

Chronological Index

T90-087 Natural Convection from Isothermal Plates Embedded in Thermally Stratified Porous Media. F. C. Lai, *Colorado State University*; I. Pop, *University of Cluj, Romania*; and F. A. Kulacki, *Colorado State University* (4, 4, p. 533) Technical Note

Technical Comment by Adrian Bejan, *Duke University* (6, 3, p. 574)

Reply (6, 3, p. 575)

T92-001 Rate Parameters for Coupled Vibration-Dissociation in a Generalized SSH Approximation. Surendra P. Sharma, Winifred M. Huo and Chul Park, *NASA Ames Research Center* (6, 1, p. 9) Article based on AIAA Paper 88-2714

T92-002 Monte Carlo Simulation of Vibrational Relaxation in Nitrogen. David P. Olynick, *North Carolina State University*; James N. Moss, *NASA Langley Research Center*; and H. A. Hassan, *North Carolina State University* (6, 1, p. 22) Article based on AIAA Paper 90-1767

T92-003 Numerical Simulation of Rarefied Gas Flow Through a Slit. Chan-Hong Chung, Duen-Ren Jeng, Kenneth J. De Witt and Theo G. Keith Jr., *University of Toledo* (6, 1, p. 27) Article based on AIAA Paper 90-1694

T92-004 Flat-Ended Circular Cylinder in Hypersonic Rarefied Flow. J. K. Harvey, M. C. Celenligil, R. G. Dominy and M. R. Gilmore, *Imperial College, England, UK* (6, 1, p. 35) Article based on AIAA Paper 89-1709

T92-005 Doppler Shift Effects on Infrared Band Models. J. A. Drakes, R. E. Hiers III and R. A. Reed, *Sverdrup Technology, Inc., Arnold AFB* (6, 1, p. 44) Article based on AIAA Paper 89-1678

T92-006 Three-Dimensional Thermal Structural Analysis of a Swept Cowl Leading Edge Subjected to Skewed Shock-Shock Interference Heating. Sandra P. Polesky, Pramote Dechaumphai and Christopher E. Glass, *NASA Langley Research Center*; and Ajay K. Pandey, *Lockheed Engineering & Sciences Company* (6, 1, p. 48) Article based on AIAA Paper 90-1710

T92-007 Modeling the Postcure Regime of Ablative Composite Materials. Zivorad R. Lazic and Jova P. Hrabar, *Military Technical Institute, Yugoslavia* (6, 1, p. 55) Article

T92-008 Thermal Gap Conductance: Effects of Gas Pressure and Mechanical Load. S. Song, *IBM*; M. M. Yovanovich and K. Nho, *University of Waterloo, Canada* (6, 1, p. 62) Article based on AIAA Paper 89-0429

T92-009 Thermal Performance of Thermal Pad Contact Heat Exchangers. G. P. Peterson and L. S. Fletcher, *Texas A&M University*; and David Blackler, *Rockwell International Corporation* (6, 1, p. 69) Article based on AIAA Paper 91-0364

T92-010 Finite Difference Solution for Transient Cooling of a Radiating-Conducting Semitransparent Layer. Robert Siegel, *NASA Lewis Research Center* (6, 1, p. 77) Article

T92-011 Rough-Wall Turbulent Heat Transfer with Step-Wall Temperature Boundary Conditions. Robert P. Taylor, M. H. Hosni, James W. Garner and Hugh W. Coleman, *Mississippi State University* (6, 1, p. 84) Article based on AIAA Paper 90-1501

T92-012 Periodically Fully Developed Flow in Channels with Conducting Blockages. S. H. Kim and N. K. Anand, *Texas A&M University* (6, 1, p. 91) Article

T92-013 Laminar Mixed Convection in a Vertical Tube with a Longitudinal Rectangle Insert. Jun-Dar Chen and Shou-Shing Hsieh, *National Sun Yat-Sen University, Taiwan, ROC* (6, 1, p. 98) Article

T92-014 Buoyant-Thermocapillary Flow with Nonuniform Supra-Heating: I. Liquid-Phase Behavior. David N. Schiller and William A. Sirignano, *University of California, Irvine* (6, 1, p. 105) Article

T92-015 Buoyant-Thermocapillary Flow with Nonuniform Supra-Heating: II. Two-Phase Behavior. David N. Schiller and William A. Sirignano, *University of California, Irvine* (6, 1, p. 113) Article

