

Reviewers for *Journal of Spacecraft and Rockets*, October 1, 1967-September 30, 1968*

EACH year it is a great pleasure to acknowledge the assistance of reviewers. Many times the editors and the AIAA Publications Committee have discussed our procedures for handling papers, and, in considering ways to reduce the time to publication, it is sometimes suggested that our reviewing process be compromised in some way. However, each such discussion has ended with the recognition that

formal reviews by experts are of such great value to the authors and to the professional quality of our journals that no compromise can be seriously considered.

We are keenly aware that considerable effort and time are required for a good review. Many authors have expressed their sincere appreciation for your constructive criticism. Please accept our warmest thanks for this service to your profession.

* Because it is difficult to include the reviewers for October, November, and December 1968 in this issue of the Journal, they will be listed with the reviewer for 1969, in the January 1970 issue.
