

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Laminar Mixed Convection from a Uniform Heat Flux Horizontal Cylinder in a Cross-flow T92-046

Aerospace Plane

Surface Cooling of Scramjet Engine Inlets Using Heat Pipe, Transpiration, and Film Cooling T92-079

Manufacturing

Thermophysical Properties of Lysozyme (Protein) Solutions T92-083

Energy

Conservation

Second-Law Optimization of Forced Convection of Non-Newtonian Fluids in Ducts T92-085

Transient Solidification of a Binary Mixture in an Inclined Rectangular Cavity T92-053

Flywheels

Convective Thermal Ignition of an Individual Polymethylmethacrylate Particle T92-054

Magnetohydrodynamic Power Generation

Bias in Emission Absorption Measurements of Temperature and Atomic Density T92-124

Arc Transition and Growth of Big-Arcs in Magnetohydrodynamics Generator Channels T92-073

Nuclear Fission

Analytical Two-Phase Flow Void Prediction Method T92-019

Rotating Machinery

Turbulent Heat Transfer in a Square Channel with Staggered Discrete Ribs T92-027

Fluid Dynamics

Boundary Layers and Heat Transfer—Laminar

Effect of Thermal Creep on Buoyancy-Induced Flows in Low-Gravity T92-125

Free Convection About Vertical Needles Embedded in a Saturated Porous Medium T92-092

Laminar Impingement Jet Mach Number and Temperature Effects on Heat Transfer T92-050

Wall Heating Effects in Mixed Convection in Vertical Annulus with Variable Properties T92-045

Numerical Solutions of Natural Convection in Enclosure with Boundary Condition Switching Method T92-044

Entrance Heat Transfer in Isosceles and Right Triangular Ducts T92-026

Mixed Convection of Low Prandtl Number Fluid in the Annuli of Rotating Cylinders T92-024

Microstructure Effects on the Conjugate Heat Transfer Along a Vertical Circular Pin T92-023

Boundary Layers and Heat Transfer—Turbulent

Wall Heating Effects in Mixed Convection in Vertical Annulus with Variable Properties T92-045

Surface Cooling by Transpiration of a Freezing Liquid T92-022

Rough-Wall Turbulent Heat Transfer with Step-Wall Temperature Boundary Conditions T92-011

Computational Fluid Dynamics

Solution of the Parabolized Navier-Stokes Equations Using Osher's Upwind Scheme T92-069

Accuracy of the Burnett Equations for Hypersonic Real Gas Flows T92-068

Thermochemical Nonequilibrium Flow Computations of Flow Around the Aeroassist Flight Experiment T92-066

Laminar Impingement Jet Mach Number and Temperature Effects on Heat Transfer T92-050

Heat Transfer in the Entrance Region of Semicircular Ducts with Internal Fins T92-048

Laminar Mixed Convection from a Uniform Heat Flux Horizontal Cylinder in a Cross-flow T92-046

Diagonal Implicit Scheme for Computing Flows with Finite Rate Chemistry T92-037

Mixed Convection of Low Prandtl Number Fluid in the Annuli of Rotating Cylinders T92-024

Microstructure Effects on the Conjugate Heat Transfer Along a Vertical Circular Pin T92-023

Buoyant-Thermocapillary Flow with Non-uniform Supra-Heating: II. Two-Phase Behavior T92-015

Buoyant-Thermocapillary Flow with Non-uniform Supra-Heating: I. Liquid-Phase Behavior T92-014

Numerical Simulation of Rarefied Gas Flow Through a Slit T92-003

Hydrodynamics

Acceleration-Induced Depriming of External Artery Heat Pipes T92-087

Hypersonic Flow

Three-Dimensional Direct Particle Simulation on the Connection Machine T92-108

Monte Carlo Simulation of Nonequilibrium Shock Fronts T92-106

Laminar Heat Transfer to Blunt Cones in High-Enthalpy Hypervelocity Flows T92-070

Solution of the Parabolized Navier-Stokes Equations Using Osher's Upwind Scheme T92-069

Accuracy of the Burnett Equations for Hypersonic Real Gas Flows T92-068

Thermochemical Nonequilibrium Flow Computations of Flow Around the Aeroassist Flight Experiment T92-066