T92-016 Numerical Study of Natural Convection from Discrete Heat Sources in a Vertical Square Enclosure. G. Refai Ahmed and M. M. Yovanovich, *University of Waterloo, Canada* (6, 1, p. 121) Article based on AIAA Paper 90-0256

T92-017 Analytical Solution for the Integral Contact Line Evaporative Heat Sink. J. A. Schonberg and P. C. Wayner Jr., *Rensselaer Polytechnic Institute* (6, 1, p. 128) Article

T92-018 Effect of a Coaxial Jet on the Film-Cooling Performance Downstream of a Suddenly Expanded Swirling Flow. C. Gau and T. M. Huang, *National Cheng Kung University, Taiwan, ROC* (6, 1, p. 135) Article

T92-019 Analytical Two-Phase Flow Void Prediction Method. Reazul Huq, *BWR Thermal Hydraulics, SIEMENS/KWU, FRG*; and John L. Loth, *West Virginia University* (6, 1, p. 139) Article based on AIAA Paper 90-1738

T92-020 Experimental Investigation of Transition Boiling in Forced Convection. J. Orozco and L. Chen, *University of Illinois at Chicago* (6, 1, p. 145) Article

T92-021 Transient Thermal Analysis of Three Fast-Charging Latent Heat Storage Configurations. Therese K. Stovall, *Oak Ridge National Laboratory*; and Rao V. Arimilli, *University of Tennessee* (6, 1, p. 152) Article

T92-022 Surface Cooling by Transpiration of a Freezing Liquid. L. Schindel and R. Driftmyer, *Naval Surface Warfare Center* (6, 1, p. 158) Technical Note based on AIAA Paper 89-1774

T92-023 Microstructure Effects on the Conjugate Heat Transfer Along a Vertical Circular Pin. Rama Subba Reddy Gorla, *Cleveland State University* (6, 1, p. 160) Technical Note

T92-024 Mixed Convection of Low Prandtl Number Fluid in the Annuli of Rotating Cylinders. T. S. Lee, *National University of Singapore* (6, 1, p. 162) Technical Note

T92-025 Two-Dimensional Effects in a Triangular Convecting Fin. A. Aziz and H. Nguyen, *Gonzaga University* (6, 1, p. 165) Technical Note

T92-026 Entrance Heat Transfer in Isosceles and Right Triangular Ducts. R. Lakshminarayanan, *Ketema Inc.*; and A. Haji-Sheikh, *University of Texas at Arlington* (6, 1, p. 167) Technical Note

T92-027 Turbulent Heat Transfer in a Square Channel with Staggered Discrete Ribs. S. C. Lau, R. T. Kukreja and R. D. McMillin, *Texas A&M University* (6, 1, p. 171) Technical Note

T92-028 Practical Method for Calculating Radiation Incident upon a Panel in Orbit. Masao Furukawa, *National Space Development Agency, Japan* (6, 1, p. 173) Technical Note

T92-029 Laminar Forced Convection in Circular Duct Inserted with a Longitudinal Rectangular Plate. Jun-Dar Cheng and Shou-Shing Hsieh, *National Sun Yat-Sen University, Taiwan, ROC* (6, 1, p. 177) Technical Note

T92-030 Two-Dimensional Radiation in a Cylinder with Spatially Varying Albedo. H. Y. Li, M. N. Ozisik and J. R. Tsai, *North Carolina State University* (6, 1, p. 180) Technical Note

T92-031 Determination of Optical Properties by Two-Dimensional Scattering. W. W. Yuen and A. Ma, *University of California at Santa Barbara*; I. C. Hsu and G. R. Cunningham Jr., *Lockheed Missiles & Space Company, Inc.* (6, 1, p. 182) Technical Note based on AIAA Paper 90-1719

T92-032 Transient Laminar Forced Convection From a Circular Cylinder Using a Body-Fitted Coordinate System. Yue-Tzu Yang, Cha'o-Kuang Chen and Sang-Ru Wu, *National Cheng-Kung University, Taiwan, ROC* (6, 1, p. 184) Technical Note

T92-033 Electron Temperature and Electron Density in a Rarefied Air Plasma Jet. M. A. Dudeck, P. Lasgorceix, C. Voisin and S. Cayet, *Centre National de la Recherche Scientifique, France* (6, 1, p. 188) Technical Note

