain Kuo and Kuo-Chung Liu, *National Defense University, Taiwan, ROC* (**25**, 1, p. 80) Article based on AIAA Paper 2000-4435

G02-011 Attitude Estimation for a Flexible Spacecraft in an Unstable Spin. Mark L. Psiaki, Eric M. Klatt, Paul M. Kintner Jr., and Steven P. Powell, *Cornell University* (**25**, 1, p. 88) Article

G02-012 Rapid Multitarget Acquisition and Pointing Control of Agile Spacecraft. Bong Wie, *Arizona State University*; and David Bailey and Christopher Heiberg, *Honeywell, Inc.* (**25**, 1, p. 96) Article

G02-013 Adaptive Control of Double-Gimbal Control-Moment Gyro with Unbalanced Rotor. Jasim Ahmed, *Robert Bosch Corporation*; and Dennis S. Bernstein, *The University of Michigan* (**25**, 1, p. 105) Article

G02-014 Real-Time Motion Planning for Agile Autonomous Vehicles. Emilio Frazzoli, *University of Illinois at Urbana-Champaign*; and Munther A. Dahleh and Eric Feron, *Massachusetts Institute of Technology* (**25**, 1, p. 116) Article

G02-015 New Approach to Attitude Determination Using Global Positioning System Carrier Phase Measurements. Yong Li and Masaaki Murata, *National Aerospace Laboratory, Japan*; and Baoxiang Sun, *Beijing Institute of Control Engineering, China* (**25**, 1, p. 130) Article

G02-016 Satellite Orbit Determination Using a Single-Channel Global Positioning System Receiver. Mark L. Psiaki, *Cornell University* (**25**, 1, p. 137) Article

G02-017 Robust Control of Linearized Poiseuille Flow. Lubomír Baramov, Owen R. Tutty, Eric Rogers, *University of Southampton, England, UK* (**25**, 1, p. 145) Article based on AIAA Paper 2000-2684

G02-018 Aeroservoelastic Structural and Control Optimization Using Robust Design Schemes. Boris Moulin, *Technion*; Moshe Idan, *Technion - Israel Institute of Technology, Israel*; and Mordechay Karpel, *Technion-Israel Institute of Technology, Israel* (**25**, 1, p. 152) Article based on AIAA Paper 2000-1453

G02-019 Direct Trajectory Optimization by a Chebyshev Pseudospectral Method. Fariba Fahroo and I. Michael Ross, *Naval Postgraduate School* (**25**, 1, p. 160) Article

G02-020 Real-Time Adaptation of Mode Transition Controllers. Freeman Rufus, George Vachtsevanos, and Bonnie Heck, *Georgia Institute of Technology* (**25**, 1, p. 167) Article

G02-021 Design Technique for Stuck-On Thruster Δv Minimization for an Asymmetric Spacecraft. Trevor Williams, *University of Cincinnati*; and Sergei Tanygin, *Analytical Graphics* (**25**, 1, p. 176) Engineering Note

G02-022 Experimental Robustness Study of Positive Position Feedback Control for Active Vibration Suppression. G. Song, *The University of Akron*; and S. P. Schmidt and B. N. Agrawal, *Naval Postgraduate School* (**25**, 1, p. 179) Engineering Note

G02-023 Approximate Equations for the Coplanar Restricted Three-Body Problem. Mayer Humi, *Worcester Polytechnic Institute* (**25**, 1, p. 182) Engineering Note

G02-024 Energy-Based Stabilization of Angular Velocity of Rigid Body in Failure Configuration. A. Astolfi, *Imperial College, England, UK*; and R. Ortega, *Supelec, France* (**25**, 1, p. 184) Engineering Note

G02-025 Optimal Fusion of a Given Quaternion with Vector Measurements. Itzhack Y. Bar-Itzhack and Richard R. Harman, *NASA Goddard Space Flight Center* (**25**, 1, p. 188) Engineering Note

G02-026 Multimode Control of a Rotating, Uniform, Cantilever Beam. Donald L. Kunz, *Old Dominion University* (**25**, 2, p. 193) Survey

G02-027 Laboratory Test System for Performance Evaluation of Advanced Star Sensors. Giancarlo Rufino and Antonio Moccia, *University of Naples, Italy* (**25**, 2, p. 200) Article