Direct Simulation of Re-Entry Flows with Ionization T92-065

Diagonal Implicit Scheme for Computing Flows with Finite Rate Chemistry T92-037

Models of Energy-Exchange Mechanics Applicable to a Particle Simulation of Reactive Flow T92-036

Inlet, Nozzle, Diffusor, and Channel Flows

Surface Cooling by Transpiration of a Freezing Liquid T92-022

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Application of Laser Holographic Interferometry to Temperature Measurements in Buoyant Air Jets T92-060

Experimental Investigation of Film Cooling Effectiveness for Slots of Various Exit Geometries T92-049

Multiphase Flows

Investigation of Liquid Droplet Evaporation in Subcritical and Supercritical Gaseous Environments T92-123

Convective Heat Transfer of a Particulate Suspension T92-089

Thermal Radiation Effects on a Shocked Particle-Laden Gas T92-075

Entrance Heat Transfer in Isosceles and Right Triangular Ducts T92-026

Experimental Investigation of Transition Boiling in Forced Convection T92-020

Analytical Two-Phase Flow Void Prediction Method T92-019

Plasmadynamics and MHD

Bias in Emission Absorption Measurements of Temperature and Atomic Density T92-124

Flowfield Analysis for High-Enthalpy Arc Heaters T92-095

Arc Transition and Growth of Big-Arcs in Magnetohydrodynamics Generator Channels T92-073

Electron Temperature and Electron Density in a Rarefied Air Plasma Jet T92-033

Rarefied Flows

Three-Dimensional Direct Particle Simulation on the Connection Machine T92-108

Radiation Modeling with Direct Simulation Monte Carlo T92-107

Monte Carlo Simulation of Nonequilibrium Shock Fronts T92-106

Rotational Temperature Measurements in an Arc Jet T92-093

Accuracy of the Burnett Equations for Hypersonic Real Gas Flows T92-068

Direct Simulation of Re-Entry Flows with Ionization T92-065

Models of Energy-Exchange Mechanics Applicable to a Particle Simulation of Reactive Flow T92-036

Electron Temperature and Electron Density in a Rarefied Air Plasma Jet T92-033

Numerical Simulation of Rarefied Gas Flow Through a Slit T92-003

Reacting Flows and Combustion

Vibration-Dissociation Coupling in Nonequilibrium Flows T92-109

Monte Carlo Simulation of Nonequilibrium Shock Fronts T92-106

Chlorine Utilization Study for Uniform-Droplet Singlet Delta Oxygen Generators T92-074

- Temperature Measurement of Reacting Flowfield by Phase-Shifting Holographic Interferometry T92-072
Modeling of an Argon Plasma in a Boundary-Layer Flow T92-038
Flat-Ended Circular Cylinder in Hypersonic Rarefied Flow T92-004

Separated Flows

- Convective Thermal Ignition of an Individual Polymethylmethacrylate Particle T92-054

Shock Waves and Detonations

- Thermal Radiation Effects on a Shocked Particle-Laden Gas T92-075

Supersonic Flow

- Flat-Ended Circular Cylinder in Hypersonic Rarefied Flow T92-004

Guidance, Control, and Dynamics Technology

Information Processing

- Convective Flows in Enclosures with Vertical Temperature or Concentration Gradients T92-061

Interdisciplinary Topics

Aerospace Management

- Surface Cooling by Transpiration of a Freezing Liquid T92-022

Analytical and Numerical Methods

- Three-Dimensional Thermal Structural Analysis of a Swept Cowl Leading Edge Subjected to Skewed Shock-Shock Interference Heating T92-006

Lasers and Laser Applications

- Investigation of Mixed Convection About a Rotating Sphere by Holographic Interferometry T92-121
Correlation Transfer: Application of Radiative Transfer Solution Methods to Photon Correlation Problems T92-100
Chlorine Utilization Study for Uniform-Droplet Singlet Delta Oxygen Generators T92-074

- Temperature Measurement of Reacting Flowfield by Phase-Shifting Holographic Interferometry T92-072

- Two-Dimensional Radiative Transfer in a Cylindrical Layered Medium with Reflecting Interfaces T92-040

Sensor Systems

- Transient Conjugated Heat Transfer From a Rectangular Hot Film T92-056

Launch Vehicle and Missile (LV/M) Technology

Thermal Protection Systems

- Dependent Scattering by Parallel Fibers: Effects of Multiple Scattering and Wave Interference T92-101
Backward Monte Carlo Modeling for Rocket Plume Base Heating T92-091