T92-034 Radiative Transfer in Multidimensional Enclosures with Specularly Reflecting Walls. A. S. Jamaluddin and W. A. Fiveland, *Babcock & Wilcox* (6, 1, p. 190) Technical Note

T92-035 Earth Atmospheric Entry Studies for Manned Mars Missions. M. E. Tauber and G. E. Palmer, *NASA Ames Research Center*; and Lily Yang, *Sterling Software* (6, 2, p. 193) Article based on AIAA Paper 90-1699

T92-036 Models of Energy-Exchange Mechanics Applicable to a Particle Simulation of Reactive Flow. Brian L. Haas, *Stanford University* (6, 2, p. 200) Article based on AIAA Paper 90-1749

T92-037 Diagonal Implicit Scheme for Computing Flows with Finite Rate Chemistry. Scott Eberhardt, *University of Washington*; and Scott Imlay, *Amtech Engineering, Inc.* (6, 2, p. 208) Article based on AIAA Paper 90-1577

T92-038 Modeling of an Argon Plasma in a Boundary-Layer Flow. Pascale Domingo, Dany Vandromme and P. Vervisch, *CORIA—URA, France* (6, 2, p. 217) Article

T92-039 Effect of Linear-Anisotropic Scattering on Spectral Emission from Cylindrical Plumes. S. T. Thynell, *Pennsylvania State University* (6, 2, p. 224) Article based on AIAA Paper 90-0137

T92-040 Two-Dimensional Radiative Transfer in a Cylindrical Layered Medium with Reflecting Interfaces. N. M. Reguigui and R. L. Dougherty, *Oklahoma State University* (6, 2, p. 232) Article based on AIAA Paper 90-1779

T92-041 Discrete-Ordinates Solution of Radiative Transfer Equation in Nonaxisymmetric Cylindrical Enclosures. A. S. Jamaluddin, *Babcock & Wilcox, Alliance Research Center*; and P. J. Smith, *University of Utah* (6, 2, p. 242) Article

T92-042 Effects of g-Jitter on a Thermally Buoyant Flow. F. Tsau, S. Elghobashi and W. A. Sirignano, *University of California at Irvine* (6, 2, p. 246) Article based on AIAA Paper 90-0653

T92-043 Natural Convection Heat Transfer in Rectangular Cavities Partially Heated from Below. M. Hasnaoui, E. Bilgen and P. Vasseur, *Ecole Polytechnique de Montréal, Canada* (6, 2, p. 255) Article

T92-044 Numerical Solutions of Natural Convection in Enclosure with Boundary Condition Switching Method. Z. Fang and I. Paraschivoiu, *Ecole Polytechnique de Montréal, Canada* (6, 2, p. 265) Article

T92-045 Wall Heating Effects in Mixed Convection in Vertical Annulus with Variable Properties. F. K. Tsou, *Drexel University*; Win Aung and Hamid E. Moghadam, *Howard University*; and C. Gau, *National Cheng Kung University, Taiwan, ROC* (6, 2, p. 273) Article

T92-046 Laminar Mixed Convection from a Uniform Heat Flux Horizontal Cylinder in a Crossflow. R. A. Ahmad, *Thiokol Corporation*; and Z. H. Qureshi, *Westinghouse Savannah River Company* (6, 2, p. 277) Article based on AIAA Paper 91-0383

T92-047 Laminar Coupled Flow Downstream of an Asymmetric Sudden Expansion. George C. Vradis and Lara VanNostrand, *Polytechnic University* (6, 2, p. 288) Article based on AIAA Paper 91-0162

T92-048 Heat Transfer in the Entrance Region of Semicircular Ducts with Internal Fins. H. Y. Zhang and M. A. Ebdian, *Florida International University* (6, 2, p. 296) Article

T92-049 Experimental Investigation of Film Cooling Effectiveness for Slots of Various Exit Geometries. M. E. Taslim, *Northeastern University*; S. D. Spring and B. P. Mehlman, *GE Aircraft Engines* (6, 2, p. 302) Article based on AIAA Paper 90-2266

T92-050 Laminar Impingement Jet Mach Number and Temperature Effects on Heat Transfer. Tarit Kumar Bose, *Indian Institute of Technology, India* (6, 2, p. 308) Article