G02-028 Control of Chaotic Motion in a Dual-Spin Spacecraft with Nutational Damping. P. A. Meehan and S. F. Asokanthan, *University of Queensland, Australia* (**25**, 2, p. 209) Article

G02-029 Benchmarking Time-Optimal Control Inputs for Flexible Systems. Michael C. Reynolds and Peter H. Meckl, *Purdue University* (**25**, 2, p. 215) Article

G02-030 Characteristics of Time-Optimal Commands for Flexible Structures with Limited Fuel Usage. Mark A. Lau and Lucy Y. Pao, *University of Colorado* (**25**, 2, p. 222) Article

G02-031 Experiments on Command Shaping Control of a Manipulator with Flexible Links. Marcello Romano, *Politecnico di Milano, Italy*; Brij N. Agrawal, *Naval Postgraduate School*; and Franco Bernelli-Zazzera, *Politecnico di Milano, Italy* (**25**, 2, p. 232) Article

G02-032 Calibration of Measurement Delay in Global Positioning System/Strapdown Inertial Navigation System. Hyung Keun Lee and Jang Gyu Lee, *Seoul National University, Korea*; and Gyu-In Jee, *Konkuk University, Korea* (**25**, 2, p. 240) Article

G02-033 Guidance Law Design by Adaptive Fuzzy Sliding-Mode Control. Chih-Min Lin and Chun-Fei Hsu, *Yuan-Ze University, Taiwan, ROC* (**25**, 2, p. 248) Article

G02-034 Reduced-Order Entry Trajectory Planning for Acceleration Guidance. K. D. Mease, D. T. Chen, P. Teufel, and H. Schönenberger, *University of California* (**25**, 2, p. 257) Article

G02-035 Robust Control System Design Using Simulated Annealing. Toshikazu Motoda, *National Space Development Agency of Japan, Japan*; Robert F. Stengel, *Princeton University*; and Yoshikazu Miyazawa, *National Aerospace Laboratory of Japan, Japan* (**25**, 2, p. 267) Article

G02-036 Dynamic Inversion-Based Adaptive/Reconfigurable Control of the X-33 on Ascent. David B. Doman and Anhtuan D. Ngo, *U.S. Air Force Research Laboratory* (**25**, 2, p. 275) Article

G02-037 Motion Control of a Nonholonomic System Based on the Lyapunov Control Method. Kazuo Tsuchiya, Takateru Urakubo, and Katsuyoshi Tsujita, *Kyoto University, Japan* (**25**, 2, p. 285) Article

G02-038 Robust Fault Detection for Uncertain Discrete-Time Systems. Haibo Wang and James Lam, *University of Hong Kong, ROC* (**25**, 2, p. 291) Article

G02-039 Output Feedback Control of the Nonlinear Aeroelastic Response of a Slender Wing. Mayuresh J. Patil and Dewey H. Hodges, *Georgia Institute of Technology* (**25**, 2, p. 302) Article

G02-040 System Architecture Trades Using Bode-Step Control Design. Boris J. Lurie, Ali Ghavimi, Fred Y. Hadaegh, and Edward Mettler, *Jet Propulsion Laboratory* (**25**, 2, p. 309) Article

G02-041 Order Reduction and Closed-Loop Vibration Control in Helicopter Fuselages. Anita Mathews, V. R. Sule, and C. Venkatesan, *Indian Institute of Technology, India* (**25**, 2, p. 316) Article

G02-042 Analysis of the Two-Degree-of-Freedom Wing Rock in Advanced Aircraft. Tiauw Hiong Go and Rudrapatna V. Ramnath, *Massachusetts Institute of Technology* (**25**, 2, p. 324) Article

G02-043 Real-Time Identification of Flutter Boundaries Using the Discrete Wavelet Transform. Jeffrey D. Johnson, Jun Lu, and Atam P. Dhawan, *University of Toledo*; and Richard Lind, *NASA Dryden Flight Research Center* (**25**, 2, p. 334) Article

G02-044 Generalized Active Control of Vibrations in Helicopters. Sergio Bittanti and Francesco Alessandro Cuzzola, *Politecnico di Milano, Italy* (**25**, 2, p. 340) Article