- Heat Pipe and Surface Mass Transfer Cooling of Hypersonic Vehicle Structures T92-078

- Modeling the Postcure Regime of Ablative Composite Materials T92-007

Propulsion

Airbreathing Propulsion

- Experimental Investigation of Film Cooling Effectiveness for Slots of Various Exit Geometries T92-049

Spacecraft Technology

Aerobraking Configurations/ Aerothermodynamics

- Three-Dimensional Direct Particle Simulation on the Connection Machine T92-108
Laminar Heat Transfer to Blunt Cones in High-Enthalpy Hypervelocity Flows T92-070

- Nonequilibrium Chemical and Radiation Coupling, Part II: Results for AOTV Flowfields T92-064

- Nonequilibrium Chemical and Radiation Coupling, Part I: Theory and Models T92-063

- Earth Atmospheric Entry Studies for Manned Mars Missions T92-035

Aerobraking Flight Mechanics

- Earth Atmospheric Entry Studies for Manned Mars Missions T92-035

Space Experiments

- Flat-Ended Circular Cylinder in Hypersonic Rarefied Flow T92-004

Space Processing

- Effect of Thermal Creep on Buoyancy-Induced Flows in Low-Gravity T92-125
Thermophysical Properties of Lysozyme (Protein) Solutions T92-083
Buoyant-Thermocapillary Flow with Non-uniform Supra-Heating: II. Two-Phase Behavior T92-015
Buoyant-Thermocapillary Flow with Non-uniform Supra-Heating: I. Liquid-Phase Behavior T92-014

Spacecraft Contamination/ Sterilization

- Thermal Control Coatings Performance at Near Geosynchronous Altitude T92-112

Spacecraft Power

- Transient Thermal Analysis of Three Fast-Charging Latent Heat Storage Configurations T92-021

Spacecraft Propulsion System Integration

- Experimental Verification of Scaling Parameters for Thermal Stratification T92-082

Spacecraft Sensor Systems

- Practical Model for Molecular Contaminant Deposition Kinetics T92-111

Spacecraft Thermal Management

- Transient Behavior of Heat Pipes with Thermal Energy Storage Under Reversed-Pulsed Heat Loads T92-115

- Dependent Scattering by Parallel Fibers: Effects of Multiple Scattering and Wave Interference T92-101
Effect of Surface Material Properties and Surface Characteristics in Evaporative Spray Cooling T92-080

Structural Mechanics and Materials

Structural Finite Elements

- Thermal-Structural Finite Element Analysis Using Linear Flux Formulation T92-055

Thermal Effects

- Thermal-Structural Finite Element Analysis Using Linear Flux Formulation T92-055
Three-Dimensional Thermal Structural Analysis of a Swept Cowl Leading Edge Subjected to Skewed Shock-Shock Interference Heating T92-006

Thermophysics and Heat Transfer

Ablation, Pyrolysis, Thermal Decomposition and Degradation

- Convective Thermal Ignition of an Individual Polymethylmethacrylate Particle T92-054
Modeling the Postcure Regime of Ablative Composite Materials T92-007

Aerothermodynamics/ Thermal Protection

- Spacecraft Thermal Energy Accommodation from Atomic Recombination T92-110
Vibration-Dissociation Coupling in Nonequilibrium Flows T92-109
Analytic Solution of the Transient Behavior of Radiation-Backscattering Heat Shields T92-104

- Dependent Scattering by Parallel Fibers: Effects of Multiple Scattering and Wave Interference T92-101

- Backward Monte Carlo Modeling for Rocket Plume Base Heating T92-091

- Transient Combined Conduction and Radiation in Anisotropically Scattering Spherical Media T92-090

- Conduction—Radiation Interaction in Absorbing, Emitting and Anisotropically Scattering Media with Variable Thermal Conductivity T92-084

- Heat Pipe and Surface Mass Transfer Cooling of Hypersonic Vehicle Structures T92-078

- Arc Heater Nozzle Heating Test with Hydrogen Combustion Products T92-071

- Laminar Heat Transfer to Blunt Cones in High-Enthalpy Hypervelocity Flows T92-070

- Stagnation Point Nonequilibrium Radiative Heating and the Influence of Energy Exchange Models T92-067