T92-051 Steady-State Post-Critical Heat Flux Heat Transfer to a Refrigerant. J. M. Paske, P. Papadopoulos, C. M. George, D. M. France and W. J. Minkowycz, *University of Illinois at Chicago* (6, 2, p. 314) Article

T92-052 Filmwise Condensation from a Flowing Vapor onto Isothermal, Axisymmetric Bodies. Anthony M. Jacobi, *Johns Hopkins University* (6, 2, p. 321) Article

T92-053 Transient Solidification of a Binary Mixture in an Inclined Rectangular Cavity. W.-Z. Cao and D. Poulikakos, *University of Illinois at Chicago* (6, 2, p. 326) Article

T92-054 Convective Thermal Ignition of an Individual Polymethylmethacrylate Particle. Gwo-Guang Wang and Jing-Tang Yang, *National Tsing Hua University, Taiwan, ROC* (6, 2, p. 333) Article

T92-055 Thermal-Structural Finite Element Analysis Using Linear Flux Formulation. Ajay K. Pandey, *Lockheed Engineering & Sciences Company*; Pramote Dechaumphai and Allan R. Wieting, *NASA Langley Research Center* (6, 2, p. 341) Article based on AIAA Paper 89-1224 CP891

T92-056 Transient Conjugated Heat Transfer From a Rectangular Hot Film. P. W. Liang and K. D. Cole, *University of Nebraska-Lincoln* (6, 2, p. 349) Article

T92-057 Thermal Contacts in Transient States: A New Model and Two Experiments. Alain Degiovanni, Anne-Sophie Lamine and Christian Moyne, *Unité de Recherche Associée, France* (6, 2, p. 356) Article based on AIAA Paper 90-0542

T92-058 Transient Behavior of Axially Grooved Heat Pipes with Thermal Energy Storage. Ming-Jr Chang and Louis C. Chow, *University of Kentucky*; Won Soon Chang and Micheal J. Morgan, *Wright Research and Development Center, Wright-Patterson AFB* (6, 2, p. 364) Article based on AIAA Paper 90-1754

T92-059 Use of Membrane Transport in an Absorption Thermal Transfer Cycle. J. S. Yu, *West Virginia Institute of Technology*; W. S. Chang and W. L. Haskin, *Wright Laboratory, Wright-Patterson AFB* (6, 2, p. 371) Article based on AIAA Paper 90-1683

T92-060 Application of Laser Holographic Interferometry to Temperature Measurements in Buoyant Air Jets. Keh-Chin Chang, Jim-Ming Huang and Sheng-Mao Tieng, *National Cheng-Kung University, Taiwan, ROC* (6, 2, p. 377) Technical Note

T92-061 Convective Flows in Enclosures with Vertical Temperature or Concentration Gradients. L. W. Wang, *Yuan-Ze Institute of Technology, Taiwan, ROC*; A. T. Chai, *NASA Lewis Research Center*; and D. J. Sun, *National Cheng Kung University, Taiwan, ROC* (6, 2, p. 379) Technical Note based on AIAA Paper 89-0069

T92-062 Influence of Nonuniform Particle Temperature on the Radiatively Active Particle Ignition. Seung Wook Baek, *Korea Advanced Institute of Science and Technology* (6, 2, p. 382) Technical Note based on AIAA Paper 91-0483

T92-063 Nonequilibrium Chemical and Radiation Coupling, Part I: Theory and Models. Leland A. Carlson and Thomas A. Gally, *Texas A&M University* (6, 3, p. 385) Article based on AIAA Paper 91-0569

T92-064 Nonequilibrium Chemical and Radiation Coupling, Part II: Results for AOTV Flowfields. Thomas A. Gally and Leland A. Carlson, *Texas A&M University* (6, 3, p. 392) Article based on AIAA Paper 91-0569

T92-065 Direct Simulation of Re-Entry Flows with Ionization. Ann B. Carlson, *NASA Langley Research Center*; and H. A. Hassan, *North Carolina State University* (6, 3, p. 400) Article based on AIAA Paper 90-0144

T92-066 Thermochemical Nonequilibrium Flow Computations of Flow Around the Aeroassist Flight Experiment. Grant Palmer, *NASA Ames Research Center* (6, 3, p. 405) Article based on AIAA Paper 90-1702

T92-067 Stagnation Point Nonequilibrium Radiative Heating and the Influence of Energy Exchange Models. Lin C. Hartung, Robert A. Mitcheltree and Peter A. Gnoffo, *NASA Langley Research Center* (6, 3, p. 412) Article based on AIAA Paper 91-0571