G02-045 Eccentricity Impact on East-West Stationkeeping for Global Positioning System Class Orbits. Todd A. Ely, *Jet Propulsion Laboratory* (**25**, 2, p. 352) Article based on AIAA Paper AAS 99-389

G02-046 Turning Elliptic Orbital Planes via Intermediate Thrust Spherical Arcs. Dilmurat M. Azimov and Robert H. Bishop, *University of Texas at Austin* (**25**, 2, p. 358) Article

G02-047 Numerical Study and Analytic Estimation of Forces Acting in Ballistic Gravitational Capture. Antonio Fernando Bertachini de Almeida Prado, *National Space Research Institute, Brazil* (**25**, 2, p. 368) Article

G02-048 Nonlinear Tracking Control for Satellite Formations. Hsi-Han Yeh, Eric Nelson, and Andrew Sparks, *U.S. Air Force Research Laboratory* (**25**, 2, p. 376) Article

G02-049 Hybrid Cartesian and Orbit Element Feedback Law for Formation Flying Spacecraft. Hanspeter Schaub, *ORION International Technologies*; and Kyle T. Alfriend, *Texas A&M University* (**25**, 2, p. 387) Article based on AIAA Paper 2000-4131

G02-050 Event Detection and Characterization During Autonomous Interplanetary Navigation. Timothy P. Crain, *NASA Johnson Space Center*; Robert H. Bishop, *University of Texas at Austin*; and Todd A. Ely, *Jet Propulsion Laboratory* (**25**, 2, p. 394) Article based on AIAA Paper 2000-3939

G02-051 Adaptive Critic-Based Neural Networks for Agile Missile Control. Dongchen Han and S. N. Balakrishnan, *University of Missouri-Rolla* (**25**, 2, p. 404) Engineering Note based on AIAA Paper 98-4495

G02-052 Jump Markovian-Based Control of Wing Deployment for an Uncrewed Air Vehicle. A. Stoica, *University "Polytechnica" of Bucharest, Romania*; and I. Yaesh, *Israel Military Industries, Israel* (**25**, 2, p. 407) Engineering Note

G02-053 Fast Quaternion Attitude Estimation from Two Vector Measurements. F. Landis Markley, *NASA Goddard Space Flight Center* (**25**, 2, p. 411) Engineering Note

G02-054 Structural Damage Detection Using Virtual Passive Controllers. Jiann-Shiun Lew, *Tennessee State University*; and Jer-Nan Juang, *NASA Langley Research Center* (**25**, 3, p. 419) Article

G02-055 Time-Varying Linear Pursuit-Evasion Game Models with Bounded Controls. Tal Shima and Josef Shinar, *Technion-Israel Institute of Technology, Israel* (**25**, 3, p. 425) Article

G02-056 Incremental-Angle and Angular Velocity Estimation Using a Star Sensor. G. Nagendra Rao and T. K. Alex, *Indian Space Research Organization, India*; and M. Seetharama Bhat, *Indian Institute of Science, India* (**25**, 3, p. 433) Article

G02-057 Classical/Neural Synthesis of Nonlinear Control Systems. Silvia Ferrari and Robert F. Stengel, *Princeton University* (**25**, 3, p. 442) Article based on AIAA Paper 2000-4552

G02-058 Rocket Nozzle Flow Control Using a Reduced-Order Computational Fluid Dynamics Model. David J. Lucia and Meir Pachter, *Air Force Institute of Technology*; and Philip S. Beran, *U.S. Air Force Research Laboratory* (**25**, 3, p. 449) Article

G02-059 H_∞ Antiwindup Design for Linear Systems Subject to Input Saturation. Yong-Yan Cao and Zongli Lin, *University of Virginia*; and D. G. Ward, *Barron Associates, Inc.* (**25**, 3, p. 455) Article

G02-060 Fast Implementation of Direct Allocation with Extension to Coplanar Controls. John A. M. Petersen and Marc Bodson, *University of Utah* (**25**, 3, p. 464) Article

G02-061 Desensitized Jerk Limited-Time Optimal Control of Multi-Input Systems. Marco Muenchhof and Tarunraj Singh, *State University of New York at Buffalo* (**25**, 3, p. 474) Article

G02-062 Comparison of Flight Control System Design Methods Using the CONDUIT® Design Tool. Mark B. Tischler, *U.S. Army Aeroflightdynamics Directorate*; James A. Lee, *University of Southern California*; and Jason D. Colbourne, *U.S. Army Aeroflightdynamics Directorate* (**25**, 3, p. 482) Article