- Nonequilibrium Chemical and Radiation Coupling, Part II: Results for AOTV Flowfields T92-064

- Nonequilibrium Chemical and Radiation Coupling, Part I: Theory and Models T92-063

- Experimental Investigation of Film Cooling Effectiveness for Slots of Various Exit Geometries T92-049

- Earth Atmospheric Entry Studies for Manned Mars Missions T92-035

- Electron Temperature and Electron Density in a Rarefied Air Plasma Jet T92-033
 Monte Carlo Simulation of Vibrational Relaxation in Nitrogen T92-002

Boiling/Condensation

- Investigation of Liquid Droplet Evaporation in Subcritical and Supercritical Gaseous Environments T92-123
 Effect of Surface Material Properties and Surface Characteristics in Evaporative Spray Cooling T92-080
 Filmwise Condensation from a Flowing Vapor onto Isothermal, Axisymmetric Bodies T92-052
 Steady-State Post-Critical Heat Flux Heat Transfer to a Refrigerant T92-051
 Experimental Investigation of Transition Boiling in Forced Convection T92-020
 Analytical Two-Phase Flow Void Prediction Method T92-019

Computational Heat Transfer

- Effect of Free Surface Shape on Combined Thermocapillary and Natural Convection T92-120
 Iterative Temperature Calculation Method for Rectangular Sandwich Panel Fins T92-116
 Prediction of Radiative Transfer in Cylindrical Enclosures with the Finite Volume Method T92-103
 Source Function Approach for Radiative Heat Transfer Analysis T92-096
 Turbulent Transport Phenomena in a Channel with Periodic Rib Turbulators T92-081
 Surface Cooling of Scramjet Engine Inlets Using Heat Pipe, Transpiration, and Film Cooling T92-079
 Thermophoresis of a Radiating Aerosol in Laminar Boundary-Layer Flow T92-076
 Solution of the Parabolized Navier-Stokes Equations Using Osher's Upwind Scheme T92-069
 Stagnation Point Nonequilibrium Radiative Heating and the Influence of Energy Exchange Models T92-067
 Transient Conjugated Heat Transfer From a Rectangular Hot Film T92-056
 Thermal-Structural Finite Element Analysis Using Linear Flux Formulation T92-055
 Heat Transfer in the Entrance Region of Semicircular Ducts with Internal Fins T92-048
 Laminar Coupled Flow Downstream of an Asymmetric Sudden Expansion T92-047
 Numerical Solutions of Natural Convection in Enclosure with Boundary Condition Switching Method T92-044
 Effects of g-Jitter on a Thermally Buoyant Flow T92-042
 Discrete-Ordinates Solution of Radiative Transfer Equation in Nonaxisymmetric Cylindrical Enclosures T92-041
 Radiative Transfer in Multidimensional Enclosures with Specularly Reflecting Walls T92-034
 Transient Laminar Forced Convection From a Circular Cylinder Using a Body-Fitted Coordinate System T92-032
 Two-Dimensional Effects in a Triangular Convecting Fin T92-025
 Numerical Study of Natural Convection from Discrete Heat Sources in a Vertical Square Enclosure T92-016

- Periodically Fully Developed Flow in Channels with Conducting Blockages T92-012

Cryogenics

- Experimental Verification of Scaling Parameters for Thermal Stratification T92-082

Electronics Cooling

- Enhanced Cooling of Electronic Components by Flow Oscillation T92-117
 Effect of Surface Material Properties and Surface Characteristics in Evaporative Spray Cooling T92-080
 Laminar Coupled Flow Downstream of an Asymmetric Sudden Expansion T92-047
 Numerical Study of Natural Convection from Discrete Heat Sources in a Vertical Square Enclosure T92-016
 Thermal Gap Conductance: Effects of Gas Pressure and Mechanical Load T92-008