T92-068 Accuracy of the Burnett Equations for Hypersonic Real Gas Flows. Forrest E. Lumpkin III, *NASA Ames Research Center*; and Dean R. Chapman, *Stanford University* (6, 3, p. 419) Article based on AIAA Paper 91-0771

T92-069 Solution of the Parabolized Navier-Stokes Equations Using Osher's Upwind Scheme. R. A. Gerbsch and R. K. Agarwal, *McDonnell Douglas Research Laboratories* (6, 3, p. 426) Article based on AIAA Paper 90-0392

T92-070 Laminar Heat Transfer to Blunt Cones in High-Enthalpy Hypervelocity Flows. S. L. Gai, *University College, University of New South Wales, Australia*; and W. S. Joe, *Australian National University* (6, 3, p. 433) Article

T92-071 Arc Heater Nozzle Heating Test with Hydrogen Combustion Products. Bernard S. C. Kim, Stanley L. Stoy and Herschel J. Fivel, *McDonnell Douglas Missile Systems Company* (6, 3, p. 439) Article based on AIAA Paper 91-1413

T92-072 Temperature Measurement of Reacting Flowfield by Phase-Shifting Holographic Interferometry. Sheng Mao Tieng and Wen Zen Lai, *National Cheng Kung University, Taiwan, ROC* (6, 3, p. 445) Article based on AIAA Paper 91-1388

T92-073 Arc Transition and Growth of Big-Arcs in Magneto-hydrodynamics Generator Channels. K. A. Satheesh, Y. Okumura and K. Okazaki, *Toyohashi University of Technology, Japan* (6, 3, p. 452) Article

T92-074 Chlorine Utilization Study for Uniform-Droplet Singlet Delta Oxygen Generators. Craig C. Woolhiser, *Phillips Laboratory, Kirtland AFB*; C. Randall Truman, *University of New Mexico*; Eric J. Jumper, *University of Notre Dame*; and Bruce S. Masson, *Phillips Laboratory, Kirtland AFB* (6, 3, p. 460) Article based on AIAA Paper 90-1576

T92-075 Thermal Radiation Effects on a Shocked Particle-Laden Gas. J. L. Haferman, R. G. Schmitt, T. F. Smith and P. B. Butler, *University of Iowa* (6, 3, p. 467) Article

T92-076 Thermophoresis of a Radiating Aerosol in Laminar Boundary-Layer Flow. G. Jia, J. W. Cipolla Jr. and Y. Yener, *Northeastern University* (6, 3, p. 476) Article

T92-077 Fixed Conductance Heat Pipe Performance with a Liquid Slug. R. P. Bobco and B. L. Drolen, *Hughes Aircraft Company* (6, 3, p. 483) Article based on AIAA Paper 90-1794

T92-078 Heat Pipe and Surface Mass Transfer Cooling of Hypersonic Vehicle Structures. Gene T. Colwell, *Georgia Institute of Technology*; and James M. Modlin, *U. S. Army Strategic Defense Command* (6, 3, p. 492) Article

T92-079 Surface Cooling of Scramjet Engine Inlets Using Heat Pipe, Transpiration, and Film Cooling. James M. Modlin, *U. S. Army Strategic Defense Command*; and Gene T. Colwell, *Georgia Institute of Technology* (6, 3, p. 500) Article

T92-080 Effect of Surface Material Properties and Surface Characteristics in Evaporative Spray Cooling. M. S. Sehmbe, M. R. Pais and L. C. Chow, *University of Kentucky* (6, 3, p. 505) Article based on AIAA Paper 90-1729

T92-081 Turbulent Transport Phenomena in a Channel with Periodic Rib Turbulators. T.-M. Liou, J.-J. Hwang and S.-H. Chen, *National Tsing Hua University, Taiwan, ROC* (6, 3, p. 513) Article

T92-082 Experimental Verification of Scaling Parameters for Thermal Stratification. H.-C. Ji, *Washington University*; S. H. Schwartz, *California State University*; T. N. Lovrich, *McDonnell Douglas Corporation*; J. I. Hochstein, *Memphis State University*; and L. A. Holmes, *Modesto College* (6, 3, p. 522) Article

T92-083 Thermophysical Properties of Lysozyme (Protein) Solutions. Jiaching Liu and Wen-Jei Yang, *University of Michigan* (6, 3, p. 531) Article

