# Journal of Aircraft

VOLUME 1 NUMBER 6

NOVEMBER-DECEMBER 1964

## CONTRIBUTED PAPERS

|                                                                                                                                 |                                 |     |
|---------------------------------------------------------------------------------------------------------------------------------|---------------------------------|-----|
| <b>Shaft Power Transmission Systems for Fixed-Wing, V/STOL, GEM, and Hydrofoil Vehicles</b> .....                               | N. B. Rothfuss and O. H. Meier  | 321 |
| <b>Performance, Operation, and Use of Low Aspect Ratio Jet-Flapped Wings</b> .....                                              | G. K. Korbacher                 | 327 |
| <b>Simulator Investigation of the Effects of <math>L_{\alpha}</math> and True Speed on Longitudinal Handling Qualities</b> .... | C. R. Chalk                     | 335 |
| <b>Operational Planning for General Aviation Facilities at Airports</b> .....                                                   | H. C. Burns and M. A. Warskow   | 345 |
| <b>Domain of the Convertible Rotor</b> .....                                                                                    | R. Hafner                       | 350 |
| <b>Contributions of the X-15 Program to Lifting Entry Technology</b> .....                                                      | E. C. Holleman and E. J. Adkins | 360 |
| <b>Practical Experience with Ground Effect Machines</b> .....                                                                   | F. A. H. Ashmead                | 367 |

## ENGINEERING NOTES

|                                                                  |                                                 |     |
|------------------------------------------------------------------|-------------------------------------------------|-----|
| <b>Modes and Frequencies of Pressurized Conical Shells</b> ..... | J. E. Goldberg, J. L. Bogdanoff, D. W. Alspaugh | 372 |
|------------------------------------------------------------------|-------------------------------------------------|-----|

## TECHNICAL COMMENTS

|                                                                                                           |                  |     |
|-----------------------------------------------------------------------------------------------------------|------------------|-----|
| <b>Comment on "Completely Automatic Weight Minimization Method for High-Speed Digital Computers</b> ..... | L. A. Schmit Jr. | 375 |
| <b>Further Comment on "Low-Altitude, High-Speed Handling and Riding Qualities"</b> .....                  | I. L. Ashkenas   | 377 |

## REPRINTED TABLE OF CONTENTS

|                                                                  |          |
|------------------------------------------------------------------|----------|
| <b>October AIAA Journal</b> .....                                | 378, 379 |
| <b>November AIAA Journal</b> .....                               | 380, 381 |
| <b>November-December Journal of Spacecraft and Rockets</b> ..... | 382      |

## 1964 JOURNAL OF AIRCRAFT INDEX

|                            |     |
|----------------------------|-----|
| <b>Author Index</b> .....  | 383 |
| <b>Subject Index</b> ..... | 384 |