Forced Convection

- Investigation of Mixed Convection About a Rotating Sphere by Holographic Interferometry T92-121
 Enhanced Cooling of Electronic Components by Flow Oscillation T92-117
 Combined Conjugated Heat Transfer from a Scattering Medium T92-088
 Second-Law Optimization of Forced Convection of Non-Newtonian Fluids in Ducts T92-085
 Turbulent Transport Phenomena in a Channel with Periodic Rib Turbulators T92-081
 Arc Heater Nozzle Heating Test with Hydrogen Combustion Products T92-071
 Transient Solidification of a Binary Mixture in an Inclined Rectangular Cavity T92-053
 Filmwise Condensation from a Flowing Vapor onto Isothermal, Axisymmetric Bodies T92-052
 Heat Transfer in the Entrance Region of Semicircular Ducts with Internal Fins T92-048
 Laminar Coupled Flow Downstream of an Asymmetric Sudden Expansion T92-047
 Wall Heating Effects in Mixed Convection in Vertical Annulus with Variable Properties T92-045
 Transient Laminar Forced Convection From a Circular Cylinder Using a Body-Fitted Coordinate System T92-032
 Laminar Forced Convection in Circular Duct Inserted with a Longitudinal Rectangular Plate T92-029
 Turbulent Heat Transfer in a Square Channel with Staggered Discrete Ribs T92-027
 Experimental Investigation of Transition Boiling in Forced Convection T92-020
 Effect of a Coaxial Jet on the Film-Cooling Performance Downstream of a Suddenly Expanded Swirling Flow T92-018
 Periodically Fully Developed Flow in Channels with Conducting Blockages T92-012

Heat Conduction

- Analytical Investigation of the Rewetting of Grooved Surfaces T92-094
 Combined Conjugated Heat Transfer from a Scattering Medium T92-088
 Fixed Conductance Heat Pipe Performance with a Liquid Slug T92-077

- Thermal Contacts in Transient States: A New Model and Two Experiments T92-057

- Transient Conjugated Heat Transfer From a Rectangular Hot Film T92-056
 Two-Dimensional Effects in a Triangular Convecting Fin T92-025
 Mixed Convection of Low Prandtl Number Fluid in the Annuli of Rotating Cylinders T92-024
 Microstructure Effects on the Conjugate Heat Transfer Along a Vertical Circular Pin T92-023
 Periodically Fully Developed Flow in Channels with Conducting Blockages T92-012
 Rough-Wall Turbulent Heat Transfer with Step-Wall Temperature Boundary Conditions T92-011
 Thermal Performance of Thermal Pad Contact Heat Exchangers T92-009
 Thermal Gap Conductance: Effects of Gas Pressure and Mechanical Load T92-008

Heat Pipes

- Transient Behavior of Heat Pipes with Thermal Energy Storage Under Reversed-Pulsed Heat Loads T92-115
 Transient Heat-Pipe Modeling: A Quasi-steady, Incompressible Vapor Model T92-097
 Analytical Investigation of the Rewetting of Grooved Surfaces T92-094
 Acceleration-Induced Depriming of External Artery Heat Pipes T92-087
 Heat Pipe and Surface Mass Transfer Cooling of Hypersonic Vehicle Structures T92-078
 Fixed Conductance Heat Pipe Performance with a Liquid Slug T92-077
 Convective Flows in Enclosures with Vertical Temperature or Concentration Gradients T92-061
 Transient Behavior of Axially Grooved Heat Pipes with Thermal Energy Storage T92-058

Melting/Solidification

- Visualization of a Solidification Process in Microgravity T92-122
 Transient Thermal Analysis of Three Fast-Charging Latent Heat Storage Configurations T92-021
 Rate Parameters for Coupled Vibration-Dissociation in a Generalized SSH Approximation T92-001

Mixed Convection

- Investigation of Mixed Convection About a Rotating Sphere by Holographic Interferometry T92-121
 Effect of Free Surface Shape on Combined Thermocapillary and Natural Convection T92-120
 Measurements of Heat Transfer and Flow Structure in Heated Vertical Channels T92-118
 Laminar Mixed Convection from a Uniform Heat Flux Horizontal Cylinder in a Cross-flow T92-046
 Natural Convection Heat Transfer in Rectangular Cavities Partially Heated from Below T92-043
 Laminar Mixed Convection in a Vertical Tube with a Longitudinal Rectangle Insert T92-013