T92-084 Conduction—Radiation Interaction in Absorbing, Emitting and Anisotropically Scattering Media with Variable Thermal Conductivity. Hsin-Sen Chu and Chung-Jen Tseng, *National Chiao Tung University, Taiwan, ROC* (6, 3, p. 537) Technical Note

T92-085 Second-Law Optimization of Forced Convection of Non-Newtonian Fluids in Ducts. S. K. Rastogi and D. Poulikakos, *University of Illinois at Chicago* (6, 3, p. 540) Technical Note

T92-086 Boundary Heat Fluxes for Spectral Radiation from a Uniform Temperature Rectangular Medium. Robert Siegel, *NASA Lewis Research Center* (6, 3, p. 543) Technical Note

T92-087 Acceleration-Induced Depriming of External Artery Heat Pipes. X. F. Peng and G. P. Peterson, *Texas A&M University* (6, 3, p. 546) Technical Note

T92-088 Combined Conjugated Heat Transfer from a Scattering Medium. M. Kassemi, *NASA Lewis Research Center*; and B. T. F. Chung, *University of Akron* (6, 3, p. 548) Technical Note

T92-089 Convective Heat Transfer of a Particulate Suspension. Ali J. Chamkha, *Fleetguard, Inc.* (6, 3, p. 551) Technical Note

T92-090 Transient Combined Conduction and Radiation in Anisotropically Scattering Spherical Media. Hsin-Sen Chu and Ling-Chia Weng, *National Chiao Tung University, Taiwan, ROC* (6, 3, p. 553) Technical Note

T92-091 Backward Monte Carlo Modeling for Rocket Plume Base Heating. H. F. Nelson, *University of Missouri—Rolla* (6, 3, p. 556) Technical Note

T92-092 Free Convection About Vertical Needles Embedded in a Saturated Porous Medium. Chunmei Peng, Taofang Zeng and Gang Chen, *Huazhong University of Science and Technology, PRC* (6, 3, p. 558) Technical Note

T92-093 Rotational Temperature Measurements in an Arc Jet. G. Cernogora, G. Gousset and L. Hochard, *Université Paris-Sud, France*; M. Dudeck, P. Lasgorceix and V. Lago, *Centre National de la Recherche Scientifique, France* (6, 3, p. 561) Technical Note

T92-094 Analytical Investigation of the Rewetting of Grooved Surfaces. X. F. Peng and G. P. Peterson, *Texas A&M University* (6, 3, p. 563) Technical Note

T92-095 Flowfield Analysis for High-Enthalpy Arc Heaters. Frank S. Milos, *NASA Ames Research Center* (6, 3, p. 565) Technical Note based on AIAA Paper 91-1384

T92-096 Source Function Approach for Radiative Heat Transfer Analysis. J. Huan and M. H. N. Naraghi, *Manhattan College* (6, 3, p. 568) Technical Note

T92-097 Transient Heat-Pipe Modeling: A Quasisteady, Incompressible Vapor Model. W. Jerry Bowman, *U. S. Air Force Institute of Technology, Wright-Patterson AFB*; Robert C. Winn and Harold L. Martin, *U. S. Air Force Academy* (6, 3, p. 571) Technical Note

T92-100 Correlation Transfer: Application of Radiative Transfer Solution Methods to Photon Correlation Problems. B. J. Ackerson, R. L. Dougherty, N. M. Reguigui and U. Nobbmann, *Oklahoma State University* (6, 4, p. 577) Article based on AIAA Paper 91-1433

T92-101 Dependent Scattering by Parallel Fibers: Effects of Multiple Scattering and Wave Interference. Siu-Chun Lee, *Applied Science Laboratory, Inc.* (6, 4, p. 589) Article based on AIAA Paper 91-1398

T92-102 Refractive Index Effects on Radiative Behavior of a Heated Absorbing-Emitting Layer. C. M. Spuckler and R. Siegel, *NASA Lewis Research Center* (6, 4, p. 596) Article

T92-103 Prediction of Radiative Transfer in Cylindrical Enclosures with the Finite Volume Method. E. H. Chui and G. D. Raithby, *University of Waterloo, Canada*; and P. M. J. Hughes, *Energy Research Laboratories, Canada* (6, 4, p. 605) Article