G02-063 Predictor/Flight-Path Display for Manual Longitudinal Control Improvement. G. Sachs and K. Dobler, *Technical University of Munich, Germany* (**25**, 3, p. 494) Article

G02-064 Robust H_2 Design for Lateral Flight Conrol of Highly Flexible Aircraft. Daniel Alazard, *ONERA, France* (**25**, 3, p. 502) Article

G02-065 Two-Degree-of-Freedom Control of an Actively Controlled Wind-Tunnel Model. George Papageorgiou and Keith Glover, *University of Cambridge, England, UK* (**25**, 3, p. 510) Article based on AIAA Paper 99-4274

G02-066 Phugoid Damping Control. Meir Pachter and Nicolas J. Schindeler, *Air Force Institute of Technology* (**25**, 3, p. 517) Article

G02-067 Online Parameter Estimation Techniques Comparison Within a Fault Tolerant Flight Control System. Yongkyu Song, *Hankuk Aviation University, Korea*; and Giampiero Campa, Marcello Napolitano, Brad Seanor, and Mario G. Perhinschi, *West Virginia University* (**25**, 3, p. 528) Article

G02-068 Semi-Analytical Formulas for Launcher Performance Evaluation. Emanuele Di Sotto and Paolo Teofilatto, *University of Rome "La Sapienza", Italy* (**25**, 3, p. 538) Article

G02-069 Identification of the Dominant Ground Handling Characteristics of a Navy Jet Trainer. David H. Klyde, Thomas T. Myers, and Raymond E. Magdaleno, *Systems Technology, Inc.*; and James G. Reinsberg, *The Boeing Company* (**25**, 3, p. 546) Article

G02-070 Guidance and Relative Navigation for Autonomous Rendezvous in a Circular Orbit. Hari B. Hablani, Myron L. Tapper, and David J. Dana-Bashian, *The Boeing Company* (**25**, 3, p. 553) Article based on AIAA Paper 2001-4393

G02-071 Anatomy of the Constant Radial Thrust Problem. Maruthi R. Akella and Roger A. Broucke, *University of Texas at Austin* (**25**, 3, p. 563) Article

G02-072 Epicyclic Motion of Satellites Under Rotating Potential. Yoshikazu Hashida and Philip L. Palmer, *University of Surrey, England, UK* (**25**, 3, p. 571) Article

G02-073 Tests of Magnetometer/Sun-Sensor Orbit Determination Using Flight Data. Hee Jung and Mark L. Psiaki, *Cornell University* (**25**, 3, p. 582) Article

G02-074 Minimizing the Effects of Transverse Torques During Thrusting for Spin Stabilized Spacecraft. James A. Oldenburg and Steven G. Tragesser, *Air Force Institute of Technology* (**25**, 3, p. 591) Article

G02-075 Increasing the Numerical Robustness of Balanced Model Reduction. Gregory J. W. Mallory and David W. Miller, *Massachusetts Institute of Technology* (**25**, 3, p. 596) Engineering Note

G02-076 Spillover Suppression via Eigenstructure Assignment in Large Flexible Structures. Jae Weon Choi, *Pusan National University, Korea*; and Un Sik Park, *Osaka University, Japan* (**25**, 3, p. 599) Engineering Note

G02-077 Solar Sail Hybrid Trajectory Optimization for Non-Keplerian Orbit Transfers. Gareth W. Hughes and Colin R. McInnes, *University of Glasgow, Scotland, UK* (**25**, 3, p. 602) Engineering Note

G02-078 Optimal Earth-Capture Trajectories Using Electric Propulsion. C. A. Kluever, *University of Missouri-Columbia* (**25**, 3, p. 604) Engineering Note

G02-079 Experimental Modal Analysis and Damping Estimation for an Inflated Thin-Film Torus. D. Todd Griffith and John A. Main, *University of Kentucky* (**25**, 4, p. 609) Article

G02-080 Optimal Near-Minimum-Time Control Design for Flexible Structures. Bassam A. Albassam, *King Saud University, Saudi Arabia* (**25**, 4, p. 618) Article based on AIAA Paper 2000-4150

