

A Warm Welcome

I AM pleased to announce that Dr. R. H. Woodward Waesche has been approved by the AIAA Board of Directors to succeed Gordon Oates as Editor-in-Chief of the *Journal of Propulsion and Power* (JPP). Woody was previously Editor-in-Chief of the *Journal of Spacecraft and Rockets* (JSR), where for six years and through two major revisions of scope he has caused JSR to grow in stature and financial soundness. He has a strong background and interest in propulsion and power, and had been working closely and well with Gordon to monitor the complex interface between JPP and JSR.

R. H. WOODWARD WAESCHE is a Principal Scientist in the Propulsion Division of Atlantic Research Corporation. He received his B.A. in Physics from Williams College and his M.A. and Ph.D. in Aerospace and Mechanical Sciences from Princeton University. He has a long and distinguished involvement in solid rocket ballistics, propellant combustion, flame spectra, combustion instability, and ramjet ignition and combustion. Dr. Waesche has an impressive background in both AIAA Technical Activities and Publications, including chairing the Task Force to evaluate the feasibility of publishing the *Journal of Propulsion and Power*. He is an Associate Fellow of AIAA, a Guggenheim Fellow, a recipient of the AIAA Space Flag Award, and is listed in *Who's Who in American Men of Science*.

For these reasons, I know that JPP will continue to grow and prosper under Woody's direction, and I welcome him to his new position. His photograph and biographical sketch follow.

I also would like to express my thanks to all those who reviewed papers for JPP during the past year. Their names are given below, and their work helps to assure the quality of the Journal.

William H. Heiser
AIAA Vice President—Publications

Reviewers for the *Journal of Propulsion and Power*—1986*