Natural Convection

- Effect of Thermal Creep on Buoyancy-Induced Flows in Low-Gravity T92-125
- Effect of Free Surface Shape on Combined Thermocapillary and Natural Convection T92-120
- Combined Natural Convection and Radiation from Heated Cylinders Inside a Container T92-119
- Free Convection About Vertical Needles Embedded in a Saturated Porous Medium T92-092
- Numerical Solutions of Natural Convection in Enclosure with Boundary Condition Switching Method T92-044
- Natural Convection Heat Transfer in Rectangular Cavities Partially Heated from Below T92-043
- Effects of g-Jitter on a Thermally Buoyant Flow T92-042
- Numerical Study of Natural Convection from Discrete Heat Sources in a Vertical Square Enclosure T92-016
- Buoyant-Thermocapillary Flow with Non-uniform Supra-Heating: II. Two-Phase Behavior T92-015
- Buoyant-Thermocapillary Flow with Non-uniform Supra-Heating: I. Liquid-Phase Behavior T92-014
- Natural Convection from Isothermal Plates Embedded in Thermally Stratified Porous Media T90-087

Nonintrusive Diagnostics

- Bias in Emission Absorption Measurements of Temperature and Atomic Density T92-124
- Visualization of a Solidification Process in Microgravity T92-122
- Correlation Transfer: Application of Radiative Transfer Solution Methods to Photon Correlation Problems T92-100
- Rotational Temperature Measurements in an Arc Jet T92-093
- Temperature Measurement of Reacting Flowfield by Phase-Shifting Holographic Interferometry T92-072
- Application of Laser Holographic Interferometry to Temperature Measurements in Buoyant Air Jets T92-060
- Two-Dimensional Radiative Transfer in a Cylindrical Layered Medium with Reflecting Interfaces T92-040
- Determination of Optical Properties by Two-Dimensional Scattering T92-031

Radiation in Participating Media

- Radiation Modeling with Direct Simulation Monte Carlo T92-107
- Development of a Nonequilibrium Radiative Heating Prediction Method for Coupled Flowfield Solutions T92-105
- Analytic Solution of the Transient Behavior of Radiation-Backscattering Heat Shields T92-104
- Prediction of Radiative Transfer in Cylindrical Enclosures with the Finite Volume Method T92-103
- Refractive Index Effects on Radiative Behavior of a Heated Absorbing-Emitting Layer T92-102
- Correlation Transfer: Application of Radiative Transfer Solution Methods to Photon Correlation Problems T92-100

- Source Function Approach for Radiative Heat Transfer Analysis T92-096
- Backward Monte Carlo Modeling for Rocket Plume Base Heating T92-091
- Transient Combined Conduction and Radiation in Anisotropically Scattering Spherical Media T92-090
- Combined Conjugated Heat Transfer from a Scattering Medium T92-088
- Boundary Heat Fluxes for Spectral Radiation from a Uniform Temperature Rectangular Medium T92-086
- Conduction—Radiation Interaction in Absorbing, Emitting and Anisotropically Scattering Media with Variable Thermal Conductivity T92-084
- Thermophoresis of a Radiating Aerosol in Laminar Boundary-Layer Flow T92-076
- Thermal Radiation Effects on a Shocked Particle-Laden Gas T92-075
- Stagnation Point Nonequilibrium Radiative Heating and the Influence of Energy Exchange Models T92-067
- Influence of Nonuniform Particle Temperature on the Radiatively Active Particle Ignition T92-062
- Discrete-Ordinates Solution of Radiative Transfer Equation in Nonaxisymmetric Cylindrical Enclosures T92-041
- Two-Dimensional Radiative Transfer in a Cylindrical Layered Medium with Reflecting Interfaces T92-040
- Effect of Linear-Anisotropic Scattering on Spectral Emission from Cylindrical Plumes T92-039
- Radiative Transfer in Multidimensional Enclosures with Specularly Reflecting Walls T92-034
- Determination of Optical Properties by Two-Dimensional Scattering T92-031
- Two-Dimensional Radiation in a Cylinder with Spatially Varying Albedo T92-030
- Finite Difference Solution for Transient Cooling of a Radiating-Conducting Semitransparent Layer T92-010
- Doppler Shift Effects on Infrared Band Models T92-005

Radiation Interchange Between Surfaces

- Combined Natural Convection and Radiation from Heated Cylinders Inside a Container T92-119
- Bidirectional Reflectance and Specularity of Twelve Spacecraft Thermal Control Materials T92-113
- Practical Method for Calculating Radiation Incident upon a Panel in Orbit T92-028