G02-081 Element-Specific Beam Dynamics Formulations: Coordinate Choices, Boundary Conditions, and Strain Approximations. William Haering, *Pennsylvania State University* (**25**, 4, p. 626) Article

G02-082 Dynamics of Beams Undergoing Large Rotations Accounting for Arbitrary Axial Deformation. Marcelo Areias Trindade and Rubens Sampaio, *Pontifícia Universidade Católica do Rio de Janeiro, Brazil* (**25**, 4, p. 634) Article

G02-083 Virtual Vibration Absorbers with Inherent Damping. Shang-Teh Wu, *National Yunlin University of Science and Technology, Taiwan, ROC* (**25**, 4, p. 644) Article

G02-084 Estimating Departure Queues to Study Runway Efficiency. Stephen C. Atkins, *NASA Ames Research Center* (**25**, 4, p. 651) Article

G02-085 Nonorthodox Guidance Law Development Approach for Intercepting Maneuvering Targets. J. Shinar and T. Shima, *Technion-Israel Institute of Technology, Israel* (**25**, 4, p. 658) Article based on AIAA Paper 2000-4273

G02-086 Efficient Multiple Model Adaptive Estimation in Ballistic Missile Interception Scenarios. Tal Shima, Yaakov Oshman, and Josef Shinar, *Technion-Israel Institute of Technology, Israel* (**25**, 4, p. 667) Article based on AIAA Paper 2000-4274

G02-087 Uncorrelated Observations Processing at Naval Space Command. Shannon L. Coffey, Harold L. Neal, and Mathew M. Berry, *U.S. Naval Research Laboratory* (**25**, 4, p. 676) Article

G02-088 Quasi-Newton-Type Continuation Method for Nonlinear Receding Horizon Control. Toshiyuki Ohtsuka, *Osaka University, Japan* (**25**, 4, p. 685) Article

G02-089 Optimization of Vertical Plane Cobralike Pitch Reversal Maneuvers. H. J. Komduur and H. G. Visser, *Delft University of Technology, The Netherlands* (**25**, 4, p. 693) Article

G02-090 Evaluation of Optimization Methods for Control Allocation. Marc Bodson, *University of Utah* (**25**, 4, p. 703) Article

G02-091 Multiple-Model Adaptive Flight Control Scheme for Accommodation of Actuator Failures. Jovan D. Boskovic and Raman K. Mehra, *Scientific Systems Company, Inc.* (**25**, 4, p. 712) Article

G02-092 Output Feedback Form and Adaptive Stabilization of a Nonlinear Aeroelastic System. Sahjendra N. Singh and Ling Wang, *University of Nevada* (**25**, 4, p. 725) Article

G02-093 Linear Parameter-Varying Modeling and Control of Structural Dynamics with Aerothermoelastic Effects. Rick Lind, *NASA Dryden Flight Research Center* (**25**, 4, p. 733) Article

G02-094 Nonlinear Prefilter to Prevent Pilot-Induced Oscillations due to Actuator Rate Limiting. Brad S. Liebst, Michael J. Chapa, and David B. Leggett, *U.S. Air Force Institute of Technology* (**25**, 4, p. 740) Article

G02-095 Aeroservoelastic Model Uncertainty Bound Estimation from Flight Data. Martin J. Brenner, *NASA Dryden Flight Research Center* (**25**, 4, p. 748) Article

G02-096 Spacecraft Trajectory Planning with Avoidance Constraints Using Mixed-Integer Linear Programming. Arthur Richards, Tom Schouwenaars, Jonathan P. How, and Eric Feron, *Massachusetts Institute of Technology* (**25**, 4, p. 755) Article based on AIAA Paper 2001-4091

G02-097 Spacecraft Motion About Slowly Rotating Asteroids. W. Hu and D. J. Scheeres, *University of Michigan* (**25**, 4, p. 765) Article

G02-098 Relative Satellite Motion About an Oblate Planet. William E. Wiesel, *Air Force Institute of Technology* (**25**, 4, p. 776) Article

G02-099 Control of Hovering Spacecraft Using Altimetry. S. Sawai, D. J. Scheeres, and S. B. Broschart, *University of Michigan* (**25**, 4, p. 786) Article