T92-104 Analytic Solution of the Transient Behavior of Radiation-Backscattering Heat Shields. Charles J. Cornelison and John T. Howe, *NASA Ames Research Center* (6, 4, p. 612) Article based on AIAA Paper 91-1322

T92-105 Development of a Nonequilibrium Radiative Heating Prediction Method for Coupled Flowfield Solutions. Lin C. Hartung, *NASA Langley Research Center* (6, 4, p. 618) Article based on AIAA Paper 91-1406

T92-106 Monte Carlo Simulation of Nonequilibrium Shock Fronts. David P. Olynick, *North Carolina State University*; James N. Moss, *NASA Langley Research Center*; and H. A. Hassan, *North Carolina State University* (6, 4, p. 626) Article based on AIAA Paper 91-1341

T92-107 Radiation Modeling with Direct Simulation Monte Carlo. Ann B. Carlson, *NASA Langley Research Center*; and H. A. Hassan, *North Carolina State University* (6, 4, p. 631) Article based on AIAA Paper 91-1409

T92-108 Three-Dimensional Direct Particle Simulation on the Connection Machine. Leonardo Dagum, *NASA Ames Research Center* (6, 4, p. 637) Article based on AIAA Paper 91-1365

T92-109 Vibration-Dissociation Coupling in Nonequilibrium Flows. D. Brian Landrum and Graham V. Candler, *North Carolina State University* (6, 4, p. 643) Article based on AIAA Paper 91-0466

T92-110 Spacecraft Thermal Energy Accommodation from Atomic Recombination. Karen L. Carleton and William J. Marinelli, *Physical Sciences, Inc.* (6, 4, p. 650) Article based on AIAA Paper 91-1337

T92-111 Practical Model for Molecular Contaminant Deposition Kinetics. A. P. M. Glassford, *Lockheed Missiles & Space Company* (6, 4, p. 656) Article

T92-112 Thermal Control Coatings Performance at Near Geosynchronous Altitude. D. F. Hall and A. A. Fote, *The Aerospace Corporation* (6, 4, p. 665) Article based on AIAA Paper 91-1325

T92-113 Bidirectional Reflectance and Specularity of Twelve Spacecraft Thermal Control Materials. B. L. Drolen, *Hughes Aircraft Company* (6, 4, p. 672) Article based on AIAA Paper 91-1326

T92-114 Normal Spectral Emittance of W-Re-HfC and W-Re-ThO₂ Alloys. Bang-Hung Tsao and Mysore L. Ramalingam, *UES, Inc.*; N. O. Moraga, *Universidad de Santiago de Chile*; and D. L. Jacobson, *Arizona State University* (6, 4, p. 680) Article

T92-115 Transient Behavior of Heat Pipes with Thermal Energy Storage Under Reversed-Pulsed Heat Loads. Ming-Jr Chang and Louis C. Chow, *University of Kentucky*; Won Soon Chang and Micheal Morgan, *Wright-Patterson AFB* (6, 4, p. 685) Article based on AIAA Paper 91-1404

T92-116 Iterative Temperature Calculation Method for Rectangular Sandwich Panel Fins. Katsuhiko Nakajima, *NTT Radio Communication Systems Laboratories, Japan* (6, 4, p. 693) Article

T92-117 Enhanced Cooling of Electronic Components by Flow Oscillation. Kaveh Azar, *AT&T Bell Laboratories* (6, 4, p. 700) Article based on AIAA Paper 90-1746

T92-118 Measurements of Heat Transfer and Flow Structure in Heated Vertical Channels. C. Gau, K. A. Yih and Win Aung, *National Cheng Kung University, Taiwan, ROC* (6, 4, p. 707) Article based on AIAA Paper 90-1723

T92-119 Combined Natural Convection and Radiation from Heated Cylinders Inside a Container. Z. Zhao, D. Poulikakos and Z. Ren, *University of Illinois at Chicago* (6, 4, p. 713) Article

T92-120 Effect of Free Surface Shape on Combined Thermocapillary and Natural Convection. Yasuhiro Kamotani, *Case Western Reserve University*; and Jonathan Platt, *NASA Lewis Research Center* (6, 4, p. 721) Article

T92-121 Investigation of Mixed Convection About a Rotating Sphere by Holographic Interferometry. Sheng Mao Tieng and An Cherng Yan, *National Cheng Kung University, Taiwan, ROC* (6, 4, p. 727) Article