Thermal Control

- Combined Natural Convection and Radiation from Heated Cylinders Inside a Container T92-119
- Transient Behavior of Heat Pipes with Thermal Energy Storage Under Reversed-Pulsed Heat Loads T92-115
- Bidirectional Reflectance and Specularity of Twelve Spacecraft Thermal Control Materials T92-113
- Thermal Control Coatings Performance at Near Geosynchronous Altitude T92-112
- Analytical Investigation of the Rewetting of Grooved Surfaces T92-094
- Transient Combined Conduction and Radiation in Anisotropically Scattering Spherical Media T92-090

- Conduction—Radiation Interaction in Absorbing, Emitting and Anisotropically Scattering Media with Variable Thermal Conductivity T92-084
- Fixed Conductance Heat Pipe Performance with a Liquid Slug T92-077
- Transient Behavior of Axially Grooved Heat Pipes with Thermal Energy Storage T92-058
- Thermal Contacts in Transient States: A New Model and Two Experiments T92-057
- Analytical Solution for the Integral Contact Line Evaporative Heat Sink T92-017
- Thermal Performance of Thermal Pad Contact Heat Exchangers T92-009
- Thermal Gap Conductance: Effects of Gas Pressure and Mechanical Load T92-008

Thermal Modeling and Analysis

- Iterative Temperature Calculation Method for Rectangular Sandwich Panel Fins T92-116
- Practical Model for Molecular Contaminant Deposition Kinetics T92-111
- Spacecraft Thermal Energy Accommodation from Atomic Recombination T92-110
- Analytic Solution of the Transient Behavior of Radiation-Backscattering Heat Shields T92-104
- Acceleration-Induced Depriming of External Artery Heat Pipes T92-087
- Experimental Verification of Scaling Parameters for Thermal Stratification T92-082
- Influence of Nonuniform Particle Temperature on the Radiatively Active Particle Ignition T92-062
- Use of Membrane Transport in an Absorption Thermal Transfer Cycle T92-059
- Transient Behavior of Axially Grooved Heat Pipes with Thermal Energy Storage T92-058
- Transient Laminar Forced Convection From a Circular Cylinder Using a Body-Fitted Coordinate System T92-032
- Two-Dimensional Effects in a Triangular Convecting Fin T92-025
- Transient Thermal Analysis of Three Fast-Charging Latent Heat Storage Configurations T92-021
- Analytical Solution for the Integral Contact Line Evaporative Heat Sink T92-017
- Thermal Performance of Thermal Pad Contact Heat Exchangers T92-009
- Three-Dimensional Thermal Structural Analysis of a Swept Cowl Leading Edge Subjected to Skewed Shock-Shock Interference Heating T92-006
- Monte Carlo Simulation of Vibrational Relaxation in Nitrogen T92-002

Thermochemistry and Chemical Kinetics

- Spacecraft Thermal Energy Accommodation from Atomic Recombination T92-110
- Vibration-Dissociation Coupling in Nonequilibrium Flows T92-109
- Chlorine Utilization Study for Uniform-Droplet Singlet Delta Oxygen Generators T92-074
- Thermochemical Nonequilibrium Flow Computations of Flow Around the Aeroassist Flight Experiment T92-066
- Nonequilibrium Chemical and Radiation Coupling, Part II: Results for AOTV Flowfields T92-064

Nonequilibrium Chemical and Radiation
Coupling, Part I: Theory and Models

T92-063

Modeling of an Argon Plasma in a Bound-
ary-Layer Flow

T92-038

Diagonal Implicit Scheme for Computing
Flows with Finite Rate Chemistry

T92-037

Models of Energy-Exchange Mechanics Ap-
plicable to a Particle Simulation of Reac-
tive Flow

T92-036

Monte Carlo Simulation of Vibrational Re-
laxation in Nitrogen

T92-002

Thermophysical Properties

Normal Spectral Emittance of W-Re-HfC
and W-Re-ThO₂ Alloys

T92-114

Bidirectional Reflectance and Specularity of
Twelve Spacecraft Thermal Control Ma-
terials

T92-113

Thermal Control Coatings Performance at
Near Geosynchronous Altitude

T92-112

Practical Model for Molecular Contaminant
Deposition Kinetics

T92-111

Rotational Temperature Measurements in an
Arc Jet

T92-093

Thermophysical Properties of Lysozyme
(Protein) Solutions

T92-083

Thermal Contacts in Transient States: A
New Model and Two Experiments