G02-100 Fast Prediction Algorithms of Satellite Imaging Opportunities with Attitude Controls. Shu-Fan Wu and Phil L. Palmer, *University of Surrey, England, UK* (**25**, 4, p. 796) Article based on AIAA Paper 2001-4270

G02-101 Chaotic Attitude Tumbling of an Asymmetric Gyrostat in a Gravitational Field. Jinlu Kuang and Soonhie Tan, *Nanyang Technological University, Singapore*; and A. Y. T. Leung, *University of Manchester, England, UK* (**25**, 4, p. 804) Article

G02-102 Optimal Simultaneous Pairwise Conflict Resolution Maneuvers in Air Traffic Management. John C. Clements, *Dalhousie University, Canada* (**25**, 4, p. 815) Engineering Note

G02-103 Mechanism for Precision Orbit Control with Applications to Formation Keeping. I. Michael Ross, *Naval Postgraduate School* (**25**, 4, p. 818) Engineering Note

G02-104 Consistent Approximations to Aircraft Longitudinal Modes. N. Ananthkrishnan and P. Ramadevi, *Indian Institute of Technology Bombay, India* (**25**, 4, p. 820) Engineering Note

G02-105 Rigid-Body Trajectory Reconstruction. R. Scott McEntire, *Sandia National Laboratories*; Steven L. Folkman, *Utah State University*; and Ned R. Hansen, *Sandia National Laboratories* (**25**, 4, p. 824) Engineering Note

G02-106 Pitch Autopilot Design Using Model-Following Adaptive Sliding Mode Control. Dong-Gyun Choe and Jong-Hwan Kim, *Korea Advanced Institute of Science and Technology, Korea* (**25**, 4, p. 826) Engineering Note

G02-107 Hybrid Fuzzy Sliding-Mode Control of an Aeroelastic System. Chih-Min Lin and Chun-Fei Hsu, *Yuan-Ze University, ROC* (**25**, 4, p. 829) Engineering Note

G02-108 Analytical Modeling of Sensor Quantization in Strapdown Inertial Navigation Error Equations. Paul G. Savage, *Strapdown Associates, Inc.,* (**25**, 5, p. 833) Article

G02-109 Multivariable Adaptive Control Design with Applications to Autonomous Helicopters. A. S. Krupadanam, *Maxtor Corporation*; A. M. Annaswamy, *Massachusetts Institute of Technology*; and R. S. Mangoubi, *Charles Stark Draper Laboratory, Inc.* (**25**, 5, p. 843) Article

G02-110 In-Space Calibration of a Skewed Gyro Quadruplet. Itzhack Y. Bar-Itzhack and Richard R. Harman, *NASA Goddard Space Flight Center* (**25**, 5, p. 852) Article

G02-111 Model Predictive Lateral Pulse Jet Control of an Atmospheric Rocket. Bradley Burchett and Mark Costello, *Oregon State University* (**25**, 5, p. 860) Article

G02-112 Minimax Design of Robust Controllers for Flexible Systems. Tarunraj Singh, *State University of New York at Buffalo* (**25**, 5, p. 868) Article

G02-113 Trajectory Optimization for Air-to Surface Missiles with Imaging Radars. Asif Farooq, *MBDA UK, Ltd., England, UK*; and David J. N. Limebeer, *Imperial College, England, UK* (**25**, 5, p. 876) Article

G02-114 Optimal Coordinated Maneuvers for Three-Dimensional Aircraft Conflict Resolution. Jianghai Hu, *University of California*; Maria Prandini, *University of Brescia, Italy*; and Shankar Sastry, *University of California* (**25**, 5, p. 888) Article

G02-115 Automated Tuning of an Extended Kalman Filter Using the Downhill Simplex Algorithm. Thomas D. Powell, *The Aerospace Corporation* (**25**, 5, p. 901) Article

G02-116 Robust Control System Design for Rotorcraft. Chih-Min Lin and Chen-Ling Ying, *Yuan-Ze University, Taiwan, ROC* (**25**, 5, p. 909) Article

G02-117 Robust Individual Blade Control Algorithm for a Dissimilar Rotor. Beatrice Roget and Inderjit Chopra, *University of Maryland* (**25**, 5, p. 915) Article based on AIAA Paper 2001-1433