T92-122 Visualization of a Solidification Process in Microgravity. A. Iwasaki, S. Hosokawa, I. Kudo and M. Tanimoto, *Electrotechnical Laboratory, Japan*; H. Sakurai, Y. Arai, T. Watanabe and S. Kawai, *Ishikawajima-Harima Heavy Industry, Japan*; M. Ishikawa, *Mitsubishi Research Institute, Japan*; and S. Kamei, *Mitsubishi Research Institute, Japan* (6, 4, p. 733) Article

T92-123 Investigation of Liquid Droplet Evaporation in Subcritical and Supercritical Gaseous Environments. H. Jia and G. Gogos, *Rutgers University* (6, 4, p. 738) Article

T92-124 Bias in Emission Absorption Measurements of Temperature and Atomic Density. Leslie E. Bauman, *Mississippi State University* (6, 4, p. 746) Article based on AIAA Paper 91-0212

T92-125 Effect of Thermal Creep on Buoyancy-Induced Flows in Low-Gravity. M. Vedha-Nayagam, *Wyle Laboratories*; and Daniel W. Mackowski, *Auburn University* (6, 4, p. 753) Technical Note

U.S. Postal Service STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION <i>Required by 39 U.S.C. 3685</i>			
1A. Title of Publication Journal of Thermophysics and Heat Transfer		1B. PUBLICATION NO. 0 0 0 7 6 5	2. Date of Filing 9/25/92
3. Frequency of Issue Quarterly		3A. No. of Issues Published Annually 4	3B. Annual Subscription Price \$24.00
4. Complete Mailing Address of Known Office of Publication (Street, City, County, State and ZIP+4 Code) (Not printers) 370 L'Enfant Promenade, S.W., Washington, D.C. 20024			
5. Complete Mailing Address of the Headquarters of General Business Offices of the Publisher (Not printer) same as above			
6. Full Names and Complete Mailing Address of Publisher, Editor, and Managing Editor (This item MUST NOT be blank)			
Publisher (Name and Complete Mailing Address) American Institute of Aeronautics and Astronautics, Inc. (same as above)			
Editor (Name and Complete Mailing Address) Alfred L. Crosbie (same as above)			
Managing Editor (Name and Complete Mailing Address) Heather A. Brennan (same as above)			
7. Owner (If owned by a corporation, its name and address must be stated and also immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual must be given. If the publication is published by a nonprofit organization, its name and address must be stated.) (Item must be completed.)			
Full Name		Complete Mailing Address	
American Institute of Aeronautics and Astronautics, Inc.		same as above	
8. Known Bondholders, Mortgagees, and Other Security Holders Owning or Holding 1 Percent or More of Total Amount of Bonds, Mortgages or Other Securities (If there are none, so state)			
Full Name		Complete Mailing Address	
none			
9. For Completion by Nonprofit Organizations Authorized to Mail at Special Rates (DMM Section 423.12 only) The purpose, function, and nonprofit status of this organization and the exempt status for Federal income tax purposes (Check one)			
(1) <input checked="" type="checkbox"/> Has Not Changed During Preceding 12 Months		(2) <input type="checkbox"/> Has Changed During Preceding 12 Months (If changed, publisher must submit explanation of change with this statement.)	
10. Extent and Nature of Circulation (See instructions on reverse side)		Average No. Copies Each Issue During Preceding 12 Months	Actual No. Copies of Single Issue Published Nearest to Filing Date
A. Total No. Copies (Net Press Run)		1850	2000
B. Paid and/or Requested Circulation			
1. Sales through dealers and carriers, street vendors and counter sales		---	---
2. Mail Subscription (Paid and/or requested)		1231	1175
C. Total Paid and/or Requested Circulation (Sum of 10B1 and 10B2)		1231	1175
D. Free Distribution by Mail, Carrier or Other Means Samples, Complimentary, and Other Free Copies		96	96
E. Total Distribution (Sum of C and D)		1327	1271
F. Copies Not Distributed			
1. Office use, left over, unaccounted, spoiled after printing		523	729
2. Return from News Agents		---	---
G. TOTAL (Sum of E, F1 and 2—should equal net press run shown in A)		1850	2000
11. I certify that the statements made by me above are correct and complete		Signature and Title of Editor, Publisher, Business Manager, or Owner Heather A. Brennan Director, Journals