G02-118 Nonlinear Receding Horizon Control of an F-16 Aircraft. Raktim Bhattacharya and Gary J. Balas, *University of Minnesota*; and M. Alpay Kaya and Andy Packard, *University of California* (**25**, 5, p. 924) Article

G02-119 Optimal Control of Interplanetary Trajectories Using Electrical Propulsion with Discrete Thrust Levels. A. Axelrod and M. Guelman, *Technion-Israel Institute of Technology, Israel*; and D. Mishne, *RAFAEL Armament Development Authority, Ltd., Israel* (**25**, 5, p. 932) Article

G02-120 Method for Calculating Collision Probability Between a Satellite and a Space Tether. Russell P. Patera, *The Aerospace Corporation* (**25**, 5, p. 940) Article

G02-121 Integrated Algorithm for Lunar Transfer Trajectories Using a Pseudostate Technique. R. V. Ramanan, *Vikram Sarabhai Space Center, India* (**25**, 5, p. 946) Article

G02-122 Monitoring of Geostationary Earth Orbit Satellites in Russian Space Surveillance Center. Zakhary N. Khutorovsky, *"Vympel" International Corporation, Russia* (**25**, 5, p. 953) Article

G02-123 Flutter, Postflutter, and Control of a Supersonic Wing Section. Piergiovanni Marzocca and Liviu Librescu, *Virginia Polytechnic Institute and State University*; and Walter A. Silva, *NASA Langley Research Center* (**25**, 5, p. 962) Article

G02-124 Analysis of Formation Flying Control of a Pair of Nanosatellites. S. M. Veres and S. B. Gabriel, *University of Southampton, England, UK*; D. Q. Mayne, *Imperial College, England, UK*; and E. Rogers, *University of Southampton, England, UK* (**25**, 5, p. 971) Engineering Note

G02-125 Unifying Treatment to Control of Nonlinear Systems with Two Timescales. Ping Lu and Zuojun Shen, *Iowa State University* (**25**, 5, p. 975) Engineering Note

G02-126 Nonlinear Tracking Control of an Underactuated Spacecraft. A. Behal and D. Dawson, *Clemson University*; E. Zergeroglu, *OFS Fitel*; and Y. Fang, *Clemson University* (**25**, 5, p. 979) Engineering Note

G02-127 Method of Unsteady Aerodynamic Forces Approximation for Aeroservoelastic Interactions. Iulian Cotoi and Ruxandra M. Botez, *Ecole de Technologie Supérieure, Canada* (**25**, 5, p. 985) Engineering Note

G02-128 Composite Optimization Scheme for Time-Optimal Control. Michael C. Reynolds and Peter H. Meckl, *Purdue University* (**25**, 5, p. 987) Engineering Note

G02-129 Height Control System for Sea-Skimming Missile Using Predictive Filter. S. E. Talole and S. B. Phadke, *Institute of Armament Technology, India* (**25**, 5, p. 989) Engineering Note

G02-130 Adaptive Output Feedback for High-Bandwidth Flight Control. Nakwan Kim, Anthony J. Calise, Naira Hovakimyan, and J. V. R. Prasad, *Georgia Institute of Technology*; and Eric Corban, *Guided Systems Technologies, Inc.* (**25**, 6, p. 993) Article

G02-131 Strictly Positive Real H_2 Controller Synthesis via Iterative Algorithms for Convex Optimization. Takashi Shimomura, *Osaka University, Japan*; and Samuel P. Pullen, *Stanford University* (**25**, 6, p. 1003) Article

G02-132 Hierarchical Approach to Adaptive Control for Improved Flight Safety. Moshe Idan, *Technion-Israel Institute of Technology, Israel;* and Matthew Johnson and Anthony J. Calise, *Georgia Institute of Technology* (**25**, 6, p. 1012) Article

G02-133 Spherical μ with Application to Flight Control Analysis. Shinji Ishimoto and Fuyuto Terui, *National Aerospace Laboratory, Japan* (**25**, 6, p. 1021) Article

G02-134 Modeling and Computing Worst-Case Uncertainty Combinations for Flight Control Systems Analysis. Thomas Mannchen, *Univeristy of Stuttgart, Germany*; and Declan G. Bates and Ian Postlethwaite, *University of Leicester, England, UK* (**25**, 6, p. 1029) Article

G02-135 Blending Methodology of Linear Parameter Varying Control Synthesis of F-16 Aircraft System. Jong-Yeob Shin, *NASA Langley Research Center*; Gary J. Balas, *University of Minnesota*; and M. Alpay Kaya, *University of California* (**25**, 6, p. 1040) Article

G02-136 Adaptive Estimation Methodology for Helicopter Blade Structural Damage Detection. Jonathan Alkahe, Yaakov Oshman, and Omri Rand, *Technion-Israel Institute of Technology, Israel* (**25**, 6, p. 1049) Article

G02-137 Clohessy-Wiltshire Equations Modified to Include Quadratic Drag. Thomas Carter, *Eastern Connecticut State University*; and Mayer Humi, *Worcester Polytechnic Institute* (**25**, 6, p. 1058) Article

G02-138 Local Regularization of the Restricted Elliptic Three-Body Problem in Rotating Coordinates. Jean Albert Kechichian, *The Aerospace Corporation* (**25**, 6, p. 1064) Article

G02-139 High-Fidelity Linearized J_2 Model for Satellite Formation Flight. Samuel A. Schweighart and Raymond J. Sedwick, *Massachusetts Institute of Technology* (**25**, 6, p. 1073) Article

G02-140 Spacecraft Adaptive Attitude and Power Tracking with Variable Speed Control Moment Gyroscopes. Hyungjoo Yoon and Panagiotis Tsiotras, *Georgia Institute of Technology* (**25**, 6, p. 1081) Article

G02-141 Lidar-Based Hazard Avoidance for Safe Landing on Mars. Andrew E. Johnson, Allan R. Klumpp, James B. Collier, and Aron A. Wolf, *Jet Propulsion Laboratory* (**25**, 6, p. 1091) Article

G02-142 Error Analysis of a Low-Low Satellite-to-Satellite Tracking Mission. Jeongrae Kim and Byron D. Tapley, *University of Texas at Austin* (**25**, 6, p. 1100) Article

G02-143 Dynamics/Control of a Radio Telescope Receiver Supported by a Tethered Aerostat. Meyer Nahon, *McGill University, Montreal, Canada*; and Gabriele Gilardi and Casey Lambert, *University of Victoria, British Columbia, Canada* (**25**, 6, p. 1107) Article

G02-144 Influence of Wind Speed on Airship Dynamics. José Raul Azinheira, *Instituto Superior Técnico, Portugal*; and Ely Carneiro de Paiva and Samuel Siqueira Bueno, *Centro de Pesquisas Renato Archer, Brazil* (**25**, 6, p. 1116) Article

G02-145 Two-Bar Model for the Dynamics and Stability of Electrodynamic Tethers. Jesús Peláez, Manuel Ruiz, and Oscar López-Rebollal, *Universidad Politécnica de Madrid, Spain*; and Enrico C. Lorenzini and Mario L. Cosmo, *Harvard-Smithsonian Center for Astrophysics* (**25**, 6, p. 1125) Article

G02-146 Functional Analysis Approach to Minimum Energy Maneuver Problem for Flexible Space Structures. Hironori A. Fujii and Shin-ichi Suda, *Tokyo Metropolitan Institute of Technology, Japan* (**25**, 6, p. 1136) Article

G02-147 Target Association Using Detection Methods. Jonathan D. Wolfe and Jason L. Speyer, *University of California* (**25**, 6, p. 1143) Article

G02-148 Observability Analysis of Six-Degree-of-Freedom Configuration Determination Using Vector Observations. Debo Sun, *Texas A&M University*; and John L. Crassidis, *University at Buffalo, State University of New York* (**25**, 6, p. 1149) Article

G02-149 Inverse Dynamics of Aircraft via Reduced-Order Shooting Methods. Franco Bernelli-Zazzera, Gerlando Cappello, and Paolo Mantegazza, *Politecnico di Milano, Italy* (**25**, 6, p. 1158) Engineering Note

G02-150 Recurrent Neural Network Adaptive Control of Wing-Rock Motion. Chih-Min Lin and Chun-Fei Hsu, *Yuan-Ze University, Taiwan, ROC* (**25**, 6, p. 1163) Engineering Note

G02-151 Angular Velocity Determination Directly from Star Tracker Measurements. John L. Crassidis, *University at Buffalo, State University of New York* (**25**, 6, p. 1165) Engineering Note
